No. 36.

## When Fire Alarm Sounds, There Should Be Fire

Our fire department believes in going to a fire when the alarm sounds—and if there isn't one at the reported place, they apparently do something about it.

Monday night, Fred Bentley's car caught fire, but the blaze was out when the firemen reached the scene.

... they did something about that. A man in the southwest part of town had expressed his desire to have the weeds around his house burned, so the firemen went to that spot, set the weeds afire, and kept guard over the blazing until the job was done.

There's simply no life like that of a fireman.

## Commission Appraises Roth Land at \$950

That the county should pay \$950 and Mrs. H. M. Roth \$950 for a disputed strip of land needed for the right-of-way for the widening of U. S. Highway 66 was the decision announced last week by three special commissioners appointed by Judge Sherman White to appraise the land.

The three commissioners, I. D. Shaw and C. J. Cash of McLean and E. E. Glass of Alanreed, appraised the land last week, and on Friday a meeting was held when the three men heard testimony from the land owners and members of the county commissioners court.

The case is the first dispute to be recorded on land needed for the highway right-of-way. The Roth land joins Wheeler County at the point where the road is now being worked on in Wheeler.

The land in question totals 7.63 acres and the owners were asked \$1,000 for the right-of-way. The commissioners had offered \$950. The land contains several fruit trees, as well as a number of shelterbelt trees, it was explained.

Members of the county commissioners court will vote at their next meeting whether to accept the ruling of the special commission. The land owners have not expressed their feelings in regard to the decision. Either side may appeal the ruling to a higher court.

## Barr Staging Birthday Sale

In observance of the ending of the firm's third year in business in McLean, the Barr Automotive Service, owned by O. L. Barr, is staging a ten-day anniversary sale commencing this week-end.

In addition to operating the retail store here, Barr is a manufacturer's distributor, and sold merchandise during the past month to a total of 341 service stations and garages throughout the Panhandle area.

The firm is the local jobber for the well-known Armstrong tires, and since January 1 a total of 1,864 tires has been sold, Barr said.

During the ten-day sale, Barr Automotive will offer a number of low prices, many of them below the jobbers cost, the owner explained. Included in the special prices are tires, tubes, seal beam kits, jacks, and fan belts. All stock will be reduced during the sale.

"We are staging this sale," Barr said, "to show our appreciation for the patronage given us in our three years in business in McLean. The sale will continue for only ten days, and most of the prices will be below the regular jobbers prices. You are invited to pay us a visit."

## It's A Bad Day For Road Hogs, Garrison Says

My Col. Homer Garrison, Director Department of Public Safety

The new Texas traffic law, going into effect September 5 will make things tough for those people who think they are the only ones on the road.

The person who drives in the middle of the road, or wanders from one side to the other, will now be liable to arrest. So will the person who passes one vehicle when another is coming to meet him.

A driver must stay on the right except when passing, when driving on a one-way thoroughfare, or when the right side of the road is blocked.

The middle lane of a three-lane highway is to be used only for passing and for making left turns, and then only when nobody is using it from the other direction.

One vehicle may not pass another when they are at, or approaching an intersection or railroad crossing; when approaching a bridge, viaduct or tunnel; or when in a designated no passing zone, marked by a broken stripe or any other means.

The question of right-of-way is clearly defined in the new law. The vehicle that gets into an intersection first has the right-of-way. If two vehicles get there at the same time, the one on the right has the right-of-way. In other words, if the other car is on your right, you must let it go ahead. If the other car is on your left, it should let you go ahead.

When you are making a left turn at an intersection, you must not cut in front of other vehicles so as to create a hazard. But you may turn ahead of opposing traffic after you have signalled for your turn and let the cars by that are in, or right at, the intersection.

Observance of rural stop signs—whether on highways or county roads—has never been enforced, because the old law did not actually make it a violation to run a rural stop sign. But it's a different story under the new law. Those stop signs now mean STOP. Furthermore, after stopping, you must be careful not to start up again in such a way as to interfere with other traffic, thereby creating a hazard.

Hay-wagon turns are outlawed. To make a left turn you must start the turn from the position nearest the center of the street or road. A right turn must be made only from the lane nearest the right side of the street or road. Turns should be short, not on a wide angle such as one

(Continued on back page)

## Labor Day Here Is Merely Another First of Month

Monday, September 1, was Labor Day, and was observed throughout many parts of the nation, but practically all local citizens merely labored.

The American National Bank and the post office closed on the official holiday, but the remainder of the business houses remained open for business as usual.

No special observance took place here either. The closest celebration was in Amarillo, where a parade featuring labor was held. A barbecue was also held in that city.

## Lions to Treat Football Team Next Tuesday

Members of the McLean Tigers football squad and the three coaches will be honored guests at the regular meeting of the Lions Club next Tuesday it was announced by President Clee Meharg this week.

Coach Larry Sanders will be in charge of the program. Accompanying him and the football squad will be Coaches A. D. Shaver and George McCarty.

A ladies' night will be held by the Lions Club early in October and the district governor, John McClain, is being invited to be present. Honored guests at the dinner will be members of the school faculty.

The Lions Club also voted to sponsor again Fire Prevention Week in McLean. The week of October 6-11 has been set aside by President Truman for that purpose. The Lions plan to offer cash prizes to the best posters on fire prevention. It was announced. The prizes will be similar to those given last year.

## Legion to Begin Note Repayment Tuesday Night

The Andrew H. Floyd Post of the American Legion will begin repayment of the \$25 notes sold recently at the regular meeting next Tuesday night, September 5, it was announced this week.

The first number will be drawn on that night, and the note with the corresponding number will be paid. Other numbers will be drawn on succeeding nights.

Approximately one hundred \$25 notes were sold, in order that the Legion could pay off its debt of \$2,500. Under the plan, one or more numbers will be drawn each meeting night, and the notes corresponding will be retired.

## More Than 250 Down Melons, Hear Kimbrough at Grid Rally

To many people over the nation, Monday, Labor Day, was a day of rest. But to McLean's football squad members it will be long remembered as a day of labor.

Full training for the squad opened on that day and the coaches, Larry Sanders, T. D. Shaver and George McCarty, put the boys through several hours of hard drilling. Practice on the first day did not end until daylight ended.

The second day's practice, however, was cut short somewhat, since the squad was honored at a watermelon feast sponsored by the Downtown Quarterback Club at the city park. Free watermelon was served to all who attended, and between 250 and 300 people were present. Even so, there were watermelons left when the event was over.

Highlighting the program was a brief address by Frank Kimbrough, head coach at West Texas State College in Canyon. He was accompanied to McLean by Ous

## Local Schools Get Started In Mad Rush

It was a mad-rush Monday and still confusing Tuesday, but Wednesday the McLean Public Schools were open and running as smoothly as if they had been going on for months and months.

The maddest day, of course was Monday, when registration of both high and grade school students was held. The student didn't have to do much rushing but quite a bit of waiting; the rushed people were the teachers who had to take care of the students.

Then Tuesday at the high school, the freshman girls found themselves without shoes as the upper classmen took over. The shoes were taken throughout the building, and the freshmen spent a good part of the day trying to track down their shoes. "But that activity was about the extent of the hazing—and no one was any to the worse."

The enrollment in the local schools is heavy this year, in comparison to some years in the past. Several new teachers have been added however to take care of the extra students.

A complete worked-out-in-advance program for the year is to be announced soon. In this program it is planned to include all activities, such as junior and senior plays, banquets, and various other programs. This is being done to prevent a concentration of events during the spring months, such as occurred last year.

## Rainbow Girls To Have Public Installation

Public installation of officers for the McLean Rainbow assembly will be held Monday night, September 8, at 7:30 o'clock. It was announced this week.

Installing officers will be Margie West, installing officer; Beth D. Spain, installing marshal; Betty Ann Wade, installing chaplain; Leta Mae Hughes installing musician; and Barbara Barrett, recorder.

Officers to be installed for the ensuing term are: Bobbie Jean Hedrick, worthy advisor; Mildred Holloway, associate advisor; La Wanda Shadd, charity; Sue Davis, Hope; Margaret D'Spain, faith; Darlene Shadd, chaplain; Lynn Dell Mantooh, drill leader.

Waneta Hupp, love; Barbara Jeffries, religion; Marsalee Windom, nature; Jane Graham, immortality; Jo Ann Williams, fidelity; Jo Ann Grigsby, patriotism; Pat Ferguson, service; Evelyn June West, confidential observer; Geraldine Florey, outer observer; Waneva Morris, choir director; Norma Chapman, musician; Patsy Lowary, Mary Ruth Holloway, Barbara Beck paraphernalia committee; Beth D'Spain, reporter.

The McLean assembly is well on its way toward the completion of the summer's project.

The girls purchased the paint, varnish, enamel, etc., needed to redecorate the two rooms southwest of the assembly room for waiting rooms. They bought two floor coverings and after three work days the rooms were made ready to be furnished.

A bogging tour of the town as made. The public was most generous it was reported, and as a result, one room is completely furnished and several pieces of furniture have been promised for the other room. Anyone wishing to donate odd pieces of furniture, please contact some member of the assembly and they will come after it, leaders said.

The girls appreciate the interest of the McLean citizens and those of the neighboring communities shown in their behalf, and take this means of thanking each person who has helped them in any way to furnish or redecorate these rooms.

## Hot Weather Still Holding Sway; Crops Suffering But Not Ruined

The hot and dry weather continues to hold sway over the McLean area, and crops are suffering, although most farmers agree that the crops are holding up miraculously well in the face of the extremely hot temperatures.

Food crops are suffering most, and much of the cotton is beginning to show signs of wear and tear from the heat. The stalks of cotton, although not large, are well loaded, but the hot weather is slowing down their growth and some bolls are already beginning to fall off.

The first three days of this week have been very hot, 100 degrees and up, and although there is no official temperature recording made in McLean, most people agree that Monday, Tuesday, and Wednesday have been as hot as any days during the summer.

Temperature readings in Pampa, Amarillo, and other cities and towns in this area have been running well over 100 degrees and it is believed that the readings here would have been similar.

No rain of any sizable amount has fallen during the past week in the Panhandle area, and nearly all parts of this area are in need of moisture.

Just how much longer the cotton and feed can hold up without moisture is not known. Some farmers say they will make some cotton if no rain at all is forthcoming, and others are in doubt whether they would have any worth pulling. The condition of the crops varies a great deal, depending partially on the way in which some of the farmers have worked the crops.

## Scout Executive Committee To Be Held Next Monday Night

All members of the executive committee of the local boy Scout troop are urged to be present at a meeting next Monday night at 7 o'clock at the American Legion Hall, when plans for the troop for the coming year will be discussed. Frank Pressler, chairman of the committee, said this week.

The meeting of the executive committee and the scoutmaster and assistants will be held prior to the regular Scout meeting at 7:15 o'clock, Pressler said.

Named as new scoutmaster to succeed Rev. Karl Ernst, is Forrest Switzer. He will assume his duties immediately, Pressler said. Rev. Ernst recently resigned due to lack of time to devote to the work.

Committee members are Pressler, W. C. Meharg, John Cooper, Donald McCracken, Earl Graham, and W. W. Shedd. Assistant scoutmasters, who are also urged to attend the meeting, are Dr. R. C. McNett, Roy Kiser, and C. W. Shapp.

## Mrs. Howard Named Pastor Holiness Church

Mrs. C. C. Howard has been named as the new pastor of the Pentecostal Holiness Church in McLean. It was announced by members of the church this week.

Mrs. Howard has been serving as pastor at Turpin, Okla., for the past two years. She is well known in McLean since she has held two revivals here in the past.

The new pastor succeeds Rev. Carl Baker, who has been pastor here for some time.

## Dove Hunters Begin Shooting - Season Opens

Local hunters—those who had the time off at least—got started on their dove hunting sessions Monday when the season in the Texas north zone opened one-half hour before sunrise. The season will last through October 15.

Hunters of this area will likely find an abundance of doves, at least during the first part of the season. A large number of doves may be seen at almost all times of the day by driving on either the highways or country roads.

One of the most important rules to follow is the "cease fire at sundown" order, game wardens have pointed out. Daily newspapers carry the exact time of sundown each day, and game wardens follow this time in carrying out the law.

Only shotguns may be used to hunt doves, and they must be plugged permanently to a 3-shell capacity. The guns cannot be larger than 10 gauge.

Hunters must have a license if they shoot outside the county of their residence. Bag limit is ten a day. No hunting is allowed from automobiles or from the highways.

The supply of birds in the area depends on the Kansas hatch, it was explained. The midwest birds will move down with the first cool weather, while those raised here go further south.

## Temperature Remains Near Century Mark

The hot and dry weather continues to hold sway over the McLean area, and crops are suffering, although most farmers agree that the crops are holding up miraculously well in the face of the extremely hot temperatures.

Food crops are suffering most, and much of the cotton is beginning to show signs of wear and tear from the heat. The stalks of cotton, although not large, are well loaded, but the hot weather is slowing down their growth and some bolls are already beginning to fall off.

The first three days of this week have been very hot, 100 degrees and up, and although there is no official temperature recording made in McLean, most people agree that Monday, Tuesday, and Wednesday have been as hot as any days during the summer.

Temperature readings in Pampa, Amarillo, and other cities and towns in this area have been running well over 100 degrees and it is believed that the readings here would have been similar.

No rain of any sizable amount has fallen during the past week in the Panhandle area, and nearly all parts of this area are in need of moisture.

Just how much longer the cotton and feed can hold up without moisture is not known. Some farmers say they will make some cotton if no rain at all is forthcoming, and others are in doubt whether they would have any worth pulling. The condition of the crops varies a great deal, depending partially on the way in which some of the farmers have worked the crops.

- Sept. 13—Mrs. F. H. Bourland, Eileen Butcher, Ronnie Worley.

## Former Resident Dies at Houston

W. S. Aiken, resident of McLean while serving as a staff sergeant during the time the Prisoner of War Camp was located here, died last week as a result of injuries suffered in a car accident. Funeral services were held Tuesday of last week in Houston.

Aiken and his wife lived in McLean while he was stationed at the POW camp, and he had a number of friends here.

## Fun Nite Dance at Legion Hall To Honor City College Students

The regular teen-agers "Fun Nite" dance Friday night at the American Legion Hall will be a formal affair, given in honor of the students who will leave McLean soon to take up college work, it was announced this week by the sponsors.

Furnishing music for the occasion will be the Shamrock High School orchestra, it was announced, and all teen-agers are urged to attend.

The parties will continue through the football season sponsors pointed out. Special guests during the season will be members of the visiting teams, bands and pep squads. The parties are well chaperoned, and usually 15 to 25 mothers and fathers are present.

Hostesses for September and October are as follows (the first name in each group is the chairman for that time; she is to be present or see that at least one member of her group is at the building at 7 o'clock; anyone on the committee who will be unable to serve is to notify the committee chairman):

September 5: Mrs. E. J. Windom, Mrs. Jolly, Mrs. Earnest Beck, Mrs. R. T. Dickinson.

September 12: Mrs. Joe Willis, Mrs. Everett Hall, Mrs. Bob Black, Mrs. John Haynes.

September 19: Mrs. Odell Mantooh, Mrs. Hommel, Mrs. Simmons, Mrs. Olen Davis.

September 26: Mrs. Haskel Smith, Mrs. Johnson, Mrs. George Graham, Mrs. Peb Everett.

October 3: Mrs. Brooks, Mrs. J. D. Coleman, Mrs. Bill Bailey, Mrs. John Biggers.

October 10: Mrs. Paul Pierson, Mrs. Cool Griffith, Mrs. W. J. Morris, Mrs. Peden.

October 17: Mrs. Gunn, Mrs. Mildred Origsby, Mrs. Floyd Lively, Mrs. C. P. Callahan.

October 24: Mrs. H. E. Barrett, Mrs. H. H. Wade, Mrs. R. O. Florey, Mrs. Frank Harlan.

October 31: Mrs. Earnest Beck, Mrs. Bob Black, Mrs. Hal Mounce, Mrs. Jack Mercer.

## More, Juicier Meat Wanted On Chickens

The chicken-of-tomorrow, a meatier bird with juicier drumsticks and more white meat to delight the national palate, definitely can be developed—and it may be Texas-bred, a Texas A. and M. poultry specialist predicted recently.

His prediction was based on results of the 1947 Texas and Southwestern chicken-of-tomorrow contests held this summer at Fort Worth with Texas-bred birds winning four of the five first places in the regional competition.

"The chickens entered in the state and regional contests had more white meat and were superior in every way to the average cockerels their age," declared F. Z. Beanblossom, A. and M. extension poultryman who is chairman of both the state and regional chicken-of-tomorrow committees.

"The next step in the three-

year, nation-wide contest will be selection by the national committee of the poultrymen whose chickens will compete in 1948 for \$7,000 in national prizes offered by A. & P. Food Stores, sponsors of the contest," Beanblossom explained. "The committee is expected to make its selections in the next few months."

Since Texas entries took most of the top places in the regional contest, they will receive first priority from the national committee for selection for the finals, the extension poultryman said. In order to compete in the finals, an entry must meet the rigid standards set by the committee, which is composed of poultry industry leaders, U. S. Department of Agriculture experts, and representatives of state agricultural colleges and extension services.

Poultrymen selected for the finals will ship two cases of eggs—720—to a central hatchery somewhere in the U. S. There the eggs will be hatched and the chicks raised, killed, and judged under identical conditions by nationally-known experts.

## Jones Manager Tire Department

Ernest Jones, former resident of McLean who moved to Shamrock a few months ago has been made manager of the Firestone department of the Mayfield Tire and Supply company at Shamrock, it has been learned here.

Jones has had a number of years experience in the automotive business, and was associated in McLean with A. L. Hibler, of the Hibler Truck and Implement company.

The former resident moved to Shamrock a few months ago, and has been associated with the Liberty theater in that city.

An evil-looking land mine was unexpectedly dug up by Dale Gretton of Lansing, Mich., when he was a machinist's mate, second class, with the navy's Seabees on Saipan, where he operated a shovel crane. How did he react to his "surprise package?" After his initial startled cry of "Wow!" he said, "it seemed like ten years before I got it back on the ground."

## Uncle Sam Says

"What's in it for me?" Any time you buy something or invest money in something you should ask this question and get a gift-edge answer. Supposing a U. S. Savings Bond could talk—it would say: "Here's what's in it for you. When you exchange your money for me you get for yourself these things: future security, safety of your investment, profit (\$4 for \$3 in 10 years), the means to take advantage of opportunities, a nestegg to handle any emergencies." U. S. Treasury Department

Bobby Decker left Saturday for his home in Mountainair, N. M. after a visit with relatives here.

Mrs. Zora Kennedy was a business visitor in Amarillo Tuesday.

Mr. and Mrs. Ewell Hightower of Hollis, Okla., were Sunday visitors with Mr. and Mrs. Lefe Smallwood.

Theodore Roosevelt was the first United States president to go below the surface of the sea in a U. S. navy submarine.

The U. S. navy had a total of 319 active combatant vessels on January 1, 1947.

## SOCIETY

### Cotton Coffee Held in Home of Mrs. W. S. Lentz

Members and guests of the McLean Garden Club were entertained at a cotton coffee at 9:30 o'clock Wednesday morning in the home of Mrs. W. S. Lentz with Mrs. Bonnie Swanson assisting.

Mrs. Lester Campbell presided at the guest book and pinned a cotton blossom on each person. A miniature cotton patch with some small scales in the center was the point of interest on the serving table. The scales held the favors, which were tiny cotton sacks containing fall blooming crocus bulbs. Flanking the arrangement were two clever figurines, one picking cotton and the other leaning on his hoe. Mrs. Mattie Graham presided at the coffee service.

During the social hour guests exchanged gaily wrapped plants and Mrs. Guy Hibler won the grand prize.

In attendance were Mesdames H. E. Franks, D. A. Davis, Guy Hibler, Lester Campbell, Charles Cooke, Evan L. Sitter, Mattie Graham, F. H. Bourland, and J. H. Kritzer.

Mesdames Haskell Smith, C. O. Godman, J. B. Hembree, Kid McCoy, W. E. Bogan, Alma Henley, Bonnie Swanson, and W. S. Lentz.

Mr. and Mrs. Dolph Burrows returned Monday after a week's vacation in Long Beach, Calif. with their daughter and husband, Mr. and Mrs. Carl Jahnske.

## Locals

J. H. Carpenter and son Jimmy of Opelousas, La., Mr. and Mrs. Carl Carpenter and granddaughter Geniece, and Mrs. E. L. Mink of Sandown are visiting in the home of Sidney Kunkel and George Colebatch. Kay Carpenter of Opelousas, La., has been visiting here the past month.

Mr. and Mrs. Creed Bogan and daughter Marilyn of Berger visited Sunday with their parent and grandparents. Mr. and Mrs. W. E. Bogan, and other relatives.

Mr. and Mrs. D. L. Wood of Amarillo were visitors Sunday with friends.

Mr. and Mrs. A. L. Jones made a business trip to Amarillo Tuesday.

Mrs. Warren Wahlgren of Amarillo visited Saturday, Sunday, and Monday in the home of Mr. and Mrs. C. B. Lee Jr.

Miss Iva Dell Rippy, who is a senior student at Harris College of Nursing in Fort Worth, spent Tuesday and Wednesday of this week visiting her parents, Mr. and Mrs. K. S. Rippy. She was accompanied by Miss Tommie Thompson of Waxahachie.

W. S. Lentz made a business trip to Amarillo Wednesday.

Mrs. H. C. Rippy and Patty Ruth of Blackwell, Okla., were week-end visitors in McLean with relatives and friends.

Miss Jewel Glass of Amarillo spent the Labor Day holidays with her mother, Mrs. Anna Glass.

Mr. and Mrs. Bob Shedrick were visitors over the week-end in

Oklahoma with Mr. Shad parents.

Misses Wynette Caldwell, Gwendolyn Riddle of Amarillo turned home Sunday after spending the summer months here the home of their grandparents, Mr. and Mrs. T. N. Hobbs.

**Back to Books' Banquet Is Held At Local Church**

Honoring students who are leaving soon for their college work, the young people's department of the First Baptist Church held a "Back to Books" banquet last Thursday night at the church. The department is a part of the Baptist Training Union, which is sponsored by Mrs. Vester Dowell.

The program was as follows: Opening of School (salute to the "America"); "Take up Books" (prayer); Rev. Ray Stephens; Welcome, Wes Laugham; noon

"Musical Recital." Mary Lee Abbott and Bonnie Willis, "English Class" (poem), Claude Mounce; "Chapel," Rev. Stephens; "Last Bell" (benediction), Vester Dowell.

The menu for the "noon lunch" consisted of fruit juice cocktail, chicken pie, potatoes, green beans, carrots, congealed salad, cranberry sauce, pickles, hot rolls, butter, and angel cake.

Mr. and Mrs. Arbie Lankford and children of Tulla visited their parents and grandparents, Mr. and Mrs. K. S. Rippey of Head, and Mr. Lankford, and other relatives recently. Billy Lankford remained for a longer visit.

Mr. and Mrs. Tom Bodine Jr. and baby of Amarillo visited their grandparents, Mr. and Mrs. J. H. Bodine, over the week-end.

DEWISON, Tex., Aug.—They have turned back the calendar 75 years in this North Texas city of 25,000.

Every male in town old enough to shave has either a full-grown beard, or at least a handle-bar mustache. Housewives wear bustles and long taffeta dresses on downtown shopping tours, and everybody who owns a horse and can borrow a buggy has put the family car in the garage for the duration.

Dewison will be 75 years old next September 23, and from September 1-6 there will be a week long Diamond Jubilee celebration.

Dancers of Oklahoma Indians, whose ancestors lived just across the Red River, when Dewison grew out of the wilderness, will be on hand, as well as hundreds of cowboys and thousands of other visitors—all attired in costumes of the '70's.

There will be parades and pageants, street dances and a rodeo; Old Fiddlers' contests, sidewalk chuck wagons and street carnivals. The entire business district will be closed to traffic for the whole week and transformed into a midway for the recreation of a boisterous frontier city. On Saturday, September 6, the closing day of the Jubilee, a tiny wood-burning Katy locomotive, pulling five ancient cars will wheeze down from Oklahoma, cross the Red River and enter Dewison, to re-enact the arrival of the first train to arrive in Texas from the North. The event actually occurred on December 25, 1872, and some of the children, who were on the platform that day with their pioneer parents will be honored guests for the re-enactment.

This will be the highlight of the celebration, which has been planned by the city and the Missouri-Kansas-Texas Railroad. Dewison was built by the Katy as its Southern terminal. It has remained one of its most important points during the past 75 years.

Officials of the railroad will ride the train into the city September 6, as well as Governor Beauford Jester of Texas; Governor Roy Turner of Oklahoma, and other notables. Later the Governors will address the thousands expected for the event. Other speakers will include Sam Rayburn, former Speaker of the United States House of Representatives; Raymond J. Morfa, Katy Beard Chairman, and Donald V. Fraser, the railroad's president.

More than 150,000 visitors are expected to come to Dewison during the week of the Jubilee. Local citizens will open their homes to guests to take care of the overflow. Only the Indians will not have to worry about housing—they'll stay in tepees erected on the lawn of the Katy railroad station in the heart of downtown Dewison.

**BOYCE HOUSE**

Have been getting so many invitations to speak and it costs to jump around over the state and my work suffers back in the office, so your columnist has had to begin making a moderate charge (depending on distance) for speeches. We appreciate what we have to pay something for, as a general rule. Speeches made recently or soon to be made include: National Peanut Council, National Editorial Association, "ladies' night" of numerous civic

clubs, annual dinners of the chamber of commerce in Lampasas, Tulla, Nocona, and Schulenburg. Then the high school commencement addresses range from Pecos to San Augustine with Bastrop, Midland, Santa Anna and Roscoe between.

Seen "The Jolson Story" yet? It's a mighty fine picture. Jolson wanted to get close to his audience, he wanted to see their faces, and he lived to sing.

Jolson sang because he wanted to—because he had to, because of some insistent demand within him, just as a bird sings or a flower blooms—because that is what the bird or flower was created for.

A visitor in Hannibal, Mo., met an old-timer and asked him, "Did you know Mark Twain?" The native replied, "Yes, I did; and I know just as many stories as he did; the only difference is he writ 'em down."

Fritz Kreisler was going to give a concert and the newspapers wrote up the \$50,000 Stradivarius he owned. On the night of the concert, he came out and gave a number superbly. He bowed again and again at the applause; then held up the violin and the audience applauded the instrument; then he snapped the violin into a dozen pieces. It was not the costly "Strad" but just a violin he had picked up for \$5. It's not the instrument but the artist—brains, fingers and soul expressing itself through the instrument—that is most important.

Mrs. Molita Rice and Mrs. Tom Royal of Amarillo returned Tuesday from a business trip to Dallas.

Mr. and Mrs. D. L. Holder and children of Amarillo, and Mr. and Mrs. H. C. Nelson and children of Dimmitt visited Mrs. Loula Ladd and Mrs. K. S. Rippey and family over the week-end.

Paul Bond, formerly of McLean, received his degree last week in Abilene.

The first U. S. naval officer to become an admiral was David Glasgow Farragut, who was appointed to that rank July 25, 1862.

**Shade Helps Dairy Cattle**

Providing dairy cattle with some type of shade is one essential of summer management for the dairyman, says Harry W. Cave, head of the Oklahoma A. and M. dairy department.

"Ample quantities of cool clear water during this period," points out Cave, "is necessary for high milk production. Cows need between 100 and 150 pounds of water a day to cool the body, make the milk, help digest the feed and eliminate waste."

Farmers must watch pastures closely and as soon as they are grazed down so there is reasonable doubt cattle are getting enough to eat, supplement the pasture with hay.

"To dairy cattle on pasture, a sufficient amount of salt and bone meal should always be provided. A good mineral mixture is made of equal parts of salt, bone meal, and finely ground limestone," Cave indicates.

For heavy milk production, cows should be treated kindly and not

over heated by driving or hurrying them rapidly to the barn. It is important that cows be comfortable and contented.

"Barns and cattle should be sprayed with some approved type of DDT to help eliminate flies," states the dairy cattle specialist. "This will make it possible for the cows to graze in comfort and consume more pasture."

### NEW TRAFFIC LAW

THERE'S A NEW traffic law going into effect tomorrow, September 5, one which is not overly strict but sensible and one which does away with the ancient traffic laws our state department of public safety has been having to put up with for many years.

There are a lot of little changes which the new law makes, and those little changes are actions which the safe and sensible drivers already do anyway. Now that these little things are in the law, and not merely an act of courtesy, the highway patrolmen can clamp down on people who hog the road, do not dim their lights, etc.

Here are a few of the changes, little changes, yes, but important ones.

A driver must keep to the right except when passing, when driving on a one-way thoroughfare, or when the right side of the road is blocked. In other words, don't straddle that black line merely because you see no one coming.

When you are driving on a three-lane road, stay on the right unless you are passing a car and then use the middle lane—but only do this when no one is using the middle lane in the other direction.

Don't get anxious and pass the car ahead when you are approaching a railroad crossing or an intersection, when approaching a bridge, viaduct, or tunnel, or when in a no-passing zone.

Another new angle, and this one resembles the laws followed by ships at sea: The question of right-of-way is clearly defined. The vehicle that gets into an intersection first has the right-of-way. If two vehicles get there at the same time, the one on the right has the right-of-way. In other words, if the other car is on your right, you must let it go ahead. If the other car is on your left, it should let you go ahead.

Rural stop signs that say stop now mean STOP. The old law did not make it a violation to run such a stop sign, but the new law does.

Standard arm and hand signals, now written in the law, are as follows: The hand and arm are extended out and up for a right turn; straight out and pointing to the left for a left turn; and out and down toward the ground for slow or stop.

These are merely some of the little changes in our state's traffic laws. If we would all obey them today then we would all have a better chance of living until tomorrow.

## LES TALK

By LESTER

Football training started this week, and next week the McLean Tigers will have their first grid tilt of the year. The first game will be a non-conference battle with Panhandle, at Panhandle, and the Tigers will be attempting to average the resounding defeat handed them by the Panthers last year.

This year's team has very good prospects for being a winning team. The school has three coaches this year, instead of one, so that Larry Sanders won't have to do all the work. He was given aid last season. I understand, by George McCarty, with McCarty taking time off from his own work to help out. This year McCarty will work with Sanders as will A. D. Shaver, all three of whom are connected with the school system.

So we have the coaches, and we have some mighty good ball players, too. I didn't see many of the games last year, since I didn't get over here until November, but the Tigers were fair last year and all of them were pretty green at the game. Sixteen lettermen are back on the squad this year, and some of them are big, and I mean big boys. So we have the material and the coaches.

I wouldn't predict that the Tigers will be District 3-A champs this year, but I do think they will make an excellent showing. I also believe that next year, with the seasoned men and with good coaching in their past, our Tigers will either take the district or come out a close second.

This year's team can win the district, despite what you may think now. Look what the Clarendon Broncs did last year, when everyone said before the season that the Broncs were very weak. McLean can do it this year, can even come out better than the Broncs did last year.

But in order for this to happen, there must be backing for the boys. Remember that on the playing field there are only 11 men on the team, but the stands should be jammed full—there is no limit to the number on the rooting team. Another thing, if the Tigers lose a game, then don't make fun of them the following day—give them a slap on the back and tell them they played a good game even if they did lose. Or else they will continue to lose.

W. T. Wilson came in the office the other day with a stalk of what he called soy beans. Not being very familiar with soy beans, although I did try eating some once and decided I didn't like them because I had seen our cow eating them, too, I wouldn't swear that what Mr. Wilson brought in was soy beans. But he said they were, and that he had a few rows of them

planted in his garden. No, he hadn't eaten any.

Apparently efforts to have an active chamber of commerce in McLean are going to fail. The idea was to hire a full-time secretary of the organization, a man who would have the time to do all those little things no one else wants to do, and who would be able to promote the town to more progress. But since re-organization, the chamber of commerce has had only two applications for the job. One was from a man who had to have an answer right then, and that was about two days after the meeting in which it was decided to determine how much money could be raised to finance the chamber. So that man wasn't available when the time came to hire one. The other applicant merely wrote, but I saw the letter and he couldn't even spell commerce, so no further correspondence with that man was ever carried on. And no more applications were received.

So apparently no one wanted the job. As a result of this, the activities of the chamber of commerce have been very small. Some few people have worked quite a bit, and regardless of what you may think of it, these few people have done a great deal of good work for McLean under the name of the chamber of commerce.

I personally hate to think that

the chamber of commerce is going to fail, but I am tired of having people say to me, especially Walter Kelly, "Well, why don't the chamber of commerce do something?" Somehow it has never occurred to these people, including Walter Kelly, that the chamber of commerce is not merely an object or a "they," but in actuality is an organization composed of its members. Those members (not a pot with a handle on it) are the chamber of commerce, and if the chamber of commerce is to do anything, then the members must do it. I hate to single out Walter Kelly in this, for he is no more guilty

than me or any other member of the chamber of commerce who makes the same remarks. Nevertheless, I don't like to hear so many people say, "Why don't they do something?" After all, who are "they?"

Admiral Thomas C. Hart met his wife while he was an instructor at the Naval Academy and her father was superintendent of the Academy. Admiral Hart was later also superintendent of the Academy. He and his father-in-law had further similar service in that both commanded the Asiatic Fleet, the latter in 1906-7 and the Admiral

during the crucial early days of World War II.

 FRANK J. SWARTZ  
 CHIEF ACCOUNTANT

TO THE ADDRESSED ASSOCIATION:  
 IN RE: Free Ambulance Service

Numerous complaints have been coming into this Department with reference to free ambulance service being given by funeral homes who are operating burial associations or other mutual assessment companies in conjunction with a funeral home.

Your attention is called to the several Board Orders previously issued advising the associations that it is against the law for the associations or their agents to give free ambulance service as an inducement to sell insurance or collect premiums. The associations giving free ambulance service are advised that it is almost an impossibility to draw a line for such services between members and non-members; therefore, it is requested that all funeral homes connected with such companies discontinue the giving of free ambulance service.

Should the association or other mutual assessment companies have further complaints filed against them the burden of proof will be placed on the company or association that such service is not being given as an inducement to sell insurance or to collect premiums. If such evidence is found against the parties complained of, the Board of Insurance Commissioners will be requested to cancel the certificate of authority for the companies operating in the State of Texas.

We dislike to take the above attitude in enforcing the law; however, it is becoming necessary through the many complaints being filed that definite steps must be taken to curtail such practices and your immediate cooperation is solicited.

Very truly yours

George B. Butler, Chairman  
 Board of Insurance Commissioners

Floyd Herring, Director  
 Mutual Assessment Companies

# Walking on a Wall

The little boy in the picture is practicing one of the earliest and most essential arts of life—the art of balance.

His real problem is to keep the weight of his body evenly distributed so that the line of gravity passes through his feet. It is the first lesson a child or young animal must learn in assuming an upright position.

Children derive much pleasure and satisfaction from their ability to walk a wall or narrow curb or rail fence. It gives them a sense of accomplishment when they are able to perform these feats without falling.

Balance is important not only in physical posture and movement, but in all the relations of life. It is especially important for children, as well as older people, to learn to keep their balance, mentally, morally and spiritually.

The life without religion is an unbalanced life. Man needs religion and the consciousness of God to keep him from falling under the weight of temporal cares.

The Church provides religious instruction and spiritual inspiration for all who seek its ministrations.

**THE CHURCH FOR ALL... ALL FOR THE CHURCH**

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend and support the church of his choice. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church on Sunday and read your Bible daily.

**Uncle Sam Says**

How would you like a fat raise? Dream stuff, you say? It isn't. It's a cold-cash, brass tacks reality—you want it to be. How do you go about it? Very simple. Just sign up for the Payroll Savings Plan where you work or the Bond-a-Month Plan where you bank. For every \$3 you put away now, you get \$4 in ten years. Take part of your pay each week in U. S. Savings Bonds. That's all. That's a fat gain in any man's arithmetic. And if ten years seems like a long time to look ahead, just give a thought to the smart Americans who bought bonds ten years ago, and hung on to them. Act now. Ten years will be gone before you know it!

U. S. Treasury Department

Ramona Holder, who has been visiting here with her grandmother, Mrs. Loula Ladd, and aunts, Mrs. K. S. Rippey and Mrs. N. J. Holder, returned to her home in Amarillo Sunday.

**Worley Closes Report on Foot And Mouth Disease in Mexico**

BY EUGENE WORLEY

The following concludes the report on the foot and mouth disease in Mexico made by the House of Representatives agriculture subcommittee:

**Negative Observations, cont.**

7. The size of the undertaking.—The very size of the undertaking is one of the major problems. The infection is scattered throughout some 30,000 square miles of territory ranging all the way from dense coastal jungles to 15,000-foot mountains. There are an estimated 2,500,000 cattle in this area, all of which—together with sheep, goats, hogs, and deer—will have to be slaughtered unless the disease can be virtually "stopped in its tracks." The handling of the men and machines required to do this job over this vast territory is a tremendous and expensive undertaking.

The staggering size of the undertaking is clearly delineated in the cold statistics on the number of animals disposed of and the number remaining: At the end of June, approximately 168,000 cattle had been killed and buried while an additional 26,000 from the infected zone had been disposed of by slaughter and consumption in Mexico City. The estimated number of hogs, sheep, and goats de-

stroyed was about three times the number of cattle killed. In contrast to the accomplishment thus far, following are the joint commission's estimates of the number of animals remaining in the various zones:

Zone 1 (highly infected): 1,282,770 cattle, 745,606 hogs, 448,086 goats, 731,353 sheep.

Other quarantined areas: 3,186,691 cattle, 1,154,192 hogs, 1,303,619 goats, 1,235,909 sheep.

North of quarantine: 6,021,324 cattle, 2,523,720 hogs, 4,988,763 goats, 2,270,420 sheep.

South of quarantine: 923,998 cattle, 660,244 hogs, 60,775 goats, 205,441 sheep.

The cost of eradication will depend to a large extent on the speed with which the campaign is carried on. Virtually all the animals in zone 1 must be eradicated. Destruction must be carried out in the "other quarantined areas" to whatever extent is necessary to eradicate the outbreaks that occur. The average indemnity thus far paid for cattle is \$49 per head. The total cost to the United States at the end of June was about \$68 per head of cattle destroyed.

8. Northern Mexico.—One of the most urgent problems is that of finding an outlet for uninfected cattle in northern Mexico. It is estimated that there may be as many as 9,000,000 cattle in that part of Mexico lying north of the quarantine line and that more than 600,000 of these must be sold or liquidated this year to prevent overstocking of ranges, the possible starvation of the whole cattle population, almost certain bankruptcy of many ranchers. The normal market for these cattle is northward into the United States and southward into Mexico City. Both of these markets have been cut off by the quarantine imposed because of foot and mouth disease. An outbreak of the disease in the northern states of Mexico would render futile all the efforts which have been and are now being made to stamp it out in the area around Mexico City. Nevertheless, such an outbreak is a very real danger unless an immediate market is found for many of these cattle.

**Conclusions**

Following are the conclusions reached by the committee members as a result of their observations in Mexico.

1. Operations must be speeded up. The eradication program is still lagging behind the disease, trying to catch up, instead of being ahead of the disease pushing it back. In the committee's opinion, operations should be at least doubled in scope and intensity.

2. Funds should be made available immediately to enable the campaign to be pursued at the highest speed and intensity with which it can be operated. The faster the campaign can be pushed, the less it will cost in the long run.

3. There should be created the

office of executive director of the campaign to be filled by a man approved by the governments of both the United States and Mexico, who has the ability to direct a campaign of this magnitude in all its ramifications and to bring about the speed, coordination and efficiency which are absolutely essential to the success of this program. The committee specifically commends the work of the present co-directors of the campaign and does not wish this suggestion to be implied as any criticism of their activities or abilities. It believes, on the contrary, that they are performing a tremendously difficult task with remarkable ability. In justice to them, the committee believes that someone of outstanding executive ability and experience should be designated by their governments to carry out the policies that they decide upon, so that the co-directors will be free to devote their time and energies to the policy phases of the program and be relieved of the executive duty.

4. It is the considered opinion of the committee that the campaign should be carried on on its present basis south of the Tampico-Colima military quarantine line. Without undertaking to commit either the joint commission or the government of the United States to such a policy, it respectfully suggests that if foot and mouth disease spreads into northern Mexico it may very possibly be necessary to abandon completely efforts to control the disease at this time in Mexico and to withdraw our own forces to the American side of the border in an effort to keep the disease out of this country. Certainly, it will be impossible to continue the present program on the present scale if the disease does spread into northern Mexico.

5. The Department of Agriculture should immediately assign the best men available to the job of getting existing packing plants in northern Mexico into operation and assisting the operators of those plants in finding export markets for their meat. It is recommended also that the department encourage foreign countries now buying meat in the United States to transfer part of their purchases to Mexico by announcing that there will be,

**COTTON QUIZ**

WHEN WAS THE FIRST AMERICAN COTTON IMPORTED INTO EUROPE?

ANSWER: IN 1493 WHEN COLUMBUS CARRIED BACK TO SPAIN SAMPLES OF COTTON FIBER FROM THE WEST INDIES.

beginning at once, reductions in the allocation of meat from the United States, proportionate to the quantity which the department believes can be supplied from northern Mexico.

6. Regardless of salvage operations or other expedients, the committee is convinced that the only way the campaign against foot and mouth disease can be waged successfully is to kill and bury all infected or exposed animals as rapidly as it is physically possible to do so.

We have Several Customers who want to Buy Tires like this that still have some miles in them.

**Right Now**  
We Can Pay You a GOOD PRICE for Such a Tire as Trade-in on a New Tire

We happen to have several customers who want worn tires that still are not bruised or damaged. For such a tire, we can right now pay you a substantial trade-in price. But you can very easily lose most, if not all, of this good price—and here is why:

Drive It 3 or 4 Thousand Miles More and it Will Bring You Only a JUNK Price

You see, as the tread wears thin you are very likely to bruise or damage the tire. At the very least, you can easily wear it to the point where it cannot be recapped. Either way, the tire will then bring you only a JUNK price. The last 3 or 4 thousand miles you try to get would then prove mighty expensive, wouldn't they?

**How One Stalk Of Sorghum . . .**

Grew into a \$23,000,000 Business

One day about 10 years ago, a marvelous thing happened! A man we know found ONE STALK of growing sorghum in his drouth ridden field.

Seed carefully nurtured from that same stalk today is found in hundreds of profitable sorghum fields in the area we serve

And today sorghums—never very profitable in the old days—are a \$23,000,000 crop in the Panhandle-Plains Pecos Valley area!

We have so much confidence in the sorghum industry—and all other industries we serve, that we are investing \$5 million dollars in a building program. This expansion program in our territory will bring more dependable electric service to industry and better living—electrically—to everyone!

## After Forty Health Foes Begin to Grow

From a health standpoint, life after forty generally begins to be more complicated for the average individual than it was in his earlier years. According to Dr. Geo. W. Cox, state health officer, the principal foes confronting people in middle life are heart disease, cancer, kidney disease, high blood pressure, hardening of the arteries, apoplexy, diabetes, and arthritis.

Middle aged people of today are healthier than were those of preceding generations, and the present generation, when they reach middle age, should enjoy

even better health than their parents of today.

"Medical care" in middle life has two important phases," Dr. Cox asserts. "The first is going to the doctor at regular intervals for a complete check-up, whether or not there have been symptoms that suggest the need for medical attention. The second is prompt attention to any illness, since this may mean the difference between complete recovery and prolonged invalidism. It is difficult to say which of these phases is the more important."

It has been found that men and women who faithfully pursue the habit of regular health examinations and who follow their physician's advice arising from them, tend to live longer, more satisfactorily, and freer from disease than those who simply take a chance and go to the doctor

## Uncle Sam Says

When you buy Savings Bonds, you don't SPEND your money. It is still YOURS—on deposit with the Government, and subject to call when you need or want it. Savings Bonds are better than money, because they do not tempt you to spend for things you don't need. At the same time they work for you, they earn as you earn.

Enroll in the Payroll Savings Plan, or increase your allotment if you are already enrolled. Buy more Bonds regularly through the Payroll Savings Plan. It is the surest way to save for the things you'll want in the years to come.

U. S. Treasury Department

only when pain or disability forces them to give up their normal activities.

It is also a fact, according to the state health officer, that many diseases of middle age respond to treatment in early stages where if neglected until later, they often cause chronic invalidism or even death.

Mr. and Mrs. Harbin Bodenhamer and daughter Rebecca Ruth of Lubbock are visiting here with their parents and grandparents. Mr. and Mrs. Amos Thacker.

Mrs. Percy Daniels and Mrs. Corinne Trimble were visitors last week in Borger with relatives.

Parker Price of Guyton, Okla. visited last week in the home of his brother, E. L. Price.

Rev. Ray Stephens, R. L. Appling, and M. D. Bentley were visitors in Amarillo Monday.

H. C. Wells and family of Friona visited Sunday in the home of Mr. and Mrs. E. L. Price.

## Shirley Phillips And Leo McDonald Wed in Missouri

Before a candle lighted altar decorated with palms and white gladioli, in the First Baptist Church of Hebert Groves, Mo. Miss Shirley Phillips, daughter of Mr. and Mrs. D. D. Phillips of St. Louis, Mo., became the bride of Leo McDonald, son of Mr. and Mrs. R. L. McDonald of McLean, on Tuesday evening, August 19. Rev. J. Loren Jolly officiated.

Before the ceremony, Claude Baker of St. Louis sang "Because," by D'Hardelot, and Miss Wanda Potts of St. Louis sang "I Love Thee," by Greig.

The bride, given in marriage by her father, wore a white gown of mousseline de soie and lace. The full skirt fell in a short train, and the lace bodice had a flare peplum. She wore a Juliet cap trimmed with seed pearls, which held in place a fingertip veil. She carried a white Bible covered with a shower bouquet of white roses.

Mrs. Claude Baker, sister of the bride, was matron of honor. Miss Eula Mae Green of Ozark Mo., and Miss Elaine Hoganmiller of Fredericktown, Mo., were the bridesmaids. Sharon Wester of St. Louis was flower girl. The attendants wore gowns of marquisette and lace, the skirts of which had a bustle effect. They wore lace Juliet caps. The matron of honor and flower girl wore pale blue, while the bridesmaids wore yellow.

The groom chose as his best man Claude Baker, brother-in-law of the bride; and as ushers, his brother, Scotty McDonald of McLean, and Carter Mundell of St. Louis.

A reception was held at the home of the bride's parents, after which the bride and groom departed on a short wedding trip before going to Shawnee, Okla., where both will be seniors at

Oklahoma Baptist University this fall. The groom is a ministerial student.

Out-of-town guests at the wedding were Mr. and Mrs. R. L. McDonald and son Scotty of McLean, Mrs. John Phillips and Mrs. W. L. Rethwisch of Thayer, Mo. Miss Eula Mae Green of Ozark Mo., Mr. and Mrs. Hoganmiller and daughters, Bud Revelle, Russell Wray, Misses Martha McCormick and Roma King, all of Fredericktown, Mo.

## Mr. Mrs. Worstall Honored at Party in Roberts Home

Mr. and Mrs. Roy Worstall, who are visiting here from Zanesville, Ohio, were honored with a party recently in the home of Mr. and Mrs. Jesse Roberts.

Forty-two was enjoyed throughout the evening, and ice cream and cake were served to Bill Worstall of Zanesville, Ohio, Mr. and Mrs. Bud Back, Mr. and Mrs. Neville, Back, Mr. and Mrs. Earnest Beck, Barbara, Virginia, and Nona Jean; Mr. and Mrs. Clyde Holloway, Mildred and Mary Ruth; Mr. and Mrs. Gene Lowe, Mae Frances and Jeanne Sue; Mr. and Mrs. Bill Earles and Wilma, Mr. and Mrs. Milton Carpenter, Effie Lou and Johnny Max; Mrs. Josie Stewart, Mrs. Ted Street, Miss Frances Collie, Charlie Back, John Clay McClellan, Jesse Wayne Roberts, and the honorees.

## Range Improvement Field Day To Be Held at Reydon, Okla.

Farmers of this area interested in range improvement are invited to attend the third annual Roger Mills County range improvement field day, to be held at Reydon, Okla., Friday, September 12. Quentin Williams district soil conservationist, said this week.

The program for the day will start at 10:30 o'clock in the morning at the Reydon High School. Registration will be from 10:30 to 11:30; free lunch from 11:30 to 12:30; 12:30 to 1:30, noon program; and field tour beginning at 1:30 o'clock in the afternoon. Principal speaker will be Leon J. McDonald, assistant state conservationist of the S. C. S. at Oklahoma City.

Williams stated that thousands of acres of old land had been planted to grasses in that area in an effort to determine which will make the best pasture and which will improve the ranges the most.

Plantings of native grasses have been made there in 1941, 1942, 1943, 1944, 1945, and 1946. Also to be shown is the idea of mowing versus the burning of shinnery.

The day's program is being sponsored by the Reydon business men the upper Washita soil conservation district, and the Cheyenne Kiwanis Club.

## Road Hogs—

(Continued from front page) might make when he's driving a hay-wagon with a double span of horses.

Definite signals must be given before a driver turns, slows down, or stops.

Most of us will use the prescribed hand-and-arm signals. But busses and trucks will have to be equipped with electrical or mechanical signalling devices if they are built so that hand-and-arm signals cannot readily be seen.

Hand-and-arm signals are given in this manner: the hand and arm are extended out and up for a right turn; straight out and pointing to the left for a left turn; and out and down toward the ground for slow or stop.

## WANTED

Wanted—Married man for general farm work and help with cattle. Year round job. Must be able to operate tractor for row crop farming, no cotton. Good living quarters.
