# Good Old Days?

Remember the days when you cranked a car to start it on a cold morning? Ever stop to think that there's a whole generation of children growing up who will never have this fascinating experience?

Nowadays, all you do is push a button or turn the key ... no art or skill required. But you do have to make sure that your battery is in good shape. Because at low winter temperatures, your battery may have only 40% of its normal starting power! If your battery is unreliable, let your Phillips 66 Dealer install a brand-new dapendable Trop-Artic \* Battery with Silver Cobalt plated grids for extra resistance to corrosion and overcharge .. your best insurance against getting stuck some
