Recently published figures of industrial expansion in our service area reached a huge \$28 million.

Add to that another vast expansion figure and you have an even more impressive total.

\$27,000,000 was spent on new commercial construction and for expansion of existing businesses in the same time period, in the same WTU service area. This is why we say "The Center of the Southwest" is one of the Nation's fastest growing regions.

Such industrial and commercial expansion, plus civic and other improvements, strengthen our conviction that this region faces growth unlimited.
