gives the following valuable information: duties of a postmaster. It is his duty to look after As coming from a member of Congress, if for no weather conditions, advise you on the parental other reason, Judge Blanton's allegations, which training of your children, lick and stick your post- are direct and specific, should be given due conage stamps and give out detailed and accurate infomation on the best methods of agriculture, hor-ticulture and stock raising. He knows the proper fore the bar of public opinion. Congress is either period for planting gardens, setting hens, and guilty or innocent, If guilty, the fact should be where to dig fish bait. He is also familiar with established and the corditions amended. If innothe best methods of ridding your place of rats, cent, Congress owes it to itself and to the Amerifleas, and mother-in-laws, and has advance inform-tion as to just when you should expect a letter. It is safe to pre-Ask him any or all these questions, or any other dict, however, that no attention will be paid to that may occur to you. He knows. He may be a these charges. It is a fact, too well known and little reluctant about giving up information, but he realized, that Congress, and the various State leghas nothing else to do."

文为为

"A sucker is born every minute." Quite a number of Ozona people who subscribed for some magazines and near-magazines through some traveling agents who visited Ozona, have been initiated. "A fool and his money are soon parted." These particular suckers are not all fools-simply a little too trustful. But lots of people, strange as it may appear, would rather send money away than to keep it at home.

I hav a nice letter from Millard L. Cope, of Sonora, , who takes some exception to what I said editori ally about the Sonora correspondent of some of the daily papers. He intimates that an "apology' is due him. What I said editorially was that 'Son mea had a correspondent of some of the dailies that, was a BIRD—whether of the feathered variet for not." This correspondent, it was noted, seant out reports that two hundred head of grown cattle had been burned to death in Crockett county by range fires. Millard did not seem to like the 'Bird" and the "feathers." He assumes that I knew him to be the correspondent, that he is only sixteen years old-and all the rest about him. Millard writes a good letter, and a nice, courteous letter, but he takes himself too seriously. The world does not yet know of him. He will, we doubt not, arise to fame, but he will have to be patient. He has fine promise, if we may judge from the good letter he writes. Crockett county has not lost a single head of any kind of stock by range fires. Millard says he did not send out any report to that effect, and cannot learn who did. It is well. Millard, then, is not THE Bird. The grapeline service of the certain papers is, as usual, responsible for the absurd reports. I will say to Millard that I, at several times, "represented" daily papers at this place, but I found, by unpleasant experience, that those alleged "newspapers" usually knew more about facts and conditions here Editor Dollahite says his paper, the Edwards than I, or anyone else here, knew. So, rather than pleasure and promptness. That is all.

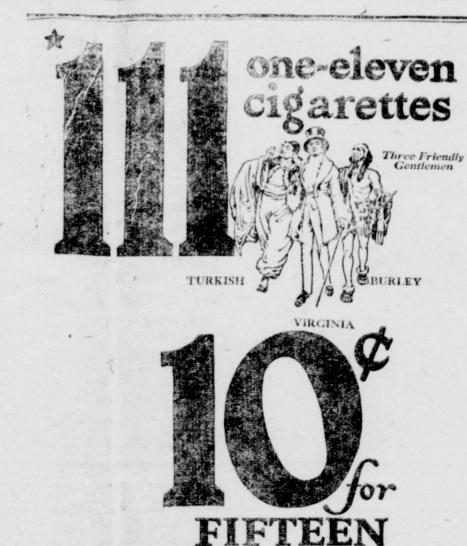

是是是

It is easy, and it is, moreover, a part of human nature to call a man a blatherskite and belittle his efforts to expose corruption in high places. But dolph has been re-appointed postmaster at Menard, the resolution introduced in Congress by Representative Blanton deserves a careful reading by "A great many people are not familiar with the the people and the serious attention of Congress. sideration. Congress is, at least, summoned beislatures, are willing and prompt to "investigate" and regulate everybody and everything except

IF YOU WANT THE BEST AND

THE LEAST EXPENSIVE, YOU

WILL SELECT AN AERMOTOR

#### Warn annian and and annian and an annian in THE LAST WORD IN WINDMILLS IS THE NEW AERMOTOR

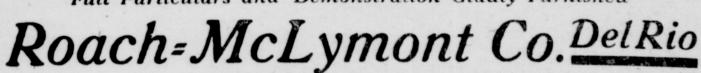

In the future someone may design a better windmill I than the new AERMOTOR, but there is nothing better on the market today.

A year's supply of oil goes with each Aermotor. Pour the oil into the crank case and the Aermotor runs itself for a year without further attention from you.

Censitive to the slightest breeze, balanced to the high-Jest wind, it pumps more water than any other kind of pumping machinery. Constructed so simply withal; that

it cuts repairs and labor to practically nothing.
