## Santa Coming On Pre-Yule Visit

### Jolly Saint Nick To Meet Children At Oberkampfs Store

Although a little late this year, old Santa Claus is coming in a big way on his annual pre-Christmas visit with the boys and girls of Ozona—just to talk things over with them a bit and find out from their own lips just what they want for Christmas.

Santa is due to arrive about 2 o'clock Saturday afternoon at Joe Oberkampfs store and will remain there until 8 o'clock Saturday evening. That is by way of making up for the fact that he was late getting here this year—he is going to pay the boys and girls of Ozona a real visit, staying six long hours here just to meet the kids and have a good time.

And Santa is not coming empty-handed—he hardly ever does. He hasn't given a hint of what he is bringing on this trip but it will be a surprise of some sort. Anyway, he has issued a special invitation to every child in Ozona in driving distance of Ozona to be here Saturday afternoon to see him.

And another thing—Santa has asked that all the children who have not already mailed their letters to Santa write them now and have them ready to give to him in person Saturday afternoon. He will get some pointers on what the kids want by talking to him, but Santa is old and can't remember as well as he used to and he'd rather have the requests written so he won't forget anything.

West contributed an interesting discussion of three of the particularly well-known paintings of the Christ Child, "Holy Night," the "Madonna and Child" and the "Sistine Madonna." Mrs. West gave an interesting and instructive story of the history of the picture and the artist in each one.

**Christmas Theme**  
Mrs. Ira Carson added to the Christmas spirit of the program with a reading entitled "The Cowboy's Christmas Ball." A Christmas story, "Sandy" told by Miss Elizabeth Fussell was enjoyed and the program closed with the singing of "Silent Night" by the ensemble, with Mrs. W. J. Grimmer at the piano.

## Ozona Girl Is Slightly Burned

### Miss Blanche Robison Victim Of Mishap In A.C.C. Laboratory

Miss Blanche Robison, daughter of Mr. and Mrs. P. T. Robison of Ozona, suffered severe burns about her wrists Tuesday when her clothing became ignited from a gas explosion in the home economics laboratory at Abilene Christian College where she is a student. Her parents have been advised.

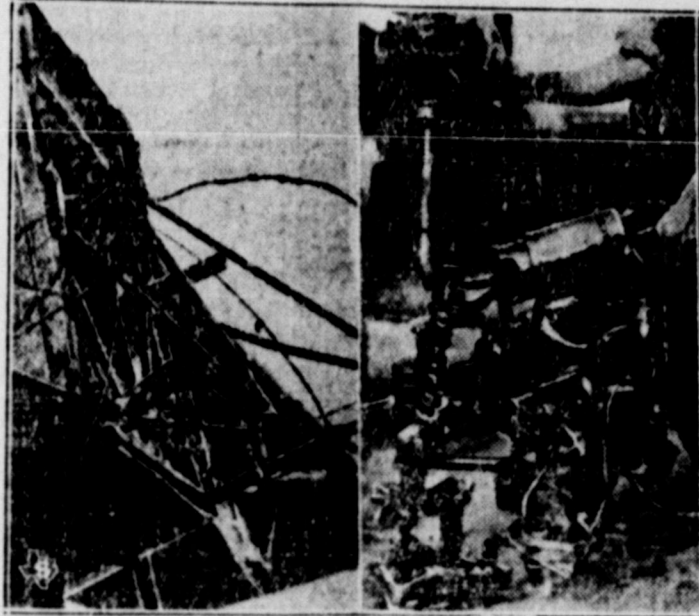

Someone had left the gas turned on in the oven of one of the ranges in the laboratory. Miss Robison was standing near the range when the gas was ignited from flames in nearby stoves, the blaze enveloping her. The fact that she was wearing a coat probably saved her from more serious burns. The front of her dress was burned and the coat also caught fire, but the burning clothing was extinguished before the flames reached her face. The burns about her wrists are not considered serious.

## \$4400 PAYROLL ESTIMATED ON SEWER PROJECT

### 6,500 Foot Main To Be Laid To Serve Mexican Sector

#### 66 MEN GET JOBS

#### Connections To Be Required; Nominal Charges Fixed

Work was started this week on a 6,000-foot extension to Ozona's sanitary sewer system, a project which will loose a \$4,400 payroll in Ozona covering the next few weeks and give 66 men employment with a maximum salary of \$1. a week.

The sewer extension has been approved as a CWA project, the labor bill to be paid from funds of the Civil Works Administration.

The extension will give sewer service to the Mexican section of Ozona, an eight-inch main following the south bank of the draw to the eastern extreme of the settlement. Six-inch branch lines will extend into the area to be served, giving every house in the section service.

#### Ten Men Added

An additional ten men have been added to the Crockett County CWA payroll by authority of the administration at Austin. The original quota set for this county was 56 workers, but when more than that number were needed for the job and the additional unemployed were on the rolls, authority was granted to put on an additional ten workers. The full quota was expected to be at work by the end of this week.

J. S. Barlow, engineer who designed and supervised installation of the Ozona sewer system, has again been engaged to survey out and install the extension. One additional short line is to be laid on this side of town to complete service for the entire city.

Mr. Barlow's acceptance by the Austin authorities as an official CWA engineer is necessary before he can be retained as such on this project. Application has been made, however, to have him approved and it is expected that he will be designated as project engineer by the authorities.

#### Service Charges Levied

A basis of monthly charge for sewer service has been agreed upon by the Commissioners Court and will be placed in operation beginning January 1, it has been announced. Although the sewer system has been in operation nearly a year, there has been no charges in connection with the service of the system levied to date.

A minimum charge of 50 cents a month for one fixture has been agreed upon and each additional fixture will carry a monthly charge of 10 cents. Thus, four fixtures, three bathroom and a kitchen sink, will carry a monthly service charge of 80 cents.

THURSDAY DECEMBER 14 1933

WINTER HAZARDS

The coming of winter, as the National Safety Council points out, brings with it a number of varied and important accident hazards.

Carbon monoxide is one of the foremost. Motorists warm up their cars in closed garages—and the inevitable result is more unnecessary tragedies to add to the annual death toll.

To most of us, winter driving presents the principal hazard. Streets are wet and ice-covered. Darkness comes early. Driving practices that are reasonably safe in the summer, become extremely dangerous.

is vastly more important than at any other time of the year.

Every motorist should have his car examined at the beginning of winter to make certain it is in good operating condition. Then he should remember that only 15 per cent of car accidents can be laid to mechanical failure, and that in the balance the human element must bear the blame.

In automobiles, in homes and in most, winter presents a thousand menaces to life and health and property. Practically every one of them can be offset by care, competence and thought on the part of the individual.

SPENDING IS SAVING NOW.

True economy is that which obtains the largest possible return for a dollar spent. True economy is to spend that dollar at a time when it will bring the most.

We have had a number of years of extreme depression. Prices have dropped to unimaginably low levels. Buying power has been close to non-existent. There was money in the country—but persons who had surpluses were afraid to spend.

If they pursue that timid policy any longer, they are going to be literally out of luck. That hoarded money is going down in value now. The worth of the dollar depends entirely on what it will buy.

You can get maximum value from your money only by putting it to use. There was never a better time to install a new heating plant, to repair or replace a roof, to build or rebuild, to paint or to do a thousand similar things.

Think it over! True saving now through wise spending.—The Manufacturer.

WHAT IS THE CURE?

It is possible that we may yet discover that the surest way for us as a nation to be restored to something like our old time economic condition must be by the strictest adherence to the fundamental principle of spending less than we receive.

Pay day comes some day, sure as fate. No one can fail to be concerned about this matter when he thinks it through. Bold strokes in favor of artificial rejuvenation of trade, agriculture, industries, business in all forms must have a coordinate reaction that will be harmoniously stimulating and tend quickly to make us a going concern in the matter of finances.

Nature tends to balance things in an orderly manner. Business, industry, agriculture, labor conditions tend to balance themselves if given time. If sugar is too low in price for the producer he quits producing and the price rallies.

But there is distress attending these adjustments even when nature carries the load. We seek then sometimes, temporary relief; help for the disabled. There is where the experimental enters the picture.

That's where we are today, and we all hope that our doctors and the new specifics will prove to be "remedies," not stimulants that are succeeded by a depressant reaction, but remedies that tend to really assist nature in a permanent cure.

### Motorists Profit From Dry Repeal

#### Half Cent of Federal Tax Comes Off On January 1

HOUSTON, TEX., Dec. 13—Although Texas remains dry, prohibition repeal will bestow upon motorists of the Lone Star state a New Year's gift of \$3,500,000 year by year, the Texas Good Roads Association pointed out today.

The special federal gasoline tax of one-half cent per gallon, levied by Congress this year as a revenue provision of the National Recovery Act, will be voided automatically on January 1.

The act, which raised the federal levy on motor fuel from one cent to 1½ cents, stipulated that it would be returned to one cent on the first day of the calendar year following repeal of the eighteenth amendment. Liquor tax income will make up the difference.

Thus, twice during 1933, the much-harried consumer of motor fuel has regained a little of the ground he has lost, of recent years in his battles against heavy special taxation.

The first "break" for more than a million Texas automobilists came last March, when the state legislature struck a hefty blow at the tax evaders with the new felony law against motor fuel "bootlegging." Comptroller Sheppard, by hard work, is recovering millions in stolen revenues yearly, half of which go to improve state highways.

Taxes on motor fuel in Texas, as 1934 begins, will remain at five cents per gallon—one cent federal and four cents state. Yet only two cents of this total goes directly to the basic purpose for which the tax was conceived, construction and maintenance of highways.

The average Texas motorist pockets \$2.78 a year from the reduction, his annual motor fuel tax bill dropping from \$30.58 to \$27.80 for average consumption of 556 gallons, the road association estimated.

### 15 Millions In Texas Road Work

#### 24 Million Program Past Halfway Mark By Christmas

AUSTIN, TEX., Dec. 13—Texas' \$24,250,000 NRA road-building program, swinging past the halfway mark, will approach \$15,000,000 in construction projects actually under contract by Christmas, the Texas Good Roads Association announced today from highway department figures.

More than 25,000 Texas breadwinners already have been given jobs from this highway program, according to the calculations of the United States Bureau of Public Roads—8,500 directly on the jobs and twice that number in contributory pursuits such as manufacture and transportation of materials.

Steadily gaining speed after a slow start, the state highway commission let more than \$4,000,000 per month in contracts during October and November, and expects to exceed this rate during December and January.

Officials are making strenuous efforts to have the entire program in the actual construction stage early in the new year, when Congress may appropriate more funds for public works.

Texas Good Roads Association leaders have urged repeatedly upon the national administration the pressing need for more modern highways in Texas, as well as the extreme value of road construction for unemployment relief.

They are seeking another substantial federal appropriation for highways in the spring.

Through November, the Bureau of Public Roads reported, Texas' 270 road projects ranked second in number only to Pennsylvania.

Texas was fourth in total volume of road work and third in the jobs this work provided. But most of the smaller states were nearer to completion of their respective programs.

## WARNING to EXPECTANT MOTHERS

If you have ever been a patient in any hospital, you are probably familiar with the advantages of a liquid laxative.

All doctors know the value of the laxative whose dose can be measured, and whose action can be controlled.

The public, too, is fast returning to the use of liquid laxatives. People have now learned that a properly prepared liquid laxative brings a perfect movement without discomfort at the time, or after. Dr. Caldwell's long experience with mothers and babies, and his remarkable record of nearly three thousand births without the loss of one mother or child, should give anybody complete confidence in any prescription which he wrote!

But most important of all, a gentle liquid laxative does not cause bowel strain to the most delicate system, and this is of the utmost importance to expectant mothers and to every child.

Expectant mothers are urged to try gentle regulation of bowels with Dr. Caldwell's Syrup Pepsin. It is a delightful tasting laxative of delightful action, made of fresh herbs, pure pepsin and active senna. Not a single mineral drug to be absorbed by the system, or irritate the kidneys.

Dr. Caldwell's Syrup Pepsin is an approved preparation and kept ready for use by all druggists.

## No Family Secrets—Save The First Kiss Can Be Kept From The County Clerk

If anyone is born, the county clerk knows about it. If somebody dies, the clerk soon knows about it. If a couple decide to get married, the clerk knows it before the preacher, and is sure to see the license before the girl who is to become a wife. All these and many other things are well known to the county clerk, and he isn't necessarily curious, either. It is his business to have the information at the public finger tips.

Important in-between-happenings in the life of every regular resident of the county are properly recorded and neatly filed. There are voluminous biographies telling all. But the sketchy outline of each citizen tells much. It shows high points and reveals a lot about character.

When a child is born, the event is chalked up by the clerk in his birth certificate file. Later he may be grateful or ungrateful depending on whether he wished to take a position with a certain company which will not take youngsters, or whether he wishes to alter the truth just a little to put in one more year on the high school football team. Regardless of the convenience or inconvenience it causes the individual, there it is, legal and everything.

The records on the rising generation are rather scanty. In fact, there are not any except an occasional death certificate. But from the late teens on the record is clear.

The clerk is not only informed as to when a person is married, but usually has the information several days in advance.

If the couple decide to buy a home the clerk's files show they bought and from whom, where the property is located and how much they paid or are paying, and how. Not that it is anybody's business, but legal records are handy to have around. If they don't buy a home, one of several things happen. They are renting, living off their folks or have left the country.

The county clerk knows if an oil well is being drilled on your property, and you are expecting a

fortune soon, the leases tell everything. If a person is wealthy the real estate salesman gets to him and he buys a lot of property. He probably does not know where some of it is located but the county clerk does.

The chattel mortgage files, warranty deed and trust records form an accurate barometer of the status of both the average citizen and business generally.

The vital statistics the clerk is required to keep, account for all deaths. And in death there is no escape from the all-knowing archives. The deceased's will shows how much he is worth and who inherited it.

Is there anything a person can do without the county clerk knowing of it?

Of course, a girl can kiss a fellow the first time without the clerk making a record of it, and the bootlegger can go about his business of making and selling beer with an assurance the clerk won't know it unless he is caught, but, if the courtship goes far enough, the clerk is sure to find it out, and with the legalizing of beer the clerk will have a complete record of all beer salesmen, since he will be called on to issue permits to them.

Nearly everybody buys on the

installation plan. The chattel mortgage records show that. When the same couple buys furniture their friends and the county clerk's office knows about, assuming they purchased on the painful payment plan.

Later it will be known when the newly-weds buy a radio. By and by they will trade the old ice box in on an electric, and the clerk will record that. When last note on the car has been paid, and the lien has been lifted the clerk is in a position to rejoice with his fellow citizens. He knows all about it.—Nacogdoches Herald.

### Christmas Fire Warning Sounded

#### State Commissioner Urges Care During Holidays

Raymond S. Mauk, State Fire Insurance Commissioner, has sounded a warning of the danger of fires during the Christmas holidays. His statement released today reads as follows:

"It is not intended to suggest that the Christmas celebration be transformed into a safety campaign. However, the suggestions that are made here for preventing fires are simple and sensible and there is no good reason why they should not be adopted. The pleasure of the holiday season should not be marred by easily avoidable fires.

"When setting up a Christmas tree it should be placed at a safe distance from any stove, fireplace or other heating device.

"Candles have long been associated with Christmas celebrations, but they are altogether too dangerous to be used as tree decorations, or for window displays on Christmas Eve, no matter what precautions may be taken. For tree lights we recommend strings of miniature electric lamps.

"The artificial decorations used on the tree and about the rooms should be of non-inflammable material—such decorations can be obtained almost as easily as can those made of paper, cotton, pyroxylin plastic (celluloid), or other highly combustible substances, and the difference in cost is quite small.

"Toy electric trains, motors and other appliances should not be attached to light sockets; until all fuses and connections are in perfect order.

"Pennies or wire should never be used in replacing blown out electric fuses. The fuse is the safety valve on your wiring system to protect you against fire.

"Chimney fires are often started by burning papers and other light material in fireplaces and stoves. Sparks and burning embers discharged from the chimneys may fall on wooden shingle roofs and set fire to houses. This danger may be avoided by gathering up waste paper and other combustible refuse and storing them in covered metal containers to await the trash collector.

"Small children should never be permitted to handle fireworks.

"Entirely too many fires during the Christmas season result in a fatality."

Porter: "De man in room seven has done hang hisself!"

Clerk: "Hanged himself! Did you cut him down?"

Porter: "No, sah! He ain't dead yet."
