Barrow Again In Clutches Of Law On Check Charge

Brother Of Clyde Is "Invited" To Shift To "Other Parts"

For the second time within a week, L. C. Barrow, a brother of the late notorious Clyde Barrow, slain with his paramour, Bonnie Parker, in a hail of bullets from the guns of Texas Rangers and other peace officers, ran afoul of the law in Crockett County.

Released from the Crockett County jail late last week after serving out his time in lieu of a fine imposed in justice court on charges of an affray, Barrow was arrested the following day on a charge of swindling by bogus check. Barrow had given a small check at the C. G. Morrison Co. here for purchase of merchandise.

A fine, imposed in justice court on this charge, was suspended on condition that Barrow shift the scene of his activities to other parts. He agreed, and left town immediately. Since the slaying of his brother, Barrow has served a term in the state penitentiary, having been released from that institution less than a month before coming to Ozona. In the interim, local officers learned, he had served a ten-day jail sentence in Temple.

New Crockett Oil Pool Gets Another Test

Choate - Hogan Locate Offset To Black & Eubanks Well

Location for another test in the new oil pool in the extreme north west corner of Crockett County on University land was staked during the past week by Choate and Hogan, principal operators in the new production area.

The new test, not yet designated, will be a south offset to Black and Eubanks Oil Co. No. 1 University, which is one half mile east and a half mile south of the discovery well on the block.

The Black and Eubanks well, which promises to be one of the largest producers in the field, last week pumped 40 barrels in a 3 1/2 hour test, some of it probably an accumulation. The well has been estimated for 150 barrels daily. It was shot last week with 130 quarts from 1,330 to 1,370 feet.

Choate and Hogan's No. 1 University, newest well in the pool, was being tested after being shot with 160 quarts from 1,372 to 1,425 feet.

Masons Elect New Officers At MCeet

New officers were elected by the Ozona Masonic Lodge in its monthly session Monday night.

R. L. Flowers was named Worshipful Master of the order. Other officers selected were W. E. Friend, Jr., Senior Warden; Fred Hagelstein, Junior Warden; Scott Peters, Treasurer; Lowell Littleton, Secretary; and Ira Carson, Tiler. A supper was served before the lodge opening.

The new officers are to be installed at the next regular meeting of the lodge, scheduled for July 4.

ANOTHER NEW HOME

Work was started last week on a new home for Mr. and Mrs. Buster Augustine. The new residence is being constructed on a lot east of the Chris Meinecke home west of the draw. This is the fourth home under construction in a local building boom. Work is now under way on a home for Elbert Lucas, Clyde Hill and Lee Snyder, the last completed and ready for occupancy. Ross Hufstetler is also planning a new home to start soon.

Ready for the Front Line

On the Lunghai line going to the front line battlefield, Chinese troops are shown at the railroad station about to entrain. The stubborn resistance of the Chinese troops to the Japanese invasion is regarded as one of the military miracles of modern times.

Catalogues For 1938 Rodeo Ready For Distribution

Free Souvenir Booklets Available For Mailing To Friends

The 1938 edition of the Crockett County Rodeo, Race Meet, Stock Show and Sale catalogues were completed early this week and are ready for distribution.

The catalogue contains the complete preliminary draft of the three-day program, rules and premium lists in the annual Rambouillet sheep show and sale, rules for the colt show, wool show, roping, riding and other rodeo events, local pictures and complete information about the eleventh annual Ozona show to be held this year June 23, 24 and 25. In addition, the book contains attractive ads from business firms in Ozona, Sonora, San Angelo and other towns in the area as well as from a number of prominent sheep breeders throughout the nation. These advertisers make possible the annual publication of this attractive piece of advertising literature for the local show.

The catalogue may be mailed for three cents postage if left unsealed. Envelopes are provided free at The Stockman office for mailing the books. The books may also be obtained at local business houses.

Little Moisture With Electrical Displays In Area

Frequent Disturbances Bring Light, Scattered Showers

Ozona residents are becoming accustomed to an almost nightly display of dazzling lightning and crackling thunder to the accompaniment of light showers over the area as these displays form frequently from quick rising and quick shifting clouds.

One of the most severe of the frequent electrical storms accompanied a light rain Monday night. Low flashing lightning and heavy thunder wakened many residents at about midnight. Several telephones were put out of order by the lightning. Another display and a blustery shower entertained Wednesday night, but brought little moisture.

Mrs. J. A. Fussell has gone for a visit to Georgia, her native state. She will see her son, Aubrey, who has recently been transferred there by Westinghouse Electric Co.

College Students Return For Summer Vacation Period

The official arrival of summer was heralded during the past week with the return of college students to their homes here for the summer vacation.

Among the returning students were Misses Lillian Baggett, Clara Mae Dunlap and Athleen Dudley from Texas State College for Women at Denton; Miss Maggie Seaborn from Gulf Park College at Gulf Port, Miss.; Miss Totsy Robison from Abilene Christian College; Miss Carolyn Montgomery, Joe Thomas Davidson and James Childress from Southern Methodist University; Ele Bright Baggett and W. R. Baggett, Jr., from A. & M. College; Richard Miller, Max Schneemann and Grover Jones from Texas Tech at Lubbock; Jack Williams from North Texas State Teachers College at Denton; John Childress from New Mexico Military Institute at Roswell, N. M., and J. K. and Shorty Bill Colquitt from San Antonio Military Academy.

Brother Of Mrs. A. C. Nance Dies In Plane Crash

Ozonan Visiting There When Jim Moody And Companion Killed

Jim Tom Moody, 35, Hillsboro business man, and a brother of Mrs. A. C. Nance, wife of the minister of the Ozona Church of Christ, was killed in an airplane crash near Hillsboro Tuesday afternoon. A companion on the fatal flight, Raymond Taylor, died with Moody.

Rev. and Mrs. Nance happened to be visiting in Hillsboro this week and were in that city when Mrs. Nance's brother was killed. They wired the news to friends here.

The plane, piloted by Moody, crashed near a landing field four miles east of Hillsboro. The ship burst into flames as it struck the ground after going into a spin from an altitude of 125 feet. Both occupants of the ship were believed to have burned to death.

Moody, a wholesale gasoline and oil dealer at Hillsboro owned the ship. He had been flying about eight months. In an attempt to land, the flyers overshot the landing field, and then regained altitude when the ship crashed.

Moody is survived by his widow and two children, and Taylor by his widow and one child.

Mr. and Mrs. V. I. Pierce and son, Miles, returned Sunday from a vacation trip to New York and a tour through the northern and eastern states.

Ozonan Escapes Death As Auto Crashes Bridge

Dempster Jones Suffers Concussion In Accident Monday

Dempster Jones, Crockett County ranchman, suffered a slight brain concussion and minor cuts and bruises Monday when his automobile crashed into a concrete culvert on Highway 27 near the tourist courts on the west side of Ozona.

Mr. Jones was traveling west on the highway and in making the curve the rear wheels of his pickup crashed into the concrete pillar of the culvert. The car turned over several times and was almost completely demolished, the rear wheels being jerked completely from under the body by the impact with the concrete.

Persons in the vicinity who witnessed the accident rushed to Mr. Jones' aid. He was still conscious when taken from the car but lapsed into unconsciousness soon after, and remained in this condition for several hours. He was able to be up Wednesday, however, and is believed to have suffered no serious injuries.

200 Attend First Of Union Outdoor Church Services

Rev. Slater Preaches Opening; Nance, Children In Order

A crowd estimated at 200 persons attended the first Sunday evening religious services held in the park last Sunday evening to inaugurate the summer program in which the three churches of the city have joined for union outdoor services each Sunday evening.

Rev. Eugene Slater, pastor of the Methodist Church, preached the sermon at the Sunday night service. Rev. A. C. Nance, minister of the Church of Christ, will deliver the sermon next Sunday evening, and the Rev. Clyde Childers, pastor of the Baptist Church will preach the third Sunday evening.

Regular services are being held at each of the churches at the morning hours.

W. A. Hadden Is Candidate For District Judge

Veteran Local Attorney Seeking Post In 112th District

Judge W. A. Hadden, resident of Fort Stockton for nearly forty years, this week filed as a candidate for judge of the 112th Judicial District of Texas, which comprises the counties of Pecos, Upton, Crockett, Sutton and Kimble.

With the exception of a few years spent in San Antonio practicing law, Judge Hadden has been an active member of the Pecos County bar, and has also been active in civic and religious affairs of the community.

He was county clerk for a time during his early residence here, and for the last several years has been city attorney of Fort Stockton. He was formerly in the abstract and land business here.

With a wide acquaintance in the western portion of the district, Judge Hadden plans also to visit the eastern counties of the district in the course of his campaign.

Miss Mary Louise Harvick left Sunday to enter summer camp in Kerrville. Mrs. S. M. Harvick and Miss Catherine Childress took her in the car.

PARTIES FOR CHINA

Col. Theodore Roosevelt, Jr., who has invited Americans to attend symbolic "Bowl of Rice" parties in 2,000 cities to raise funds for 30,000,000 Chinese civilians left destitute by the Japanese invasion. Highlight of the parties will be a contest to select the most perfect fashion model in America. Son of the famed T. R., Col. Roosevelt is national chairman of the United Council for Civilian Relief in China and former governor-general of the Philippines.

Fair Plant Made Ready For Show Opening June 23

Grandstand, Track and Pen Repairs Made; Entries Mount

With repair work on the grandstand, damaged recently by high winds, completed, officials of the Crockett County Fair Association are busy with details of shaping final plans for the opening of the eleventh annual Rodeo, Race Meet, Stock Show and Sale here June 23, 24 and 25.

Sheep entries in the annual Rambouillet show and sale indicate that facilities at the sale barns will be taxed to capacity with choice animals from the leading breeders of the nation. For the rodeo events, ropers and riders are sending inquiries concerning the various events, indicating that some of the best talent of the Southwest will be on hand to compete for the prize money in this division of the three-day program.

Paul Perner, chairman of races, has announced one of the best racing cards in the history of the local show. Coming halfway between meets at Rocksprings and Brady, race horse men will be able to make a circuit for the three weeks and this convenient spacing of shows is expected to bring top horses from some of the best stables in the state.

A section of the north end of the grand stand, damaged by wind, has been replaced and the structure put in first class condition. Pens and stables have been repaired, the track is to be put in good condition and everything made shipshape for the three-day entertainment, according to Wayne West, association president.

Extension To Powell Field Pool Completed

A southeast extension to the Powell Field in Crockett County was announced yesterday with completion of Mac T. Anderson's No. 1 P. J. Sorg estate for 717 barrels of pipe line oil on the pump at 2,604 feet in lime. Production is natural.

The well, which has an elevation of 2,725 feet, topped the pay at 2,597. It is 1,650 feet from the south, 330 feet from the west line of section 61-BB-GC&SF.

Clifton Taliaferro has entered Texas Tech in Lubbock for a six weeks course in two subjects. He will work with Joe Haddon and play the trombone in the Tech band one hour each afternoon and one hour every Wednesday in the Slaton band which Mr. Haddon directs.

Early Crockett Lambs Bring 7 1/2 At Fort Worth

65-70 Pound Averages For Lambs Of Local Growers

Early Crockett County lambs, fattened on the splendid range in this county resulting from frequent rains during the Spring, brought 7 1/2 cents on the Fort Worth market this week.

The lambs, shipped from here by truck, are averaging better than 60 pounds.

West Brothers and Carson have shipped 6,600 head of lambs to Fort Worth, receiving 7 1/2 cents. The lambs averaged 68 pounds.

Ned Friend shipped 370 head which averaged 65 pounds, selling at the same price. Lee Childress shipped 320 head of lambs and 80 ewes, but reports were lacking yesterday on the weight and price of this shipment.

All-Day Program Of Missionary Society At V. I. Pierce Ranch

The first all-day meeting and program of the summer period planned by the Woman's Missionary Society of the Methodist Church will be held next Wednesday at the ranch home of Mrs. V. I. Pierce. The meeting was postponed from Wednesday of this week.

The study topic for the day's program will be "Building the Kingdom of God in Japan." Music will be furnished by Mrs. V. I. Pierce. Mrs. Charles Williams will lead the program. Scripture reading will be by Mrs. J. C. Montgomery, and talks will be made by Mrs. L. B. Cox and Mrs. Alvin Harrell. Mrs. Scott Peters will give a report on the work of the committee on Christian Social Relations. Another matter to be discussed will be the vacation Bible school to be conducted at the church during the summer months.

SON TO SUDDERTHS

A son was born Saturday to Mr. and Mrs. Earle W. Sudderth of Van Horn in a San Angelo hospital. The infant has been named Jerry Friend Sudderth. He is a grandson of Mr. and Mrs. Frank Friend of San Angelo, former Ozona residents. Mr. Sudderth is connected with the State Health Department, with headquarters in Van Horn.

Mrs. C. O. Walker of Lenders, Texas, is visiting her parents, Mr. and Mrs. P. T. Robison.

Coates Family Reunion To Be At Christoval

Descendants Of Wm. Duval Coates Gather Sat. And Sun.

Descendants of William Duval Coates, founder of the Coates family in this section, will gather next Saturday and Sunday under the pecan groves at Christoval for the annual family reunion, the second to be held at Christoval.

Last year's reunion was held at Christoval and approximately 150 persons were in attendance. Frank Friend of San Angelo and Ozona, was elected president of the reunion and Miss Dollye Coates of Ozona, secretary. Members of the Coates, Friend and Davidson families of Ozona will attend the reunion.

John Parker, former fire chief at San Angelo, and renowned as a barbecue cook, will prepare the barbecue for the reunion meals. Dr. W. D. Coates of San Jose, Calif., the only living child of the seven children of Mr. and Mrs. William Duval Coates, will be unable to attend the reunion this year.

OZONA STOCKMAN

Published Every Thursday at Ozona, Crockett County, Texas

SUBSCRIPTION PRICE One Year \$2.00 Six Months \$1.25 Outside of the State \$2.50

Notices of church entertainments where admission is charged, cards of thanks, resolutions of respect and all matter not news, will be charged for at regular advertising rates.

Any erroneous reflection upon the character of any person or firm appearing in these columns will be gladly and promptly corrected upon calling the attention of the management to the article in question.

CREDIT SITUATION

There is an old saying to the effect that "you can lead a horse to water but you can't make him drink." The national administration is learning something of the kind in its experience with the present bank credit situation.

The potential credit expansion based on present gold holdings and excess reserves is more than one hundred millions, yet bank credit continues to shrink. There is no good cause to be served by railing against the banks. The present administration is learning what the Hoover administration finally came to realize during 1931-32, namely, that the credit control technique is likely to backfire under abnormal conditions.

A floating bathtub which would permit one to take a bath in the sea, lake or river. The bathtub is made of rubber and has a tubular rim which is blown up. In its sides and bottom are perforations which permit water to flow inside the tub when the bather sits in it.

THE FORGOTTEN MAN

ODD INVENTIONS

Washington, D. C.—Among inventions patented recently were two unusual ones. They were:

A fish lure that makes it possible to use the same bait over and over again. The hollow lure is made of a transparent material, like celluloid through which the fish can see the bait inside. In use it is stuffed with bait, either alive or dead, through an opening which is sealed by a plug.

A floating bathtub which would permit one to take a bath in the sea, lake or river. The bathtub is made of rubber and has a tubular rim which is blown up. In its sides and bottom are perforations which permit water to flow inside the tub when the bather sits in it.

WAVE OF KIDNAPING

It is to be hoped that Federal assumption of the chase for the murderers of little Peter Levine results in early identification, capture and punishment in the case. The Florida kidnaping which follows hard on the Levine crime may have had its origin in the suggestion of the earlier case. The criminal mind is psychopathic—or perhaps psychological—to that extent. One crime breeds another. It is open to question whether kidnaping and similar terrible offenses could not be checked and similar terrible offenses could not be checked by a newspaper conspiracy of silence. Against that supposition is the obvious value that the newspaper plays in raising the hue and cry for the murderers.

In at least one notable West Coast instance of kidnaping and murder, it was newspaper publicity that brought comparatively quick capture for the youthful murderer and charted his course to the gallows hungry for his breed. The newspaper publications of the Lindbergh bank note numbers paved the way for Hauptmann's identification also.

Society is convinced that there must be effective measures to punish kidnaping. The death penalty can and should be invoked—there is no shadow of excuse for letting the type of criminal mind that can put kidnaping into effect to long darken the earth it disgraces. Needed, too, are means that will assure no retention of kidnaping profit by any member of the criminal's family or entourage. The extraordinary harsh measures which have been adopted at Alcatraz against kidnapers whose booty has not been recovered in entirety are certainly justified. Lighter penalties there can be purchased by revealing the cache.

Crimes of violence deserve no mercy. Justice must be assured but mercy is a word that has no place in the lexicon of the brutal. Juries err if they employ it.

—Dallas News.

BAN ON PRIVATE ARMIES

Remembering that Italy's Fascists and Germany's Nazis came into power largely by means of armed forces raised by minority political parties, many of those interested in the preservation of American democracy are proposing a Federal ban on the formation of "private military forces" other than those of recognized veterans' organizations. Representative Hamilton Fish of New York has introduced in Congress a bill to enact this proposal.

The carefully worded Fish bill does not seek to restrict in any way the political activities of Fascists or other minority groups, nor does it clash with the constitutional right of the individual citizen to bear arms. It merely would ban private armies, such as Hitler's Storm Troopers, on the ground that "the formation of private military forces in the United States leads to violence or the preparation for violence between such forces and persons or groups holding different opinions or with the civil authorities, or to interference with the rights and liberties guaranteed by the Constitution; and that "the formation of private military forces has the necessary effect of infringing upon the exclusive control by Congress over the armed forces of the United States"

The man who wants to wear a bright uniform and march in parades can always find a lodge to join. The one who wants military drill usually can find a vacancy in the National Guard. Only those who might wish to overthrow American democracy by force are likely to object to the ban. The Fish bill would impose on private armies using dangerous weapons.

—Dallas News.

SENATORS PROTEST AGAINST POLITICS IN RELIEF

As had been expected, the Senate has passed the Administration \$3,723,000,000 lending-spending bill virtually as it came from the House. Only minor changes must be settled in conference, so that the legislation probably will go to the President early this week. With the wage hour bill also taking final shape, Congress may adjourn within the week.

That prospect will be no more welcome to the lawmakers who must hasten home to mend their political fences, than to the businessmen who will be granted at least a brief breathing spell. Before Congress shall convene again, the Federal Government will have heard from the country—and that

may bring about a more sensible policy, a more "realistic" attitude toward business and industry, by the President and his advisers.

On that score one should not be highly optimistic, however. The outlook for restoring common sense to governmental affairs would be brighter had the Senate opposition, led by Byrd (Virginia) and Copeland (New York), and other spokesmen for the "economy bloc" succeeded in their efforts to limit Mr. Roosevelt's spending powers.

Certainly no emergency exists comparable with that five years ago, to call for giving the President a free hand again. Already cynics are remarking—not without justification—that "you can't beat four billion dollars." The power resident in that sum is far too much power to entrust to one man. Only a veritable national crisis would justify any such grant of authority.

With the elections coming on, the situation is charged with peril. If the people be not awakened to the dangers which threaten them, they will be selling their birthright for a relief allotment. Ironically enough, the money will come from their own pockets; it is borrowed and must be paid back. Directly and indirectly, everybody will pay, as taxes are added onto living costs.

With Mr. Roosevelt's oft repeated determination not to let anybody starve, all humane persons sympathize; but the business could be far better managed. Relief should be separated from politics. The minority demand that relief administration be turned back to the states and the communities, was soundly based. That step must be taken sooner or later, to check extravagance which is ruining the nation.

Were that impracticable, Congress at least should keep its own hands on the purse strings. Already one has heard so much talk about the political use of relief as to arouse suspicions of fire under all that smoke. To say the least, Administrator Hopkins' intervention in the Iowa primary fight over the senatorial nomination (for example) was a grave breach of the proprieties.

Sufficient protest has been

heard throughout the country to have called for a specific prohibition upon political activities by relief workers, as Senator Austin (Vermont) and Hatch (New Mexico) proposed. The strikingly close votes on their proposals—35 to 33 and 33 to 32, respectively—would indicate that the Senators are alert to the situation's dangers.

Mixing politics and relief could brew a major national scandal, if nothing worse. At any rate, here is an assignment for a Senate investigating committee. —San Antonio Express.

SULFANILAMIDE CURES

Sulfanilamide may be hard to pronounce, but it promises to become almost a household word within a few years. It is a chemical that already has saved thousands of lives and recently was credited with the conquest of two new diseases. Medical authorities say that no other single drug ever has been found effective for so wide a range of disease.

Malaria, childbed fever, erysipelas, gonorrhea, yellow fever, meningitis and some types of pneumonia have been responding to treatment with sulfanilamide. And now several doctors in Virginia have reported its successful use in curing undulant fever and streptococcus infection of the brain. A young girl nearly dead from brain infection was given big doses of sulfanilamide as a last resort and was back with her playmates in ten days. A Richmond man who contracted undulant fever from drinking unpasteurized milk was cured with sulfanilamide in eleven days, whereas treatment with other medicine often requires a year or more.

A scare was caused last fall by a number of deaths that occurred after self administration of an "elixir" of sulfanilamide for gonorrhea. But officials of the United States Public Health Service now attribute these deaths to use of diethylene glycol, a chemical similar to radiator antifreeze, that was used to dissolve the sulfanilamide. Medical authorities of high standing have expressed conviction that sulfanilamide, even when given in large quantities, does not cause any harmful effects. In hospitals and clinics over the country, it is being used regularly in treating

gonorrhea; and its use in curing other ailments is reported to be increasing rapidly.—Dallas News.

RELIEF COSTS UP

New York, N. Y.—Despite a rise of 70.8 per cent in industrial production and a drop of 45.8 per cent in unemployment, Federal relief costs increased from \$360,000,000 in the fiscal year 1932-33 to \$2,467,000,000 in 1936-37, the National Industrial Conference Board reported recently. The rise in the relief outlay amounted to 586.2 per cent, according to the board.

"The fiscal year 1936-37 registered the peak of recovery in industrial production and the lowest point in unemployment in five years," the board said. "Yet, notwithstanding these evidences of returning prosperity, Federal expenditures for relief in the same year reached an all time high."

SHIP VIA ALAMO TRUCK LINE SAN ANGELO — OZONA SAN ANTONIO HOUSTON

NOTICE OF REWARD I am offering \$500 Reward for apprehension and conviction of guilty parties to every theft of livestock in Crockett County — except that no officer of Crockett County may claim the reward. W. S. WILLIS Sheriff, Crockett County

Pull Up Your Anchor!

SET YOUR SAILS, GET A NEW START AND KEEP GOING

The merchant who is anchored to old ideas never gets anywhere.

You Must Modernize With

New Ideas, New Fixtures, New Goods

In the early days of shipping, the foreign captains took in sail at night and just loafed along. It took Americans to show how to make fast voyages by carrying sail day and night. They soon had the business away from their foreign competitors.

So it is with merchants—you have got to keep your goods constantly before the public or you lag behind. Keep up with the modern methods with New Ideas, New Goods, New Styles, Moderate and Reasonable Prices and most important of all—

ADVERTISE

Ever Growing Army Of Well Equipped Fishermen Brings Problem To State Commission To Provide Good Fishing

Tucker Says Cooperation Necessary For Solution

By Will J. Tucker
Executive Secretary, Game, Fish and Oyster Commission

When the first arc light was put in operation at the corner of the block in the small town where I grew to a realization of the wonders of the world, it was a signal of great progress and aroused much civic pride. It presaged the passing of the kerosene lamp. The light tender who scaled the high pole each morning to replace the carbon was a hero to all the boys of the community. He knew something about a mysterious new element. His morning round of pole climbing brought forth the neighborhood boys, eager to get the small pieces of carbon. He made a friend for life when he brought down the sometime slightly used carbon sticks, not trusting to breaking them by a throw to the ground, and with fine impartiality occasionally gave the smaller boys that which they could not have won in a wild scramble.

The lighted space provided by the arc light of forty years ago was the early evening rendezvous of the boys of the community. There were no automobiles and the street intersection was a fine place to play. It was the drill ground of our juvenile military company, imitating our elders who were getting ready for the Spanish-American War.

But I came to the arc light many mornings for a purpose other than getting carbon sticks. I discovered that just about the time the dogwoods began to bloom the lights attracted a myriad of precious insects, many of which fell to the ground, and were there to be taken with little effort. It was there that I first began a serious study of practical entomology.

I soon learned to gather only those bugs which fish liked best. The rarer ones I traded with those peculiar boys who were content with mere bug collecting.

By this time you understand that the arc light was an important source of fish bait, and that in my estimation it was justified from that fact alone. It taught me early to know those bugs which the fish liked best. I developed into a "fly fisherman" without benefit of bambax rod, or dressed line.

When the earlier electric development was in progress we did not see any other possible connection with fishing. But electricity is now so important in every day life that we are making every effort to provide it more cheaply. That is urging the erection of hydro electric dams, and in many places these dams are capable of producing better fishing, if fish are given proper consideration as one of their important byproducts. But I shall deal with that a little later.

Looking back over a life that had brought me to boyhood at the time the Maine was sunk, I find that I am inclined to view all progress in its bearing on wildlife. Perhaps that is as it should be. Too many are prone to forget that which makes life possible, pleasant or even endurable.

When I had to work in a printing office during vacations, the introduction of the Linotype was important in that it made it possible to get the paper out earlier, and thereby provide more time for fishing, swimming and hunting.

The first automobile appealed to me as a wonderful device for reaching the haunts of wildlife. All places in walking or horse distance had been explored long before there was any possibility of automobile ownership, so far as I was concerned. As a matter of fact, however, the first automobile in which I had a direct interest was purchased jointly by Harry Green and me. We pooled our financial resources and went into debt rather deeply so that we might explore some new hunting and fishing places—and get there while they were still good. We alarmingly foresaw that all good places soon would be completely exploited. Why, over some very bad pioneer roads (if you took a long enough cold potatoes, spare parts, and extra inner tubes) one had reasonable assurance of getting as far away as a hundred miles in a couple of days. It was getting so you could purchase gas oil, if you had the money, in even some of the smaller towns.

We liked hunting and fishing, and we believed in the most up-to-date methods. Many years before I had seen the late Congressman Buchanan out with a casting rod and reel. Much to my surprise he was catching largemouth black bass, which I then called trout, like most everybody else in the South. My silversides on a Sproat hook were doing fairly effective work. But immediately I liked the idea of moving about and going after the fish. It wasn't long before I had saved enough to buy a casting outfit and two lures. They were sure killers, maybe because

ICKES' BRIDE

Miss Jane Dahman of Milwaukee who was married in Dublin, Ireland, to Secretary of the Interior Harold Ickes. Ickes is sixty-four and his bride is twenty-five. The new Mrs. Ickes had been abroad for some weeks, staying at the home of her uncle, John Cudahy, United States minister to the Irish Free State. She is a sister of Mrs. Wilmarth Ickes, whose husband, son of Secretary Ickes, died in 1936.

fish didn't know much about lures in those days.

Finally we got out in the country of white waters, where you didn't see anybody in a day's fishing. We found that where the fish had been fished for least they struck or bit best. Most of the waters were good, unspoiled, but there were some places that were just naturally bad. Around the campfire of evenings we would speculate on the possibility of reaching other fishing places on our next excursion—to beat the crowds there that were sure to come when more and more people bought automobiles. We did not even dream of the time when other pioneer anglers would try to find new fishing places from their aeroplanes. But that epoch in progress has long since been achieved.

Harry was down last week. He likes quiet lakes and streams. He thought I ought to know where to find such a place. We were willing to provide an automobile better than anyone dreamed of owning when we started fishing together. It didn't cost but about \$800. You couldn't have bought one as good twenty years ago for \$80,000, and it wouldn't have gone over the ruts of many roads of that time, even if one had owned such a grand automobile.

But I couldn't tell Harry about where to find any quiet lakes or streams, except a few private ones that after all have about them the atmosphere of artificiality. It was because almost everyone owns an automobile as good or better, and the state has spent millions of dollars building country roads better than our city sidewalks used to be.

Exploitation of fishing places no longer requires the endurance of pioneer hardships. You can buy your groceries on the banks of some of the favored fishing places and if you have the habit of some fishermen, there you can get a few bottles of cold beer or the makings of a highball. You can sleep in screened enclosures, with all of the comforts of home, where we used to be content to sleep where the rattlesnakes and cotton mouths were not too numerous. If you are an early riser you can go a hundred miles before breakfast, put in a day fishing and return after supper and by normal bed-

time. But you won't catch as many fish as we used to catch in the same number of hours fishing, even though you are aided and abetted by fishing tackle manufacturers who are thoroughly versed in fish psychology and by state and Federal fish culturists, who are trying to supplement the work of nature in keeping up with your demands.

But this is no apology for why it is so long between bites or strikes for the average fisherman. It is an effort to show what can be done to keep up with the reasonable demands of an increasing army of fishermen, if we use ordinary intelligence and pursue a course of good public policy.

If we are to provide better fishing we must consider all factors, and bring about such adjustments

as are economically possible and that will be socially popular. It is a job that requires technical competency and the bulwark of public support that should come as a result of adequate information. We must approach this subject with an understanding that we are dealing with an important publicly controlled natural resource.

Perhaps we never will be able to bring back all of those conditions which my friend Harry has enjoyed, but if you will follow through with me, we can provide him a better fishing place before he joins Ike Walton and the other fishermen, where the wind is always from the South; where the fish are forever hungry; where the dogwood blooms at all seasons, and the waters are clear, cool and inviting during the per-

petual twilight that casts its soft glow, in those regions of Heaven that are reserved for the most favored angels—the Anglers, who have never done worse than tell a fishing lie.

WHEN LIFE DEPENDS ON TIRE SAFETY

On May 30, Floyd Roberts shattered all track records for the 500 mile Indianapolis Race, averaging 117.2 miles an hour using Firestone Gum-Dipped Tires.

IT'S ALWAYS Firestone

FOR 19 CONSECUTIVE YEARS THE WINNERS OF THE INDIANAPOLIS 500-MILE RACE HAVE PROTECTED THEIR LIVES WITH FIRESTONE GUM-DIPPED TIRES

THEY said it couldn't be done — that tires could not withstand the torture of the new high speeds. Yet Floyd Roberts set a new record, at this year's Indianapolis Race, averaging 117.2 miles an hour for the 500 miles on Firestone Gum-Dipped Tires.

With the sun-baked brick of the straight-away and the granite-hard surface of the turns pulling and grinding at their tires, 33 daring drivers, every one on Firestone Tires, waged a thrilling battle for gold and glory. Never before have tires been called upon to take such punishment. Never in all the history of the motor car has tire safety been put to such a grueling test. Yet not one tire failed — not one single cord loosened — because Gum-Dipping, that famous Firestone patented process saturates and coats every cotton fiber in every cord in every ply with liquid rubber counteracting the tire-destroying internal friction and heat that ordinarily cause blowouts.

Why risk your life and the lives of others on unsafe tires? Join the Firestone SAVE A LIFE Campaign today by equipping your car with Firestone Triple-Safe Tires — the only tires made that are safety-proved on the speedways for your protection on the highways.

HOME BUILDERS' PAGE

Here's Answer To Demands For New, Inexpensive Houses

'Laboratory Community' In Washington Start of Nation-Wide Building Plan

Washington, D. C.—A vast plan to dot the nation with more than five thousand demonstration small homes has been inaugurated here.

Workmen began construction of the eight small homes which will form the "Laboratory community" as the national small homes demonstration site will be known.

From these eight homes builders throughout the country will select one or more for duplication in thousands of communities. These, in turn, are expected to stimulate isolated building activities into a vast and united home building program.

The national small homes demonstration is sponsored jointly by the National Retail Lumber Dealer's association and the National Lumber Manufacturers' association with the cooperation of the Federal Housing Administration and an allied group of manufacturers of home building materials and equipment. Following closely upon the new housing bill, passed by congress and signed by President Roosevelt on February 3, the demonstration provides the mechanics for actually showing the public that "a little money buys a lot of house today."

Build Eight Model Homes

Eight houses ranging in cost from \$1,750 to \$3,400, for materials and labor excluding land costs, are being built in suburban Washington to illustrate physically the range of size, price and accommodations of typical units for the low cost housing market.

The houses are designed to accommodate families of two to seven and to meet the FHA basic construction requirements.

They are being built at current market prices for both materials and labor and the prices quoted permit normal profits to manufacturers and builders. Prospective home owners, anywhere in the United States, can duplicate these modern durable homes within the same price range.

That today's actual building costs are considerably lower than the 1928 level is the message which the building industry wishes to impress upon the public consciousness. Leaders insist this is so, pointing out that comparison is the soundest basis to use in evaluating real estate values.

Some building material costs are above the level of a decade ago, they state, but add that other materials of lower cost and higher quality, requiring less labor to install, have taken the place of

Two of the recently completed new homes in Ozona. Top is the new home of Mr. and Mrs. O. D. Busby, built for the most part of native stone, with some decorative colored stones used. The walls are plastered and hardwood floors are used throughout.

Bottom is the new rock home of Mr. and Mrs. Sam Cox, completed early this year. Novel stones of random size, representing a collection from all parts of the country, were used in construction of the walls. Brick trim was used.

Two New Rock Homes In Ozona

materials formerly used so that in general today's actual building costs are considerably below the 1928 level.

Certainly there is no comparison between the value of the 1928-1938 home. Building sites cost less in 1938 than in 1926; today's financing methods offer large savings over the methods formerly in use; today's building plans increase the efficiency of the contractor's work, and insure a higher standard of specification for all equipment and workmanship. More and more material is now furnished pre fabricated, which means less hours of labor on the job. A few of many such examples are pre-fabricated windows and frames, endless flooring, wall-thick mineral wool insulation, large sections of tile and panel units, cabinets, mantels, etc., factory-made ready to install.

Houses of the "Laboratory community" contain from two to six rooms. Briefly, they are described as follows:

Model Homes Described

1. A minimum one story basementless, small house. Foundation size 24½ feet by 24½ feet. Contains extra large living room, one bed room, kitchen and bath. Affords minimum accommodations for two people.

2. A basementless, one story house with a smaller living room than No. 1, but with two bedrooms and an added utility room. Foundation size is 22 feet ten inches by 31 feet.

3. One step up in the cost range. Practically the same accommodations as one story two bedroom house No. 2 with the exception that the utility room is replaced with a full basement. Foundation size 22½ feet by 29½ feet.

4. A basementless, one story house containing large living-dining room, three bedrooms, kitchen, bath and utility room. A long rectangular shape, foundation size 22½ by 38½ feet.

5. A house with the basement built above ground in a semi-modern style. Contains hall, dining room, kitchen, utility room, and combination garage-porch on the first floor; living room, two bed rooms and bath on second. A new idea in above ground efficiency, this house has the same foundation area as No. 3.

6. A compact colonial type of six room house with three bed rooms. Foundation size 26½ feet by 25 feet. Designed to place a maximum amount of living area on a minimum amount of masonry, the extension of the second floor makes possible a three ber room house on a two bed room foundation size.

7. A compact house of large capacity at very low cost with six complete rooms and garage. There are three finished bedrooms and a large unfinished area which may be converted. Foundation size 23 feet 4 inches by 28 feet.

8. An interesting studio type, two bedroom, one story house containing large living room, two bed rooms, kitchen, bath and utility room. Foundation size is 22½ feet by 36 feet eight inches. Ideal for shore, mountain or rural use.

Specifications include mineral wool insulation against winter cold and summer heat and fire resistant mineral surfaced asphalt shingles.

Adequate Housing For Sanitation Is Need, Survey Shows

Washington, D. C.—The prevalence of congested and unsanitary living conditions in the 83 cities covered by the National Health Survey of 1935-36 is conclusive proof of the vast need for new housing accommodations, particularly for families of medium and low income.

Findings of the survey, published recently by the U. S. Public Health Service, show that overcrowding is prevalent in cities of

every size and in every section of the country. While wide variations were noted in the percentage of families living in over crowded quarters, the survey demonstrates that the problem is common to

small cities as well as large metropolitan centers.

A similar conclusion can be drawn from figures on the adequacy of sanitary facilities, although large city families are in a somewhat more favorable position than those living in communities of 25,000 or less.

"It is estimated by the Public Health Service that three million families in the United States have fewer rooms in their homes than there are persons; one million live in dwellings with more than one and one half times as many persons as there are rooms; seven hundred thousand live in dwellings with at least twice as many persons as there are rooms," the Administrator said.

Contrary to the general belief that crowding is most prevalent in the great metropolitan centers, the survey shows that the greatest incidence of over crowding appears in the Southern states where 25 per cent of the families studied lived in dwellings with more than one person per room. In the Central and Eastern sections some 15 per cent of the families live under crowded conditions while crowding is found in only 10 per cent of the families in the Western states covered.

134,000 CLAIMS APPROVED
The Social Security Board has approved payment of approximately \$4,250,000 to 134,000 claimants of lump sum benefits under old-age insurance provisions of the Social Security Act.

THIS LONE STAR STATE
By W. T. Carley

Activities of Our Ex-Governors
Oscar Branch Colquitt, dean of seven surviving governors, is now 76, and approaches life's golden sunset in semi-retirement, with the consciousness of a life well spent and reveling in the fragrance of many beautiful flowers blossoming in his rose garden of golden memories.

James E. Ferguson, now 67, still bubbles with politics, but his great delight is in the development of his dairy cattle and operation of his creamery. Every summer he makes several thousand quarts of milk to the underprivileged children of Austin.

William Pleasant Hobby, now 67, directs the editorial and business destiny of The Houston Post and takes an active part in every civic betterment of Texas' largest city. But the star of his life is the 12-year-old son, William, a veritable mental prodigy, whose progress is watched with a worshipful idolatry.

Pat Morris Neff, now 67, is making his presidency of Baylor University, the very zenith of his brilliant public career. The famous school that was chartered in the days of the republic now enjoys the best financial condition in its entire history, and rigid obedience to authority now permeates the entire student body.

Mrs. Mariam A. Ferguson, now 67, typical daughter of the Old South, gives all of her time to her home and flowers, and lets the political world go by without a single thought.

Dan Moody is now 45, and the energy that swept him into the governor's office by a majority of 25,128 votes is freely employed in the practice of law. The Moody children are growing up fast now. Dan Junior is 9 and Nancy Paxton is 5.

Ross Shaw Sterling, now 63, heads his own oil and refining company and has producing wells in numerous South Texas fields. Not in spite of his well known profession as an oil man, his absorbing hobby is the hundred-acre farm adjoining his Bayshore home, 26 miles out of Houston, where he has some of the finest hogs in the state, and when he starts talking about his corn and hogs, he forgets all about the oil business — and even politics.

Mrs. S. B. Phillips, Miss Lela Mae Phillips, Billie Gene Linthicum, and Mr. and Mrs. Babe Phillips and son, Kenneth, spent last week-end visiting at the ranch home of Mr. and Mrs. Clay Adams near Pumpville.

By "I saw it in the Stockman."

Czechs Hold Key to European War or Peace

1—War or peace in Europe largely hinges on the future actions of Konrad Henlein, leader of Czechoslovakia's Sudeten Germans whose demand for autonomy precipitated a grave international crisis. 2—Tank corps of the Czechoslovakian army called out to quell disorders during recent municipal elections and to resist possible German invasion. 3—Foreign Minister Kamil Krofta of Czechoslovakia who held peace conferences with Henlein and who has played an important part in shaping foreign policy in the recent crisis.

TO THE PEOPLE OF THE 112TH JUDICIAL DISTRICT:

I wish to take this means of announcing as a candidate for the office of District Judge of the 112th Judicial District of Texas, composed of Pecos, Upton, Crockett, Sutton and Kimble Counties, subject to the action of the Democratic Primary.

If nominated and elected I pledge an administration free from favor, and a conscientious devotion to the proper discharge of duty.

It is my desire and hope to visit you personally, and to have the honor of your vote and support.

W. A. Hadden,
Attorney-at-law,
Fort Stockton, Texas

Texas cities are in the forefront in number and scope of air conditioning installations in stores. In the nation, more than 700 department stores now have conditioned air as an aid to maintaining sales regardless of outside weather.

Three hairnets, please.
What strength? ?
Two dances and a car ride.

The first successful adding machine was sold in 1884.

CORRECTION

It was erroneously stated in last week's paper that Babe Phillips paid a fine on a charge of drunkenness. The charge as recorded on the docket in justice court was speeding. The Stockman regrets this error and cheerfully makes this correction.

ONE-MINUTE STORIES OF 100 TEXANS

By W. T. Carley

George W. Brackenridge

Was born in Indiana in 1832. He came with his parents to Texas in 1853, when the family settled in Jackson county. His father had been a distinguished member of the Indiana bar and his grandfather had served for forty years as pastor of the First Presbyterian Church in Washington, D. C.

During the Civil War Brackenridge filled an important position in the federal treasury, while three brothers followed the fortunes of the Southern Confederacy. In 1866, Charles W. Stillman, a Brownsville capitalist, provided sufficient funds for the latter to organize the San Antonio National Bank.

This bank, headed by Brackenridge, was the second in Texas to be organized under the national banking act, the first in the nation to have a woman director, and provided the nucleus of a great fortune destined to become a blessing to all of Texas.

During his 30 year service as a member of the board of regents of Texas University he saw the need of a cooperative boarding hall in which deserving young men might secure a higher education at a nominal cost, and the famous "B-Hall" was built with his own funds in 1891.

His benevolent spirit gave the city of San Antonio four costly school buildings and one of the most beautiful parks in the entire nation. His generosity has blessed

New "Airacuda" Fights 30,000 Feet Overhead

One of the new "Airacuda" fighting planes of which 13 have been ordered by the War department. The plane, of revolutionary new design, has a fighting ceiling above 30,000 feet, has its propellers located behind the wings instead of in front and is equipped with two specially designed engines. The War department states that the speed of the plane "is believed to be sufficient to overhual any modern bomber now in production or building."

the lives of thousands and generations yet unborn will speak his name with reverence as they thank their Maker for such a splendid life that has proven such an untold blessing to all the people of this Lone Star State.

SCOUT NOTES

From Concho Valley Council
Camp Louis Farr

Camp Louis Farr opened its three weeks summer training camp period on Sunday evening, June 5th. L. Malcolm R. Rogers, field Scout Executive, is directing the camp. He is being assisted by Sea Scout Skipper Earl Starkie, commissary director; James Benton, in charge of First Aid; Oscar Avera, Director Water Front; Vern Leonard, Instructor in Archery. Other officials are Duane Smith, Scoutmaster from Sanderson, J. B. Morris of Texan, and Scout leaders from Crane, Sonora, San Angelo, Sterling City and Ozona.

The camp for the second week will be attended by Troops 4, 6, 7, and 8 San Angelo; 23 and 24,

Brady; 29 and 30 Ballinger; 54 Garden City; 40 Carlsbad; and 19 Eldorado, and 52 Bronte.

Scouts To Aid Celebration

As part of their vacation program, the Scouts are being trained this month to assist their communities in conducting their local celebration. The Annual Rodeo and Barbecue at Ozona on June 23, 24 and 25, will find the Scouts assisting many ways. The celebration at Ballinger will have as a feature the dedication of the newly constructed Scout cabin on June 29th. The Scouts at Christoval will aid at the July 4th celebration, and the Scouts in San Angelo will help take care of the huge crowd who will witness the gigantic fireworks display at Santa Fe Park that night.

Industrial Hikes

Industrial hikes by Troops in the various sections of the Concho Valley Council, have been scheduled for the summer months. During the summer, the Scouts will visit ranches, wool houses, electric light plants, water systems, gas distribution systems, telephone headquarters, newspaper

offices, banks, and other businesses and industries. The Scouts will seek to widen their knowledge of the practical things that are all about them in order that they may be better prepared to carry on both their Scout work and their obligations as citizens.

Executive Board To Meet

The Executive Board of the Concho Valley Council will hold its regular monthly meeting June 14 at Camp Louis Farr. The board members will visit the Scouts at the camp and transact the business of the council in a brief session, according to Henry Ragsdale, president of the council.

NEW JERSEY SENATE FORBIDS SIT-DOWNS

Trenton, N. J.—The New Jersey Senate has unanimously passed a bill forbidding sit-down and stay-in strikes in the state.

Designed to curb the unchecked violence sponsored by labor racketeers, the bill provides a 15-year prison term for persons instigating such strikes or violence. A three man board, composed of a

representative of labor, one of management and one neutral member, would enforce the law.

Labor unions would also be required to furnish the board with a list of officers and to register the locations of union headquarters.

The bill has been sent to the House where it is expected to be approved.

Daughter: The girl who baptizes is lost.
Father: Nonsense, she's still

To the Voters and Citizens of the 86th Representative District:

It has already been my pleasure to meet many people of this section and I am planning to take every opportunity to make your personal acquaintance and discuss with each individually the problems and issues connected with the office of State Representative for which I am asking consideration at your hands.

For the reason that I may not have such an opportunity with all of the voters of this great livestock district I am taking this means of placing before the people of this section my views upon matters of public concern and interest.

Our State Auditor has recently made a very full report upon all activities and branches of our State Government. This report brings out all instances where these branches overlap and where these activities conflict. The point is made that our present deficiency of State funds (overdraft if you please) may be overcome with economies resulting from reorganization, and in many instances, elimination of unnecessary offices and bureaus. If elected it is my purpose to support such a program of economy and reorganization. Such things have been done in recent years in other States without injury or loss of efficiency and I believe by cooperation we can do as much in Texas. When I took office as County Judge of Edwards County in 1925 the County was one year behind in the payment of accounts. When I retired in 1931 at the expiration of a third term we had reduced the tax rate and had funds on hand to run until the beginning of the next tax paying period.

I believe we should go back to the old Democratic principles of local self government and that the flow of power from your local officers to the bureaus and appointive State and Federal offices should be stopped.

I believe society owes the worthy people of this State and who have made it what it is today, security and independence in their declining years and pledge my support of adequate old age assistance as the people voted for it and not as now administered by a bunch of "case workers" who are not in sympathy with the purpose and intention of the law.

I have spent fourteen years attending different schools, three years in the school room as a teacher, six years as Ex-Officio County Superintendent and at present have two children attending the public school at Rocksprings, Texas. I am making rapid strides in an Educational way and I will be glad of an opportunity to support the program which is offered by our school authorities and teachers over the State. I feel myself to be well informed in reference to school matters and believe this State has no more important duty than to provide and maintain a school system that will train and educate our children as well as children are in other States.

Many Southern States in recent years by intelligent, concerted effort have attracted outside capital and new business and industries. I believe we have conditions and natural resources in Texas that could enable us to do the same thing and that such a policy would serve to greatly expand and develop the business and wealth of our State.

With reference to matters of local importance I call attention to the unsatisfactory laws we now have governing the trucking business of this State. West Texas cannot do business without motor transportation and the business men and truckmen of this section are demanding a change. We must have laws to regulate the business and protect all people including shippers but it is necessary that these laws be reasonable and permit the truckmen to make a fair living and render proper service. There is not a district in the State more dependent upon the truck than this and many business men, and particularly ranchmen, have suffered unnecessary loss of time and money because of the limitations and restrictions of the law. I am in favor of materially increasing the load limit and making other necessary changes in the law.

It is my opinion that we should have a fair and sensible "Fair Trade" law to protect the small town merchant and business men and likewise the consumers so that the big corporations will not be permitted to drive our friends and neighbors out of business and then make it all back with interest when they have killed all competition.

You are selecting a person to look out for your interests in the State Legislature for the next two years, a person who should know all the conditions and needs of this ranch district and when to vote for and when to vote against the measures that will crowd the next session of the Legislature. I believe the more experience and contact your representative has had in the business and with the people of this district the more successfully he may be expected to serve and protect your interests in Austin. May I call your attention to the fact that I was born in Edwards County and have spent all of my life, 37 years, in this district. I started out about 20 years ago in vacation and as I had time doing ranch and common labor by the day and through the years have become familiar with all of the activities and conditions of this territory. I now own a small ranch in Edwards County and have first hand information about the problems which confront that business. I will need your help to be elected and if I am I pledge myself to merit that help with sincere and conscientious service in your behalf.

It is my intention to discuss further questions from time to time and I will be glad to have anyone mention a subject in which he or she is interested, either in person or by letter addressed to me at Rocksprings, Texas.

Respectfully submitted for your consideration,
C. H. GILMER, Candidate for nomination as State Representative, 86th District.

The LIVESTOCK SITUATION

Los Angeles, Calif.—Magnitude of the livestock business and its importance to the United States is brought out in figures released by the U. S. Department of Agriculture. Meat and dairy products realized a cash income to farmers and stockmen in 1937 amounting to \$2,269,000. This represented a slight decrease in 1936, when cash income from animals was \$2,277,000,000. The decrease is significant when it is remembered that livestock prices generally were higher than in 1937, indicating that the American consumer paid fewer dollars for meat than in 1936. The decrease is due mainly to the smaller number of hogs marketed in the country as a whole last year.

Increased income from cattle and hogs was reported in all of the western states. Arizona's total agricultural income showed the greatest increase in 1937 over 1936, any state in the Union, the gain being 29%.

When totals for all livestock products are added to livestock products, principally milk and butter, the 1937 income showed a gain over the preceding year, total income being \$5,298,588,000 in 1937 against \$5,125,194,000 in 1936.

Of the eleven western states, California had by far the largest cash income from livestock and livestock products, the 1937 income totaling \$212,807,000. Second in this group was Washington, with income of \$74,717,000.

In the United States as a whole, over 50 per cent of all cash income to farmers comes from livestock and livestock products.

"Iron Better Than Gold," Says Goering

Field Marshal Hermann Goering (center) inspecting the site of the new Hermann Goering Iron foundries at Linz, Austria, after laying the cornerstone recently. In his dedicatory speech he said, "Let others have gold, we are happy to have iron."

livestock and livestock product sales. Thus, the degree of prosperity attained by the stockmen and dairymen is of extreme economic importance to the welfare of the nation as a whole. One of the amazing things about the livestock business is that all sales of meat animals are on a cash basis. This practice has always held good on the great central markets, where cash must be paid for all livestock sold within a few hours after the animals have crossed the scales. Thus, through the system built up at the great public stock yards over the country, the nation's several billion dollar livestock income means that actual cash is going into trade channels each day in the year.

LAWS AND MORE LAWS

POSTED—All lands owned by B Trap Co. are posted against pothauling, trapping, hunting any form of trespassing. Violators will be prosecuted.
O. B. TRAP CO. 11-8

Moses was presented only Ten Commandments and Woodrow Wilson delivered Fourteen Points before the Versailles Peace Conference, but Legislatures of 13 American states in regular session

last year enacted 18,483 new laws. The record is a tribute to the ingenuity of the Senators and Representatives who from coast to coast have joyously assumed the burden of regulating other people's lives. That only 1,245 or about 7 per cent, of these bills were vetoed would suggest that some of the state executives were not so alert as they might be. First prize goes to Minnesota, where, out of 3,037 proposals for the salvation of organized society, only 495 were enacted. Ohio's record could be worse. Of the 1,085 measures cast before the lawgivers at Columbus, only 298 were approved. Thomas Jefferson proclaimed that the government is best which governs least. He would be more than mildly surprised were he to observe this interesting and somewhat alarming development in the democracy he helped to found for the protection of the rights of man.—Cleveland Plain Dealer.

Dedicate West Texas C C Headquarters At Abilene June 15

Abilene, June 8 — Representatives from all of the 130 counties and 190 towns affiliated with the West Texas Chamber of Commerce will be here Wednesday, June 15, for the formal opening and dedication of the new WTCC headquarters building and resource and museum institute.

Speakers on the dedication program will include Governor James V. Allred, H. S. Hilburn, WTCC president; Mayor W. W. Hair, Abilene; Milburn McCarty, Eastland; Ray Nichols, Vernon; Gene Howe, Amarillo; and I. C. Hunter, president of Abilene Chamber of Commerce.

West Texans will have an opportunity to learn more about West Texas in thirty minutes than they could in three months of intensive travel and study when they are carried on a radio tour which will be broadcast on a seven station hookup beginning at 2:00 p. m. The tour was mapped by Manager D. A. Bandoen, Max Bentley, Abilene, chairman of the Editorial Board, will be master of ceremonies and announcer.

Visitors and listeners will be taken to ten exhibits, each sponsored by a WTCC district to tell the story of a major West Texas resource, in the resource and museum hall. Each WTCC district director will explain briefly the exhibit of his district. Walter D. Cline, Wichita Falls, chairman of the Resource Board, will be the first speaker on the tour. District directors and the exhibit they will explain are: C. A. Studer, Canadian, wheat; James D. Hamlin, Farwell, land; J. J. Gallaher, Graham, oil; Amon G. Cartr, Fort Worth, industrial; Tate May, Hamlin, cotton and feed; B. Reagan, Big Spring, cattle; H. Y. Overstreet, Texico, minerals; C. E. Casebier, Fort Stockton, climate; Dr. L. H. Webb, Kerrville, wool and mohair; and J. Thomas Davis, Stephenville, diversification. Other talks will be made by W. C. Holden of Texas Technological college, Lubbock, on the WTCC museum, and Rev. W. P. Gerhart, Abilene, on the WTCC are display.

"John, dear," said Mrs. Brown, "such an odd thing happened today. The clock fell off the wall, and if it had fallen a moment sooner it would have hit mother."
"I always said that clock was slow."

Texas Shows Fair Average In First Quarter Business

Dallas, June 8—Showing neither spectacular gains nor relatively severe losses, the Texas table in the state-by-state business record for the first quarter of 1938 compared to the same period of 1937 reveals four "plus" and four "minus" ratings in the eight key business indices covered by the tabulation, says a report of the All-South Development Council.

On the whole, compared to the national figures on "percentage of gain or loss," the Texas showing was favorable, since only in the "heavy construction" table did the nation as a whole show a gain, and the Texas declines were less severe than the national averages.

Boosted by gains of more than a hundred per cent by several states, "heavy construction" advanced in the nation wide picture by 27 per cent, with Texas up 32. Louisiana, whose intensive drive from new industries helped make it the nation's leader in this field in 1937, carried on with a 205 per cent gain in 1938's first quarter. Oklahoma was up 155 per cent. Electric power output was up

19 per cent in Texas, against a national decline of 6 per cent; farm income in this state rose 10 per cent while dropping 14 per cent nationally, and life insurance sales gained 5 per cent, against a national drop of 18.

On the minus side, Texas dropped 16 per cent in passenger car and 12 in commercial car sales, the nation wide declines being 48 and 35, respectively. In household refrigerator sales, a good standard-of-living gauge, the Texas

drop was 18 per cent, more than Louisiana's (-7), but well under the national score of -45. In "value of checks drawn" the Lone Star State slumped 4 per cent against the national drop of 22 per cent.

DANCE—Saturday Night

"Lonesome?"

NOT AT ALL!"

Convalescence is much less tiresome when you have an extension telephone in the bedroom, for you can then talk with many more friends than could possibly come to see you. Convenience is another reason you'll want one... an extension telephone saves many steps each day. And privacy... so you can have personal conversations without the embarrassment of having others overhear. And a bedroom telephone gives a reassuring sense of security at night, should emergencies of any kind arise.

Come in Today!

SEE HOW ROYAL MASTERS STOP A CAR FROM 4 to 223 FEET QUICKER

STOPS QUICKER
When brakes are applied, the "de-skidded" cross cuts go into action... hundreds of sharp gripping edges bite through the slippery surface film... enable the flexible tread units to solidly grip the pavement.

CONTROLS SIDE SKIDS
When the weight of the car suddenly shifts to the side, in turning corners, passing cars, etc., the sharp lateral edges of the seven continuous ribs go into action, instantly bite through the film and gain direct positive foothold on the road.

1 MINUTE TEST TELLS A SAFETY STORY YOU'LL NEVER FORGET		
OILED GRAVEL ROAD No. 11 WET 4 FEET QUICKER	OILED GRAVEL ROAD No. 11 WET 7 1/2 FEET QUICKER	ASPHALT COMPOSITION ROAD No. 6 WET 46 FEET QUICKER

Granddaughter Of Ozonan Weds English Doctor In Chilean Ceremony May 12th

Miss Carolyn Perner Becomes Bride of Dr. John Bradford In Chicquemata

Miss Carolyn Perner and Dr. John Bradford were married Thursday, May 12, in an early morning ceremony, in Chicquemata, Chile, at the home of Mr. and Mrs. Wheeler, general manager of an American oil company, according to a letter received here this week by the bride's grandmother, Mrs. Mary Perner.

The civil service, necessary in South American countries, was performed in the study of the Wheeler home before the entry into the thirty-foot living room, where a bank of flowers was arranged in front of a large east window to serve as an altar. The double ring ceremony was read by the rector of the church of England in the absence of the Methodist minister. Mrs. Wheeler played the wedding march.

The bride wore a suit of brown and tan with brown accessories. Her mother, Mrs. Harry Perner, who gave the bride away, wore black.

At the wedding breakfast, fruit cup, thin creamed chicken, French fried potatoes, coffee and rolls were served, followed by cake and champagne.

Dr. and Mrs. Bradford went to Buenos Aires on their honeymoon and returned to their home June 5.

Dr. Bradford is a native of England and will continue in the employ of the company in Chile. Mrs. Bradford went to Chile as a nurse for the same company but has resigned her position.

MISSIONARY GROUP CONTINUES BIBLE STUDY

The Nelson Circle of the Baptist Woman's Missionary Society met Wednesday afternoon at the home of Mrs. Leslie Nance. The circle continued its study of famous women of the Old Testament. The lesson was under the direction of Mrs. Clyde Childers and Mrs. J. S. Whatley. Other members present were Mrs. J. T. Patrick and Mrs. Nance.

The Lottie Moon Circle postponed its meeting for the reason that many members were out of the city.

BARBECUE SUPPER SWIM FOR VISITOR

Mrs. Joe T. Davidson entertained with a barbecue supper and swimming party at her ranch home Wednesday night, complimenting her niece, Miss Dorothy Ray Kesterson, of Memphis, Texas. The guests were Misses Athleen Dudley, Billie Gene Linthicum, Dorothy Drake, Clara Mae Dunlap, Maggie Seahorn, Lurinne Townsend, Catherine Childers, Mary Alice Smith, Crystelle Carson, Mary Bess Parker, Jean Drake, Ora Louise Cox, Dorothy Hannah, Lois Jones, Posey Baggett, Mary Margaret Harris, Lela Mae Phillips, Ele Bright Baggett, James Childers, Ray Boyd, Martin Harvick, Phil Sheridan, Taylor Deaton, William Beecher Childress, P. C. Perner, Jack Baggett, John Henderson, and Joe Thomas Davidson.

Mr. and Mrs. P. T. Robison will be hosts to their forty-two club at their home tonight.

Collegiate Dancer "Most Artistic"

Creation and artistic execution of modern dance won for Palma Robinson of Coleman, Texas, the annual Leman Award which is given to the senior making the most artistic contribution to Texas State College for Women in Denton. The daughter of Mr. and Mrs. C. V. Robinson, she has studied dancing in the department of Physical Education throughout her college career and has been presented in numerous programs throughout the state. The medal has been won by writers, artists and musicians, but this is the first time it has gone to a dancer.

MRS. BRASHEAR CONTRACT HOSTESS

Mrs. J. A. Brashear was hostess to her contract club at her home Tuesday morning. Mrs. Sherman Taylor held high score and Mrs. Melvin Brown, second high. Others present were Mrs. Boyd Clayton, Mrs. Massie West, Mrs. Jake Short, Mrs. Jimmie Blaylock and Miss Fannie Falls of Elgin.

Mrs. Richard Flowers entertained her contract club at her home this morning.

Mrs. Lowell Littleton left this morning for a visit with relatives in Lubbock. She was accompanied by Misses Lillian and Posey Baggett, who will visit for a few days with Mr. and Mrs. Walter Posey in Lubbock and will then visit relatives in Floydada. Also accompanying Mrs. Littleton was Willie Joe Hubbard, who will visit relatives in O'Donnell.

CMrs. L. B. Adams of San Antonio is here for a few days visit with her daughter, Mrs. Doug Kirby, and family.

Miss Fannie Falls of Elgin, Texas, is here for a few days visit with Mr. and Mrs. Jimmy Blaylock.

Mr. and Mrs. Melvin Brown have as their guest Mrs. Spencer Thomas of Brownwood, a sister of Mr. Brown.

Mrs. Jimmy Blaylock and Mrs. Melvin Brown are entertaining at the Hotel Ozona today complimenting two visitors, Miss Fannie Falls of Elgin, who is visiting Mr. and Mrs. Blaylock and Mr. Brown's sister, Mrs. Spencer Thomas of Brownwood who is a guest of Mr. and Mrs. Brown.

Mrs. Gilbert Noakes and two children of Corpus Christi are here for a visit with Mrs. Noakes' parents, Mr. and Mrs. A. W. Jones.

John W. Young returned to a San Angelo hospital early this week for further treatment. He has been ill for several weeks.

Mrs. Hubert Baker, who recently underwent an operation in a San Angelo hospital, is well on the road to recovery, it was reported this week. Mr. Baker, who is proprietor of the Piggly Wiggly store here, returned here this week.

Mr. and Mrs. J. M. Baggett have returned after a visit in Austin with their daughter, Mrs. Jerry Pace and family.

Mrs. Miller Robison and daughter, Eda Ann, who was born May 21, went home to their ranch Saturday.

Mr. and Mrs. George Bean and children have gone to Florida for their summer vacation.

Chas. E. Davidson, Jr., left by bus and train for Baton Rouge, La., Monday night to drive back with Mrs. Davidson and the two children who have been visiting Mr. and Mrs. Mark Garver. They expect to return the last of the week.

Mr. and Mrs. Ed Bean left for Alpine Tuesday. Mrs. Bean will enter Sul Ross for six weeks study necessary for an A. B. degree.

Maurice Lemmons has enrolled at Sul Ross State Teachers College at Alpine for the summer session.

Claude Meadows and son, Henry, of San Angelo were visiting friends in Ozona Tuesday.

Ned Friend was a visitor in town Tuesday.

Mrs. Gertrude Perry went to San Angelo on business Tuesday.

Beal Brashear has accepted a position with the shooting crew of the Humble Oil and Refining Co. geophysical crew stationed here.

Those were oddly simple days away back in the times of Patrick Henry, when all that the "gimme citizen" demanded was liberty.

It appears that when it came to the matter of supporting the John Lewis candidate in Pennsylvania, the voters went on a sit down strike.

Miss Elizabeth Coose left recently for San Antonio where she has enrolled at Draughton's Business College for the summer session. She was accompanied by her father, Steve Coose, who stopped off at Kerrville on the way back home for a visit with relatives.

HOLTS ENTERTAIN

Mr. and Mrs. Jack Holt entertained at their ranch home north of town last Friday night for a group of friends from Ballinger who came out for a visit. A barbecue supper was served from the ranch chuck wagon. Mr. and Mrs. Holt, who now make their home in Ballinger, where Mr. Holt is Ford agent, spent the week on the ranch to allow a vacation for the ranch foreman.

METHODIST CHURCH Eugene Slater, Minister Calendar of Services

Sunday School 9:45 a. m. Morning Worship 11:00 a. m. Evening Worship (In Park) 8:15 p. m.

Once each year under the leadership of the Board of Lay Activities in Nashville, each local Methodist Church observes Laymen's Day. This Sunday, June 12, has been designated by the board as Laymen's Day. The theme of the service for this year has been fashioned around the question, "Why go to Church?" Mr. J. A. Brashear, one of our own laymen, will be the speaker at the morning worship service as we observe Laymen's Day. Our Board of Stewards has prepared a service that is worthy of our full support.

The Rev. A. C. Nance will be the preacher at the Union Sunday evening service in the park at 8:15. We are happy over the attendance at the service last Sunday. Let's work to increase our attendance at this Sunday evening's service!

State Police Issue Safety Rules For Vacation Motorists

With vacation time approaching for thousands of Texans, state police today issued rules for highway travelers to follow in order to lower summer traffic casualties.

In outlining the rules, officials of the safety department warned that many vacation itineraries demanded hurried trips which often end in disaster. The rules are:

1. Get plenty of sleep and travel only reasonable distances each day.
2. Check your car for mechanical defects and use tires that are in good condition.
3. Never park on highways where your car will interfere with traffic movements.
4. Drive slowly enough that your car is always under control, as speed increases the severity of accidents. Pass other vehicles only when there is plenty of clearance and, when not passing, keep to the right.
5. Keep your driver's license with you.

The addressograph was invented in 1892.

Political Announcements

The Stockman is authorized to announce the following candidates for offices listed, subject to action of the Democratic primary in July.
