# THEORY ADVANCED IN PLANE'S CRASH

Disaster Is Termed as A "Puzzle" by Officials

IDENTITY

Survivors of Many Victims Hurry To Scene

GOODWIN, Ark., Jan. 16, (A).—
Theory that a low-lying east Arkansas fog contributed to the crash of an air liner that killed 17 persons was advanced Wednesday night but federal investigators described the disaster as a "puzzle."

Inhabitants of the area, a tangled morass in the Mississippi river low country, theorized the ship might have encountered trouble, dropped into one of the pools of fog common in the region and crashed into the swamp land trees trying to make an emergency landing.

Searchers found a few of the instruments of the stricken plane buried in the muck of the swamp. The air speed recorder was found, jammed immovably at 108 miles per hour. Both ignition switches of the engine were on and the plane's light controls showed the landing lights set at "off."

Pure and Phillips 3 Cowden Estimate 850 Barrels By FRANK GARDNER

By FRANK GARDNER

The performance of Phillips and Pure No. 3 Clyde Cowden insures a southeastern extension of the Goldsmith pool in northern Ector county. When the pay was topped at 4173 feet, there was sufficient flow of oil and gas for the well to clean itself out. Later, after further penetration of the prolific pay horizon, the test made two heads for an aggregate of 59 barrels of oil within a period of one hour and forty minutes. Production is coming through casing and separator, and operators plan to run tubing and test when tools are pulled.

Estimates on the possibilities of the No. 3 Cowden run at 850 barrels and more daily. The well is making an estimated 2,000,000 cubic feet of gas, a little more than the No. 2 well, about 1000 feet to the northwest, which was completed for 945 barrels per day through tubing. The well is bottomed at 4182 and will probably be completed at that depth.

The soviet Union's answer to what it calls war threats from Japan and Germany was an announcement that the red army, already the largest in the world, has been increased during the last year to 1,300,000 men.

In addition to this, the bolshevists estimate they have a trained reserve as large as that under the czars.

A wild ovation greeted the announcement of the army's huge size by the tall and handsome Tukhachevsky to the plenary meeting of the central executive committee of the communist party.

Just a year ago Tukhachevsky, speaking on the same platform in the remodeled throneroom of the czars, had announced an increase in the army to 940,000.

Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys.

The kidneys are one of Nature's chief ways of taking the acids and waste out of the blood. If they don't pass 3 pints a day and so get rid of more than 3 pounds of waste matter, your 15 miles of kidney tubes may need flushing.

If you have trouble with frequent bladder passages with scanty amount which often smart and burn, the 15 miles of kidney tubes may need flushing out. This danger signal may be the beginning of nagging backache, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes and dizziness.

Howard Hodge sends word that I was right in some ways and wrong in others the other day when I told about the woman who saw one of his pictures three times and then complained it was indecent.

He said it didn't happen before he came here. It was at Midland and the picture was "So This Is Africa."

If that's the Wheeler & Woolsey thin I'm thinking about, I don't blame her for seeing it three times.

Robert Elliott is a merchant of death—he performs virtually all the electrocutions along the upper Atlantic seaboard. His total now is well above 300, but he has not kept an accurate count himself.

"A lot of people tell me what a terrible job I have." Elliott once said, "but when I talked about retiring a while back there were about 600 applicants for the job."

His fees range from \$150 to \$250, depending on the arrangement with officials of Pennsylvania, New Jersey, New York, Massachusetts and other states in which he works. There is a reduced rate for a double execution; Elliott got \$400 last month for electrocuting Francis Wiley and Martin Farrell at Rockview Penitentiary, Pennsylvania. The fee in Pennsylvania for

# Woodul Recommends Pension Payment Plan

AUSTIN. (A). - A selective sales tax offers Texas a solution to

nancing old age pensions, in the opinion of Lieut.—Gov. Walter Woodul, who broke a tie vote in the preceding session in favor of Senate sales taxers.

Woodul, who will seek re-election this year, isn't sure Texans want a sales tax but he believes the popular demand for pension payments outweighs opposition to the tax.

Woodul advocated allocation of all proceeds of a selective sales tax to pensions. He announced his views as acting governor, serving while Gov. Allred was in California.

He declined to reveal his recommendation to the governor or when the next session should be convened to deal with the pension problem. Gov. Allred polled members of the legislature to ascertain the prevailing opinion.

# Red-Billed Pigeons Nearing Extinction

EAGLE PASS.—(P)—Visitors to Brackenridge Park zoo, San Antonio, will see the last specimens of the red-billed pigeon, common in Texas 100 years ago. At the time the state gained its independence the red-billed, or Torcaya' pigeon was mentioned by the colonists as among the most numerous birds. Disease and hunters practically decimated the species and the only known specimens are the several pairs in the aviary of David E. Hume here, and the thirty-six specimens he gave the Brackenridge zoo early this month. The pigeons are a slate-blue color with red bills. The zoo constructed a rock cote with a flyway about thirty feet long for the pigeons. Zoo officials wrote Mr. Hume that his gift was especially valuable in connection with the observance of the Texas Centinnial.
