SHADES OF ELMER GANTRY!

James Branch Cabell, novelist, reveals in a forth coming book one of the most interesting little sidelights on literature that you would care to see.

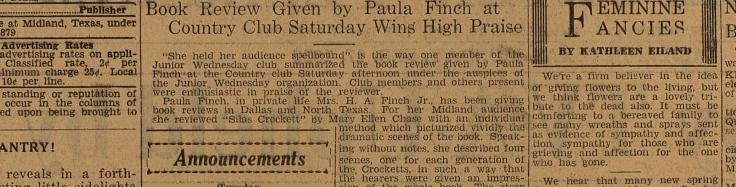

---Some years ago Mr. Cabell was a struggling young author, and Sinclair Lewis-his days of fame far in the future-was editor for a New York publishing house. One of Mr. Cabell's manuscripts came to Mr. Lewis, who reexplanation; and in this letter he explained that "the general public simply cannot be induced to buy novels about unattractive and ignoble people." One wonders just up to the people."

One wonders just what Mr. Lewis would say about that advice today. If ever a man grew rich and famous on "novels about unattractive and ignoble people," it is this access to the second state of the second s this same Sinclair Lewis. And Mr. Cabell, by the way,

this same Sinclair Lewis. And Mr. Cabell, by the way, runs him a fairly close second. It all goes to show, perhaps, that a novelist can break all the rules on the calendar with complete impunity—if he does it well enough.
