been there continuously through the terms of O. B. Colquitt, James E. Ferguson, William P. Hobby, Pat M. Neff, Mrs. Miriam A. Ferguson and Dan Moody.

'Noah's Ark', World Winner, Soon Here On the Vitaphone

Manager Williams of the Ritz Theatre announces next Thursday as the date set for the premiere of the world's greatest talking picture, 'Noah's Ark'. This epic of the screen took more than three years in the making, and includes over ten thousand extra characters in the cast, beside the stars who play the principal parts.

plex of one John Schneider, who plays at Montebello regularly. Schneider, it seems, is so modest that he hesitates to rise up and tell the world—or that part of it willing to listen—when he makes a hole-in-one.

GIRL HAS BIG BEANS

CLEBURNE, Tex., July 5.—(UP)—Four giant green beans, the longest of which measures exactly seventeen and a half inches in length have been grown here by Miss Audrey Fox.

LOCOMOTIVE LIGHTS ON T. A. T. FIELD

WACO, Tex., July 5.—(UP)—Lights resembling locomotive headlights will probably be used to illuminate Rich Field here which has been leased to the Texas Air Transport Company of Fort Worth.

HYMEN ON DUTY

DALLAS, Texas, July 5.—(UP)—Dan Cupid, the 'little God of love,' established a new record in Dallas County for June when 430 marriage licenses were issued.

Historic Cannon Recovered After A Long Absence

KENDALLVILLE, Ind., July 5.—(UP)—A cannon, stolen from Democrats of Kalamazoo, Mich., nearly three-quarters of a century ago, which has had a history for appearances and disappearances rivaling those of the 'little brown jug,' is going back to Kalamazoo for that city's centennial celebration.

Bare Leg Fad Is Worrying Ireland

BELFAST, Ireland, July 5.—(UP)—How to ban bare legs in business is a problem that is agitating Belfast business men. The bare-legged fashion which commenced with girl tennis players and athletes has now spread to typists who with the advent of hot weather have taken up the vogue with enthusiasm to the detriment, it is claimed, of the powers of concentration of male workers in the same office as the bare-legged typists.

WANTS NO PUBLICITY FOR MAKING GOLF HOLE IN ONE

LOS ANGELES, July 5.—(UP)—The locker room denizens at the Montebello Park golf course are at a loss to explain the queer com-

to his home here where he is suffering from a broken leg bone and bruises which he received last week in an accident of an unusual character. When the train on which he was riding came to a stop Lindsey stepped off to fix a hot box. Unfortunately the stop had been made on a bridge, Lindsey's fall was sixteen feet.

PLANE STILL UP

CULVER CITY, Calif., July 5.—(UP)—L. W. Mendell, and R. B. Reinhardt passed the seventy-two hour mark today in their effort to break the world's endurance flight record.

YO-YO CONTEST CARDED

A community wide yo-yo contest has been arranged for the city park that night. Devotees of the newest sport already have begun a daily training grind and latest top creations are in evidence.

EARTHQUAKE SHOCKS RECORDED MILES AWAY

CLEVELAND, O., July 5.—(UP)—Two earthquake shocks were recorded by John Carroll University seismograph today. Father F. L. Odenback reported the first shock at 9:37, the second ten minutes later. They were said to be about 5500 miles away.

THE FIRST BAPTIST CHURCH

George F. Brown, Pastor When Herbert Hoover was inaugurated his lips rested on the 18th verse of the 29th chapter of Proverbs. The pastor will preach from this verse next Sunday morning.

Tower To Solve Parking Problem

SANDUSKY, O., July 5.—(UP)—One of America's great problems—finding space for its millions of autos when they are not in motion—seems solved by the invention of J. E. Morton of Sandusky. Morton heads the Parking Tower Corporation which recently completed a 10-car storage device here, occupying no more space than the common backyard garage.

BRICKBAT SHOWER BOUNCES OFF HEADS AS TROLLEY STRIKERS FIGHT COMPANY

NEW ORLEANS, July 5.—(UP)—Violence met violence today in a four day street car strike as the traction company attempted to resume service with imported operators under heavy guard. The starting of three street cars resulted in two strikers being shot down and innumerable heads being bruised by bricks and sticks.

Last Minutes of Simba Thrilling

The last fifteen minutes of 'Simba,' the motion picture record of four years in the African jungles by Mr. and Mrs. Martin Johnson, coming to the Grand Theatre Sunday are exciting enough for an evening's entertainment. The spectacle of a handful of African natives, armed only with spears and shields, facing and slaying full-grown lions, will thrill anyone to the core.

'Y' BACHELORS IN WASHINGTON DETAIL IDEALS

WASHINGTON, July 5.—(UP)—Less necking, smoking and drinking, and more prudence and modesty are the improvements desired of the modern Miss by Y. M. C. A. bachelors here, according to answers received to a questionnaire distributed recently by association officials.

SENATE AND HOUSE WAITING FOR QUORUM SINCE MONDAY

AUSTIN, July 5.—(UP)—Entering its fifth months' work for this year, the forty-first legislature continued its watchful waiting today. Both branches were waiting for a quorum with little likelihood of one materializing before Monday.

NINE BROTHERS MAKE UP BALL TEAM; ARE GOOD

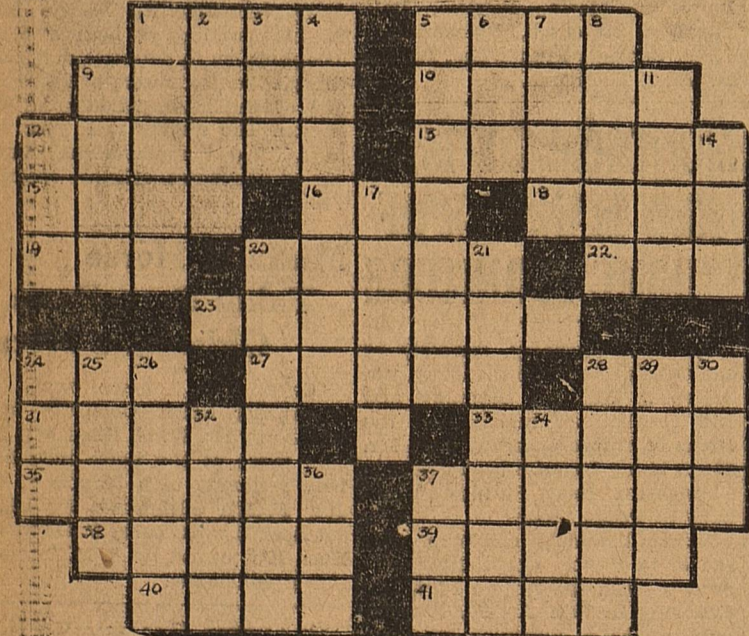

KEARNEY, Neb., July 5.—(UP)—'Baseball playing tools' are nine brothers, formerly of Kearney, who now are winning fame with their baseball team at Hawk Springs, Wyo., in the North Platte Valley Baseball League.

Negro Signs The Names of Governors In Flawless Way

AUSTIN, Texas, July 5.—(UP)—A Texas newspaper man a while back wrote an interesting story entitled 'Governors I Have Known' which reminded veteran capitol employees that an old-time darkey working in the governor's office could put out an absorbing story on 'Governor's Who Names I Have Signed.'

MAY BUSINESS WAS GREATEST YET RECORDED

WASHINGTON.—The volume of trade and industry in May was appreciably larger than in the same period of any preceding year, says Frank Greene's monthly review of general business conditions in Nation's Business, published by the Chamber of Commerce of the United States.

Contrary to the general belief, he says, retail trade is holding up well, and there is nothing to indicate that inventories are getting unduly heavy.

"With the evident spirit of co-operation shown in manufacturing," he explains, "it would be unthinkable to imagine that the present immense production is not finding adequate outlets in final distribution."

"While there has been a seasonal tapering off in business as the Spring has advanced, all obtainable comparisons point to new seasonal records in trade distribution and industrial movement."

Mr. Greene reports that the "most sanguine expectations in the iron and pig iron which in May exceeded previous peak months—March, 1929, and May, 1923, respectively—by fractions of one per cent and were larger than May a year ago by 25.3 and 18.6 per cent."

"For five months the ingot steel and pig iron outputs were respectively 14.3 and 16.1 per cent ahead of a year ago and set up new high records for the period."

"Automobile buying, though a powerful influence, was not alone responsible for this expansion. This may be gathered from the fact that the May output out automobiles although about 36 per cent ahead of May a year ago, was estimated at about six per cent below the record April output of 620,656 cars and trucks. June output is expected to show a small recession from May although far ahead of June a year ago."

"Other metal using industries such as pipe for gas and oil, machine tools, agricultural implements, plates for cars, heavy steel for locomotives, great quantities of steel and iron for electrical uses, and for the various lines of merchandise turned out for use in household electrical appliances have all helped the record outputs of these two basic industries."

"The returns of retail trade by department stores and chain and mail order houses for May show rather less diversity than in some preceding months. About a year ago, leading mail order houses began to show percentages of gains exceeding those recorded by the regular chain stores. This was attributed to the mail order concerns establishing branches and assuming the functions of regular chains."

"In May this year the chain stores reported 17.2 per cent gain, whereas the mail order concerns reported 37.2 per cent increase. For the five months the mail order houses indicate a percentage of gain of 30.3 per cent as against a possible gain by chain stores of 21.0 per cent. Department stores in May reported an increase of 2.4 per cent despite the fact that a majority of stores showed decreases. For four months of 1929 the gain was 3.4 per cent."

"Failures showed no great change, while liabilities were swelled in the South by bank suspensions in Florida. Wool prices like those of cotton went lower in May and wool manufacturing tended to increase consumption while talk of curtailment was heard in cotton manufacturing although that staple reached the year's low in late May. Furniture manufacturing was only fair. Shoe manufacturing in April showed a good gain but the four months' total was not greatly different from a year ago."

"Car loadings about the middle of April apparently began to reflect the large industrial output of the past winter and early spring, going to more than a million cars weekly on April 20, a full month ahead of a year ago. The last week of May saw the largest total of loadings for that period since 1926."

"May loadings gained 4.9 per cent over a year ago and were the largest for May of any year. The gain in loadings for the year to the end of May was 4.1 per cent over a year ago although still one per cent below 1927."

WIFE GIVES IN TO AIR CRAZE; FUTURE PILOT

NEW YORK, July 5.—(UP)—Airplanes are far safer than automobiles today and are easier to handle because traffic conditions are far better in the air than on the ground, according to Mrs. Ivan R. Gates, wife of the airplane manufacturer. Ten years ago, Mrs. Gates refused her then husband-to-be permission to pilot an airplane or fly in one.

Today she is taking instruction herself and will be able to handle a ship herself after a few more hours of flying time. "I used to be afraid to go into the air, but the experience I have had travelling from coast to coast in airplanes of the latest type has caused me to forget this fear," she declared. "In fact, riding as a passenger has become so safe that it also has become boring."

Mrs. Gates took her first ride with one of the early stunt pilots in San Francisco. It frightened her. Gates was promoting aviation at this time, and had arranged the ride. When she landed, she refused to marry him unless he promised to stay out of airplanes. He promised.

**Flew With Husband**  
A few months after the ceremony she caught him flying one of the planes of the Gates Flying Circus, giving exhibitions and carrying passengers. Thereafter, instead of refusing him permission to fly, which she knew would have no effect, she went with him. Still frightened, she insisted that they "crash together."

Within the last two years she has forgotten the crash idea, and is now taking instruction. Mrs. Gates, who is widely known in aeronautical circles, has flown hundreds of thousands of miles, visiting all of the 48 states. Probably no woman who is not a licensed pilot has flown as far.

"Traveling in an airplane is best," she said. "I've gotten to a point now, however, where I don't want to go where the pilots want to go. I want to take a trip or two myself."

"Traffic conditions are such that I get less and less pleasure from driving and more and more from flying."

Tired Business Girl Is Under The Microscope of Science

Dr. Thaddeus Bolton (above), head of the Department of Psychology, Temple University, Philadelphia, is now engaged in a research investigation to determine how far reducing diets are responsible for fatigue and irayed nerves under the strain which modern business imposes upon the feminine office worker.

Groups of girls are supplied on designated days with a mid-afternoon lunch having a fairly high proportion of sugar, one of the highly concentrated and quickly digested energy foods. The effect of the additional food ration is measured by specially prepared laboratory instruments. The records are compared with those made on days when the additional food is not served, and with the records of other groups whose members abide by their ordinary eating habits during the duration of the investigation.

Dr. Bolton identifies as his distinguishing mark, proceeds to knock the supporters out from under any prestige we might have had left. Lucien Lehman, in "The Grand Mirage, the U. S. A." admits that he can find nothing complimentary to say about America and Americans except that her newspapers are better than those of France. For the rest, he mimes no words. He came to America for six weeks, came home and wrote his book, and paints an American along these lines:

**Do You Recognize Us**  
All Americans are vain as peacocks. He adores titles, medals and high-sounding orders. He is an egoist; he goes so far in his egoism that he has a world monopoly. He is convinced that the sun rises in New York bay and sets in the Golden Gate.

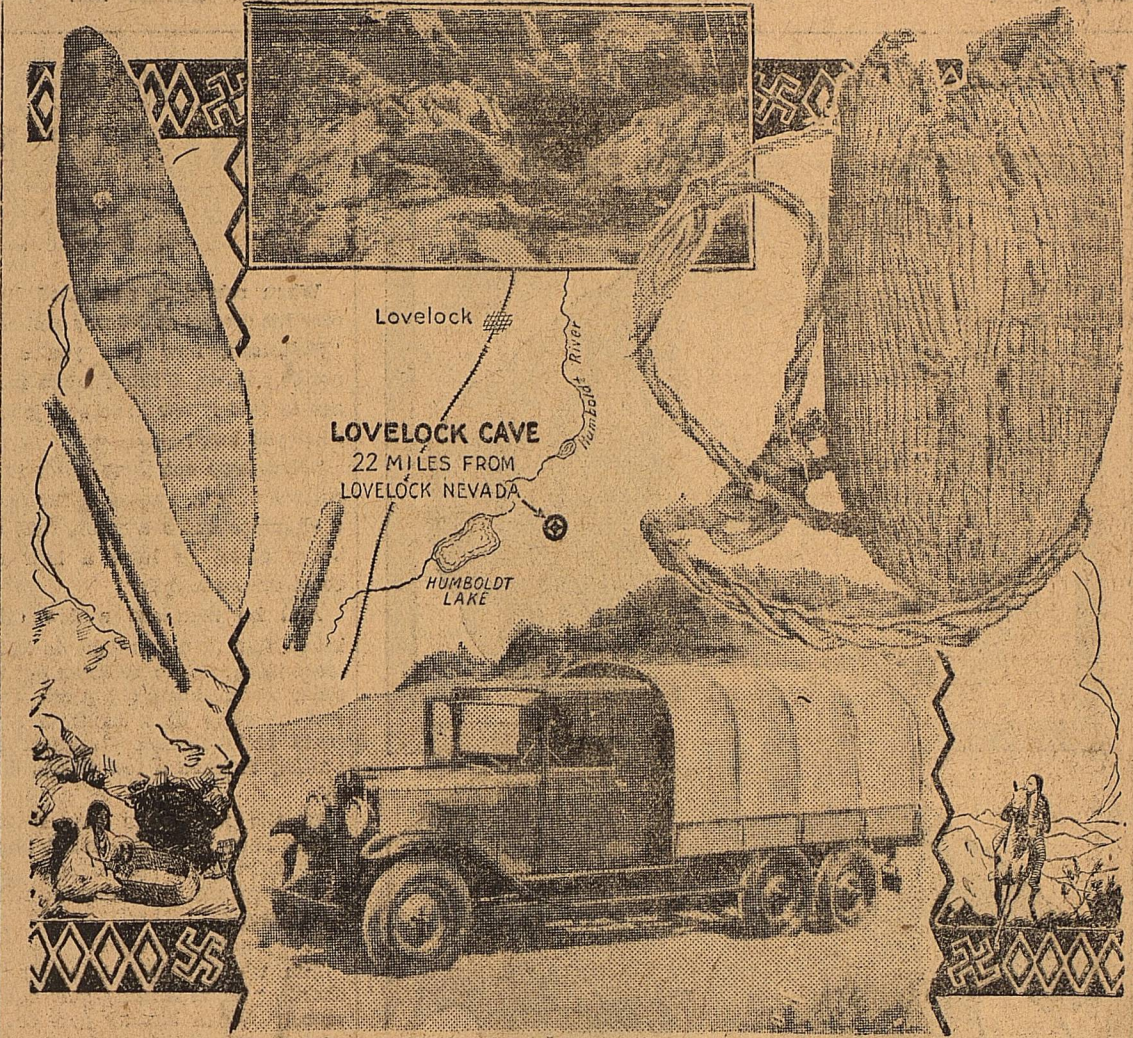

**ANGERED LOVER KILLS GIRL WHO SPURNED HIM**  
KEWANEE, Missouri, July 5.—(AP)—Because she refused to marry him, Honas Mayberry, nineteen, killed Irma Hendershott, sixteen here yesterday, and then was killed by the girl's father after Malberry had fired a bullet in his own head in an attempt to commit suicide. The father discharged a shot gun into the youth's body as the boy lay on the ground.

**FOUR ARE DEAD OVER THE FOURTH**  
DALLAS, July 5.—(AP)—Four Texans were dead, two in a serious condition, and scores injured as a result of Fourth of July accidents. All deaths were caused by automobiles. Mrs. E. C. Decker, of Tampa, was killed with her husband, who drove his automobile into a house which was being moved. Mrs. A. E. Yeager of Decatur was fatally injured by a motorist near Pampa. Earl Baird of Henrietta was killed near Cooper in an automobile collision. J. T. Durden was run down and killed by an automobile near his home in Temple.

**French Author Flays America For Many Sins**  
By RALPH HEINZEN  
United Press Staff Correspondent  
PARIS, July 5.—(UP)—The success of the Young Committee of experts in untangling a problem which had kept Europe worried for ten years put up American stock a few more points at a time when the market needed encouragement. At no time since the war had America been so bitterly disliked, especially in France, as just before the experts reached a happy compromise. The trend of this feeling is indicated in current French literature. The most recent book, supposed to portray the real American, the man behind the tortoise-shell glasses and the enormous bluff which Bur-

Ancient Civilization Unearthed at Lovelock Cave

Evidence pointing to the oldest civilization in America has been unearthed at the Lovelock Cave, located on the Nevada desert. The cave was once the home of a tribe of Indians, legend of which says were cannibalistic. Entrance to the cave is shown at the top; to the left is a flint knife, and at the right is a basket which contained two fur blankets in a perfect state of preservation. The six-cylinder Chevrolet truck found the sand road to the cave not difficult. The tandem rear wheel construction affords easy traction.

On the World's Airways

By JOSEPH H. BAIRD  
United Press Aviation Editor

WASHINGTON, July 3.—(UP)—Although the eyes of powerful astronomical cameras have peered millions of miles through space to picture distant planets, 175 miles is now the greatest distance from which aerial photographs of the earth have been made.

The Army holds this record. Not content with it, the team of Capt. A. W. Stevens, photographer, and Lieut. John D. Corkille, pilot, are going to beat it. They have selected the rugged Pacific Northwest as the subject and, according to their plans took off from Wright Field, Dayton, the other day.

Their operations will cover parts of Montana, Oregon, and Washington, centering over the Cascade and Rocky Mountain ranges. This wild, rugged country, replete with high jagged peaks, was selected because it will, in most instances, be a simple matter to embrace in one exposure, three or more outstanding mountain tops. Geological maps will tell the aviators the distance between these summits, enabling them accurately to estimate their distance from the furthest point photographed. For their part, the aviators have selected an Army CO-8 plane, a De Havilland fitted with Loening Amphibian wings and powered with a Liberty engine. An Army K-6 camera, using a 500 millimeter focal lens, will snap the landscape beneath the speeding plane.

Theoretically, Army aviators explain, there is no limit to the distances capable of being photographed, except that caused by the curvature of the earth. At 17,000 feet the curvature limit would come between 200 and 250 miles.

Development of high altitude photography is believed by the War Department to be of consummate value for successful military operations. It would mean the ability to obtain lay outs of enemy territory far beyond the reach of anti-aircraft guns.

pellor cowlings to avert unfavorable effects from fuller propellers being installed close to the edge of the wing. The plane will be built entirely of duraluminum sheeting. It is possible a future development of this giant monoplane will be the use of the recently developed Diesel Junkers motors. The interior of the cabin is arranged in two stories, the upper for passengers and the lower for freight. Storage room will be available in the wings of the plane, which is more than 70 feet long and 15 feet high.

HEAD FLOWING PLAYS PART IN LOCATING FIELD

Development of a new oil pool in Pecos County is under way, following the flowing by heads recently of the Taylor-Link Oil Company's No. 1 University, after the hole had been drilled 12 feet into saturated lime to a total depth of 1625 feet. The heads are estimated at 80 barrels daily. The well is located on the southwest corner of section 30, block 16.

The new production is located about 19 miles west of the Kates field, and the University of Texas has a solid block of 100 sections of land there. Owners of the well have run a string of six inch casing to shut off water running in from an upper horizon, in order to make a production test.

Other tests on the University tract there include Buell-Hagan #1's No. 1-B University, which at a depth of 1320-32 feet gives indications of being a small pumper. It is located on the southeast corner of section 36, block 18. It encountered 3 million cubic feet of oil and 1,000 barrels of 25 gravity oil, and swabbing tests have been under way.

Tidal Oil Company No. 1 University, in the southwest corner of section 16, block 20, was drilling a few days ago at 1357 feet, after having struck a half million cubic feet of gas. It is 3 1-2 miles northwest of Taylor-Link's well. Low high formations on the structure is said to give evidence of the highest of the tests on the new tract.

Shell Petroleum Corporation has a test in that area, having shut down for orders near the depth where the pay has been found in the new prospective pool.

The California Company owns leases on four solid sections between the Taylor-Link well and the Tidal test. Fred Turner, Jr., of Midland also owns leases in that vicinity. Much interest is centered on the new pool by oil men in this section.

## RICE INSTITUTE HAS BIG YEAR COMING ALONG

HOUSTON, Texas, July 5.—(AP)—Twenty baseball games, nine grid-iron tilts, twelve cage battles, a half a dozen tennis matches and three dual cross country events are on the Rice Institute athletic schedule for 1929-30.

The Owls also will meet the Aggies and Longhorns in dual track meets and will participate in the conference meet and in the Texas and S. M. U. relays at Austin and Dallas.

Loyola University of New Orleans is the only newcomer on the football schedule. The Feathered Flock will inaugurate their season with a game with Loyola in the Louisiana city. Other non-conference opponents are Sam Houston, Southwestern, and St. Edwards, while Texas, T. C. U., A. & M., Baylor and S. M. U. will furnish the conference opposition.

A home-and-home basketball schedule will be played with every other conference team except Arkansas. The Porker quintet will play two games here. In baseball, the Owls will cross bats with every other conference nine except the Porkers. Two games with each of the teams are scheduled for Houston and the other two away from home.

Rice's tennis opponents will be Baylor, S. M. U., Oklahoma, T. C. U., A. & M. and Texas, while the Owl harriers will run against the hill climbers representing Texas, A. & M., and S. M. U.
