

THE MIDLAND REPORTER

AND GAZETTE-EXAMINER

VOLUME XXX

MIDLAND, TEXAS, FRIDAY, JUNE 4, 1926

NUMBER 36

CRANE COUNTY TEST HAS ODOR OF GAS

SMELL REPORTED IN PENIX WELL AT DEPTH OF 3080 FEET LAST THURSDAY

Reports of a smell of gas in the Giliam-Logan well on the Penix ranch, section 42, block 42 Crane Co. were circulated in Midland Tuesday; and scouts regard it as very encouraging.

This well is located about seven and a half miles north of the Magnolia-Church and Fields well. This latter well is said to be pumping about 75 barrels of oil per day.

Ricker and Dodson, of San Angelo, are said to be leasing acreage east and south of Midland.

Married Last Week In Oklahoma

L. L. Stringer returned last week from Oklahoma, bringing with him his bride, who was formerly Miss Lundie, a grand daughter of W. H. Lundie. She visited in Midland last summer and made many friends who are glad to welcome her to Midland as a citizen. The Reporter joins in congratulations to both.

Best Since 1888

According to W. C. Cochran, there hasn't been a year since 1888 when the rains were so plentiful as they have been this year; and the country looks better to him than it has since then.

With a banner year following two years that have been at least normal the Midland country should be in great shape by the close of 1926.

The Cattleman Increases Size

The June issue of "The Cattleman," official monthly publication of the Texas and Southwestern Cattle Raisers Association, is off the press and has come out about twice its former size. It is a very attractive magazine, and as usual is filled with interesting information for cattlemen, from cover to cover.

Secretary Reports On Several Matters

Reports of work on various projects for Midland were made to directors of the Chamber of Commerce by the secretary at the meeting Monday night. The directors approved a proposed plan for a trip to create friendly feeling among citizens of neighboring places. The secretary reported progress on the movement started more than a year ago to get the Midland-Rankin road designated as a state highway. If present aims are carried out, definite requests for designation of the highway may be possible within another month or two.

The directors were told that information was being collected relative to street paving, so that this information might be available when the proper time arrives to begin active work on the proposition of paving Main Street.

John Irwin and his mother will leave this week for Snyder, where he is to be connected with a drug concern.

Mrs. N. W. Bigham and Miss Leola Bigham left yesterday for Plainview. Miss Leola will go from there to Boulder, Colorado, to attend the University of Colorado this summer.

Mr. and Mrs. B. R. Stringer and son are here from Throckmorton, visiting relatives and looking after business.

Miss Susan Cowden returned this week from Dallas, after a pleasant and profitable year in Hockaday School in Dallas.

Mr. and Mrs. Will Crier were in from the ranch southwest yesterday and reports conditions good down that way.

If Its Job Printing, We Can Do It

FERGUSON TO SPEAK IN MIDLAND 17TH

FIRST GUBERNATORIAL CANDIDATE SPEECH TO BE DELIVERED THEN

Announcement has been made by James E. Ferguson that he will speak in Midland on Thursday night, June 17, at 8 o'clock, on behalf of the candidacy of his wife for governor.

This is to be the first gubernatorial candidate speech, according to present schedules, and is expected to draw a great crowd from this territory.

Voters will want to acquaint themselves with the issues as presented by each candidate, in spite of their own political views.

J. R. Williamson Died In Snyder

Mr. and Mrs. J. H. Williamson and John P. Howe drove to Snyder Monday, following receipt of a message that Mr. Williamson's brother, J. R. Williamson, was very ill.

His condition gradually became worse, and the end came about eleven o'clock Wednesday.

The funeral was held at Snyder Thursday morning at 10:30. Mr. and Mrs. Williamson and Mr. Howe returned to Midland yesterday afternoon.

Jay Floyd Is Home With Medal

Mrs. B. W. Floyd and son, J. H. arrived home yesterday from College Station. Mrs. Floyd visited her mother down state and left her recuperating from a severe illness. Young Floyd returned home wearing a medal he won for being the best drilled man in his troop. This is considered a big honor at A. & M. College. "Little Timberline" as the youth is called after his dad, won himself and his home town several honors this year. He was second man on a stock judging team representing A. & M. at the Southwestern Exposition and Fat Stock Show at Fort Worth, and he won several athletic events at the college.

Mrs. E. R. Thomas, Mrs. H. C. Barnes of Andrews, Miss Lillie B. Williams, and Louis Thomas went to Lubbock the first of the week and attended the pageant given by the Tech College. Ben Wall carried the banner for the Midland representation in the pageant.

Mrs. Thomas left yesterday for Alpine, where she will pursue her studies in Sul Ross this summer.

Geo. D. McCormick and J. Homer Epley went to Lake Penick, near Stamford, last week, and spent a very pleasant time fishing and boating. They report fine wheat and corn crops in that country.

Mrs. J. B. Wilkinson and son, Jack, left the first of the week for a visit in Ovallo and other points. Jack will visit in Sterling City and San Angelo.

Floyd Quinney was here the first of the week from Colorado. He has been managing a store there, but it was sold last week. He is to engage in the insurance and loan business in Colorado soon.

Chas. Watson Jr. arrived Wednesday from Belton, and will visit friends in Midland for several days.

Miss Eureka Bottom and Miss Ora Lee Allen left Monday for Abbott and Austin, respectively. They went by automobile with Miss Bottom's brother who had been in Midland for several days.

Dan Rose and family left the first of the week for Wichita Falls, after which they expected to drive to south Texas points.

Mr. and Mrs. O. B. Holt went to Denton last week end and attended the graduation of Miss Mabel, from C. I. A. They went on to south Texas points the first of this week.

TRADES DAY TO BE BARGAIN DAY BEGINNING WITH SATURDAY JULY 10

Full Page Advertisements To Carry List Of Trades Day Specials Offered Each Month By Midland Stores

A great deal is being advertised these days about "new and improved" gasoline, automobiles, radios, talking machines, and various commodities. Midland is preparing to advertise a "New and Better Trades Day."

Directors of the Midland Chamber of Commerce Monday night approved a plan for increasing the crowds here on Trades Day. The plan is calculated to be of benefit both to the farmers and ranchmen and to the merchants who participate.

Business men who wish to profit by the wide advertising to be given the first of these big Trades Days which will be on July 10, will be given the opportunity of featuring some special articles for sale that day. No two advertisers may feature the same article.

For example, John Doe & Co. may advertise work gloves for sale at \$1 per pair. Other merchants will be asked not to feature work gloves in their advertising. In other words, each business man will be asked to feature some bargain at his store. These ads will be grouped on one page of The Midland Reporter. Big top headlines will call attention to these Trades Day bargains.

Circulars will be run off from this full page ad and sent to families in Midland, Andrews, Ector, and Martin Counties. It is expected that increased sales will cause the purchase of enough extra Trades Day Tickets to pay the cost of the circular advertising without any additional cost to the merchant except the cost of his ad in the newspaper.

Merchants are expected to do more business. People who come here to trade will get better bargains, and Trades Day, which seems to be in Midland to stay will be stimulated.

Skating Rink Will Open On Saturday

C. F. Lockhead arrived here this week, with a complete skating rink which he operates under a tent, and has located on Main street opposite Taylor's Drug Store. It will open Saturday. He carries his floor with him, and it is made up in sections so that it fits down wherever he locates his tent.

He states that there will be good music and good order. His ad appears elsewhere in this issue.

Breeder Fetes Texas Tech. Heads

Midland, May 28—Several members of the faculty and board of Hereford breeder of Midland and Odessa, at a barbecue on the Court House Lawn at Odessa Friday evening, regents of Texas Tech College were among the prominent guests were A. H. Leidigh, dean of Texas Tech and W. L. Stangel, head of the animal husbandry department of the school. John C. Burns of Fort Worth secretary of the Texas Hereford Breeders Association, was a principal guest.

The Texas Tech men came to Midland and Odessa to select a heifer and bull for the foundation herd of the school. Gist is taking the visitors Saturday morning to see his registered herds on his Midland and Odessa ranches and will let the college experts have their choice of the entire famous registered herds.

To make the visit of the Tech men a "blooded" affair throughout, "Uncle John," as the nationally known Hereford breeder is called not only gave two of his registered Herefords to Texas Tech, but he fed the representatives of the school on three barbecued beefs from his registered herds at Midland. Then to cap the climax in making it a classy affair, the beefs were barbecued by a state representative, the Honorable H. E. Webb of Odessa.

While Uncle John Gist was the host, he was assisted in making the barbecue a regular picnic spread by the public spirited citizens of Odessa. A dance followed the barbecue. The Tech officials and regents were scheduled to be guests of the Midland Chamber of Commerce Saturday at a dinner.

C. L. Alderman of Dallas was in Midland on business the first of the week.

Midland Prepares For Big Convention "Stunt"

Midland is preparing a surprise stunt for the mammoth delegation parade which will be one of the features of the West Texas Chamber of Commerce Convention here during June 21, 22, 23 according to Paul T. Vickers, who writes Martin Jarrett, chairman of the parade and declares: "This stunt will remain a secret till it is pulled, but it will be there with a punch and will add to the life of the party."—Amarillo Daily News.

Wiley Seale With Military School

Wiley Seale, former principal and coach of Midland High School, has been on the staff of West Texas Military Academy at San Antonio this year, and will have the same position next year.

This summer he is engaged in recruiting students for the school.

Hudson-Essex Salesman

W. E. Whitson, of Lamesa, has located in Midland and has taken a position as salesman of Hudson-Essex automobiles for the McRea Motor Company.

Back From C. I. A.

Misses Margaret Caldwell and Elsie Wolcott, who graduated this week from the College of Industrial Arts, at Denton, came in Wednesday night accompanied by Mr. and Mrs. Caldwell, Mrs. George Wolcott and Miss Kitta Belle Wolcott who were there for the graduation exercises.

J. F. Brookman returned Wednesday night from San Marcos. His daughter, Miss Al Laura, returned with him. She has been in school there this year.

Walter Elkin returned this week from Austin, where he has been in school this year.

Arthur Umberson returned Monday from San Antonio, accompanied by his sister, who graduated this spring from the high school there.

Mrs. Cross Payton and daughter, Miss Parrelee Payton, of Abilene, are visiting in the home of Mr. and Mrs. E. P. Cowden. Mr. and Mrs. M. O. Means, and son, Cole, of Valentine, are still visiting them also.

TECH OFFICIALS VISITED MIDLAND

WERE GIVEN DINNER SATURDAY WHILE HERE TO SELECT GIST CATTLE

Several Midland cattlemen and representatives of the chamber of commerce held an impromptu dinner last Saturday at the Llano, with Dean A. H. Leidigh and W. L. Stangel, head of the animal husbandry department, of the Texas Tech.

These school men were here to select a bull and heifer from the herd of John M. Gist, he having made this liberal gift to the school.

At the dinner, speeches were made by both of these men and by Mr. Gist. Paul T. Vickers served as toastmaster, and J. B. Snider introduced "Runt" Stangel, his former college chum.

After the dinner, the men went to the Gist farm south of town, accompanied by a group of men who were interested in seeing the judging of the cattle.

Eriksen Home Has Much Vegetation

Pictures were taken Thursday of the beautiful berry patch and fruit orchard of Ed Eriksen for use of the Chamber of Commerce in farm magazines. A picture was also taken of Mrs. Eriksen in her patch of enormous Bermuda onions. The Eriksen place is one of the very prettiest in Midland County. Berries, grapes, and currants are growing in great abundance. The currant will rival those of any state. These pictures like others made for the Chamber of Commerce were taken gratuitously by R. W. Hyatt, painting contractor, and one time professional photographer. Mrs. Eriksen is helping promote the interests of her county by giving some canned fruit for use in Midland County Exhibit at the Dallas State Fair.

Adjust Your Headlights

Following is a letter received by the Chamber of Commerce from C. R. Granberry, engineer of the automobile headlight division of the State Highway department.

"Every summer a large number of Texas motorists spend their vacations in their cars, traveling over the State and frequently to other states, and they form a large portion of the heavy traffic so in evidence on our principal highways, especially at night.

"We are writing to request you to call the attention of your local motorists to the necessity of having their headlights properly adjusted before starting on cross country trips. Certainly after a long trip they should be inspected and readjusted of necessity.

"Such matters need only to be called to the attention of the large majority of motorists, and in this way you can be of service to your local motorists and others in various parts of the state."

Herman Klapproth came in yesterday from Galveston, where he has completed his first year in the State Medical College, also receiving his B. A. from the State University.

Miss Eunice Allen, who took her A. B. Degree in Texas Womans College at Fort Worth this Spring, returned yesterday to Midland.

Mrs. J. V. Hobbs went to Abilene last week end with her son, Frank Hobbs who had visited here for a few days. Mrs. Hobbs returned the first of this week and reports a very pleasant trip.

Misses Rosalie and Sallye T. Orson will leave Midland about the 19th for New York, and will sail from there for England about the 24th, expecting to spend several months in that country.

Wallace Wimberley arrived the first of the week from Abilene, where he is a student in Simmons University.

BIG SPRING WON GOLF TOURNAMENT

LOCAL CLUB ENTERTAINED THE LAMESA AND BIG SPRING GUESTS ROYALLY

On account of washouts and heavy rains, the golf entrants from Fort Stockton, Pecos and Alpine could not get to Midland last Sunday; but a fine tournament was held with Big Spring, Lamesa and Midland as contestants.

A barbecue dinner was served to the guests at twelve, and a big crowd was out. Local members and their families were out en masse, and quite number of guests besides the players from other towns were here for the day.

Big Spring won the eighteen hole tournament by ten points, while Midland defeated Lamesa sixty one points, according to officials.

O. F. Wells of Midland made the best individual score, with Ellis Cowden in second place.

Eastern Star Elects Officers

Officers elect for the Eastern Star will be installed June 8th. The new officers will be Miss Rosalie Orson, worthy matron; Clarence Ligon, worthy patron; Miss Ethel Staten, assistant matron; J. M. Gilmore, secretary; R. M. Barron treasurer; Johnnie Roberts, conductress; Gladys Basham, assistant conductress. The appointive officers will be Mrs. N. W. Bigham, chaplain; Sallye T. Orson, marshal; Miss Lydie Watson, organist; Mrs. Clarence Ligon, Adah; Mrs. Vesta Harris, Ruth; Mrs. J. M. Gilmore, Esther; Mrs. Theo Ray, Martha; Mrs. Lee Bradshaw, Electra; Mrs. Wilford Thomason, warden; Harry Tolbert, sentinel.

Scouts Met Last Tuesday Evening

The first official meeting of the Boy Scouts was held last Tuesday night in the Cowden building, over Everybodys store, and about thirty scouts were there.

Temporary organization was perfected, and various phases of scouting were discussed.

A hike was arranged for Tuesday, June 8th, and the boys will start at 5 p. m. to some point in the country near Midland, in charge of scout master and assistants.

Tolbert Installs Prosperity Press

Harry Tolbert installed a new press this week in his tailoring establishment. It is known as the prosperity press and is equipped especially for steaming and pressing ladies dresses or delicate fabrics.

Attention Golfers

Members of the Midland Golf Club are asked to participate in an elimination contest of eighteen holes, Sunday, June 6th, at 1:30 P. M.

Play will be by foursomes, and the committee will designate score keepers.

Louis Wrage returned Saturday from Hollywood, California, where he has spent several weeks.

Epley Goes With Cowden Motor Co.

J. Homer Epley assumed a position on June 1st in the office of the Cowden Motor Company. A. D. Wisdom, who has held the position for the past few months recently returned to Fort Worth. Mr. Epley needs no introduction to the people of Midland, having been connected with the First National Bank for many years, and he will be an asset to the business.

Feeders Day At Big Spring 8th

The third annual feeders day will be held on June 8th at the U. S. experiment station at Big Spring, and a number of Midland ranchmen are expected to go.

Lunch will be served and a boys stock judging contest will be held. Forty five head of calves on feed for a period of 200 days will be shown to demonstrate the value of using West Texas grown feed for finishing West Texas Cattle.

This experimental feeding work is being conducted in co-operation with U. S. Department of Agriculture State Experiment Station at A. & M. College and the Big Spring Chamber of Commerce.

Among the speakers on the program for the day will be representatives from the U. S. Department of Agriculture, State Experiment Station at A. & M. College, Packers and Commission Companies of Fort Worth; and Texas Tech. If you are interested in diversification or safe agriculture attend this program.

County Agent Snider is urging as many Midland ranchmen and farmers as possible to attend. The only cost will be that of transportation, going and coming. He hopes that the Midland crowd will get there by 9 a. m., although this is not necessary to get the benefit of the days program.

Stephenson School Votes Dollar Tax

Miss Vernetta Ray has been employed for another year as teacher of the Stephenson School. The Board of Trustees composed of Herman Bilby, I. M. Moore, and J. L. Jones, closed a contract this week with the young woman to teach nine months school. Miss Ray is a community leader at Stephenson, as well as teaching the school. She is superintendent of a Sunday School and arranges various community gatherings to help promote the social life of the community. The nine months school was guaranteed when citizens of the community voted unanimously to increase the tax rate from 50 cents to a dollar limit.

Will Entertain Agricultural Men

Eugene Butler, associated editor of Farm and Ranch, B. L. Moss widely known agriculturalist and farm writer and owner of the Moss cotton plantation near Midland, and C. N. Foster of the Chilean Nitrate Co. are to be guests of the Midland Chamber of Commerce at an informal gathering while they are here early this month, according to a decision of directors of the Chamber at their meeting Monday night. It is believed Midland will get much valuable publicity from the visit of these farm writers.

POULTRY

DIFFERENT CAUSES FOR POOR HATCHES

Many small factors in the management of the flock can often affect the results which are attained in hatching eggs. With the present development of the incubators the expert operator is usually able to secure good results if the original hatching quality of the eggs is satisfactory. In the large hatcheries it is often observed that different trays of eggs run side by side will show a marked difference in the number of chicks hatched. The reason for this difference lies in the original eggs.

Some of the factors that help to secure satisfactory eggs for hatching are as follows:

Mature breeding stock. The usual age agreed upon is nine months. Many prefer females in their second year.

Plenty of male birds. Many supply one cockerel to ten hens, but the majority agree that one cockerel to fifteen hens is sufficient with the light breeds.

Remove diseased birds from the flock.

Birds which are otherwise confined should be given an outside runway when it is possible to do so without endangering the health of the birds. Direct sunlight should strike the birds.

Birds should be comfortably housed. Floors should be covered with a litter of straw and changed whenever it shows any indication of dampness, mustiness or filth.

Artificial light should not be used to stimulate laying for 60 days previous to date of saving first eggs for hatching.

A balanced ration of approximately equal portions of scratch feed and mash should be furnished.

The hens should be supplied with some type of green feed such as mangels or sprouted oats as well as hoppers filled with oyster shell and grit.

Regularity and good care for a month or six weeks prior to saving of eggs as well as during the period of saving of eggs for hatching, combined with the above essentials, should produce eggs which will hatch a high per cent of live chicks.

Turkeys With Diarrhea

Diarrhea is one of the prominent symptoms of blackhead in turkeys, though it may also occur from other causes. It is a pretty safe guess that blackhead is present when diarrhea appears and the turkeys begin to drop dead, one by one, as the disease progresses. No remedy of any considerable value has yet been found for this trouble. Each turkey may be given a dose of castor oil, one to two teaspoonfuls, when any looseness of the bowels appears. This will clear out any irritating matter.

Improvement of Flock

One of the most economical methods of improvement of the poultry flock is by the purchase of a few settings of hatching eggs. From these may be raised a few females and enough breeding males to head the flock during the succeeding year. Care should be taken to make sure that the stock from which one is purchasing eggs is superior to his own.

Nests Easily Cleaned

Nests for laying hens can be easily cleaned if they are built in sections, or tiers, of three or more nests, without bottoms, and set on shelves. When the nests are pulled from the shelf all the straw and dirt will fall to the floor.

Poultry Notes

Teach birds to roost early—prevents crowding.

Put young chicks in clean house on fresh ground.

Rest chicks in boxes for a few hours before putting into brooder.

Have brooder house ready before the chicks arrive.

Segregate cockerels from pullets as soon as possible. Keep forcing pullets along with mash, even when on range.

Look out for overheated brooders and brooder house fires. Make an inspection of all apparatus regularly and take no chances.

Do you know why big dressed chickens will not sell readily? The city man is a frugal buyer—he has to be—and chicken soon runs up the price when heavy.

If disease is in your flock, there is a cause. Hunt for it; and burn or bury all dead chicks without a second's delay.

If you have "a good old mother hen for chickens" don't kill or sell her. Even if she only lays five eggs a year, she earns her feed in brooding.

To throw away the added eggs at nesting or hatching time is to teach some animal bad habits, or pollute the air. Bury them deep or burn them at once.

J. O. Nobles Buys Business Property

Another Midland business man demonstrated his faith in the community this week when J. O. Nobles bought the 50 by 140 foot location where the City Hall now stands. This property was bought from Jax M. Cowden and M. C. Ulmer, they having bought it before acquiring the present home of the Ford business.

The lots which Mr. Nobles bought are on the corner, facing the highway, and it is his plan to build a permanent home for the Western Auto Supply Company at a later date.

No. 88.
THE STATE OF TEXAS,
To the Sheriff or any Constable of Ector County—Greeting:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Midland, Texas, (no newspaper having been published in Ector Co., such period) State of Texas, and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:

Notice Of Appointment Of Temporary Guardian.

To all persons interested in the welfare of Upton Hammett and Ethel Hammett, Minors, Mrs. A. W. Hammett was, by the County Court of Ector County, Texas, duly appointed Temporary Guardian of the estate of said minors, which appointment will be made permanent, unless the same shall be successfully contested at the next term of said Court, commencing on the first Monday in August A. D. 1926, the same being the 2nd day of August A. D. 1926, at the Courthouse thereof, in Odessa, Texas, at which time all persons interested in the welfare of said minors may appear and contest such appointment, if they see proper to do so.

Herein fail not, but have you before said court, on the said first day of the next term thereof, this Writ, with your return thereon, showing how you have executed the same.

Witness, Carl Akin, Clerk of the County Court of Ector County. Given under my hand and the seal of said court, at office in Odessa, Texas, this 18th day of May A. D. 1926.

Carl Akin,
Clerk County Court, Ector County Texas. 34-3t

WHEN TO SELL

The best time to sell overcoats is in cold weather. The best time to sell slickers is while it is raining. The time to sell ice, ice cream, ice boxes, soda pop, etc. is when it is hot.

The time to sell seed is during the planting season—graduation gifts when school closes—Christmas presents during the approach of the holidays.

There is a season for most everything, and most business houses have something to sell the year round.

To move the greatest amount of any commodity, the merchant must make every day count during its season. Concentrate on warm weather articles as soon as the weather warms up.

People have to be reminded, and the more forcibly they are reminded the more reasonable goods they will consume.

Advertising is the force that moves the goods. He who advertises early gets in on the business early, increasing his volume for the season.

Mrs. Cran Harding and her son, Cran Junior, are here from Louisville, Ky., visiting her sister, Mrs. Lenton Brunson. Mrs. Harding was formerly Miss Mae Burkett.

Mrs. Vest is leaving this week for Oklahoma, where she will visit relatives for some time.

Mrs. Percy Mims and son, James, left Wednesday for Tyler, where they will visit her father and mother.

Mr. and Mrs. Fred Wemple will leave next week for Blossom, to attend the wedding on June 9th of Mrs. Wemple's sister.

Miss Evelyn Estes will leave in a few days for Alpine, where she is to be in school this summer.

Lee Heard went to Pecos Wednesday, and brought his daughter, Mrs. Carl Eddins, and her son, Carl Jr. back with him.

Marketing Aids Used by Farmer

Good Evidence That Better Business Methods Are Being Employed.

(Prepared by the United States Department of Agriculture.)

There is every evidence that farmers generally are using better business methods in handling and marketing their products, the bureau of agricultural economics points out in its annual report to the secretary of agriculture. "This is shown," says the report, "in the manner in which farmers have rebuilt their business from the depression of five years ago. It is shown, also, by the steadily increasing call for information on standardization and inspection of farm products, farm management, credit facilities, and both domestic and foreign market news."

Is a Service Bureau.

The bureau is organized to obtain by research and investigation facts on practically all phases of the economics of agriculture from problems in farm management to the final distribution of agricultural products to consumers. It is essentially a service bureau to give farmers the best available information on these subjects.

Federal standards are now in use for 32 leading fruits and vegetables, 8 grains, 7 varieties of hay, cotton, wool, tobacco, butter and eggs, and for a number of classes of live stock and dressed meats. The American cotton standards are now used throughout the world, and the bureau is endeavoring to effect similar uniform standards for wool.

Market news reports on shipments, supplies and prices of farm products in the leading market centers are used by farmers everywhere, a nation-wide service on collecting and disseminating this news by telegraph and radio having been organized. The bureau operates the largest government leased wire circuit in the world in connection with this service.

Much Help to Farmer.

Facts provided farmers on the outlook for specific farm crops, it is considered, have done much to enable them to plan their operations. The pig surveys by the bureau have been used widely in an effort to reduce the ups and downs in the hog industry.

"Special effort is made in the marketing work of the bureau to determine the kinds, quality and quantity of products which are and which should be offered for sale. In the process of distribution questions of standardization, packing, assembling, transporting, warehousing, financing, and finally of retailing all call for special studies and services.

"Without broad information in regard to general economic conditions, the farmer is not able to meet the changing conditions in domestic and world markets. Hence the need of closely co-ordinating the facts of national and world production, movements and prices for the purpose of providing a basis upon which farmers may plan their programs of work."

Alfalfa Proven Success as Protein for Cows

Alfalfa is no longer an experiment; it is a proven success. With alfalfa the dairyman has good financial possibilities, but without it the future holds but little hope. Few as yet really appreciate alfalfa or they would be growing a larger acreage of it. Alfalfa yields twice the tonnage of other hays and several times the amount of protein. Rightly handled it does not need to be seeded nearly as often. In total feeding value it is surpassed only in yield by corn silage and the two should go hand in hand as one balances the other. They are by far our most profitable crops, although sweet clover pasture and corn for husking are likewise profitable.

Alfalfa will do well on any good corn soil that is well drained and supplied with lime. Land manured for corn the previous year is preferable. Fall plowing insures a firmer seed bed and is to be preferred for seeding down. Rolling of spring plowing is next best. In any case it will pay to fit the soil well.

If the soil lacks lime, and a test will show whether it does or not, the lime can be applied any time after plowing in the fall, winter or spring. Later it should be disked in.

Easiest and Humane Way to Dehorn Young Calves

The easiest and most humane way to dehorn calves is by the use of stick caustic potash when they are but a few days old.

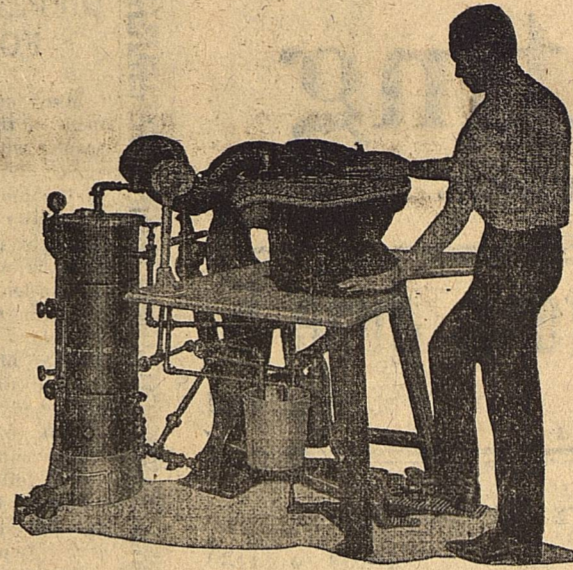

When the calf is four to seven days old the hair over and around the knobs that later produce horns is clipped close. The moistened end of a stick of caustic potash is then rubbed over the horn until a spot about the size of a dime becomes raw.

Grease may be applied to the outer edge of the spot to prevent spread of the caustic and making the sore larger than necessary.

The calf should be kept in the dry for a few hours after the treatment. Following the successful application of the caustic a scab will form over the knob and drop off in a few days.

Stick caustic potash can be procured at a drug store for a few cents and may be kept for some time in a tightly stoppered bottle. While handling the caustic it should be wrapped in paper to prevent injury to the hands.

POULTRY

FEEDING TURKEYS IMPORTANT PHASE

(Prepared by the United States Department of Agriculture.)

Feeding the young birds is one of the most important phases of turkey raising. Unwholesome feeds and improper methods of feeding, especially in the case of turkeys closely confined, have resulted in many failures.

For the first two days after hatching the poults require no feed, access to clean drinking water and a little coarse sand and green feed to peck at being sufficient. Beginning with the third day they should be fed, the amount given them varying with the quantity of natural feed they are able to pick up outside the coop. It is best to keep them more or less hungry.

When the range provides an abundance of green feed and insects, the growing poults require but little extra feeding. More losses are attributable to overfeeding, perhaps, than to all other causes. One harmful effect of overfeeding is that it removes the necessity for hunting food, with the result that little exercise is taken and indigestion develops. Sanitary feeding places are also very important and, above all, the soil should be kept sweet and clean.

When natural feed is scarce or when the poults have to be kept from ranging outside, it is advisable to feed them about five times a day. If allowed to run outside the coop where they can find insects, seeds, and green feed, two or three feedings a day will be enough. If the poults are fed regularly every night, in a short time they will return nightly to their proper roosting quarters. Never allow the feed to become moldy. A good plan is to feed the poults on boards, cleaning off any feed that may remain after feeding, and standing the boards in the sun to dry.

Buttermilk has been found very beneficial in bringing poults successfully through the early stages. A good practice is to keep the milk in front of the young birds during the morning and water during the afternoon. If grit and green feed cannot be picked up outside the coop, they must be provided in some other way.

Spanish Fiesta To Feature Convention

Amarillo, May 31.—“You don't intend to use horses on the stage, do you?” an astonished newspaper man asked Hal Worth, noted director, when Mr. Worth had read over the scenario which he has proposed for the Spanish Fiesta during the big West Texas Chamber of Commerce Convention here on June 21, 22, and 23.

“Of course I mean to use horses on the stage. Several of them. We mean to make this a spectacle that won't be forgotten.”

Mr. Worth who has but recently arrived in Amarillo and who is now hard at work upon the Fiesta, to be presented on Tuesday night at the big City Auditorium, has already progressed far in his preparations for the event. He announced this week that he had already secured a large number of the 500 who will appear in the cast, and that things were lining up mighty well.

The Fiesta, as Mr. Worth has planned it, is all that imagination can conceive in gorgeous scenery, bewitching lights and haunting melodies. Beginning with the visit of Coronado the first white man to set foot on Texas soil, in 1541, and here is where one of the horses comes in, the spectacle progresses in a living interpretation of the historic development of the West through six entrancing episodes. Every epoch since that day is represented in a triumph of artistic pantomime, and in the last the section is brought down with consummate skill to the very moment and the very gesture of the present.

Formerly in Pictures

The expedients by which Mr. Worth arrives at the effects he wishes to produce are interesting. But suffice it is to say that he has brought to his task that indomitable will and inexhaustible resourcefulness that makes the success achieved in the world of motion pictures, in which great industry he figured prominently before entering his present profession.

His experience in pictures, where he spent two years, was that of technical director on the staff of Rex Ingram. During his connection with Mr. Ingham he designed the steps for “Trifling Women,” “Where the pavement ends” and was assistant technical director on the “Prisoner of Zenda.” Outside of pictures Mr. Worth has produced innumerable pageants and public exhibitions of the type, including the Fort Worth Fat Stock Show Pageant for the past few years; the Oklahoma Indian Exposition pageants and so forth, while he has just returned from Galveston Bathing Revue which this year was such a tremendous success.

The Spanish Fiesta was the idea evolved by the Convention officials in their determination to get away from the pageant and yet present a spectacle that would meet with the approval and participation of the various towns and communities included in the territory of the West Texas Chamber of Commerce. And the idea, in addition to being far more economical and easy of realization, is proving of astonishing artistic possibilities. Mr. Worth's utilization of it is marvelous.

Economical

The scenario will be built along a Spanish motif, and will present something absolutely new to the West Texas Chamber of Commerce and to the stage of the southwest. Instead of princesses, as of former years, Senoras and Senoritas will be employed, while the escorts will be costumed and known as Spanish Dandies. Spanish terms and etiquette will be used in introducing the honorees from the various towns, together with the Dandies and two small children who will accompany each honoree.

These honorees will be dressed in inexpensive costumes, consisting of an ordinary evening gown, that may already be in the wardrobe of the young lady selected, to which may be added a Spanish shawl to give the desired effect. The escorts and two small children who shall accompany each couple, will be as simply dressed, the men wearing tuxedo trousers, soft white shirts, a red sash and sombrero, according to suggestions from those in charge of the Fiesta here. The children to accompany each couple may come from the town represented or may be secured in Amarillo, it is announced. In either event, it is urged, it will be necessary to advise the committee in charge in this city, in order that proper arrangements may be made.

Each individual town will be expected to employ its own method of selecting an honoree, but the committee is insistently urging that this selection be made at the earliest possible moment and the authorities notified. This is imperative in order that suitable entertainment may

be provided. Photos of the honorees are being requested by the publicity department of the Convention.

Each Senora or Seniorita and escort will, of course, have a part in the fiesta and will be introduced to the great audience on the night of the entertainment.

Entertainment Features

The ladies of Amarillo, who are in charge of the social functions sponsored by the Chamber of Commerce during the big convention, are taking a keen interest in providing for the entertainment and receptions of the following events have been arranged for their pleasure.

Monday, June 21, Breakfast to Senoritas, Sonoras and their chap-

erones at the County Club, 10 o'clock A. M.

Tea-Dansant to Senoritas, Senoras, Chaperones and escorts at the County Club, 4 o'clock p. m.

Tuesday, June 22, Spanish Fiesta Municipal Auditorium, eight o'clock P. M. Formal reception and ball at County Club 10:30 to 12:30 in honor of the participants in the Fiesta.

In addition to those affairs the Senoritas, Senoras, chaperones and escorts will be the recipients of special courtesies.

Each town is being urged to make selections of its honoree as soon as possible and to advise Mrs. E. W. Hardin, of Amarillo, chairman of the Women's Activities Committee, at once so that the provisions may be

made and the representatives of the towns acquainted with further details of necessary. An additional request that the committee be advised of the probable time of arrival of the representatives of each town, is being made.

Fished In The Bay

William Young, proprietor of the City Bakery, returned Tuesday from a fishing trip down at Corpus Christi. He sent back some salt water fish to some of his friends here, and reports a great time.

J. C. Thomas, who has been ill for several weeks, is up again and was down town the first of the week.

Wingless May Beetles Found On Local Farms

County Agent Snider recently sent specimens of a bug which has been found on local farms to the A. & M. College, and received a letter this week from R. R. Reppert, entomologist, stating that they are “wingless May Beetles.”

These bugs develop from the common “grub worm” and are usually found around fields adjacent to pasture land, or in fields which have been abandoned to weeds for a year or two. The bugs will damage cotton if let alone.

The entomologist advises poison bran mash as a remedy, and it is pre-

pared in the following way:

Wheat bran	25 lbs.
White arsenic or paris green	1 lb.
Lemon or Oranges	6 fruits
Low grade cane or sorghum molasses	2 quarts
Water	1 gallon

Mix the bran and poison thoroughly while dry. Dilute the molasses with the amount of water as named, squeeze the lemon juice into this diluted molasses, then grind the rind of the lemon with a meat chopper and add this also to the liquid. Then mix the liquid thoroughly with the poison bran mixture. After an even mixture has thus been obtained, add more water and mix, until a mash is obtained that when squeezed in the hand readily falls apart.

NO-NOX

MOTOR FUEL

STOPS KNOCKS

Turns Mountains into Mole hills

OR many years mechanical engineers struggled to build automobile engines of higher compression. As compression is increased the power line goes up and the fuel consumption line goes down—ordinary gasolines would not withstand this higher compression without knocks, clicks, or detonations—accumulated carbon deposits increased this compression by decreasing the size of the combustion chamber—and the audible sounds of the engine distress grew louder.

It has been our good fortune to produce a gasoline that positively eliminates clicks, pings, and knocks.

Gulf No-Nox and Carbon are Power Twins

GULF No-Nox Motor Fuel withstands compression to a high degree; carbon, increasing the compression of the engine, ceases to be a nightmare as long as it does not interfere with valve action. In other words, it puts carbon to work. More power and greater efficiency is thereby accomplished, resulting in greater mileage.

With GULF No-Nox Motor Fuel in your tank—step on it—you will get the story better than we can tell it.

This Guarantee goes with it

GULF No-Nox Motor Fuel is Non-Noxious, Non-Poisonous and no more harmful to man or motor than ordinary gasoline—that it contains no dope of any kind—that the color is for identification only—that it positively will not heat the motor summer or winter.

GULF No-Nox Motor Fuel is priced three cents per gallon higher than ordinary gasoline—and is worth it.

O. L. Willis of Lubbock was a business visitor to Midland Wednesday.

West Texas News

Big Spring—At a meeting of the Big Spring Chamber of Commerce, C. T. Watson was authorized to purchase at least 10 registered Jersey Bulls to be distributed in various communities of the county. Poultry raising, also hog production are expected to follow along with the dairy industry.

Hereford—At a luncheon recently held by the local Chamber of Commerce, Mayor D. S. Ireland urged Hereford to send a large delegation to the West Texas Chamber of Commerce Convention in Amarillo June 21, 22, 23. Committees were immediately appointed to look after the transportation, the decorations and stunts for the parade.

Tahoka—The latest scholastic Census in Lynn County show that there are approximately 3500 school children between the ages of seven and eighteen. There are 24 districts, twelve independent and 12 being common school districts.

Childress—A very extensive building program has been planned and bond carried for the erection of a City Hall, \$40,000 Sewer bonds, \$100,000 water improvement, \$35,000 and school \$110,000. The sale of the city bonds will provide funds for the erection of a new \$50,000 municipal building.

Vernon—The City Commissioners of Vernon plan to install another 360 horsepower engine at the municipal electric light and water plant.

Quanah—Quanah has just received a car load of hogs, which was ordered by the local chamber of commerce. Secretary Willie had no trouble at all placing the hogs, which were 71 in number.

Mineral Wells—Work is now under way for the re-building of the Crazy Well Hotel here, which was destroyed by fire. The Crazy Well Hotel Company has completed its organization and all the financing for the re-building of the Hotel and Pavillion has been arranged.

Sweetwater—Contract for the sale of the \$160,000 issue for a municipal city hall auditorium and fire station bonds has been entered into by the City Commission.

San Angelo—Walter E. Yaggy has recently resigned as secretary of the Board of City Development, which position he has held since April 1922. Mr. Yaggy will serve until July 1st, unless a successor is appointed before that time.

Alpine—Alpine is anticipating the opening of its new swimming pool, which has just been completed. The pool is located in the heart of the town and measures 150 feet in length and 20 feet wide. The swimming pool and surrounding park will be lighted at night.

Wichita Falls—Final arrangements for the construction of a 16 inch gas main from the Shamrock field to Wichita Falls have been completed. This contract involves an expenditure of \$4,000,000 and calls for the construction of 175 miles of line from the Wheeler County gas fields to Wichita, furnishing gas to cities enroute.

Ranger—Plans for meeting of the Eastland County Better Farming Association will soon be made according to Senator H. P. Brelsford. This organization expects to help the farmer realize that the old methods of farming must be scrapped and diversification applied.

Roswell, N. M.—Work has been started making up the list of those going to Amarillo for the Convention of the West Texas Chamber of Commerce. The delegation will leave Roswell June 20 and remain in Amarillo the 21 and 22 and returning the night of the 23rd.

Knox City—Contract has been awarded for the construction of the Knox City Sewerage System. All the main business sections will be included in the first plot also a large portion of the residence section of town.

Chiropractic Adjustments, Phone 164

Leo Roberts Going To El Paso Store

Leo Roberts returned Wednesday from a trip to Wichita Falls and Dallas, and closed a contract with the Saul Stores whereby he will take a position at once with their house in El Paso. He will be in the shoe department.

Newly Devised Attachment For Cotton Planter Places Seed At Uniform Depth

An attachment for use on cotton planters to insure uniform depth of planting and proper packing of the soil around the seed has been perfected by the United States Department of Agriculture. Many cotton planting machines in the San Joaquin Valley, California, were equipped with these attachments during the planting season of 1925, and without a single exception the growers were enthusiastic over the results.

Drawings and specifications for the planter attachment are shown in a circular just issued. They are sufficient to enable any blacksmith to properly equip a standard cotton or corn planter with the device. Application has been made for the issuance of a public service patent covering the attachment, thus making it available to all without payment of royalties necessary with privately owned patents.

The use of this device should aid the cotton growers of the irrigated valley of the Southwest to overcome some of the difficulty experienced every year in securing satisfactory stands of cotton. Sometimes poor stands are the result of immature seed, adverse or unfavorable seasonal conditions, or are due to several other unforeseen factors, but too often they are due to unsatisfactory planting machines.

A special planting problem is often encountered on account of the nature of much of the soil, say the investigators. Some soils dry out so quickly that even in a day or two of drying weather they may not be sufficient moisture left to generate seed placed in the upper inch or two of the soil. Also care must be exercised to avoid a crust, which forms on many soils as a result of pressure from the planting tool. Practically all commercial planters used in the Southwest are equipped with a type of "runner" shoe which, in opening up the soil, often compacts and glazes the sides of the furrow. Under such conditions the wheel that follows the shoe does not close the furrow properly but leaves a narrow open track of packed earth along the middle of the furrow, which allows the soil around the seed to dry out quickly. Even where no crust is apparent on the surface, investigations show that the pressing of the soil, especially if a little wet has closed the groove at the surface but has left a channel underneath, so that the seed do not have sufficient contact with the soil to start germination.

The newly devised equipment overcomes these objections. A V shaped scraper somewhat on the order of a snow plow precedes the planter shoe and levels the soil so that the penetration of the point of the planting is at a uniform depth. A small press wheel operates in the furrow just back of the seed spout and passing over the seed immediately after it is dropped presses it firmly into the soil. Two blades follow the press wheel in such a way as to accomplish the covering of the seed and a slight firming of the soil. The planter wheels are set to one side of the seed row to prevent further packing.

A copy of the publication, Department Circular 381-C may be secured as long as the supply lasts by writing to the United States Department of Agriculture, Washington D. C.

Jack Edwards came in last Sunday from Terrell, where he has been in school. The Edwards family finished moving their belongings to their home here last week.

Crane Wildcat

Drills In Lime

Ft. Worth Star Telegram)
The Zweifel-Cosden No. 1 W. E. Connell in the northern part of Crane County, was reported Tuesday morning as drilling in lime at 3,036 feet. The test topped the lime Saturday night at 2,975 feet. It then drilled 15 feet in lime and went into a break of anhydrite—grayish and softer than the flaxy, white anhydrite found above the lime. Lime was topped again at 3,020 feet.

According to operators familiar with the field, the break of anhydrite below the lime is in keeping with the experience in other wells, notably in the Independent Oil and Gas Company No. 1 Taylor, in the original producing area in the Hurdle district.

The Zweifel-Cosden test logged the top of the salt at the top of the lime somewhat lower than in the Independent test, but considerably higher than in the Gulf's No. 1 Hutchings Stock Association in Ward County and the Magnolia Tidal (Church and Fields) No. 1 University in Crane, which are nearer the Independent test than the Zweifel-Cosden indicating formations rising again, in the opinion of many operators.

The Zweifel-Cosden test is expecting a hard cap found just below the anhydrite fill in other tests.

Chevrolet Sales

Recent sales of Chevrolet cars reported by the Western Auto Supply Co. include a landau sedan to Percy Mims; a coach each to Woody Strader, E. R. Benedict, A. H. Schultz, and John Edwards; a half ton truck to Howe and Allen, and one ton truck each to A. W. Stanley, and to E. W. Myrick of Florey.

Fire Call Monday

The fire department answered a call Monday morning, when the oil stove caught fire in the residence of John Lovell. Those who arrived early got the stove out of the house, so that little damage was done.

Renew Your Health by Purification

Any physician will tell you that "Perfect Purification of the System is Nature's Foundation of Perfect Health." Why not rid yourself of chronic ailments that are undermining your vitality? Purify your entire system by taking a thorough course of Calotabs—once or twice a week for several weeks—and see how Nature rewards you with health. Calotabs are the greatest of all system purifiers. Get a family package, containing full directions. Only 35 cts. At any drug store. (Adv.)

STAR PARASITE REMOVER

Given to Fowls in their drinking water or feed will rid them of all blood sucking lice, mites, fleas, blue bugs, clean them of all external worms and parasites. It is also a wonderful poultry tonic, blood purifier, health builder and egg producer. It contains lots of sulphur, compounded scientifically with other health building ingredients. Known remedies for preventing disease. "Prevention is cheaper than cure." Keep your flock free of insects and intestinal worms and their system in good condition through the winter and you will get good hatchings and strong chicks in the spring. A supply of this parasite remover will cost very little. Give it a day's trial on your risk. Money back if not pleased.

For Sale By All Drug Stores

More Fruit Needed For Fair Exhibit

Mrs. J. S. Cordill brought a quart of cherries to the office of the Chamber this week for use by that organization in staging an agricultural exhibit at the Dallas Fair. One more quart of cherries is needed and two quarts each of four other kinds of fruit are needed. People who will donate these, will be helping to boost their county.

Hall's Catarrh Medicine is a Combined Treatment, successful local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.

Paper Best Suited for Wrapping Fruit

Should Have Good Strength and Flexibility.

(Prepared by the United States Department of Agriculture.)

Practical tests to determine suitable papers for wrapping fruits and vegetables conducted by the bureau of chemistry of the United States Department of Agriculture show that paper for wrapping apples, oranges, lemons, pears and tomatoes should weigh 10 or 12 pounds per ream of 500 sheets 24 by 36 inches in size, and that it should have a bursting strength of not less than 6 points.

It should have sufficient flexibility and strength to withstand the vigorous rapid twist given the paper in wrapping and to give a smooth, attractive appearance to the wrapped fruit. Paper complying with these requirements generally has been found satisfactory by the packers, but paper not complying with the specifications has not proved serviceable.

Wrapping papers of the right kind will retard evaporation and thus tend to keep fruits and vegetables in a fresh condition. They will reduce damage in shipment from rubbing or jarring, retard final ripening until removed by the retailer, and they will give protection from dust, frost or the sun. While it cannot be expected that one kind of paper will prove suitable for all kinds of fruits and vegetables, the specifications will enable shippers to purchase satisfactory wrapping papers.

In order to secure additional information for fruit packers, the bureau of chemistry will examine samples of paper that have proved satisfactory in service. The sample sent in must consist of at least 20 wrappers, 10 new and 10 that show the paper torn or damaged in wrapping fruit. A full statement as to the points in which the paper is unsatisfactory, the name of the maker, brand name of paper, and approximate percentage of the paper failing during wrapping, should accompany the sample which should be mailed to the bureau at Washington.

Cultivation of Alfalfa Helps to Control Weeds

Cultivation of alfalfa may be beneficial under two conditions—when barnyard manure has been applied to the soil as a top dressing, and when it is necessary to control weeds, according to Prof. S. C. Salmon of the department of agronomy at the Kansas State Agricultural college.

"Efficient cultivation works the manure into the soil where it more readily decays and hence becomes more useful to the plants," said Professor Salmon. "There is good reason to believe that cultivation after applying manure may be beneficial for that reason. There is no experimental evidence, however, to verify or disprove this opinion.

"Bluegrass, crabgrass and foxtail which greatly damage old alfalfa fields can be practically eradicated through cultivation. When alfalfa fields are to be left for seed it may be especially desirable to remove all weeds by cultivation.

"One of the best implements for cultivation is the spring-tooth harrow. If the ground is very hard a disk harrow may be used. A good time to cultivate is early in the spring before growth starts. Cultivation immediately after removing the first crop is perhaps more effective in killing bluegrass whereas cultivation after the second or third crop is cut may be most effective in killing crabgrass."

Cowpea Valuable as Hay for Different Animals

The cowpea is valuable for hay, being nearly equal to wheat bran in nutrition, according to the Department of Agriculture. The seed is rich feed but is little used because of its scarcity and high price. It also makes an excellent dish for human consumption and is considerably used in the South.

The seed is long lived and can be stored for long periods without loss of germinating quality but is attacked by weevils, so seed houses are forced to treat it with carbon bisulphid before storing, to kill off these pests and to give later treatment to keep them in check. While there are a number of varieties only a few are recognized as of first importance and the seed trade is accumulating a stock of the best sorts for distribution through careful tests and study.

FARM NOTES

If the apples kept in the cellar for home use are sorted occasionally rot will not spread.

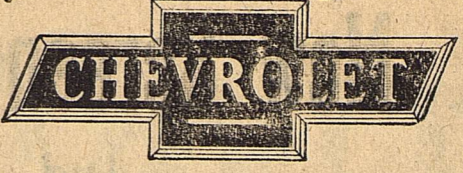

Every pound of fruit, vegetables, milk or meat placed on the market has a part in affecting the price of all.

European clover seed is low in price and quality, though neither are as low as the man who would sell it for home-grown seed.

There are approximately 193,000 farms in New York state, which is about three times as many as there are in the state of Washington.

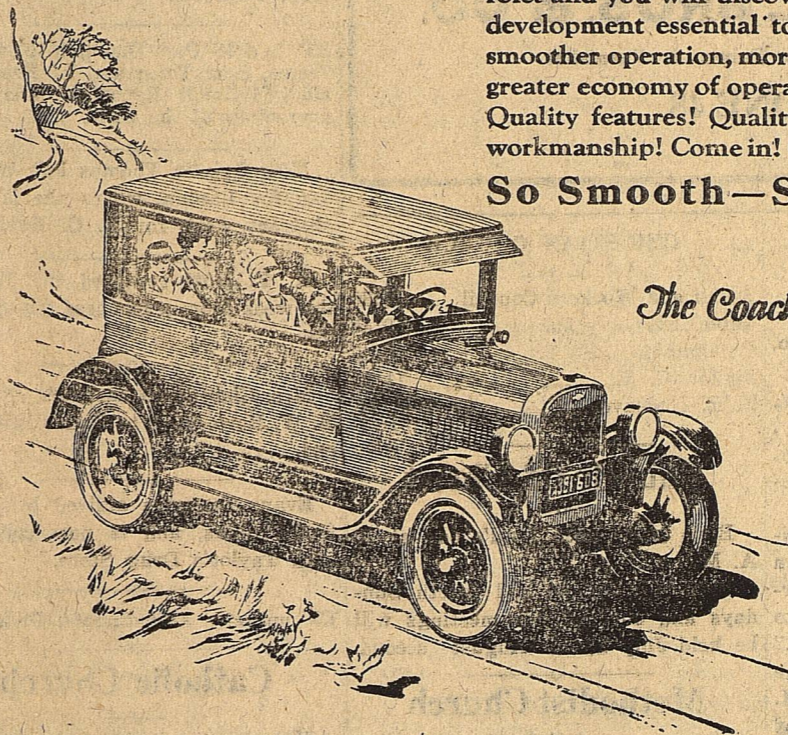

Experience goes to show that there is less waste of the fertilizing elements of manure when it is spread upon the fields as fast as it accumulates.

Went Fishing! Too Much Rain!

John Locklar, Clyde Barron and J. R. Storey, in one party, and David M. Ellis and O. A. Willingham in another, went to Stockton Lake, south of Fort Stockton last Saturday night; but too much rain fell to allow them any fishing luck. Several times they had to help each other get cars out of water holes, and when they reached the lake it was far out of its banks.

Expects Well To Come In Sept. 4th
