PUNISH THE CRIMINAL, PRESERVE LIBERTY

President Hoover's selection of members for his commission to study crime and our antiquated law machinery insures a scientific and impartial survey. Every member is distinguished in an important field of endeavor...

For many years the statute books have grown steadily more weighty with a burden of laws. Red tape abounds on every hand. A clever lawyer, apparently, can find a technicality to fit any case.

THE WAR ON HIGH GASOLINE TAXES

The automobile industry, through its successful efforts to eliminate the excessive tax on motor vehicles, saved motorists over \$100,000,000.

Now the petroleum industry, by aiding citizens in the war against exorbitant gasoline taxes, hopes to save the driving public at least \$150,000,000 yearly.

Last year the gas tax paid in the United States totaled \$300,000,000, according to an estimate by the Bureau of Public Roads. This year the aggregate is expected to reach \$450,000,000, a 50 per cent increase.

It is said that the tax now paid averages around 25 per cent of the filling station price of gasoline. This is out of all proportion to the cost of fuel.

Every state now taxes gasoline. The minimum tax is two cents, the maximum which has just gone into effect in South Carolina, is six cents.

When any tax becomes exorbitant, the public will rebel. There is no excuse for riding a willing taxpayer to death.

AN INTERNATIONAL LANGUAGE

The Daily Telegraph of London, commenting on the fact that differences in language are at present a barrier to international communications, foresees a time when one or two languages will be understood the world over.

Once international telephony comes into greater use, through a common language, it will mean a great step forward in promoting understanding and friendliness among the great nations of the world.

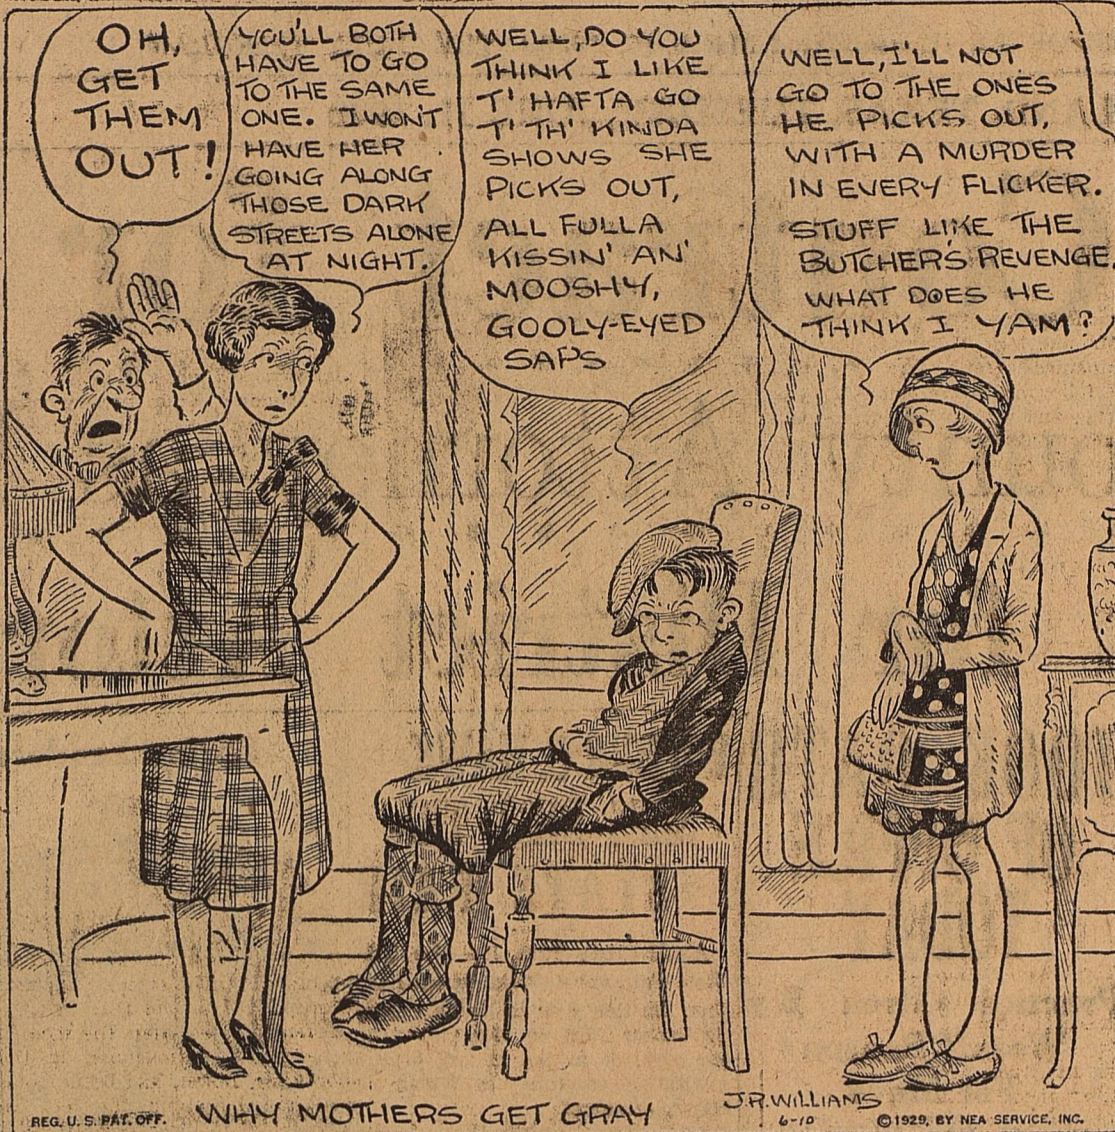

Again American private initiative and enterprise blaze the trail for world progress.

TODAY'S CROSS-WORD PUZZLE

Crossword puzzle grid with numbers 1-46 and shaded squares.

- Horizontal 1. A border of a picture. 2. Ethical. 3. One of the "spots" on a playing card or dominoes. 4. Wing part of a seed. 5. Musical drama. 6. Form of verb to be. 7. Frost bite. 8. Engaged in, as a war. 9. Natural channel between sandbanks. 10. Always. 11. Meadow. 12. Crown of the head. 13. Type of automobile body. 14. Digger of coal. 15. Matter-of-fact. 16. Quiet. 17. Wanders about. 18. A type of rabbit. 19. Thy flap. 20. Glazed clay block. 21. Stable. 22. Deadly.

OUT OUR WAY

STAR AND DIRECTOR OF FORMER SUCCESS UNITE IN NEW FILM

Due to the success of the combination of Jack Holt as the star and Frank R. Capra as the director of "Submarine," the two were re-united in the filming of "The Donovan Affair," the Columbia 100 percent dialogue production featuring Jack Holt, which will be the attraction at the Ritz Theatre on Wednesday and Thursday.

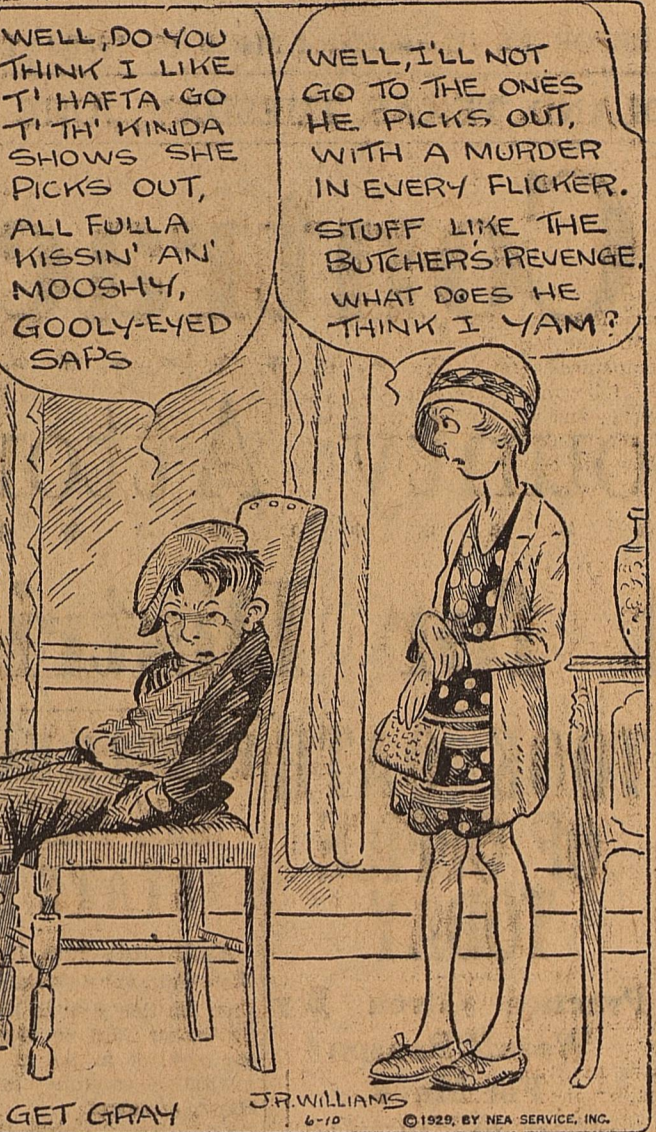

Jack Holt rose to stardom under the Paramount-Lasky banner. He has been a popular star of western pictures for over ten years, and has portrayed the leading roles in such notable successes as "Sea Horses," "Fortum River," "North of 36," "Avalanche" and others.

RAIDERS' SPONGE ON HOSPITALITY BOSTON, June 11.—(UP)—When police raided a Roxbury establishment they hunted in vain for liquor. A pipe running along the floor aroused their curiosity, however, and they traced it to the basement, where it entered a large cement block.

'GASOLINE PRICE UP' DALLAS, June 11.—(UP)—Gasoline prices advanced two cents to 19 cents at Magnolia and Oriental stations here today. Other companies are expected to follow.

Texas Mexicans Subject of Survey

AUSTIN, Texas, June 11.—Pathfinder surveys of the various phases of the social and economic conditions of the Mexican in Texas are being made by a group of University of Texas faculty members, working under the general supervision of Dr. Max S. Handman, professor of economics.

Under Dr. Handman's supervision, Dr. W. E. Gettys, professor of sociology at the University, is studying the sociological aspects of the Mexican immigration in Texas. Also working with Dr. Handman are Dr. Dr. H. T. Manuel, professor educational psychology, who is studying the education of Mexican and Spanish-speaking children in Texas; Dr. O. Douglas Weeks, associate professor of government, who is investigating the problem of the Mexican in Texas politics; and Dr. J. C. Collier, associate professor of home economics, who is making a research study of the diet of the Mexican in Texas.

CALLING "WUNTRY" STARTED HIS CAREER

"Newspaper work on a corner scale," as George Jessel puts it, feared his early childhood in New York's East Side, where his father, Joseph Jessel, a dramatist and stage director, loved his art more than dollars. George's musical cry of "Wuntry" and his smile usually cleaned up his corner in short order.

But George's newspaper career was short-lived. At the age of nine he was playing a schoolboy in a Gus Edwards' vaudeville revue—and he has been singing, wisecracking, emoting or dancing on the stage ever since. Now he is doing most of these things on the screen, for the new talking movies allow Jessel to sing, joke and act, and all of these he does in "Lucky Boy," the Tiffany-Stahl sound feature starring the famous comedian at the Grand Theatre next Sunday.

STRANGE BIRDS IN ITALY

'BIELLA, Italy, June 11.—(UP)—A number of strange web-footed birds, believed of Asiatic origin and belonging to the coromant species have been killed here by Virgilio Campigli, a local sportsman. The birds are believed to have been driven out of their usual region by violent winds of the exceptional weather of last winter. No such specimens are known in Italy and four of the birds shot by the local sportsman have been stuffed and sent to the local museum.

Salem, W. Va., Evelyn Meredith, above, fought the girl's death grip and swam with her to a ledge on the shore, where friends brought them both to safety. Evelyn is 14, and though she is not an expert swimmer, has spent much of her life out of doors. She also excels in studies. Her father is a newspaperman.

Wrestling Matches Played In Story

By Boston Herald

BOSTON, June 11.—(UP)—The Boston Herald, in a copyrighted article, said it had completed a survey showing that championship wrestling is the greatest goldbrick industry of modern sport. "Scarcely any important match is genuine," it said. The Herald said that Dan Koloif met Gus Sonnenberg at Greensboro, N. C., and Milwaukee, under the name of Dave Shannon, at Griffin, Georgia, under the name of Dan Kolman, at Huntington, West Virginia, under the name of Dave Petroff, and at South Bend under the name Fred Gotch.

Modern Science Now Makes Room for City of Twenty Million New Yorkers in Year 1959

IN METROPOLITAN AREA OF 5528 SQUARE MILES, PLANNERS WANT 38 AIRPORTS; ALL TRAIN AND MOTOR TRAFFIC UNDERGROUND

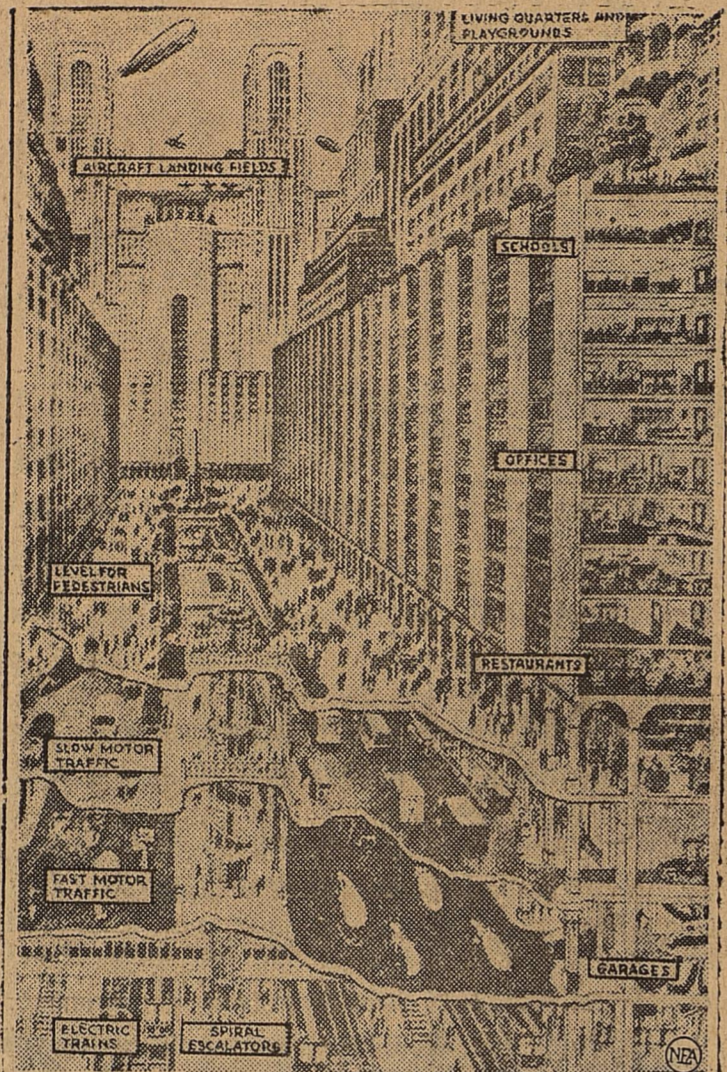

By HORTENSE SAUNDERS
NEA Service Writer

NEW YORK, June 11.—The New Yorker of the future, if he survives the present, is to have all the living advantages that have hitherto been distributed among the birds, beasts, worms, and even fishes. For he is to divide his time between air, earth, and sea. In the next 25 years, if Manhattan multiplies at its present rate, the population will be doubled and tripled, and how it will live or move already has become something to worry about.

However, according to latest reports, instead of getting worse, which it cannot, congestion is going to be reduced. With the aid of architects, scientists, city planners who have spent sleepless nights over the situation, and a billion dollars in cash, it is promised that the next generation actually will have more room than the present one.

Just Wait Till 1965
New York is envisioned as reaching its perfection about 1965—a city soaring above its present limitations and digging more deeply into its rocky ribs—a network of tunnels, bridges and highways, dotted with airports—this according to the Regional Plan of New York, a plan which is the result of seven years of work on the part of 150 engineers and economists and \$1,000,000 supplied by the Russell Sage Foundation.

The plan is in the hands of the new sponsors, with George McAweeney, former president of the Borough of Manhattan, at its head, and the Russell Sage Foundation as its backer.

in 1950 or 2000 was shown by plans at the recent Exposition of Architecture and Allied Arts in New York.

According to this scheme, the city will become a giant layer cake, with layers above and below the earth, all complete and functioning in their several ways, with all but pedestrian and air traffic underground.

Into the lowest level of subterranean life would be the subway system, connecting to upper levels by spiral escalators, and the freight tubes for fast distribution.

Immediately above this is planned the level for fast motor cars, each lane being devoted to one-way traffic, with garages on this level so that people with apartments never would need to remove their cars from that level while in the downtown portions of the city.

Above this level, but still underground, heavier, slower motor traffic would move, with adjacent garages for repair. The theoretical advantage of placing this slow traffic above the fast is that merchandise and freight would not have to be elevated so far to the stores.

Pedestrians Not Forgotten
By this time we have come up to the surface for air and have a whole level devoted to pedestrians, who by this time are so plentiful that they will fill the entire streets. Thus the stores, restaurants, and hotels naturally will seek this level.

Going up, on the level above, would be business offices, and above them, serene and high, the schools, art institutes and clubs.

By this time we are pretty high up and have only a few more stories to go to reach the roofs and setback levels, to be devoted to living quarters and playgrounds, aerial parks appropriately decorated with shrubbery and on fairly easy terms with the moon and stars. On hot summer nights, these living quarters would afford the comfort that is lacking near Mother Earth herself, where the radiation of heat is so unbearable.

Under this scheme the tops of the buildings would be of uniform height over a considerable area, furnishing convenient landing places for airplanes.

The plan considers Manhattan and its immediate vicinity as including 22 counties and comprising 5528 square miles and accommodating a population of 20,000,000 people.

Plan Huge R. R. Loop
As a means of communication relief and increased traffic facilities, it plans to connect New York, Long Island and Jersey by means of a huge railroad loop, linking the lines of seven great systems.

These lines would completely encircle the city, above and underground, and the congestion into New

Jersey and Long Island would be greatly reduced. From residential towns in New York state, Connecticut and New Jersey, a system of airways into Manhattan is proposed.

Looking forward to air transportation as increasingly important, the committee advised the immediate purchase of 16 new airports in addition to the 22 now existing. New bridges, tunnels and double levels are a part of the plan.

Picture of the Future
What the city itself may look like

Everett Gets

(Continued from Page 1)

000 will make an actual saving of 2 per cent on the fire insurance rate, will save storage on fire apparatus, now stored in various places about the city, and will save rent the city now pays for a municipal court room.

Perhaps more important than these savings, officials say, is the fact that the fire department will become vastly more efficient. In the new combination city hall and fire station, firemen will have lodgings and be on duty day and night. At present, fire boys must live wherever they can find places to stay.

Benefits Described
The combination fire hall and city hall, which under no circumstances could be built for \$20,000, builders declare, is designed on a plan whereby it can be added to without loss of walls or materials. For the additional \$15,000, in fact, the city will get combined fire station and city hall which will actually be a matter of immediate saving to the taxpayers and will better insure protection against the liability of fires.

The present city hall will be converted into a municipal court building, thereby saving rent the city is now paying for a place to hold city court. The new building will go up on property adjoining the present city hall.

The country's first commercial ambulance is in operation at Oklahoma City, The Braniff Airlines who operate the service have had emergency calls for their special hospital plane from as far away as Maine.

County Chairman

(Continued from Page 1)

M. T. C. said when approached by a reporter on the subject. "The efficiency of the system," the judge said, "is easily explained when it is known that at camp there are facilities available for all the major sports and for nearly every minor sport to which the American youth gives passing fancy."

The judge said that he expects the large list of Midland recruits to the camp at Ft. Bliss this summer to get as much from athletic training as from any other factor.

"That here Young America gets its chance under the right conditions to indulge in its favorite athletic sport is indicated by the champion athletes who have endorsed the C. M. T. Camps. 'Bobby' Jones is a firm supporter of the C. M. T. C. Babe Ruth has written the War Department his sentiments in favor of the Camps. Gene Tunney's signed statement is in the War Department files. Charley Paddock, Bill Tilden, and Johnny Weismuller, the swimming champion, are also on record. Knute Rockne of Notre Dame, 'Biff' Roper of Princeton, and 'Biff' Jones of West Point, are among the sixty famous football coaches who have penned strongly worded endorsements of C. M. T. C.

15-MILE CLASSIC SPEED RACE 4TH JULY ATTRACTION

ABILENE, Texas, June 11.—The feature of the Automobile Race program to be held on the West Texas Fair Speedway in this city on Independence Day, July 4, will be a 15-mile event in which a guaranteed purse of \$650 will be given the winner, and smaller amounts to the next three to finish.

There will be four other competitive events on the card in addition to the time trials which will start at 1:30 p. m. The fair association is putting up a total of \$2,500 as prizes for the various winners and will in addition divide a percent of the receipts among the contestants.

The race meet here on Independence Day will be conducted under the sanction of the contest board of the American Automobile Association. D. H. Jefferies, veteran race official will have charge of the program as official AAA representative and starter.

In order for drivers and cars to enter this race, very stringent regulations must be met, Jefferies says. Spectators will be guaranteed of seeing all the contestants trying to win. There will be no pieced-up machines or inexperienced pilots allowed on the track.

BIG OIL FIRE IN CALIFORNIA FIELDS TODAY

LOS ANGELES, June 11.—(AP)—Nine oil derricks and more than 45,000 barrels of oil had been destroyed today by a fire which broke out late yesterday at the Santa Fe Springs field near here.

The damage was estimated at more than \$1,000,000.

Asbestos clad firemen were unsuccessful in fighting the flames. The fire was started by oil leaking from a storage tank to a boiler.

Each of the five races will start eight cars. The first contest on the program will be for ten laps of the five-eighths mile dirt track. This will be open to the eight cars making the fastest time in the time trials and will pay \$250 to the winner.

In the second event, also a ten-lap grind, the cars winning the first three places in the first race will be cut out and the next eight high cars in the qualifying round will be started. First money will be \$175.

The other two events will be five mile races.

The entry list for the Independence Day classic is open and a large number of starters is expected.

ALL THE "TALKIES" NEED NOW IS SOMETHING TO SAY, DECLARES SHERWOOD

Hollywood isn't as nervous about the "talkies" as it was, and mechanical troubles are being overcome, says Robert E. Sherwood, well-known film critic. All they need now is to find something interesting to say, Mr. Sherwood declares in McCall's Magazine for July:

"The period of hysteria, induced by the movietone, is just about over. The reorganization of the mammoth film industry has been managed with surprising efficiency and speed, and the new regime is definitely in operation. The electrical engineers are persistently improving the sound recording devices; removing the lisps, squawks and roars; and the actors and directors are successfully adjusting themselves to the revised order of things. Nervous apprehension has abated in Hollywood.

"In fact, the talking picture is emerging from the cradle of infancy, and all that it needs now is to find something interesting to say. That, however, is not an easy task. For no matter how competent the acting and direction, or how smooth the mechanical reproduction and synchronization, a talking picture may be utterly ruined by bad dialogue. The vocal movies place a heavy burden of responsibility on the writer who composes the lines for the characters to speak, and it is becoming apparent that there are regrettably few authors who can bear up under this burden.

"In the best of the talking pictures, such as *The Broadway Melody*, *Hearts in Dixie*, *The Trial of Mary Dugan*, *Alibi*, *The Letter*, *Show Boat*, *Coquette* and *Close Harmony*, you will observe that wherever the dialogue becomes stilted and unnatural, the acting suddenly seems to appear crudely incompetent, the dramatic interest slackens and the illusion is dispelled.

"The movietone has deprived the screen of some of its traditional breadth of action, none of its fluidity, none of its opportunities for eloquent pantomime. Neither is the movietone depriving the screen of its former stars to the expected extent. Most of the notable performances that have been the work of actors and actresses whose experience has been gained in the films."

In Italian Church-State Quarrel

Italy has been stirred by disagreement between the government and the Vatican as to whether church or state shall supervise the education of children. Recent public addresses of Premier Benito Mussolini, left, were "even worse than heretical," Pope Pius XI, right, declared in an open letter to Cardinal Gasparri, inset, Papal Secretary of State. The premier had implied that the Catholic Church owed its world wide spread to its removal to Rome.

He Will Be Shrine Chief In Year 1941

Twelve years from now Walter N. Suggden, attorney of Sistriville, W. Va., will become imperial potentate of the Shrine's. He was the only new officer elected at the recent convention in Los Angeles, all others moving up to the next highest office through regular channels. As imperial outer guard now, Suggden will advance to imperial potentate by 1941.

Evolution was termed an exploded theory by other opponents. The Biblical account of creation was upheld by Representative Forbes, Weatherford clergyman.

N. A. T. Acquires Major Interests In Amarillo Airport

PORT WORTH, June 11.—Acquisition of operation rights of the Amarillo Municipal Airport, which, along with the recently purchased Grosvenor Field in San Antonio, is one of the largest in the country was announced Saturday by Hon. Hardin, vice president and general manager of the Southern Air Transport, Inc.

The Amarillo field was taken over Sunday, beginning a twenty-year lease. The field was christened by Jim Kelly, who, along with Reg Robbins, holds the world's record for sustained flight. Kelly and his wife, a bride of eight weeks, were flown to Amarillo by Lieutenant Al Harvey, around-the-world flier, who is now an instructor in the T. A. T. Flying School.

Sunday's ceremonies were informal. A formal opening, which is to be attended by a fleet of army planes, planes from various operating companies, and individuals, is planned at a later date.

The field, which is located on the edge of Amarillo, has an area of 400 acres, only slightly smaller than the Grosvenor Field recently purchased by the Southern Air Transport, which is the largest commercial field in the South. It is equipped with a large hangar and

Vacation Time

Vacation time is here. All work and no play makes Jack a dull boy. All play and no work makes him almost good for nothing. During the vacation see that he gets plenty of work, some play and lots of milk. If you would be sure of its quality and purity use milk from

MOODY VETOES FIVE RECENTLY PASSED BILLS

AUSTIN, June 11.—(UP)—Anti-evolutionists were defeated again when the House educational committee reported unfavorably the anti-evolution bill by a vote of 7 to 5.

Representative Harper of Mount Pleasant said he would try to have the bill printed on the minority report. Harper endorsed the principle of barring both religious teaching and atheistic teachings from schools.

Think of the blessed convenience of a table salt that never lumps, cakes or hardens... that pours as freely in humid or rainy weather as in dry! Morton's Iodized Salt does this because it's made with cube-shaped crystals which tumble off one another instead of sticking together like the flake crystals of inferior salts.

Yet this is not the only reason for using Morton's Iodized Salt. It also saves children from simple goiter... a widespread cause of lack of vigor, irritability and mental backwardness. Try it! Morton Salt Co., Chicago.

IODIZED TO PREVENT GOITER, ALSO PLAIN
