U.S. AKRON LOST

EXPECT 600 TO VOTE TODAY IN CITY ELECTION

Early Balloting Is Greater Than in School Vote

Assurance of a much larger vote than was cast in the school election Saturday was indicated for the city election when at two o'clock this afternoon, 294 votes had been cast. That number had voted at five o'clock in the school election and a total of only 422 was registered when the polls closed at seven.

COUNTERFEIT RING BELIEVED BROKEN

Two men who give their homes as Chickasha, Okla., are held in the county jail in connection with an investigation by local and federal officers of passing counterfeit money.

DISTRESS OIL IS FLOODING E. TEX.

HOUSTON, April 4. (UP)—The United Press learned reliably today that 700 tank cars of East Texas oil, concentrated here, have been ordered at twenty cents a barrel plus a twelve and a half cent freight charge. The field's posted price is fifty cents.

Jr. Declamation Finals Are Held

Junior declamation contest winners today were Fred Gordon and Edith Ripplin, when the finals had been completed. The two will represent Midland in district competition.

Late News

CANNES, France, April 4. (UP)—A ten day intension to wed notice by the former mayor of New York, Jimmy Walker, and the actress, Betty Compton, was published today.

Election Party At News Office

Come to the Blackboard party! Results of today's city election will be posted on a blackboard in front of The Reporter-Telegram this evening, as soon as the count is available.

WETS ASSURED WISCONSIN AND MICHIGAN VOTE

DETROIT, April 4. (UP)—Michigan led the nation today in voting for repeal of the eighteenth amendment. At least 75 of the hundred state districts elected wet candidates to the constitutional convention.

An Ex-Naval Officer Of Old Regime Was Visitor in Midland

Joseph Rosin, former officer of the White Army in Russia, visited in Midland Sunday afternoon. He was en route to El Paso, where he met three men at tea Monday who were in Russia in the same turbulent times when he was attached to Gen. Rossmoff's staff in Siberia.

Quake Said Worse Than Advertised

The utmost effort to keep down publicity on the extent of the west coast earthquake was influenced by chambers of commerce in the stricken area, according to a party of Midland people who have returned from California.

Midgents to Parade Here Wednesday

The street parade of Singer's 30 famous midgents will be at noon Wednesday, according to announcement of Bill Blair, manager of the Yucca theatre, where the group will show Wednesday and Thursday night.

Midland Band in Abilene Tourney

The West Texas high school band contest will be held in Abilene May 6 under the auspices of the Cow-boy band of Simmons university and will be in charge of D. O. Wiley. High school bands will be entered in the following classes: Class A, high schools of over 750 enrollment; Class B, high schools of over 250 enrollment; Class C, high schools of less than 250 enrollment; and Class D, any band from any size high school organized less than one year.

Most of Crew Lost in Akron Catastrophe

Above is the crew of 61, which was aboard when the Akron sailed over Midland June 12, 1932, and most of which was aboard on the voyage last night, a voyage that ended with the greatest aerial tragedy in history. The center picture shows former Lieut. Commander Charles E. Rosendahl, Cleburne, Texas, who was at the helm on the passage over Midland, but who was doing sea duty last night and was not aboard the ship. The big bag is shown in the inset. Below is shown the dirigible in its hangar at Lakehurst, N. J.

Dirigible Toll Since Year 1921

Some of the memorable airship disasters since the "modern era" of the dirigible, dated from 1921: 1921—Collapse and explosion of dirigible balloon, ZR-2, over Hull, England; 42, including U. S. naval men, were killed; Aug. 24. 1922—Dirigible balloon Roma exploded descending at Hampton, Va.; 84 died of injuries; Feb. 21. 1925—The U. S. Navy rigid dirigible airship Shenandoah (which had left Lakehurst, N. J., on Sept. 2 bound for St. Paul) was torn to pieces about 5 a. m., Sept. 3, by a thunder squall while passing over Ava, Ohio; 14 of the crew killed, including Lt. Com. Zachary Lansdowne. 1930—The British \$5,000,000 dirigible balloon R-101, largest in the world at the time, on Oct. 4 hit a wooded hill, crashed, exploded and burned, near Allone, France, on way from London to Crofton to India. She carried as fuel 25 tons of inflammable gas. Among the 47 persons aboard killed by the fire and crackup were: Lord Thompson, secretary of state for air; Sir Sifton Branker, director of civil aviation; Seven of the passengers and crew survived. The dead was taken to England on a warship and placed in one grave at Cardington. The fate of the Shenandoah is a remarkable example of the comparative safety assured by the use of helium as lifting gas. Although this storm, it did not catch fire. Only the men in the control car and engine cars, which were slung down apart (See DIRIGIBLE TOLL, page 6)

Intrepid Airmen Surmount Everest

PURNEA, India, April 4. (UP)—Four men in two planes were the first to view the summit of Mount Everest, the highest peak in the world. They were up 35,000 feet, and 6,000 feet above the summit. Oxygen tanks were used for men and motors. The conquerors were the Marquis of Clydesdale, Lieut. Col. Stewart Blackner, Lieut. D. F. McIntyre and S. R. Bennett, motion picture cameraman.

Roosevelt Offers Oil Legislation

WASHINGTON, April 4. (UP)—President Roosevelt sent letters to governors of seventeen oil states today, pledging legislation according to decisions at the recent conference here. He expressed approval of the legislation to prohibit the transportation of oil and by-products produced in violation of state laws. He favored legislation suggested by independent operators to divorce interstate pipeline companies from other branches of the industry.

Farmers Urged to Rush Application

John S. Andrews, field supervisor for the crop production loan office, emphasizes that April 30 is absolute the last day for farmers to apply for government loans for crop production purposes, and farmers who still wish to apply for loans may apply at the chamber of commerce office to have their applications properly made out. The law forbids any charge being made for the forms filled out for the application of a notary, etc. are allowed. A loan may not be approved for the amount applied for, and if it is reduced, the proper reduction will be made on the forms filled out at the time the application is made. In the event the loan is not approved, the note and mortgage will be returned to the applicant, the application and voucher being retained by the C. P. L. office. The loans this year are not only limited to \$300, but the regulations require that borrowers reduce the acreage of their cash crops 20 per cent under that grown in 1932. The regulations provide a fine of up to \$1000 and imprisonment up to six months for material false representations made to get a loan. As in the past, the borrower must give a first lien on his crop. Loans bear 5 1/2 per cent interest, are due on or before Oct. 31, 1933. The regulations make it unlawful for any person to dispose of or assist in disposing of any crops given as security for any crop loan, except for the account of the secretary of agriculture and provide for fine and imprisonment for violation of the regulation. Each borrower must agree to plant a garden for his own use and to plant sufficient acreage to furnish feed for his livestock. Andrews further emphasizes that the borrowers not wait until the last week or day to make application for his loan, as something might happen that will prevent him getting the necessary waivers, if any, signed by their landlords, or who ever holds a prior mortgage crop lien, as the government is requiring an absolute first lien on all crops grown or to be grown by the borrower in 1933. (See APPLICATIONS, page 6)

Pythian Sisters to Meet

Regular meeting of the Pythian Sisters will be held tonight at 7:30 at the K. P. hall, Mrs. J. S. Mitchell announced this morning. She requested all members to attend.

DIRIGIBLE CARRIES 73 MEN TO DEATH

BARNEGATE, N. J., April 4. (UP)—Navy planes and destroyers were scouting the ocean twenty miles out from here today for survivors of the Akron, pride of the navy's air force, which went down in a storm at 12:30 this morning.

The German tanker Phoebus rescued four, the only persons reported saved of the crew of 77. Chief Radioman R. W. Copeland died aboard the tanker. Lieut. Commander Herbert Wiley, R. E. Deal and M. E. Erwin were transferred from the tanker to a cruiser and were rushed to New York.

Rear Admiral William A. Moffett, chief of the navy bureau of aeronautics, was one of the 77 aboard the Akron. Virtually all hope was abandoned for the 73 unaccounted for. Mrs. Moffett was confident that her husband still lives.

President Roosevelt mourned the loss of the Akron and her crew. "Ships can be replaced but the nation can ill afford to lose such men as Rear Admiral Moffett and his shipmates," the president said.

The Akron went down in flames. No statement had been issued as to why the ship was in the air at night, nor was there any official conjecture as to what resulted over the dreary stretch of Atlantic into which the air giant disappeared. No statement evidently had been made by the four rescued, and no explanation made in radiograms from the German ship.

Lost Dirigible Flew Over This City in June '32

The U. S. S. naval dirigible Akron, which crashed early today, flying fast for all her appearance of lazy drifting, passed over Midland at an altitude of more than 3,000 feet on Sunday afternoon, June 12, last year, arriving at Sloan field at 3:40 and drawing the attention of hundreds in Midland a few minutes later.

Specifications

The U. S. S. Akron was the "last word" in rigid type airships. Its loss marks a tragedy greater, even, than that of the U. S. S. Shenandoah.

Through the courtesy of Sgt. G. E. Brock of the U. S. Army radio and meteorological station at Sloan field, the following specifications of the Akron airship were obtained by The Reporter-Telegram. He took them from a morgue kept at the field.

Lashed to its giant mooring dock, it extended 765 feet in length over a mile in length alone, not including the Graf Zeppelin, which with the destruction of the ill-fated R-101 again became the largest dirigible in the world. Its diameter through its thickest section was 132.9 feet, the Graf is 100 feet and the Los Angeles 90.7 feet. Could the three ships be moored side by side, this diameter would perhaps more than any other demonstrate the Akron's massiveness. In height, its 146.5 feet was 33.5 feet greater than the Graf and 42.1 feet greater than the Los Angeles. Its power rooms contained eight engines, capable of developing 4,480 horsepower, as against five engines with 2,750 horsepower and five with 2,000 horsepower of the Graf and Los Angeles respectively. Its maximum speed per hour was 83.8 miles, the Graf's is 80 and the Los Angeles is 73.1. Its capacity gas supply could carry 776 tons, without refueling, based on an average cruising speed of 50 knots. At the same speed, the Graf can cover 6,125 miles and the Los Angeles but 4,000.

Flapper Fanny Says

On this basis of speed the Akron could circumnavigate the globe via the Post-Gatun route with a single stop. The Graf Zeppelin established a number of records. Its flights around the world in 22 days was one which was surpassed only by Wiley Post and Harold Gatty. Its ability to fly under the most adverse weather conditions constituted a great step forward for aeronautics. Its size, supported by its quality of safety, drove home the possibilities of trans-oceanic air transportation. The Los Angeles, the grizzled veteran of the three ships, displayed its worth at an earlier date. Its use of non-inflammable helium gas instead of the inflammable hydrogen as an elevating agent reduced

MAN'S DESIRE FOR ADVENTURE

It is doubtful if any airplane flight yet projected is more a "stunt" flight than the hop Monday over Mount Everest by a group of British airmen. The last few years have certainly brought us enough flights whose actual dollar-and-cents utility was difficult to discover. Yet almost all of them have had some practical value, however small.

But this flight over Mount Everest is something else again. No air line will ever be established over that wild, storm-racked mountain chain; no knowledge of a plane's action under extremely adverse conditions was gained that could not have been gained just as well elsewhere. Yet there is something about this flight that appeals to one's imagination. Perhaps it is the simple fact that it was so useless—and so perilous. Men who insist on risking their lives for no reason except the inner feeling of satisfaction that comes from doing the different and the dangerous will always command our respect, even though they sometimes make us feel that they are acting foolishly.

The human animal, when you stop to think about it, is a queer and unexplainable creature. Fix him up in comfort and safety as thoroughly as you can, he is more likely than not to wriggle out of it and try to break his neck against some ice-bound, gale-swept crag on the other side of the globe. Let him know that on an inaccessible point of the map there is a sea that has never been sailed, or a mountain that has never been climbed, or a danger that has never been faced successfully, and he will not rest until he has tackled it.

Why should this be? Heaven knows. There is something in man that makes it impossible for him to take a dare. This causes a good many unnecessary deaths, from year to year, and leads us stay-at-homes to wag our beards gravely; but it also gives us a glimpse, every so often, of sheer magnificence.

BUILDING UP BUYING POWER

James D. Tew, president of the B. F. Goodrich Rubber Company, has issued a statement declaring that as an industrialist he is heartily supporting President Roosevelt's farm bill; and the interesting thing about this is that Mr. Tew's rubber company uses vast quantities of cotton, and will find its manufacturing expenses greatly increased if the bill boosts the price of cotton as the administration expects it to do.

"We feel very strongly," says Mr. Tew, "that in the interest of the farmers and the welfare of the country as a whole, it is our duty to forget selfish interests and back up wholeheartedly the efforts of our president in restoring stability to the economic life of the nation."

For this project cuts both ways. It might boost the prices of raw materials, but if it did it would also add greatly to the farmer's purchasing power; and Mr. Tew and his brother industrialists might discover that if their operating expenses rose their sales would rise even more rapidly.

China sees an interesting society take form as a result of recent speeches by Government officials and Kuomintang leaders denouncing corruption in high places. Accepting the doctrine that "luxurious living and loose conduct" are the things that lead to corruption, the new society pledges all its multiplying members to abstain from wine and gambling, not to live in luxurious homes and not to frequent disreputable places of amusement. Here is a kind of reform that will get somewhere—the establishing of new standards by setting an example.

Angelo Credit Bank Pays More Than 2 State Units

The San Angelo branch of the Regional Agricultural Credit corporation continued to maintain its record of disbursing and approving a total of more loans than the combined totals of the Ft. Worth and Houston offices of the corporation. At the close of business Friday, March 24, the San Angelo branch had actually paid out \$3,044,993.88 to 370 borrowers, had approved subject to inspection, 502 loans for a total of \$5,248,850.07 and had finally approved, but had not paid out, 462 loans for a total of \$4,844,347.65. The 92 loans, totaling \$1,239,347.79, represents the loans finally approved but which cannot be paid off until borrowers have perfected legal requirements. It sometimes takes a couple of weeks for ranchers to get releases recorded and into the local office, so that the loan can actually be accomplished.

Loans Coming in Rapidly Agricultural loans are coming in rapidly, a score or so a day, but not nearly so many of these are expected as at the Fort Worth and

Table with columns: County, Final Authorizations (No., Amount), Tentative Authorizations (No., Amount), Total, Disbursed Loans (No., Amount). Lists counties from Andrews to Ward with corresponding figures.

ODD OPERATION and its beating was stopped during the four breathless minutes needed for the operation, the patient thus being practically in a state of death. The operation was successful, and the patient has now regained full health. There is one automobile to every six people in the United States.

If You Could Measure Taste

... you'd say that Sanitary Milk gives full measure in genuine delightfulness. Served as a nice cooling drink, as a tasty health potion or used as an ingredient in better cooking, Sanitary Jersey's Milk tastes better because it comes fresh daily from our own dairy farms. When the cost is the same, why not have the best—in this case, Sanitary Jersey's Milk.

SANITARY JERSEY DAIRY

"I'll need a rather large studio, in case I decide to stop writing and take up music or sculpture."

LETTERS to the EDITOR

Dear Editor: We look to our newspapers for authentic reports of events. His-

What are we historians to do in our efforts to learn and tell the truth when we discover that many presumably reliable newspapers, while reporting the latest happenings abroad, publish gross distortions of actual facts? Almost all the metropolitan newspapers and also of the radio broadcasters of late have retailed blood-curdling stories of alleged atrocities and cruelties said to have been perpetrated against Jews in Germany.

Thus it was reported in the New York papers the other day that Ernst Apfel, a Jewish lawyer in Berlin, was so roughly mistreated by Hitler fanatics that he nearly died of his injuries. On the following day the same papers reported how Louis Ullstein, the head of the Ullstein Publishing House in Berlin, had been dragged from his bed by Nazis and was so cruelly beaten that he had to be carried to the hospital. On the day after that the

es of brew, turning it into vinegar, a thick syrup, or even more noxious stuff. The continual danger from these bacteria is the reason why all big breweries are so spotlessly clean. Dr. Hartung is extra-proud of his yeast-family, affectionately called Saccharomyces Cerevisiae, which has been nurtured and guarded and brewed over for nearly 40 years. The tiny cells have passed into millions of billions of generations now, but are still direct descendants of their ancestor.

Then come floors for storage of raw materials. Herr Gut lifts an iron trap door and lets down an electric light on a long cord. Down, down it goes until you exclaim in wonder. This is a malt bin, explains the guide. It, and six others like it, are down to the basement level, and hold 10,000 bushels each. Then there's a gigantic refrigeration room, containing some 6,000 bales of hops, 500 pounds to the bale. The odor is almost overpowering in its pungency when you enter—then it drifts the senses like a heavy perfume. The hops and grain are handled entirely by conveyors, the grain being cleaned and sorted as it is carried up to the top of the bins.

On the next level begins the brewing proper. Two spherical cooking tanks stand beside and feed a pair of mixing tanks that hold 600 barrels each. Look into the empty one and you'll see, at the bottom, two big propellers, almost exactly like those used to drive airplanes. Driven by massive machinery, from below, they make a hurry-up job of mixing the grain and hops and water as they are poured in. Two hours of that, and the mass is pumped through batteries of filters, emerging as clear "wort" and ready to flow down into the giant kettles.

They're 20 feet in diameter, these glistening copper pressure cookers, and hold 22,000 gallons each. The kettle room, with its four vats and polished pipes, soaring through the ceiling, is the show place of the brewery. Steam pipes concealed underneath set the wort to boiling fiercely. It is not until the mixture reaches this point, incidentally, that the hops are added, tumbling down from the storage room through a series of conveyors that measure it almost to an ounce. It is only by the accurate measuring of each ingredient, the brewmaster explains, that beer of a pre-determined strength may be obtained. "Of course," he explains hurriedly, "we always test the beer, to be sure."

Next the wort goes to cooling tanks, being strained again in the process. The yeast is added—about a pound to the 22-gallon barrel—when the temperature is low enough for the yeast cells to flourish. Then the whole business is forced upward again, to the fermenting vats that we saw at first. From the aging vats it flows down again, as required, into storage tanks underground. Or it is diverted to the bottling works, where thousands of bottles are filled by a set of foamy liquid, capped, labeled and put into cases.

The Town-Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

Even though he had taken nine lodge degrees, a local man said he was never so nervous as on the day he was married.

Reduction, reduction, reduction! when did we ever hear that word used so much? Men demand tax reduction while women demand weight reduction.

A saxophone is all right in its place, but it isn't nice to print the name of the place.

A Kansas farmer wrote to the secretary of war and asked him if he couldn't order the army worms out of Kansas.

English is called the mother tongue because father never gets to use it.

A news item in Sunday's paper said Lum Daugherty has never tasted coffee. Lum, you are a shirking example for the youth of the city. Boys should never touch strong drink.

However, Lum, you don't know what you have been missing by not learning to guzzle.

Won't the judges of the supreme court have a big time deciding whether 3.2 per cent beer is intoxicating?

Likely as not I wouldn't be able to reach a decision on the first metropolitan newspapers reported that 1400 Jews had been massacred during a pogrom in Hamburg.

Now we know that neither a pogrom of Jews at Hamburg, as a matter of fact not a single Jew was beaten there, let alone killed. The German press correspondents to New York have learned that neither Apfel nor Ullstein was ever mistreated. Herr Apfel himself has confirmed this in a dispatch to a friend in New York, which I have seen. As for Herr Ullstein, the New York correspondent of the House of Ullstein tells me that his chief, Louis Ullstein, recently succumbed to the after-effects of a surgical operation for gall-stones. This happened several days before the date given for his alleged murder.

Only a few of our metropolitan papers could be brought to print corrections of those erroneous stories. Most of them let their misrepresentations stand. I ask how are future historians to learn from the news recorded, can no longer be trusted in specific cases. In such cases historians can only divine the truth by reading between the lines.

While doing so we wonder whether there might not be a motive behind so many persistent untruths in regard to the latest events in Germany emanating from France and Poland? What can be that motive?

Is it because certain neighbors of Germany do not want to see her unified and strengthened by her new Nationalist Government? Or is it part of the propaganda now

# SOCIETY

## Episcopal Auxiliary To Contribute to Nat'l Organization

The president of the Episcopal Women's auxiliary Monday afternoon read an appeal from the national church organization for aid in meeting a deficit in funds and a vote was unanimously carried to give a cash donation from this auxiliary to help cover this lack of funds. The vote was taken at the home of Mrs. Charles D. Vertrees, 1211 West Indiana.

The meeting opened with the Lord's prayer and a prayer for the auxiliary said in union. A special prayer for Mrs. W. H. Martin's health was read by Mrs. Vertrees.

The regular order of business including the roll call, minutes and treasurer's report was carried out. In honor of Mrs. Martin's birthday, a gift was voted upon to be presented her. Mrs. Martin is the wife of the Big Spring Episcopal minister.

Mrs. John M. Shipley was designated as the member to send cookies and tea to the church supported student center at Canyon this month.

After a Lenten sermon was read, work on a quilt was begun.

Tea was served to 12 members. In commemoration of Holy Week, which is next week, the next auxiliary meeting will be held at Trinity Chapel and will be devoted to a devotional service.

## Christian Society Hears Program on Harvest in China

The Women's Missionary society of the Christian church met Monday afternoon with Mrs. John Phillips, 725 West Kansas street, Mrs. L. C. Rea as co-hostesses.

The meeting was opened with a prayer given by Mrs. Lee Bradshaw. The president presided and the secretary read the minutes of the last meeting.

Mrs. Ed Erickson, worshipful leader, presented the theme "Now I See." John 9:25. Mrs. Charles Klapproth, presentation leader, introduced the topic "Harvest in China, Changed Individuals." She was assisted by Mrs. Rawlins Clark, L. A. Denton, William Blevins and Glenn Brunson, who presented the following leaflets: "When Mother Was a Girl," "Overflowing Joy," "My Life as It Is and as It Would Have Been Without Christ," and "The True Story of Mrs. Cheo, a Chinese Woman," respectively.

The meeting closed with a missionary benediction.

Members attending were Mrs. E. C. Adams, Bradshaw, Guy Breneman, Blevins, Brunson, Clark, Denton, W. B. Elkin, Erickson, Carl Reeves, Klapproth, W. G. Riddle, Paul Ryan and the hostesses.

## Baptist Officers, Teachers Honored At Informal Banquet

Officers and teachers of the Baptist Sunday school and invited visitors enjoyed an oyster supper and brief program Monday night at the Sunday school annex.

John O. Nobles, the toastmaster, kept the crowd of about 40 pepped up with a running fire of wisecracks, as he introduced the various speakers. Those who made set talks were George Philippus, superintendent of the Methodist Sunday school, Claude Crane, Baptist superintendent who awarded a first place banner to the primary department, Paul T. Vickers, and the Rev. Winston F. Borum.

Philippus discussed some of the problems which beset all superintendents. W. W. Lackey, Mrs. R. V. Lawrence, and Alvin Hicks made brief talks. Mrs. J. E. Hardesty and Thomas Inman, accompanied by Mrs. Borum, played a violin and clarinet duet.

The tables were prettily decorated in the Easter motif under direction of Mrs. Ellis Cowden and Mrs. Chas. Goldsmith. Easter eggs, rabbits, imitation grass and chickens made the tables colorful. Mrs. Cowden was also in charge of the serving and was assisted by Irene Lord, Alma Lee Norwood, and Anna Faye Dunagan. Various women of the church furnished pies, and the oysters and other food was furnished by Hokus Pokus, Smith & Stevens, and Piggy Wiggly, with the Schaefer Cafe donating the cooking service.

## Baptist Circles Sew for West Texas Baptist Hospital

Circles of the Baptist Women's Missionary society Monday afternoon devoted their meetings to the gathering and making of linen articles for the West Texas Baptist hospital at Abilene.

The Annie Barron circle meeting, held at the home of Mrs. Bob Preston, was attended by 12 members, who made six sheets and worked on a quilt.

The T. E. L. class room of the Baptist church was the scene for the Lena Wimberly circle meeting. After a brief business session and the reading of a chapter from the Mission study book "Gospel to Red Men," seven members spent the remainder of the afternoon gathering linen.

Other circles held individual meetings.

## Miss Lois Brunson Hostess to Club

Miss Lois Brunson was hostess to the Entire Nons club Monday evening at the home of Mrs. J. B. Zant. In games of bridge, Mrs. Zant won high score, Miss Juliette Wolcott cut and Mrs. Susie Graves Noble high guest.

Playing were Misses Theresa Klapproth, Cordelia Taylor, Jerra Edwards, Lottie Williams and Wolcott, Mmes. Nobles, A. C. Weyman and Zant.

## Miss Lou Ella Cobb Entertains

Miss Lou Ella Cobb entertained Saturday evening with a party at the home of her parents at 214 North Weatherford.

Jig-saw puzzles and games of bridge were features of the evening's entertainment.

Refreshments were served to Misses Janie Louise McMullan, Charlene Parrott, Phyllis Gemmill, Helen Dunagan, Leola Kerby, Katie Bell Long, and the hostess.

Miss Cobb and her guests attended the midnight preview at the Yucca theatre.

## EASTERN STAR MEET

The meeting of the Eastern Star Study club tonight at 7:30 has been changed from the home of Mrs. Mabry Unger to the home of Mrs. L. C. Rea, 107 West Kansas.

The treasure of the former emperors of China is valued at more than \$20,000,000.

## Son Born to Couple Well Known Here

Word has been received here that a baby boy was born last night to Mr. and Mrs. Manly Myatt of Abilene. Mrs. Myatt is a sister of Mrs. James P. Harrison. Myatt, West Texas representative of the Quaker State Oil company, is a former Midland resident, having lived here two years ago.

## Announcements

**Wednesday**  
The Play Readers club will meet Wednesday afternoon at 3:30 at the home of Mrs. Don Carlos Davis. Mrs. Hugh Burchfiel will read "Biography."

Meeting of the Mothers Self Culture club Wednesday afternoon at 3 o'clock at the home of Mrs. Fred Wright.

Meeting of the City Federation Wednesday morning at 9:30 at the home of Mrs. John A. Haley.

Mrs. Elliott Cowden will entertain the Mid-Week club Wednesday afternoon at 2:30.

**Thursday**  
The Friendly Builders class will be entertained Thursday evening at 7:30 at the home of Mrs. Iva M. Noyes.

Opening session of the District W. M. U. meeting will be held on Thursday afternoon at 3 o'clock at the Baptist church.

**Friday**  
Mrs. Offie Walker will be hostess to members of the Naomi class Friday evening at 8 o'clock at her home, 301 North C.

Belmont Bible class meeting at 3:30 Friday afternoon at the home of Mrs. Troy Eiland, 907 North B.

Associational W. M. U. meeting held at the First Baptist church will begin Friday morning at 8 o'clock and last throughout the day.

## TODAY'S RECIPE

**Poulard Marie Antoinette**  
2 cups cooked chicken, diced  
2 cups chicken gravy  
1 teaspoon minced onion  
1/2 cups finely crumbled soda crackers  
6 eggs  
2 tablespoons butter

Combining chicken and gravy and season. Turn on buttered baking platter, and cover with two-thirds of the crackers. Make six nests in the crackers and put an uncooked egg in each. Cover with remaining crackers. Dot with butter, bake in a moderate oven (375° F.) about 20 minutes or until egg whites are firm. Serve with a fresh green salad in place of hot vegetables.

## Personals

Jay Floyd made a business trip to Seminole yesterday.

Miss Dixie Word has returned from Fort Worth, where she was called to the bedside of her mother, who is rapidly recovering.

A. E. Morgan of Dallas is in Midland on a business trip.

H. S. Brady of San Angelo is in Midland transacting business.

Mr. and Mrs. Frank Norwood, Mr. and Mrs. G. B. Graf and son, Barney Jr., returned last night from a business trip to California.

Mrs. Fred King and Mrs. Paul Anew of Odessa visited friends in Midland today.

Mrs. T. M. Jackson won the pair of belle-sharmer hose that was given away at Wilson Dry Goods company this week. Another pair will be given away soon and Midland women are asked to register at the store.

Mrs. D. E. Nelson and Miss Mary Adele Nelson of Dallas are in Midland visiting Mrs. George T. Abell and her mother, Mrs. L. B. Lancaster.

L. G. Spires and daughter, Leslie Pearl, and son, Billy, of Andrews are in Midland visiting friends.

Mrs. Allen Connell of Odessa spent the morning visiting friends here.

Misses Hester and Hella Mae Williams returned yesterday from Monahan, where they spent the week end with friends.

## Nail Driven in Gas 'Legger Coffin

AUSTIN.—Governor Miriam A. Ferguson, concurring with both houses of the legislature in the view that tax evasion must stop in order to draw into the coffers of the state every dollar of available revenues, drove the last nail late last week into the coffin of the gasoline-booglegging industry.

Recently she had signed the Metcalfe-Harmon bill, making gas tax evasion a felony, with heavy fines and prison sentences. Thursday she added the final blow against the huge "racket" which has grown up in the peddling of tax-free gasoline, when she signed House Bill 246, amending the Texas Food and Drug act, and observers at the capitol were saying during the weekend that everything possible has been done to recover the \$4,000,000 yearly lost by evasion.

While gasoline is neither a food nor a drug, the new law was deemed necessary in order to curb the blending of kerosene, naphtha and other tax-free lower fuels with gasoline, and selling the whole mixture to the motorist, plus the tax. Under this, the commonest method of tax evasion, the car owner often paid money which he believed was tax, but the state didn't get it.

This new law contains several drastic provisions for the protection of the public. First it gives the chemical analysis of gasoline, and forbids the use of the word "gasoline" on any motor fuel falling below that standard. All such fuels must be labeled "Inferior Motor Fuel" on all pumps which contain them.

Another provision is that every truck or carrier of motor fuel must be plainly labeled with the name of the distributor or maker, and every place where such fuel is stored must be marked in the same way. The new law also forbids sale of second-hand or used motor oil, except when it is plainly labeled, "Reconditioned Motor Oil."

The law gives every Texas peace officer the right to inspect any vehicle hauling motor fuel, or any place where motor fuel is sold, at any time.

The Texas Good Roads association, which backed the bill in order to recover some \$2,000,000 of highway funds, as well as \$1,000,000 for schools and an equal sum for the

## Geologists Plan Field Trip Soon

SAN ANGELO, April 3.—Members of the West Texas Geological society will make a field trip to the central mineral region on Saturday and Sunday, April 29 and 30. San Saba, Llano, Mason and McCulloch counties likely will be visited.

A committee appointed by R. F. Imb, president of the society, and composed of Henry Morgan, chairman; C. L. Mohr and Paul Schlosser, all of this city, will go to the central mineral region soon, possibly this week, to outline the itinerary.

Prof. C. L. Drake of the Missouri School of Mines at Rolla will act as guide on the trip. He and Josiah Bridge have done the most recently published work on the area, some of the results of their investigation appearing last year in a bulletin of the Geological Society of America under the title of "Faunal Correlation of the Ellenburger Limestone of Texas." Prof. Drake and Mr. Bridge subdivided the Ellenburger and correlated its various members with the Ozark Mountain section.

Owing to the geological interest generally in the central mineral region and its proximity to large centers, it is expected that a number of geologists from San Antonio and Houston will go on the field excursion. The Ellenburger, which yields the deepest oil in the world, in Reagan county, is exposed on the surface in the central mineral region.

It is world famous, yet few people know the exact area or boundaries of New York's "Lower East Side." Officially, it is one and one-half miles in area, situated between Brooklyn bridge and Fourteenth Street, and runs from the Bowery and Third Avenue east to the river.

refunding of county bonds, issued a statement Saturday to the effect that the new measure will work with the Metcalfe-Harmon law "like the two jaws of a steel trap."

*Luckies Please!*

Havana, Cuba, increasingly smart, increasingly interesting

In every corner of the world, both here and overseas, wherever you find joy in life, 'tis always "Luckies Please!"

**You want character as well as mildness in a cigarette... Luckies have both!**

Everywhere you go—at cosmopolitan Havana as in our own homeland—discriminating smokers prefer Luckies. Why?

For one thing, because of their fine, fragrant Turkish and domestic tobaccos—carefully selected, perfectly blended. People the world over want a cigarette that has Character.

Second, and all important, because these fine tobaccos are "Toasted"—that scientific process which creates true mildness. For these two reasons—character and mildness—"Luckies Please!"

*because "It's toasted"*

Hobbs Production Is Extended North

Production in the north end of the Hobbs field in Lea county, New Mexico, has been extended one location west by Continental Oil Co.'s No. 1-B-25 State, located in northeast corner of the northwest quarter of section 26-18-37E. The well topped the pay at 4,197 feet and drilled to 4,225 feet. On a prorated test on March 24 it rated 5,216 barrels of oil and 4,926,000 cubic feet of gas daily, flowing open and 3,564 barrels of oil and 2,463,000 cubic feet of gas daily, flowing through 3-inch tubing. No. 1-B-25 State is a west offset to The Texas Company's No. 4-C State, which rated 3,350 barrels of net oil and 8,314,000 cubic feet of gas daily, flowing open and 1,948 barrels of oil and 2,349,000 cubic feet of gas daily, flowing through tubing, from a total depth of 4,332 feet.

"DEAD" MAN SENT TO JAIL  
MILWAUKEE, Wis. (UP)—Judge George A. Shaughnessy refused to heed the plea of Mrs. Phillip Stamm for return of her husband to the family he abandoned 11 years ago, and sentenced the scion of an old Fond du Lac family to prison for two years after his arrest here. Stamm was declared legally dead in 1928, but was arrested on an old warrant charging abandonment when he reappeared here.

### SANTONE GETS NEW DEAL IN BASEBALL CLUB

SAN ANTONIO, (UP)—A new baseball deal has been given the citizens of this south central Texas city.

It is so radical that even the name of the club has been changed. And with the new name, The Missions, came a new manager, a fresh bunch of players and new owners.

Local followers of the club are looking for a good year. They have forgotten the 1932 record when the San Antonio Indians finished in eighth place.

Hank Severid, who holds the record of having caught more games than any living catcher, is managing the club which is a farm of the St. Louis Browns. The Brown management has sent Severid material from its chain clubs together with players from Wichita Falls and holdovers from the Indians. Way will be in the lineup when the season opens is problematical.

The hard-driving Severid has been driving his men through early workouts without predicting who would be his choice for team positions. Four 1933 Indians, Larry Cox, "Coy" Crossley, Bob House and Joe Vance have been signed but whether they will be permanent members of the club is still a question.

Severid opened practice with 15 pitchers and a half dozen catchers on hand. His weeding out process has reduced this number considerably and still more are expected to be cut off the Missions roster.

Lack of a stout young pitcher is bothering the manager.

Severid has a deal for Fabian Kowalk, San Antonio's best hurler during the past season, who was sent to the Chicago White Sox for a trial. Kowalk is a free agent and has not been signed and it may be a day or two before the opening of

the season before it is definitely known whether he may join the Missions. He had a record of 13 victories against 16 defeats last season.

"If we produce a winner we will expect your support," Severid told a noon day luncheon club here. "If we don't we won't deserve your support and won't expect it."

That, briefly, sums up the matter. Reluctant to pre-season forecasts, even to telling who he expects will show up best during the season, Severid is driving his men to give San Antonio the "new deal."

AMHERST, Mass. (UP)—Lewis Douglas, new director of the federal budget, was an expert fly fisherman while a student at Amherst college during 1912 to 1916. He spent many hours in the spring season, casting on the streams in this section.

### DISTRICT 3 GRID SCHEDULE MAPPED

BIG SPRING, April 4.—Schedule of football games for district 3 were worked out here Saturday morning with representatives of all member teams except Midland present.

Big Spring and Midland play the first game at Midland October 21. The committee voted a 50c admission fee for adults and a 25c fee for students, which will apply to all games, including holidays. They also voted to invite press representatives to executive meetings and to send out eligibility blanks by June 10 to avoid arguments over any players' eligibility.

The schedule follows:  
San Angelo  
Oct. 7—Abilene at San Angelo.  
Oct. 21—Colorado at San Angelo.  
Oct. 28—Big Spring at Big Spring.  
Nov. 11—McCamey at San Angelo.  
Nov. 18—Midland at Midland.  
Nov. 30—Sweetwater at San Angelo.

Big Spring  
Oct. 21—Midland at Midland.  
Oct. 28—San Angelo at Big Spring.  
Nov. 11—Sweetwater at Sweetwater.

McCamey  
Nov. 18—McCamey at Big Spring.  
Nov. 30—Colorado at Big Spring.

Midland  
Oct. 21—Big Spring at Midland.  
Nov. 4—Sweetwater at Midland.  
Nov. 11—Colorado at Colorado.  
Nov. 18—San Angelo at Midland.  
Nov. 30—McCamey at McCamey.

Colorado  
Oct. 14—Colorado at McCamey.  
Oct. 21—Colorado at San Angelo.  
Nov. 11—Midland at Colorado.  
Nov. 17—Sweetwater at Colorado.  
Nov. 30—Colorado at Big Spring.

McCamey  
Oct. 14—Colorado at McCamey.  
Oct. 28—McCamey at Sweetwater.  
Nov. 11—McCamey at San Angelo.  
Nov. 18—McCamey at Big Spring.  
Nov. 30—Midland at McCamey.

Sweetwater  
Sept. 30—Abilene at Abilene.  
Oct. 7—Lubbock at Sweetwater.  
Oct. 14—Amarillo at Amarillo.  
Oct. 28—McCamey at Sweetwater.  
Nov. 4—Midland at Midland.  
Nov. 11—Big Spring at Sweetwater.  
Nov. 18—Colorado at Colorado.  
Nov. 30—San Angelo at San Angelo.

Liquor Disappeared  
MEDFORD, Ore. (UP)—What happened to the 143 gallons of alcohol, 50 bottles of gin, 10 gallons of wine, and 27 bottles of wine that were stored in the county jail here, is what the grand jury wants to know. Some of the alcohol tins were found to contain water. The rest of the liquor was missing.

### Gun-Toting Parson Of Angelo Recalls 'Mile of Hell' Era

SAN ANGELO.—Dr. W. D. Powell, Baptist minister, carried a rifle as much as he did a Bible when he came out to San Angelo in 1877, and joined the Rev. A. J. "Parson" Potter of the Methodist faith in an attempt to Christianize the frontier.

Dr. Powell, back this week-end, preaching at the First Baptist church and at the Mexican Baptist church, recalls those old days, describing San Angelo as being just a "half mile from Hell." He said he packed a gun in case he met an Indian that was predestined and fore-ordained to be shot, which he never did.

"Parson" Potter packed his old rifle right into the pulpit, commanding order and "you bet he got it," recalled the pioneer pastor.

Preached First Rannels Sermon  
Dr. Powell preached the first sermon in Rannels county after it was organized and he found there Z. C. Taylor, working as county surveyor. He stayed with Taylor in a dugout, found that his friend had been trained to preach at Baylor and convinced him that he should devote himself to the ministry. Later Taylor went to Brazil the same year that Powell went as a missionary to Mexico. Taylor is credited with a great work in Brazil, Powell with 17 years in Mexico, where he organized 31 churches, baptized 1,200 persons and established a girls' school at Saltillo. Porfirio Diaz was a warm personal friend and called on the minister to help in securing an exhibit from this country.

Converted Texas Ranger  
One of Dr. Powell's first converts was Capt. Bill McDonald, later famed as a Texas Ranger. That happened at Mineola, Wood county, where the minister was successful in converting so many that he turned a dancing hall into a church.

Ex-Naval Officer  
The control car was located forward, abutting below the stream-line of the dirigible, built as an integral part of the structure. Because of its projection below the stream-line—which incidentally was the only projection on the craft—the room was built only large enough to accommodate the controls and the crew which operated them. Directly above the control car was the radio room and the commanding officer's quarters, built inside the hull.

Eight Gas Engines  
The eight gasoline engines were housed in separate rooms, four on each side of the ship, inside the hull and placed 70 feet apart. Each engine weighed approximately 120 pounds of gasoline per hour at cruising speed. All, however, did not operate simultaneously, an inspection and general care of the engines was ready to fly. The hull of the dirigible was simply opened and the planes lowered on a trapeze. Pilots could detach themselves and take off from midair and in the same manner attach them-selves when ready to return to the "hanger." In addition to providing a strengthened defense, this gave the dirigible a method of counter-attack. The airplane compartment was located between the crew quarters and the bow.

Accessibility  
One of the great assets of the Akron in point of safety was its accessibility. Its builders boasted that any part of the ship could be reached in a few seconds. Thus had one of the control cables shattered by enemy fire, repairmen could have reached the injured object and repaired it by means of telephone from the cabin car. These two extremities of the Akron were separated by approximately two city blocks.

Applications  
Cotton and corn are considered cash crops in this territory and the grower must agree to reduce these cash crops 30 per cent under that grown in 1932. The borrower may plant the balance in feed or any soil building crops.

Midland Band  
In this massed band and will be an all-West Texas high school organization.

1. The Goldman-Band—March, K. L. King.  
2. Mignonette Overture, Baumann.  
3. Cornet solo, player and number selected.  
4. Bohemian Girl Selection, Balfe.  
5. Xylophone solo, player and number selected.  
6. (a) The Vanished Army March, Kenneth Alford; (b) U. S. Field Artillery March, Sousa.  
7. Ballet Russe (Nos. 1, 2 and 5), Luigini.

Awards in the contest will be made after this concert on the night of May 6.

### Bandits Rob a Neb. Bank Today

FAIRBURY, Neb., April 4. (UP)—Six machine gun bandits today robbed the First National bank here of \$27,600. They abducted two women, later releasing them, and shot their way to freedom. Keith Sexton, bank clerk, was shot five times and the bandits forced him to serve as a shield for them.

U. S. S. Akron  
(Continued from page 1)

could be let out at the rate of 500 cubic feet per second by these valves.

Contrary to the average opinion, the possibility of damage from fire or lightning was believed almost negligible. Hazards of gasoline fires no more existed on the Akron than on the average automobile, it was believed.

The engine rooms were constructed of fireproof walls and elaborate fire-fighting systems were installed from stem to stern. Fire ventilation prevented the accumulation of gasoline fumes and gas-tight electrical connections prevented ignition of any local fumes.

Immune to Lightning  
Designers said the Akron was immune to lightning bolts. A bolt of lightning, they pointed out, would be dissipated because every metal part was bonded to another to act as a Faraday cage. Despite the general opinion that the Akron was immune to lightning, records show that only two had been struck and these were both inflammable hydrogen gas.

Although the dirigible's size of the Akron could be made to accommodate 1,000 persons, the navy's war bird generally carried only 100 officers and a crew of 50. These, however, found every comfort of an ocean liner which they went aboard for a voyage. Rooms for officers and crew were near the middle of the ship, on either side of the central corridor. Each sleeping room was provided with four comfortable bunks, the same unit of rooms were cooking facilities, mess rooms and lavatories.

The control car was located forward, abutting below the stream-line of the dirigible, built as an integral part of the structure. Because of its projection below the stream-line—which incidentally was the only projection on the craft—the room was built only large enough to accommodate the controls and the crew which operated them. Directly above the control car was the radio room and the commanding officer's quarters, built inside the hull.

Eight Gas Engines  
The eight gasoline engines were housed in separate rooms, four on each side of the ship, inside the hull and placed 70 feet apart. Each engine weighed approximately 120 pounds of gasoline per hour at cruising speed. All, however, did not operate simultaneously, an inspection and general care of the engines was ready to fly. The hull of the dirigible was simply opened and the planes lowered on a trapeze. Pilots could detach themselves and take off from midair and in the same manner attach themselves when ready to return to the "hanger." In addition to providing a strengthened defense, this gave the dirigible a method of counter-attack. The airplane compartment was located between the crew quarters and the bow.

Accessibility  
One of the great assets of the Akron in point of safety was its accessibility. Its builders boasted that any part of the ship could be reached in a few seconds. Thus had one of the control cables shattered by enemy fire, repairmen could have reached the injured object and repaired it by means of telephone from the cabin car. These two extremities of the Akron were separated by approximately two city blocks.

Applications  
Cotton and corn are considered cash crops in this territory and the grower must agree to reduce these cash crops 30 per cent under that grown in 1932. The borrower may plant the balance in feed or any soil building crops.

Midland Band  
In this massed band and will be an all-West Texas high school organization.

1. The Goldman-Band—March, K. L. King.  
2. Mignonette Overture, Baumann.  
3. Cornet solo, player and number selected.  
4. Bohemian Girl Selection, Balfe.  
5. Xylophone solo, player and number selected.  
6. (a) The Vanished Army March, Kenneth Alford; (b) U. S. Field Artillery March, Sousa.  
7. Ballet Russe (Nos. 1, 2 and 5), Luigini.

Awards in the contest will be made after this concert on the night of May 6.

### TEXAS EXHIBIT AT WORLD'S FAIR DESIGNED TO PORTRAY ROMANTIC HISTORY, PEOPLE AND BEAUTY SPOTS

AUSTIN, Tex., April 4. (UP)—Texas' romantic history, its people, its beauty spots and its industries will be fully portrayed to the world at the "Century of Progress" world's fair at Chicago this year.

Plans for the Texas exhibit which will be housed in the States Exhibit building, have been completed and a state committee, headed by L. E. Snavely of Harlingen, is engaged in raising funds to finance the exhibit from private donations.

The space assigned to Texas in the exhibit building is strategically located, the designers and architects for the Texas exhibit said.

Ivan H. Riley, Harlingen architect, and Prof. Walter T. Rolfe, of the University of Texas, are in charge of designing the Texas display.

The Texas space lies between the court of honor of the states building and the boat landing from Municipal Pier. Facing the boat landing will be the "Garden of Texas," a garden of the Rio Grande valley, enclosed by a white plaster wall with hand hewn timbers.

The space assigned Texas inside the building is divided into one large circular salon, and six smaller ones. On the first floor level are to be six dioramas presenting in living form basic activities of Texas life, such as ranching, petroleum, cotton and manufacturing.

Around the second story balcony will be a running mural in which the history of Texas will be portrayed. It is approximately 180 feet long and more than six feet high, and is so constructed and placed that it will be equally visible from the first floor or second story balcony.

At Sloan field, attaches of the army radio and meteorological station watched the ship 10 minutes before the radio man on the Akron said the bag was over Penwell, and the army men were watching it when another report came in that the ship was over Big Spring, 40 miles away.

The ease with which radio operators at Sloan field worked the bag was explained by Sergeant Brock who said new short wave receivers had been installed in the ship following its mooring a few days before on the west coast. When it was through this area shortly before it was broadcasting with a 50 watt transmitter over 845 meters, which offered only about 75 to 100 miles range under ordinary conditions, and practically no certain range under stress of weather. On the June 12 visit, it was broadcasting over 35.5 meters on short waves that could easily command the attention of any radio station in the United States.

Radio reports from the Akron said the crew was getting a withering blast from the desert, even at altitudes sometimes ranging to as high as 4,000 feet. This was the reason for the ship's having high over population centers. At times the temperature at 4,000 feet was as high as 98 degrees. Near El Paso and again when approaching Pecos, the big ship released its two airplanes, in order to lessen load and to climb above the torrid air currents. Lieut. Harrigan landed at Pecos and telephoned the army station here to radio the bag of his safe landing.

### SPECIAL Pre-Easter SHOE SALE

of high-grade Shoes for Milady

Values to \$10

\$2.95

From time to time we are forced to clear up our stocks and rid our shelves of the accumulation of odds and ends.

These shoes are more or less staples in pumps and straps, both in light colors and black kids. Some of them are in hand turned soles and inter Seals, that formerly sold from \$3.95 to \$10 the pair. . . . If you are in need of a pair of light or black shoes, don't miss this opportunity.

Arch-Types  
Included in this group is our entire line of \$5 Ideal Arch Support Shoes—in light colored leathers and straps, with solid leather heels. Just the shoe you'll need around the home.

Sizes  
Practically all sizes and widths included in the entire lot. . . . You'll regret it if you miss it.

WADLEY'S . . . of course

Widows of six former presidents of the United States are still living.
