The Hansford Plainsman

VOLUME VI, NO. 58

SPEARMAN, HANSFORD COUNTY, TEXAS, 79081

THURSDAY, MAY 13, 1965

We want all of you skeptics to quit dodging when we come down the street on our bicycle. We scored above average on the National Driving Test.

We wonder just how many people picked out the correct 10 hazards on the drive through the city.

The amount of good the test and program did will not be known, but with me it made me appreciate these good Texas Highways more. That Highway used in the program sure looked small.

We lose another graduating class this week and send some 60 men and women out to make a mark on the pages of history.

They are leaving a fine record here in the preparatory stage of their lives. If they do as good in the big show, we will remember the class of 1965.

We received our East Texas State Exes paper recently and it carried a story about Dr. Tom J. Mabry speaking at the University of Cambridge in England.

To us that carried a message about a person who used his ability.

We knew him when he was just Tommy Joe Mabry, farm boy at Commerce. Like the rest of us he pulled a cotton sack, drove a tractor and went to an ordinary high school, not as good as Spearman High and it certainly did not have as good a science department.

Tommy Joe studied, he was a good little guard on the football team, he had dates and was a good student. He was valedictorian of his class.

He got his bachelors and masters degree at East Texas, then went on for a doctorate in bio-chemistry from Rice. He was working while he did this.

Later scholarships allowed him to do post-doctorate work at the University of Dayton and Ohio State in this country and Zurich, Switzerland.

Now, the National Science Foundation has awarded a grant of \$150,000 to build a laboratory at the University of Texas for his experimentation.

EMPTYING BUILDING--These Spearman Junior High students carry their desks and chairs out of the building on the last day of school. The building will be remodeled during the summer.

Students Stack Desks As They Leave School

Spearman fifth, sixth, seventh and eighth grade students stacked the furniture and closed school Tuesday afternoon.

It probably was the noisiest school closing in the history of Spearman Public Schools Tuesday as students spent the last period of the regular school day hauling furniture from the old school building to the cafeteria. The junior high building will

be remodeled this summer and each student moved his desk and chairs from the building into the cafeteria. The older students moved the larger furniture out of the building.

Contractors wanted from \$750 to \$1,750 to move the furniture when they were bidding on the remodeling job. Architect John Work told the school

Valedictorian of the class is Vicki Kunkel with an average of 95.25 and Salutatorian is Margot Kilgore with an average of 93.5. High ranking boy is Bob Phillips with a 90.22 average.

Other honor students with averages of 90 or above are: Gladys Hopper, Gloria Ricketts, Barbara Scroggs, Jennifer Patton, Dorothy Smith, Doris Slaughter, Linda Lesley, Sandra Kitchens and Glen Keim.

City Council Asks Opinions On Community Building

Do the residents of Spearman want a community auditorium, or building enough to pay for its upkeep?

This question is now being

pondered by the City Council and they would like an opinion from the residents of the town.

At the present time the Community Building is operated under a board of directors. This committee has asked the City to assume the operation and upkeep of the building.

The problem with the operation of the building is that rental charged for its use will not pay the utilities, insurance and upkeep on the building.

Past experience shows that approximately \$2,000 per year is needed to pay expenses and maintain the building. The rent pays part, but not all of this expense.

City Councilmen asked this week that residents put their opinions on paper and mail them to the City Council.

Councilmen said if the city operates it, the building will be maintained, inspected before and after each rental and any damage will be paid for out of a deposit required when it is rented.

Thieves Hit Morse Store

Thieves broke in the North Plains Irrigation Service in Morse sometime Tuesday night and took approximately \$1,000 worth of tools and \$5 in cash. There was \$3 in change and two \$1 bills taken.

Sheriff J.B. Cooke said the burglars broke the glass in the front door, reached inside and opened the night lock. They pried open a locked filing cabinet looking for money.

The thieves missed a larger amount of money that was in the cabinet.

The burglary was discovered about 6 a.m. Wednesday.

If you want your pastry for pie to be flaky, cut the shortening into the flour, stopping the cutting process when the fat is the size of peas. Toss these shortening particles with the flour so they are well coated before adding the liquid.

Open Sandwiches

Open sandwiches taste wonderful when they are made of sliced bread, ham and tomatoes topped with mayonnaise mixed with grated cheddar cheese. Toast the bread lightly before making the sandwiches. After the "filling" is arranged on the bread, put the open sandwiches under the broiler to heat and have the topping puff and brown.

Asparagus Stalks

Ever serve fresh asparagus stalks with browned butter? To prepare the butter, let it stand in a small saucepan or skillet over moderately low heat until it foams and turns golden brown.

Season With Basil

Basil grows extremely well in a large pot and flourishes for months. The leaves may be used in practically all tomatoes dishes and they are also delicious added to French dressings or to salad greens.

board how students at Booker moved their desks from an old building to a new one in just two hours, so Spearman decided to use the same method.

While the upper grades were moving furniture, it was clean-up time in the first four grades. Students cleaned desks and tables and gathered up all of their materials as the final bell of the year approached.

There were mixed emotions in the first grade about the end of school. Like all children a big majority were glad summer vacation was here, but not all.

Janice Stewart did not like the idea of school being out. "There's nothing to do at home, so I wish school was still going on."

We checked on the two youngsters we photographed last fall when they started to school. Scott Janzen and Belinda Tanner. They had found the first grade to be all right.

Scott had developed a liking for books since he had learned to read. He liked first grade fine, but was glad school was out.

He was going to get him a library card and get a book and read this summer.

Belinda Tanner did not know what she was going to do. "Mrs. Clark won't let me go to school this summer."

She, like so many of the others, was going to get some library books and read.

This rush for library books is the result of the first grade teachers stressing the idea to all of their students.

At the High School the last day died slowly as fewer and fewer students were in the classrooms and building. The students had to attend classes only when they were taking finals or wanted to use the library.

Students will get their report cards from 1:55 p.m. until 2:30 p.m. today. Buses will run in time to get the students here, then run afterward to return them home.

The final activity will be graduation Friday at 8 p.m. in the high school auditorium for the Class of 1965.

Day by Day

I'm finding it a little hard this week to get back in the swing of things. I spent last week with my Dad, arising at six each morning for a golf lesson. We'd come home hungrier than I can remember being, eat a mammoth breakfast and then loaf or play Mexican dominoes all day until picnic time in the late afternoon.

That kind of routine is my idea of a real vacation and even though I'm not ready to challenge anyone yet, I did learn a little more about golf. For instance, those three important rules of the game . . . (1) keep your eye on the ball, (2) keep your eye on the ball and (3) keep your eye on the (blank-blank) ball.

Did you take the National Drivers Test Monday night on television?

I started to hitchhike to work Tuesday after I figured my score because I guess I'm not even safe behind the steering wheel myself, not to mention all the trusting, innocent drivers I'm endangering.

I keep telling myself I should have sat up straight to take the test rather than reclining on the sofa. Maybe then I'd have been average at least. Or do you suppose it was that trip I made to the refrigerator during section B?

Well anyway, my biggest mistake was blurting out my terrible score before my husband figured his. Naturally his was a good 20 points higher and he gloated the rest of the evening.

I'll get even though. I'll remember what an inadequate driver I am late some evening when he thinks he's too sleepy to drive.

As of next week, Faye Lynch (who sets type, keeps books and runs the front office at the Plainsman) will begin her vacation which will last through the summer. It's going to take two of us to fill in for her so you can be sure we're looking forward to her return next fall.

Success: He has achieved success who has lived well, laughed often and loved much. Who has gained the respect of intelligent men and the love of little children. Who has always appreciated earth's beauties and never failed to share their values with others.

One who has left the community better than he found it, whether by an improved flower, a single poem or a rescued soul. One whose memory will be a benediction.—Alex V. Tisdale.

Engaged—

Mr. and Mrs. Buster Horton of Merkel are announcing the engagement and approaching marriage of their daughter, Mary Jane to William Thomas (Tom) Womble, son of Mr. and Mrs. A.C. Womble of Morse.

The wedding will be solemnized July 23 in the First Baptist Church of Merkel with Rev. Jimmie Jenkins of Cottonwood officiating.

Both will be 1965 graduates of Hardin-Simmons University in Abilene. The bride elect was a math and biology major, a member of Cowgirls, and active in all University activities. Tom is a political science major, a member of Tau Alpha Phi, Who's Who Among Students in American Universities and Colleges, and a member of the battalion staff of the University ROTC. He will receive his commission as a second lieutenant in the Army Intelligence and Security Corps upon graduation May 31.

A whole group of new sizes of aerosol products are coming on the scene to save time and space when packing for a trip, or even for jobs at home. A few of the things you can find in handy small sizes are hair spray, cologne or perfume, deodorants, shaving cream and insect repellent. Of course small sizes of mouth wash, make-up foundation and bath oils can be found, too, outside the aerosol field.

Meat will be more tender if cooked slowly. Basting with fat or a sauce will tend to keep meat more moist and juicy. It is best to have a grill that can be raised and lowered so that the distance of the meat from the coals can be regulated.

Don't season meat before grilling, as salt tends to draw moisture from lean tissue. To avoid loss of juice, turn meat with tongs. Piercing with a fork will let out the moisture. Seasoning may be added immediately after meat is turned or when it is almost done.

For hickory flavor, hickory chips that have been soaked in water or green pieces of hickory can be added to the hot coals about five minutes before the meat is done.

Next week, I'll give some ideas for vegetables you can use in charcoal grilling.

The County Extension Agents will be out of the office May 31-June 4, accompanying our 17-4-H delegates to the State 4-H Roundup in College Station.

THE LAST NOTE: Housework isn't noticed until it isn't done. Homework isn't done until somebody notices some housework that isn't done.

If you are a real organizer (or just want to save blood pressure!) try keeping a special "miniature grooming kit" already packed, ready to travel whenever you are. This is especially handy if any member of the family travels a lot—it will save time and temper in last minute packing.

Are your family members outdoor cookery enthusiasts? If so, you may like to try some new ideas for "cooking in the coals" this summer. Since charcoal broiling is a dry heat method of cooking, tender cuts of meats should be used. Veal is not well suited to dry methods of cooking. Lamb cuts, (not mutton) are excellent for outdoor cooking, as are cured and smoked pork products, and tender beef cuts. Weiners, ground beef and variety cuts are also good to use.

Steaks or chops should be cut at least one inch thick for grilling. Thinner cuts tend to dry out too much during cooking. To cook meat: the grill

WHY SONIC BOOMS

All bodies moving through air create disturbances which radiate outward at the speed of sound. However, a supersonic plane proceeds through the air faster than the disturbances it is creating, and the result is the formation of shock waves

Knits Span The Seasons; Gaining In Popularity

Fashionable women are not about to give up their knits just because the seasons are changing—and the do-it-yourself girls are ahead again this summer.

Women who knit can start now to keep a date with the lacy-knit look in summer styles. The new look for summer is lacy.

Handknits and crochet fashions have peek-a-boo patterns—filigree designs to take the traveler all through day.

The see-through styles can go sightseeing by day, and their fragile feminine look is always appropriate for an evening out.

These lace-like knits and crochets are partial to travelers. Bernat has come out with new, ready-to-knit designs both packable and shape-holding.

Designed in the new Sunlin spun yarn, summertime knits have the look of linen. The new yarn is a blend of orlon and Irish linen for carefree crispness. Colors are rainbow shades of pastels.

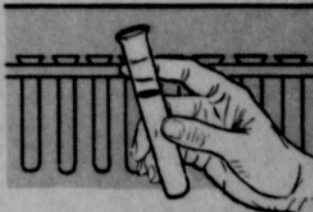

The new knits are easy lines for ready motion. Slender, gently fitted sheaths have a special guile—a narrow belt which can be used to nip the waist, tied high for an empire style or tied low on the hip in flapper fashion.

Another success for the coming season is the handknit overblouse. Topping trim skirts are peek-a-boo shells,

easy blouses with scalloped borders, suit length jackets and sleeveless styles that wrap to the side.

Summer knit suits are satin rimmed. Their lacy-like texture takes shape in Chanel-inspired designs or jaunty blazer styles.

Easy-to-follow instruction books are available at yarn shops and art needlework departments.

AND THEN THERE IS ONE...

First comes the scientific breakthrough when research scientists discover a chemical compound that may combat a specific disease. Then hundreds of derivatives of this compound are developed to find the most effective drug. Then come years of laboratory testing eliminating all but a few. Then, years more of testing in clinics, eliminating all but the most effective and safe drug.

Success hasn't gone to its price

After all, you don't get the No. 1 place (or stay there year after year after year) unless you give people a lot for their money. That, Chevrolet does. Look what's new for 1965. Everything.

Like the handsomest new styling you've ever turned around for another glance at. Like Chevrolet's Jet-smooth ride, even better now with Wide-Stance to steady

things as you go. Like however much economy or excitement you'd want, our miserly 140-hp Six to our ferocious Turbo-Jet V8, 325 hp on order.

Besides price, one other thing hasn't changed: Chevrolet's traditional resale value... still so good you won't believe it until you get it. So get it (along with all that's new) at your Chevrolet dealer's.

Wheat Harvest Beginning Down State

At the eastern end of the Texas wheat belt the crop is good and the harvest is waiting only on the fields to dry, according to the farm labor bulletin of the Texas Employment Commission issued Monday.

In the High Plains the rains have helped the dry-land crop to fill the heads and has halted the abandonment of the dryland crop.

On the east side of the Panhandle the dryland yield is expected to be average to above average.

Irrigated wheat is promising average and above average production throughout the High Plains.

In the eastern part of the state the crop has not been damaged, yet, by the rains; but much more moisture and lodging is expected.

In the Wichita Falls area harvest was expected to begin this week, if the fields were dry enough. From Vernon to Childress, Wellington, and Matador, harvest is expected to be started by May 28 or June 1.

From Amarillo south on the High Plains harvest of irrigated wheat is expected to start about June 15 to 20.

There is no expected shortage of men or machines in any area. All areas expect the normal migratory pattern of harvesters to fill all needs.

USE OF 2,4-D

Use 2,4-D with extreme caution as you could damage surrounding crops. This is the time of plenty of weeds and wind. Do not use 2,4-D when the wind is high as the drift could kill or damage your neighbors roses or other ornamentals. If you must use 2,4-D in town, use the low volatile Amine form. I would be happy to discuss the use of 2,4-D with anyone.

Fond Memories Remain as Band History, '57-'65, Recalled

EDITORS NOTE:The following story is a history of the Lynx Band, its trials, tribulations and victories from the time this Senior class joined it in grade school through this year. The history was written and presented by Mrs. Sam Watson at the band banquet Friday night.

In 1957-58 the beginners band had some eager pupils to start. From Mrs. Rodens home room came Donna Boyd, No-reene Sutton, Phyllis Patterson, Nelda Vanderburg, Sandra Kitchens, John Hutchison, Sharon Cook, Bobby Campbell, Glenn Keim, Leroy Callaway. From Miss Nelms room came Patsy Kingsley, Norma Stowe, Vicki Kunkel, Margot Kilgore, Mae Bell Witcher, Hester Beck, Johnny Crawford, Helen Collard, Larry Ed Beck, Mike Shedeck, Johnny Jo Vernon, Mike Skinner, David Knox. Like all beginner bands before and after them, they played Eastport March, Chorale, and Marjorie Waltz for their Spring concert. That year the high school band made their first Sweepstakes at UIL and won their first Outstanding Concert Band at Enid. They set a mean pattern for a bunch of beginners to follow.

As 6th graders you made your first big trip--to Gruver and the Area Contest. You were great playing Torch of Liberty, Air and March. At least some of you played--some were still trying to figure out what the black dots were on those 5 lines. But you did make your first sweepstakes that year.

Next year you were 7th graders and Mr. Noel Maxwell came to help the aging Mr. Watson. Spearman's antique auditorium was packed to hear you perform at the spring concert. Your Gallant Marines, Summer Holiday, and Fireworks Music were so

terrific, that Mr. Maxwell decided the rest of the world was ready for you. So off to Goodwell, Oklahoma you went. It was a long hard trip with you pushing the bus most of the time, but finally you won out over the bus and you rode the rest of the way and received a 1st Division. You also made your 2nd Sweepstakes, this time the contest was at Phillips. Then Mr. Maxwell decided after one year as a band director, he was ready for the rest of the world. He joined the army and saw Texas. You had a new principal this year called Mr. Frank Cockrell.

By the next year you were 8th graders. Miss Laura Adams was a brave eager college student who had just graduated and decided she would join the faculty, and added ruffles and curtains to the band house. Kyra Crum and Doris Slaughter joined the drum section that year, but the real highlight of the year was our Area Contest in Stinnett. We really knocked the young judge out with our State Center March (spelled center, not sinner) and received your 3rd Sweepstakes. By the way, the judge was a Mr. D.W. Crain, Jr. sometimes called Dub. Old Yeller made its first trip with us that year.

The freshman year started out with the band marching at a West Texas Football game. Old Yeller broke down in Borger and a dump truck took us on to Canyon. Miss Adams, now was Mrs. Lane, felt that one semester was enough this year and went back to school. Mr. Carl Ward finished out the year. Carol Simmons, Gloria Ricketts, and James McElreath joined band. This was one of the big years for band in spite of that. And in spite of rain, hail, flood and tornadoes they won the Outstanding Marching Band Trophy for keeps at Enid.

They won Sweepstakes at UIL in Canyon playing La Donna, Spiritual, and Overture for Winds. The Band also won Outstanding Concert and Marching Band at Enid, 1st place in the parade and won the Sweepstakes Trophy for class CC. Old Yeller and the original Savage Sam received a royale welcome home from the band. That was quite a year for a bunch of freshman and hard to live up to for the next three years.

The next year Mrs. Lane thought she would give the Spearman Band another try and came back to work. This year was a different one, because we didn't use Raiders March. But we won our 8th consecutive I in marching at UIL anyway. Again Sweepstakes was received at Canyon playing Thunder Song, Dramatic Episode, and Irish Folk Song Suite.

The Junior year started out as a good year as the band opened with a concert for the new high school dedication even before school started. We were the best band for the West-Texas-Memphis State football game. Too bad about the rain, and the West Texas and Pam-pa bands. The band made Sweepstakes at UIL in Canyon. Again the journey to Tri-State was made and to the Oxford Hotel (which was still standing, much to everyone's surprise.) It was a year for 1st at Enid. It was the first time one of our judges had ever judged a band. It was the first time it hadn't rained when we marched, the first time the kids were quiet in the hotel and the first time the band had stood up to play their concert music. But things started looking up with 1st place in the parade, the Outstanding Marching Band Plaque and the Sweepstakes Trophy. Eddie Jenkins moved to Spearman and helped us play LaRoquina,

Percussion and Interlude, and Slavonic Folk Song Suite.

The Senior Band year was a happy and sad year. It started off happy with our new white uniforms, which we thought looked great, on the hangers--but some kids had grown over the summer and several of the uniforms didn't fit. After switching uniforms around a bit, we felt we looked sharp for our first public performance, and then, the rains came. The first cleaning took place and plastic was purchased to put on bleachers at football games. The word was out that Old Yeller was being replaced and again we were sad. Everyone was convinced that old Yeller was our good luck charm at contest and what would the band do???

Mr. Watson asked to keep the bus for Marching Contest and it made it's last sagging voyage. The new white uniforms were the talk of the contest, also the size of the band. As the band came into the stadium in single file, one remark was "That has to be two bands." The other band directors gave us the name of the "White Knights", and believe me the mothers and the cleaners were wishing we had the Ajax White Knight. We made our 10th consecutive I in Marching that day. Mr. Porter joined us as an assistant in September.

But the bad comes with the good and we said goodbye to Old Yeller at the Dalhart football game and accepted our new bus. Everyone was trying to name it for us, but naturally it was "Savage Sam", son of Old Yeller.

The Stage Band played for the Miss and Mr. SHS pageant in December. Our band queen and king were presented at this time. Patsy Kingsley looked queenly in her aqua formal--and Glenn Keim was the boy wearing the bright red tie.

Somewhere along the way we elected James McElreath, president, Mike Skinner, vp, Helen Collard, sec, Bobby Campbell and Danny Robison, managers, or better known as Band-Aids.

The band had to put up with me for a couple of days, but I think maybe it was well worth it, as Mr. Watson brought us home a surprise from Dallas. He announced at our concert that we were invited to perform at the Cotton Bowl next New Years. The sad part of this happy event is the seniors won't be with us on the trip. But their being in band helped make it possible for the rest of us to go to Dallas.

After solo contest the maestro began to really worry about the concert contest, so with a loud call for help, our faithful friend, Dub Crain, came running. After an afternoon and morning of clinicing the band, Mr. Crain finally got the band to sound like they were spraying water through a hose.

Now we were ready for contest, or so we thought. We went to the Borger Contest on April Fools, and were we fooled!!!! The next week we went to UIL in Amarillo. The concert judges liked us and gave us a I. Sightreading was a surprise to us as we had read the same music in Borger. A I was made there and we had our 8th Consecutive Sweepstakes at UIL. We wish we had been as sure as Mr. Hemphill was, standing there with our sweepstakes trophy even before we had finished sight-reading.

We liked what one of the judges said about us that day. It was "Sam, I'm impressed with your troops." And that is what we looked like in inspection at Enid, and one band

director asked if our army was divided into companies. Then we marched--well we had enough problems as it was without the photographer being on the field with us. After a hectic day of solos and ensembles on Thursday, curfew was early as had to be up at the crack of dawn. Some people must think dawn is at 4 a.m. and got up. The Stratford band said they really didn't like March Juno at 6 in the morning and that First Swedish was for the birds, I guess that meant the early bird, because we got a nice juicy worm that morning. We had room to play our concert numbers this year. In fact Mr. Watson told the officials if he had known we were going to have that much room he would have brought the other bus of kids. Things went well in concert and in sightreading. The Million Dollar Parade was a fine event, as we won 1st place in class CCC. As one mother put it, its worth putting up with white uniforms after seeing our band in the parade. The crowd liked us, too. It was a real thrill for the Spearman fans to watch Mr. Watson to keep walking down the aisle at the Grand Concert to receive our trophies.

Again we come to the sad part of saying goodbye to our seniors as they go. You've come a long way from East Port March to March Juno, Marjorie Waltz to Praludium and Chorale to First Swedish Rhapsody. You had 3 Sweepstakes in Jr. Hi, 4 UIL Sweepstakes in High School, 3 Outstanding Marching Band Awards, 2 Outstanding Concert band awards, 3 1st places in the parade, and 3 Sweepstakes Awards from Enid. That's a fine record. You just couldn't ask for much better, so what a way to go.

Congressman Walter Rogers Participates In Important Legislative Matters

Congressman Walter Rogers will preside Thursday and Friday as one of the two subcommittees of which he is chairman opens hearings into problems associated with so-called "community antenna television systems."

Earlier in the week, Congressman Rogers will take part in House of Representatives debates on two important legislative matters: the foreign aid authorization bill and the bill to provide appropriations for the Department of Agriculture in the coming fiscal year. Also scheduled to come before the House during the week are legislative proposals affecting bonding provisions of the Labor-Management Reporting and Disclosure Act; amendments to the Federal Coal Mine Safety Act; and interlocking directorates of U.S. rail carriers.

"The foreign aid bill will, as always, touch off one of the session's most heated discussions," Congressman Rogers said. "No one opposes money spent in the fight against communism. But everyone should oppose the waste of taxpayer's money under the guise of a program that is ineffective against communism."

The agricultural appropriations bill includes appropriations of \$5,692,537,000, a reduction of approximately \$122 million in the Department's budget requests and \$1.1 billion less than was appropriated by Congress for the current fiscal year.

"I had hoped to travel home to the Panhandle during the week," Congressman Rogers said. "But the scheduling of extremely important legislative matters in committees as on the floor of the House has made it impossible for me to be away at this time."

The two committees on which the Congressman serves, Interstate and Foreign Com-

merce and Interior and Insular Affairs, will meet. The Commerce Committee will continue its discussion of the nomination of General William McKee to be administrator of the

Federal Aviation Agency, succeeding Najeeb Halaby.

Determining the role of community antenna television systems in relation to television broadcasting is the pro-

blem facing the Subcommittee on Communications and Power of the Committee on Interstate and Foreign Commerce. Before the subcommittee for consideration is legislation introduced by Congressman Oren Harris of Arkansas, chairman of the full committee.

Congressman Rogers, who will preside at the hearings, said witnesses will include E. William Henry, chairman of the Federal Communications Commission, and Frederick W. Ford, former FCC commissioner and now president of the National Community Television Association.

"This matter is tied broadly to the question of the future of television broadcasting in the United States," Congressman Rogers said. "One of the decisions Congress must make as soon as possible concerns the relationship between broadcasting and CATV systems--- systems by which TV broadcast signals are collected and then relayed by cable to homes in U.S. cities and towns."

The CATV hearings will resume in June, Congressman Rogers said.

Shoe Size

When you get a new pair of shoes that fit well, preserve them so that the next time you buy you will get exactly the same size. Brush clear polish over the inside of the shoes. This will prevent the shoes from wearing off.

Hot Meals Due

During hot weather, plan simple meals and use an insulated oven for as long as possible. Do only a minimum of stove cooking. Serve in desserts, salads and other dishes.

Neighborhood Youth Corps To Be Tried by City

City of Spearman will participate in the Neighborhood Youth Corps this summer, if it was decided Monday night at the council meeting. Under the government youth corps the city will employ a number of youths, 16-21 years of age, who will work in parks and on other public lands.

The federal government will pay 90 percent of the cost of these employees, supervisory personnel and materials which they use, the city pays the remaining 10 percent.

All boys wanting to work in this program must apply at the Texas Employment Commission office in the courthouse.

Councilmen also granted a

10 year franchise, with a 10-year option, to Spearman Community TV Cable System.

A city board of tax equalization was appointed. Those appointed are John R. Collard Jr., George Buzzard, Tom Etter, Tommy Gooch and Gus Renner.

Lee Phillips was hired as a radio dispatcher, fireman, and animal control officer. He will live in the apartment at the city hall. He has been serving as fire chief.

White House Wedding

The first wedding ceremony held in the White House was in 1812 when Mrs. James Monroe's sister, Lucy, was married to U. S. Supreme Court Justice Thomas Todd.

Easy for Pancakes

A skillet with a non-stick surface makes frying paper-thin pancakes a delightfully easy job.

DID YOU KNOW THAT:

Each year, for the past 5 years, over 2,000 fires occurred annually in the pine-hardwood area of East Texas, burning 47,000 acres of valuable timberlands. In addition, improvements such as homes, barns, fencing, and improved pastures were destroyed. These fires were man caused, for the most part, and could have been prevented if someone had used care with firebrands out of doors. Your Texas Forest Service urges you to take every precaution when doing any outdoor burning.

Pineapple, Cabbage

Crushed pineapple and finely shredded green cabbage make a good combination to add to a molded lemon-flavored gelatin salad.

WHAT TO DO IN THE GARDEN NOW

It is time to plant zinnia seed. There is a wide range of varieties with varying heights. Why not try the new green zinnia, called Envy. As pictured on the seed packet and in garden magazines, it seems to be an entirely new color.

Set out small plants of periwinkle now. Most gardeners prefer the cool white that keeps the glow of color in the evening garden.

Hemerocallis may be planted now. These also are offered in containers and if planted now will give bright color to the mid-summer borders. Select a few for early bloom and some repeaters to bolster late summer and fall color in the garden.

There seems to be a new set of weeds in lawns. Most of the early ones have been eliminated. Don't allow any weed to set seed. Keep all

weeds pulled out for a well kept lawn.

Keep the soil stirred lightly under the annual plants. The roots are shallow. See that the watering depth extends to the root areas.

Spray for green aphids which are now seen on roses. They usually attack the unopened buds. Malathion will eliminate them in one spraying.

Spread a thin line of bug repellent around the petunia plants to ward off sow bugs and cut worms. There are a number of effective bug baits in the garden shops. The cutworms take the plants off at the soil line. The sow bugs chew on the foliage.

Quick Tips

Accompany tangy cole slaw with fingers of dark bread spread with a mild anchovy butter - 1/2 teaspoon anchovy paste to 1/4 cup butter or margarine. Different and good.

Mix large pieces of fresh and canned fruit with crumbled blue and a variety of cubed cheeses. Serve on crisp lettuce greens with dressing of equal parts mayonnaise and creamy French dressing.

Use medium size soft rolls. Cut a slice from top and pull out crumbs leaving a 1/2" shell. Brush with melted butter and toast lightly in oven. Fill with creamy scrambled eggs and ham. Replace top slice and serve hot.

A REPORTER was interviewing an old codger who was celebrating his 100th birthday. "What are you most proud of?" he asked.

"Well," said the man, "I've lived 100 years and haven't an enemy in the world."

"What a beautiful thought. How truly inspirational," commented the reporter.

"Yep," added the centenarian, "outlived every last one of them!"

Businesses Will Close Here Monday

A majority of the businesses in Spearman will be closed Monday, May 31, since Memorial Day is on Sunday.

All federal, state, county and city offices will be closed.

Gauze for Hem

When your little daughter has outgrown her dress to the place where there is nothing to do to the bottom of the skirt but face it, you can make a neat job of it by using bandage gauze. It will not pucker when the dress is washed and ironed and will last the remainder of the life of the garment.

Removal of Odors

To remove fish and cabbage odors from cooking utensils, soak them in a vinegar and soda water solution, then wash in a sudsy water, rinse and dry.

HANSFORD COUNTY'S LEADING NEWSPAPER

The Hansford Plainsman

VOLUME VI, NO. 58

SPEARMAN, HANSFORD COUNTY, TEXAS, 79081

THURSDAY, MAY 13, 1965

The rain, flood, gift from Heaven, or whatever you wish to call it, produced some interesting sidelights.

Every businessman in town has been looking for an increase in business if it would just rain. It rained and store owners said there was an increase in traffic and sales even while it was raining.

Brad Beedy said he had a real good day during the flood. However, it was in rather unusual items for a rainy day. He sold a big order of yard furniture.

The heavy rains and flooded streets shook Scott Janzen's faith in the rainbow and God's covenant with Noah.

As the boy and his mother were driving home through the flooded streets, he remarked:

"Mother, I thought God wasn't going to flood the world again."

The newspaper profession and the world lost a fine lady this past weekend with the death of Mrs. Jessie Stewart of Perryton, one of the owners of the Ochiltree County Herald.

We shall always have a warm spot in our memory for Mrs. Stewart because she was so nice to us when we were just starting the Plainsman.

During those first couple of years when we were known as the publishers of that second newspaper in Spearman, Mrs. Stewart invited us into her Ochiltree County Herald group at the Panhandle Press Convention and made us feel welcome.

We shall always appreciate her kindness.

Because of the Crusade meeting, we were unable to attend the Choir Concert Tuesday night. From everything we have heard we missed a fine evening of entertainment.

The several people we have talked to all said it as good or better than last year.

Lewis Tilford has done a fine job of rebuilding an organization that was badly demoralized when school started this year.

Mike Morris, in presenting the choir gift to director Tilford said: At the beginning of the year many of the members thought they would never have another good choir, but Mr. Tilford rebuilt the choir until they now think they are just as good or better than last year.

The competition record says they are right.

Youth Injured In Car Wreck

A high school youth was slightly injured in a two car collision at 12:50 p.m. Sunday at the intersection of E. Kenneth and Hazelwood.

Monte Black received a lacerated lip when his car and one driven by J.L. Pierce collided at the intersection.

Black was on Kenneth Street and Pierce was on Hazelwood.

Police Chief Wayne Pierce said both cars were heavily damaged.

Rodeo Ready

Due to the excessive rain of last week the F.F.A. Rodeo was postponed but will be held this Saturday and Sunday, May 22 and 23 at the Rodeo Arena. The time will be 7 p.m. each day.

Cemetery Beautification Planned by Club

Beautification and clean-up of Hansford Cemetery will be conducted Saturday in the second annual Kimberly Study Club Clean-up program.

They are asking everyone to donate their excess bulbs to the effort. Anyone having bulbs they wish to donate should call Mrs. Bill Wilmeth or Mrs. Everett Cain.

Another project is planting some hardy ivy at the fence posts around the cemetery. Anyone having such ivy is asked to contact Mrs. Wilmeth of Mrs. Cain.

also be a burner there to be used on large weeds.

Everyone is asked to join in the work at the cemetery. Also, everyone coming to work should bring their own tools. Some men will be

there to help with the heavy work.

Day by Day

This was going to be the year that I didn't have a birthday but somehow when May fourteenth dawned, something told me I ought to celebrate whether I counted the year or not.

Birthdays are pretty wonderful even if they do add up to no good. What with a number of gifts, cards, homemade ice cream and my first birthday cake in a number of years, I really had a day to remember. All that and smiles of recognition from my twin nieces, so the day was utterly complete.

I understand the master of ceremonies at the beauty contest discussed my lack of cooking ability at length the other night. It's a good thing, I keep thinking, that I couldn't hear him at the time. There's no telling how I might have reacted.

As it is, I've decided I might as well live up to my reputation and serve instant sandwiches morning, noon and night for awhile. That ought to show him "how we talk in front of a crowd".

We were saddened this week at the death of Mrs. Jessie Stewart of the Ochilree County Herald. Jessie was a wonderful person whose warmth and vitality might have been envied by women half her age. She lived a vigorous, happy life and those whose lives she touched will long remember her.

I tried a recipe for cherry parfait before the Tall Texan complained publicly about my cooking. I'll have to admit it's about as simple as he said most of my recipes were but I notice he polished off a lot more than his share of the finished product, so here's the recipe.

CHERRY PARFAIT

- 1 can dark cherries
- 2 cans Eagle Brand milk
- 1/2 cup lemon juice
- 1/2 pint whipped cream

Mix juice and Eagle Brand milk; fold in cherries and then whipped cream. Put in dessert glasses and chill.

Despite the growing popularity of December weddings, June is still the biggest bridal month. And before the great days arrive come weeks of frantic, happy preparations. There are hurried shopping forays, excited chatter over coffee while plans are made, fittings, parties--ah, yes, the parties.

Most of us have hosted at least one bridal shower, and for each one, we try to make the refreshments and decorations especially lovely. First, because there is always a long, agonizing wait for the honor guest, there should be fresh coffee waiting for guests. The rest of the refreshments come later, after the bride-to-be has joined the party.

Whether it's a luncheon or evening party, the dessert ought to be particularly bride-like. Our beautiful Orange Blossom Cake, for instance, in the shape of wedding bells, is so attractive it can serve as your main table decoration. The cake has a delicate orange flavor and isn't difficult to put together if you follow the cake-cutting instructions. Once the bells are assembled, you can cover them with any favorite fluffy white frosting.

The appropriate accompaniment to such a cake is your most delectable coffee. You can't give a greater compliment to guests. Brewing good coffee is one of the factors that determines a thoughtful hostess--and one of the first things a bride should learn.

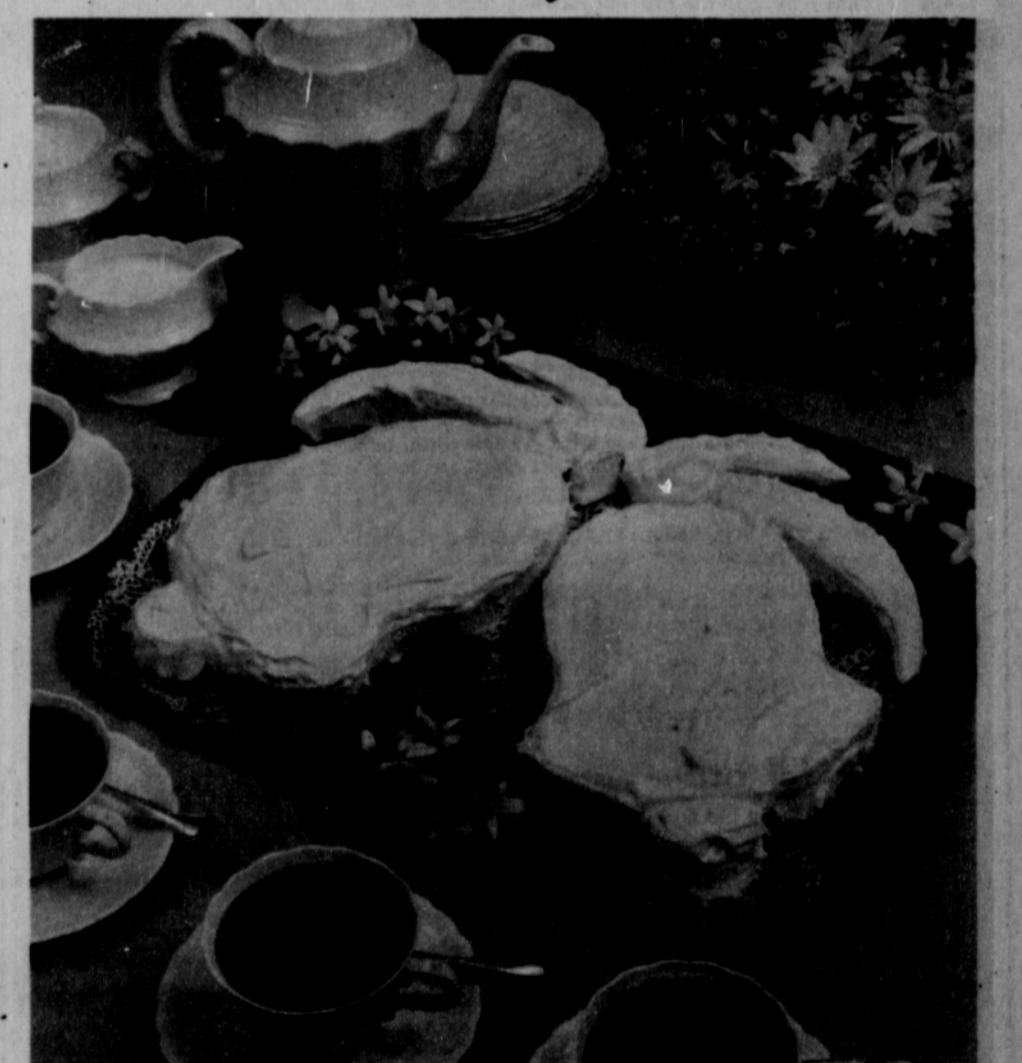

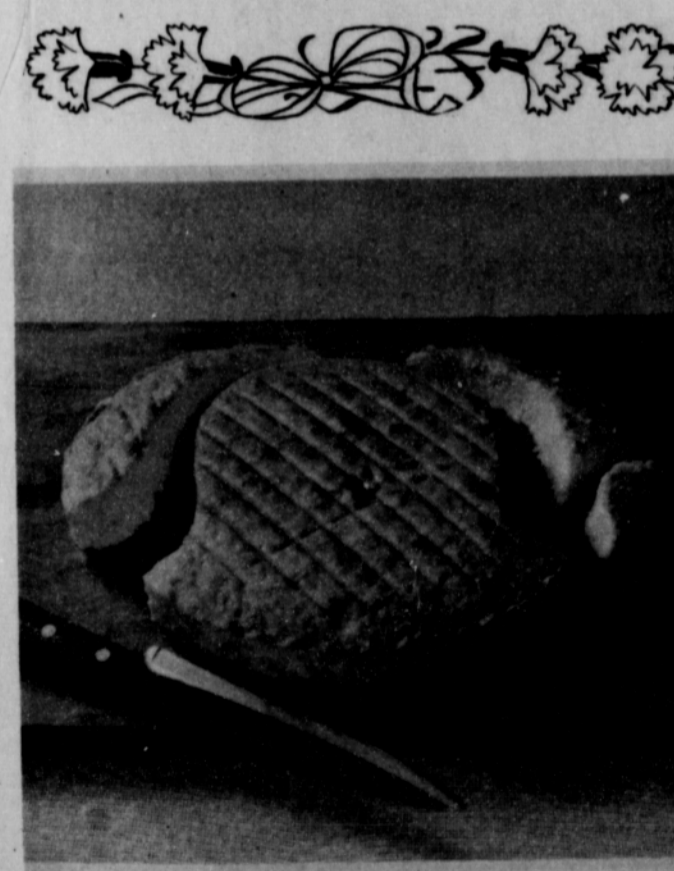

ORANGE BLOSSOM CAKE

- 2/3 cup butter or margarine
 - 1 1/2 cups sugar
 - 2 teaspoons grated orange peel
 - 3 whole eggs
 - 2 egg yolks
 - 2 1/2 cups sifted cake flour
 - 2 1/2 teaspoons baking powder
 - 1/2 teaspoon salt
 - 1 cup orange juice
- Cream butter to consistency of mayonnaise; add sugar and orange peel slowly while con-

tinuing to cream. Add eggs and egg yolks, one at a time, beating well after each addition. Mix and sift dry ingredients; add to creamed mixture alternately with orange juice, beginning and ending with flour mixture. Turn into 2 greased and waxed paper-lined 9-inch layer cake pans. Bake at 350 degrees for 25 to 30

minutes. Cool in pans 10 minutes; turn out of pans on to racks to finish cooling. To make bell shape, mark off circumference of cake layer with wooden picks into 3 equal arcs. One arc will be bottom of bell. To make curved sides of bell, cut off equal curved strips from other 2 arcs. From one of the cut-off cake strips, cut a clap-

per. Make another bell with second layer using first bell as pattern. Place bells, on serving tray side-by-side, with tops of bells slightly tilted toward each other. Attach clappers with small amount of frosting. Arrange strips cut from sides to make ribbons at top. Frost with any favorite fluffy white frosting.

WILSON CRUSADE SET HERE

Initial plans for an area-wide Christian crusade by one of Billy Graham's assistant's were made here Tuesday night.

A late October crusade with evangelist Grady Wilson will be held in Spearman for the entire North Plains. The exact date will depend on when Wilson can be here following Billy Graham's Houston Crusade.

Approximately 35 pastors and laymen met Tuesday night to appoint committee chairman and plan the initial steps in preparing for the crusade.

No church will be sponsoring this crusade, nor will any church be asked to donate money to the crusade.

General Chairman Luther Berry pointed out that this will be a unified effort by individual Christians from all churches who wish to work in the crusade.

H. M. Nichols, a retired minister, planted the seed for the crusade here two years ago when Wilson was in Amarillo for a crusade there.

Nichols asked Wilson if he would come to Spearman for a crusade and Wilson said he would. The retired preacher turned the information over to the local ministerial alliance.

He kept pushing the group to contact Wilson and begin planning a meeting here. The Rev. Berry said at the time he doubted if a town as small as Spearman could get Wilson, but at Nichols' insistence, wrote the Billy Graham organization.

He received an affirmative

reply and last week a coordinator from the Graham organization met with a group here, set the date for the crusade and explained all the steps in preparing for such a program.

Berry told the group that Wilson will receive no salary, only expenses for travel to and from Atlanta, Ga., and his lodging while here. The crusade group will pay a salary to a song leader and accompanist from the Graham organization.

Committee Chairmen appointed besides Berry are: vice chairman Orvil Brummett; treasurer, W. L. Russell; prayer groups, the Rev. T. J. Taylor; arrangements, Ray Martin; Andrew committee, Frank Buzzard; field workers, the Rev. Everett Cain; finance, E. J. Copeland; counseling, the Rev. George Bollinger; follow-up, Orville Fullbright; youth, Mr. and Mrs. Orvil Brummett; ushers, Harold Bowen, music, Richard Fancher; publicity, Burl McClellan.

This crusade was named "Christ for All Crusade". It will be incorporated.

Homemaking Notes

Home Demonstration Agent

Good news for the water pollution problem! All makers of detergents coast to coast, will switch all product formulations to "soft" biodegradable materials by June 30.

This doesn't mean that our present detergents will have any more or any less cleaning power. It simply means that under the new formula, the sudsy materials can be broken down in sewage treatment as readily as in mixed sewage. Foam on water, which heretofore has resulted in many areas foam detergents which could not be broken down in treatment, will disappear.

So, when your favorite detergent comes out soon with the word "Bio-degradable" included on the label, you will know that this is just one industry's contribution to cleaner waters in our rivers and streams.

The Adults Drivers Improvement Clinic got off to a wet start last week. Several persons attended the first session of the clinic, which was held Friday night. Those who did not come certainly missed

something. There are three more sessions left, May 25 and 27 and June 3. I hop this doesn't interfere too much with end-of-school activities, but these were the only dates open to us. Do plan to attend the remainder of the clinic. You'll be glad you did.

Please don't forget the National Driver's Test to be given over CBS-TV, Monday, May 24, 9 to 10 p.m. There is still time to get test forms from our local CBS TV station (KFDA Amarillo), or I have test forms available in my office in the courthouse. Get one for each driver in your family.

The test is on driving judgment, knowledge and perception. This is one good way by which to see for yourself how good your driving skills are, and how they compare with those of other drivers in other sections of the country.

THE LAST NOTE: The best things in life are free, but there always will be those who would appreciate them more if they weren't.

Go View the Land

Latest Documentary Film Described as Magnificent

"A magnificent film," is Mrs. R.E. Lee's description of the latest KGNC Farm and Ranch Department film, "Go View the Land."

Mr. and Mrs. Lee were guests of KGNC in Amarillo Saturday for the premier showing of this travel documentary filmed and produced by Bill Rhew and narrated by Cotton John.

Mrs. Lee said much credit is due Bill Rhew's artistic and photographic ability.

Rhew made the film on the first Cotton John tour around the world in 1961. J. Garland

(Cotton John) Smith wrote the script and narrated the 38-minute film.

The title of the new movie is from Joshua 2:1 in the Old Testament.

Before the premier the Lee's attended a KGNC party for members of the travel group. They were welcomed by Bob Watson, General Manager of KGNC.

There were approximately 75 at the party and over 500 at the premier of the film.

...AND FAIRMONT FRESH BUTTERMILK MAKES IT BEST

Fairmont Fresh Buttermilk gives home-baked bread a special melting tenderness... a real old-fashioned kind of goodness. Try our fragrant, moist Date-Nut loaf... you'll see.

BUTTERMILK DATE-NUT LOAF

- | | |
|--------------------------|-----------------------|
| 2 eggs, beaten | 1/2 teaspoon nutmeg |
| 2 cups brown sugar | 1/2 teaspoon cinnamon |
| 2 cups buttermilk | 1 cup oatmeal |
| 3 cups flour | 1 cup chopped dates |
| 1/2 teaspoon salt | 1/2 cup crushed nuts |
| 1 teaspoon baking powder | 1/4 cup melted butter |
| 2 teaspoons baking soda | |

Beat eggs and sugar thoroughly. Add buttermilk and beat well. Sift together flour, salt, baking powder, soda, and spices. Stir into egg mixture and mix thoroughly. Fold in the oatmeal, dates, and nuts, stirring only enough to combine. Gradually blend in the melted butter. Clothing Appeal Is Made By Church Group

The United Clothing Appeal working through the Church World Service is conducting a clothing drive in Spearman and surrounding communities, with the pick-up point at the Methodist Church in Spearman. All churches, organizations or individuals who have good, clean used clothing which is in good repair, or blankets, pillows or other bedding items, or cloth remnants for sewing, are asked to bring these items to the old fellowship hall of the Methodist Church on Friday, Saturday, and Monday, June 4, 5 & 7 along with 10 cents per pound of material to cover essential cost of processing, export packing, insurance and marking. This does not cover commercial transportation or postage to the World Service Center. Someone will be at the church on these days between the hours of 9 a.m. to 3 p.m. to weigh and receive the goods.

The Church World Service Center sends these items overseas anywhere in the world they are needed. Where there are floods, earthquakes, hurricanes, political unrest, homeless children, refugees or other disasters where help is needed.

Mr. and Mrs. Bud Morley returned Sunday from Tishomingo, Okla. where they visited relatives and did some fishing.

Morse school board met Thursday night and acted on a number of items.

A teacher incentive incre-

ment plan has been in discussion by the board for some time and two special increments were added to those already existing. They read as follows:

"\$10 per semester hour earned above the Bachelor or Master degree in their teaching field or special service area up to 36 hours. Hours must be earned while in service with the Morse School. Hours earned before coming to Morse will not count. Eighteen clock hours of In-service training will count 1 college semester hour. All hours earned must be from an accredited college or university approved by the Texas Education Agency.

"\$50 increase in annual salary after the first year in the school system and \$100 per year thereafter up to a maximum of \$250."

This will be effective June 1, 1965.

The board voted to pay the bills and appointed the First State Bank of Spearman as the depository bank. They also voted to comply with the national lunchroom program.

The superintendent was authorized to secure bids on repairing the shop building, two classrooms, one dressing room, the cafeteria, painting of the halls, redashing and painting the trim on the teacherages, retopping the parking area and building a concessionstand for the football field.

The board also appointed H.B. Parks, D.M. Womble, A.C. Womble to serve on the equalization board. Alternates are John Trindle, Charles Johnson and Mike Balentine. The equalization board will meet July 14.

Earl Henderson was sworn in as a board member replacing Grant Miner who recently resigned.

Final examinations were held Tuesday and Wednesday at Morse school. School will

officially dismiss Thursday at 2:30 and the senior graduation will be at 8 p.m. that night.

Friday will be a work day for the Morse teachers. The report cards will be mailed to the students after the close of school.

Cloy also won a first place trophy in the same event on a different night.

Early Harvest

Along with big yields, you want an earlier, earlier harvest. And that's just what DeKalb Sorghum Breeders had in mind. That's part of the "why" of DeKalb's big, open head. That's why DeKalb Hybrids were selected to produce dry, ripe grain on green stalks. Multiply early harvest by other bred-in DeKalb extras: fast growth and disease resistance; open heads and stiff stalks; big, quality grain yields and easy combining, and you see why it pays to plant ALL DEKALB.

Note to new cooks: the easiest way to manage rolled cookie dough or pastry is to use a pastry cloth and a stockinet covered rolling pin. These kitchen accessories are well worth the small investment they call for.

COMMUNICATIONS Your Tool for Progress

This coin telephone benefits you in TWO ways

First of all, it becomes a "friend in need" when a quick call is necessary... puts a telephone where you are and makes it available 24 hours a day. It is profitable to communities, too, providing new income when we are permitted to locate them on public property. There is an added advantage in some states where it can lower fire insurance rates because of the availability of prompt alarms. So the next time you see a coin telephone, consider it an example of convenience in Communications — Your Tool for Progress. You are invited to call our Business Office for information about income-producing booth locations.

Nuclear Energy Allows Agriculture Exploration

A group of news media representatives visiting Texas A&M University this week saw and heard how nuclear energy is being used to explore a wide variety of agricultural production problems.

They learned, for example, how nuclear science is digging up information on crop and livestock losses from bugs, disease and weeds which are costing the United States about \$22,500 per minute of \$12 billion a year.

Dr. Ruble Langston of the Plant Sciences Department told the newsmen that nuclear energy is often used as a tracer to mark movements of chemicals, insects, nutrients, hormones and other items. It is something like a farmer belling his lead cow to keep track of herd movements.

He cited the screwworm eradication program in Texas as an outstanding example of the atom at work for agriculture. Five years ago, screwworm infestations were common. Today, they are relatively rare.

Dr. Wyman Dorough, entomologist at Texas A&M, said one of the big obstacles in the never-ending fight against bugs is to develop pesticides that are both effective and reasonably safe to handle. Answers are sought through metabolism studies using radioisotopes as tracers.

"Many new materials are found to be inadequate and further costly investigation is eliminated," Dorough pointed out. "Those materials meta-

bolized too slowly, or in some cases too rapidly, are discarded and the more promising chemicals are studied further."

Another speaker, Dr. Page W. Morgan of the Plant Sciences Department described a number of ways radioactivity is used to track hormone movements in plants.

He said hormones are "chemical messengers that scurry about the plant telling buds, leaves, branches and roots to grow or not to grow, to mature or to die." Especially significant research is underway on better ways to control brush, such as mesquite.

"Using radioactive 2,4,5-T, one promising lead has already turned up," Morgan said.

"Addition of ammonium this cyanate to the herbicide gets more of it to the mesquite root, resulting in better kill. Based on these isotope-assisted findings, a combination-of-ingredients mesquite killer should soon be on the market."

Soil moisture probe, a new and more accurate way of measuring soil water through atomic energy were explained by Dr. J.R. Runkles of the Soil and Crop Sciences Department. Conventional methods require expensive equipment and many man hours of labor.

The new system involves measuring the soil moisture content by determining density of a "cloud of slow neutrons after a source of fast neutrons is placed in the soil." If soil moisture is low, the density of the slow neutron cloud will

be less than if moisture content is high.

Dr. George M. Krise, biologist, said an ordinary Spanish goat can often absorb sizable doses of radiation and still perform physical tasks, but this doesn't mean man can do the same.

Discussing radiation effects on goats and their relationship to man, he said goats have been found to be unusually resistant to radiation. Much more research must be done with other animals before results can be "extrapolated" or applied to humans.

Various animals have been tried in radiation experiments, and the Spanish goat is a favorite because it and man are similar in some ways.

"Man lives under a variety of changing environmental conditions and might be considered a wild-type," Krise explained. "By and large, the Spanish goat is a wild-type animal since it is seldom cared for under normal cultural conditions."

Dr. Carl N. Lyman, head of the Biochemistry and Nutrition Department, discussed experiments on a yellow pigment known as gossypol in cotton seed. Gossypol in cottonseed meal, if fed improperly, can be poisonous to some types of livestock.

Radioactive carbon is providing some of the answers. The gossypol is separated from the seed after the parent plant has been treated with organic substances labeled with the carbon. If the separated gossypol is radioactive, then the substance given to the plant had to be used to make gossypol.

Dr. W.D. Ellis of the Animal Science Department said radioactive flow markers are proving valuable in studying nutritive value of forages.

He said the flow rate of forage particles through an animal's digestive tract is being determined by "marking" the particles with a radioactive isotope of cerium, a metallic element.

Dr. J.H. Quisenberry, head of A&M's Poultry Science Department, discussed studies on effects of radiation on poultry and eggs.

"Chickens and turkeys have a greater natural resistance to irradiation than man and many other animals. Therefore, they could become a most important source of food in case of nuclear attack," he said.

More Beef Will Be Eaten

Approximately four more pounds of meat per person will be consumed in the United States this year than last.

This will bring the per capita consumption of red meat to 173 pounds--a record high, says Mrs. Gwen Clyatt, Texas A&M Extension consumer marketing specialist.

Virtually all of the nationwide increase will be in beef and veal, which have been in especially good supply and at reasonable prices, U.S. Department of Agriculture researchers have indicated. The availability of supply is expected to continue throughout 1965.

Homemakers who are looking for tasty, economical ways of using beef will do well to consider the round, says Mrs. Clyatt. Round steaks have gone modern and have taken on a new look.

Many markets offer for sale, in addition to whole round steaks, portions of the round. There are some advantages to these cuts. Some of the misunderstanding or abuse in preparation may be eliminated, since the shopper can now purchase that part of the round for a specific use.

The whole round steak is full of flavor. However, it is not tender enough to broil, and should be cooked in a covered skillet at low heat.

The top muscle in the cut of round is the most tender. It can be broiled, braised, chicken fried or roasted. The bottom round, an outside cut, usually has a lower price tag than the top round.

Award-Winning

Choir Will Present Concert Tuesday

Spearman's award winning High School Choir will present its first public performance of the year, Tuesday at 7:30 p.m. in the High School Auditorium.

This 85-voice choir has earned superior ratings in contests this year and has been named the "Outstanding Choir" at the PAMC Choir Festival at Goodwell, Okla., and, also, at the Tri-State Music Festival, in Enid, Okla.

Included in the Spring Festival of Song Tuesday night, will be songs by the Junior High Choir, and the Fifth and Sixth Grade Choir.

Five New Teachers Hired by Board

Five new teachers were hired Tuesday night by the Spearman Independent School District.

John Hickey, who had resigned earlier as eighth grade language arts instructor, was hired as an English instructor in High School.

Hickey had resigned to seek a high school teaching position.

Mr. and Mrs. Bant McGee of Hollis, Okla. were hired. He will teach High School history and is qualified to teach science and industrial arts.

Mrs. McGee will teach in the junior high language arts department.

Both Mr. and Mrs. McGee have over 20 years experience. They were recommended by G. W. Robinson, an instructor in the Spearman schools. They were his teachers while in school.

Mrs. Kent Guthrie was hired as an English instructor. She is the former Glenda Butts and a Spearman High School and North Texas University graduate.

Herman Smith Boone was employed as agriculture teacher. He has taught in Clarendon and Olney. He is rated as one of the top teachers in the West Texas area, by men of his profession.

The board agreed to allow the school nurse to purchase an eye testing machine from her budget. However, it was noted that the budget would probably have to be increased to cover \$360 cost of the machine.

The resignations of Miss Pat Howard, Don Cotner, Jerry Day and Mrs. Leo Fields were accepted by the board.

The board will meet again May 20 to accept bids on the remodeling of the Junior High building and the paving work at the high school.

One Injured In Accidents

One man was injured in a one-car accident at Third Street and Highway 760 about 3:30 p.m. Wednesday.

J.E. Fickling received a laceration on his nose when his car hit a powerline pole as he was attempting to turn onto Third Street.

Police Chief Wayne Pierce said the skid marks showed that the driver apparently applied the brakes as he was making the turn and the car skidded into the pole.

Fickling's face struck the steering wheel of the car.

Monday afternoon two cars were heavily damaged in an accident at the intersection of Tenth and Dressen Streets. Pierce said the intersection had no stop signs.

One car was driven by James King and the other was driven by John Knudson. There were no injuries.

These were the first accidents within the city this month. There was only one accident last month. Officers issued 37 traffic tickets during the month to enforce the city's stricter traffic regulation.

Farmers Face Wheat Deadline

Hansford County farmers are again facing a deadline that can put them out of the wheat program for this year.

This is the May 15 deadline for the destruction of excess wheat. Since May 15 is Saturday, Ellzey Vanderburg, ASC Office Manager, said the farmers have until Monday, May 17 to report the destruction of excess wheat.

Vanderburg said Tuesday there were 140 farmers who had not made their report to the ASC office.

The recent school tax increase has created some sharp reaction among some of the taxpayers of the district.

Some have accused the school board of misrepresenting the facts about the amount of increase necessary to pay for the bond recently voted.

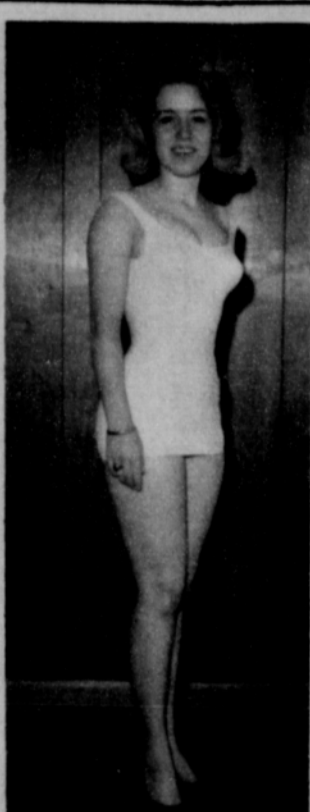

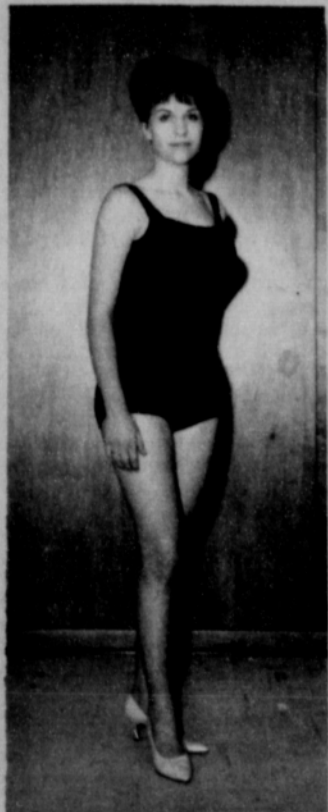

The tax increase to pay for the bonds is just about what was presented, six percent. The rest of the increase is for the actual operation of the school.

This is a tax increase we may as well get ready for every year or two, as long as the school continues to grow. Just as a growing family takes more money, a growing school takes more.

There is probably no one who hates raising taxes more than the present school board. They will talk and figure half the night trying to find ways to operate a first rate school that is growing on the same money that it took last year or the year before.

There is not a department in the school that is not larger than it was last year or two or

We are a young area in average age of the residents, and young people are the ones with school age children.

It takes young people to start new businesses, operate irrigated farms, and work in the oil and gas industry.

Don Floyd of the Chamber of Commerce told us the other day that Spearman's population is now 4700 people. This figure is based on the number of water and gas meters in town.

Charles Gilliam tells us that Community Public Service has 27 more customers now than at the same time last year, another sure sign of growth.

With these reports of continued growth, there is no way we are going to cut school costs.

If you know how to do it on less money and still produce students who will be qualified to go to college, hold jobs and be useful citizens, then the school board would like to talk to you any night they are in session.

Lately, that has been almost every night.

This is Festival week, so hope you will turn out and join the fun and entertainment.

Polynesian Paradise Is Banquet Theme

Two Themes Surprise Seniors

Decorations in a "Polynesian Paradise" theme greeted guests at the annual Junior-Senior banquet Saturday evening at the high school cafeteria. As guests arrived a misleading western motif was carried out in the entry room to surprise the seniors from whom the theme of the banquet is traditionally a secret.

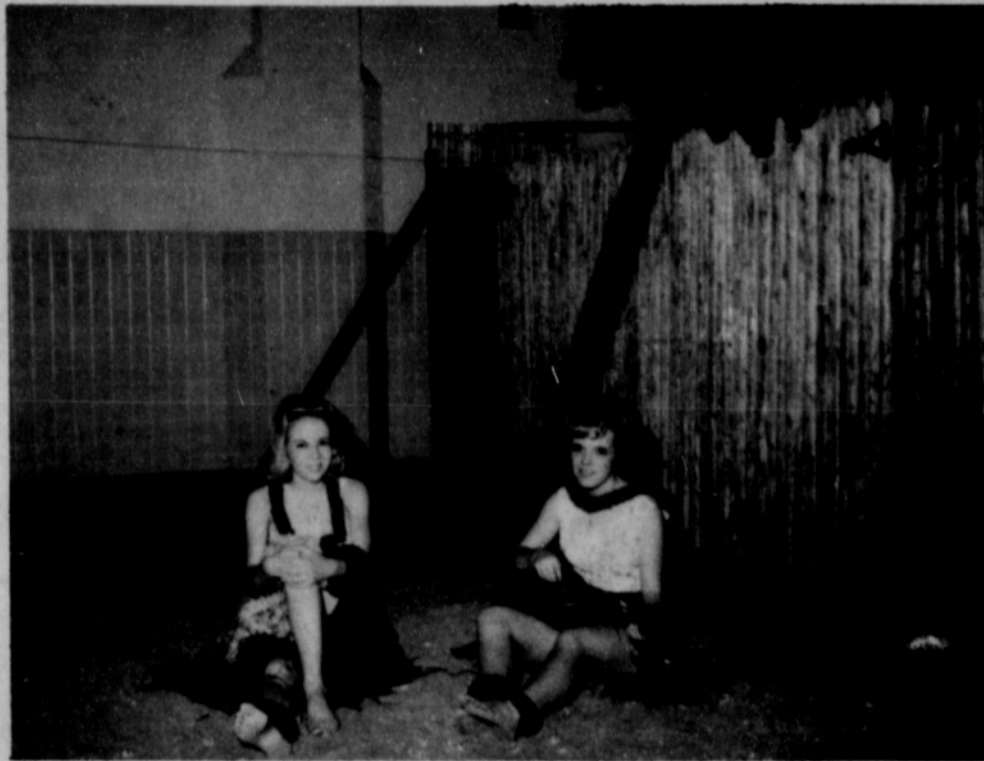

Dancers from the Do-Si-Do Square Dance Club entertained the guests as they arrived, in a room decorated with tumbleweeds, fence posts, wagon wheels, lanterns and cow skulls.

A Polynesian Mask served as the entry-way to the banquet room which was highlighted with fishnets and sea shells before a background of surf. Lighted tropical fish illuminated the room and table decorations were Polynesian fruits, sea shells and other island relics.

Larry Babbs, Junior Class president, served as master of ceremonies and presented the welcome. Johnny Crawford, Senior Class president, gave the Response.

Entertainment was by the Frank Phillips Girls Octette and Joe Morrison of Odessa who presented a dramatic reading. Kathi Pattison gave the Farewell.

Music for the Prom was by The Essex of Pampa.

Day by Day

We've just received some of the most beautiful Hallmark inspirational cards. They are perfect for a number of occasions when you want to convey a fitting inspirational message to friend or loved one.

We also unpacked some other new Hallmark items, Little Red Riding Hood birthday items for a little girl's party, a western cowpoke for a little boy's party, a cute little chef for summertime barbecues and other entertaining and new baby shower items.

This isn't exactly the busiest season for parties, but keep Hallmark party goods in mind when you do plan to entertain. Whether you need help in party planning via the new party-planning books or decorations and serving supplies, you'll find Hallmark makes entertaining easy.

I found out the true meaning of the word catastrophe in my last-minute rush to get ready to attend the Junior-Senior Banquet Saturday night. My front tooth filling fell out and in the rush to get it "glued" back in before the dentist's office closed at noon, I almost missed my appointment at the beauty shop.

I won't mention who made the suggestion but I got some help in the form of this thoughtful problem-solving idea, "If worst comes to worst, Day, you can always wear a big hat and keep your mouth shut!"

The banquet was nevertheless though, a very beautiful occasion with a Polynesian Paradise theme. Miss Pat Howard was the sponsor behind all the planning and decorating and she and the juniors did a very good job I thought.

As Dorothy Buzzard and I noted (from our position in the old folk's observation gallery) Miss Howard has done a real good job at S.H.S. in all her extra-curricular jobs, not to mention her sideline, teaching English. She'll be missed, along with many of the other teachers who won't be here next year.

Never saw such a turnover of teachers in one year!

With all the current articles about diets, I think I've finally figured out what to do. According to the seven golden rules of glamour, the "Rules of Wrist" are what is really important.

It seems your chest should be 5 1/2 times the size of your wrist, the waist 4 times the size of your wrist, the hips 6 times the wrist's size, the thigh 3 1/2 times the size of the wrist, the calf 2 1/2 times and the ankle 1 1/4 times the size of the wrist.

So you see, it's all in what size wrist you have. I personally am doing everything I can to gain an inch or so, in the wrist.

And as long as we're talking about gaining weight, try this simple-to-make Tea Party Loaf. It's sweeter than bread and less sweet than cake and delicious served with tea or coffee.

TEA PARTY LOAF

- 3 cups prepared biscuit mix
- 1 cup quick rolled oats (uncooked)
- 1 cup sugar
- 1 egg, slightly beaten
- 1 1/2 cups milk
- 1/4 cup vegetable oil
- 1/2 cup semisweet chocolate pieces
- 1/2 cup butterscotch flavored pieces
- 1/2 cup chopped walnuts

Measure biscuit mix into bowl; stir in oats and sugar. Combine egg, milk and oil; add to oat mixture and beat until smooth. Stir in chocolate and butterscotch pieces and nuts. Turn into greased and wax-paper-lined 9 x 5 x 3-inch loaf pan. Bake at 350 degrees for 1 hour and 15 minutes, or until cake tester inserted in center comes out clean. Cool 10 minutes before turning out of pan.

The Way I See It

"LET'S GIVE YOUTH A PLAN FOR LIVING"

Youth today think less of present problems and more on the future--that which is to come. We need to help them to be open to what is to occur in their lifetime. Stress is on the New...as new morality, new man, new English language for computers etc. Our youth need the capacity to "ride loose in the saddle" to be ready for any change of direction. Are we helping our youth? Or giving them only short tether rope?

We must give youth freedom to be constantly examining. We must not bury their problems. We want youth to question and examine. This they are doing. People today ask why not have birth control, why not create life in a test tube? Why not have gene control and choose your offspring? Why not control conversation by wire tapping devices? Why not this? We may disagree with these thoughts, but youth are asking seeking answers to these and many other questions. We must help them by giving our youth direction. We must give them a plan for living.

Thus deep guidance must be given to help the youth of today "go on the line". Youth want to be where there is action. We must help them take the stance of the committed--to know Christian morality and truth that they may live unto their Living Lord.

However it is not enough for youth just to question. Without a goal of life, questioning ends up in nihilism, sweet sentimentalism or complete abandonment of all principles that are good. We need one foot to question and to stand on the other foot on solid absolute truths which the Gospel provides.

Let us not tell our youth to "play it safe". Let us tell them to go on the line. They must question life, but also hear the Church speak and learn to respond to Christ's truths of life.

We thus need not give youth a plan for life but a plan for living. We need not map out their future but give them guidelines that will help youth see their purpose in this world. Help us send youth into the world with a good Christian plan for living. Is your youth ready?

CASE. 40-INCH

threshing/separating width—
why it is

more important today than ever before

Why? Bigger yields! Crops like 150 bushel corn, 50 bushel wheat, 40 bushel soybeans, 100 bushel grain sorghum.

They need "elbow room" in your combine. Greater threshing and separating width to allow the crop to thin out and shake out every last kernel of grain.

And yet, most popular-priced, family-sized self-propelled combines still have 26- to 30-inch cylinders. Except the Case 600!

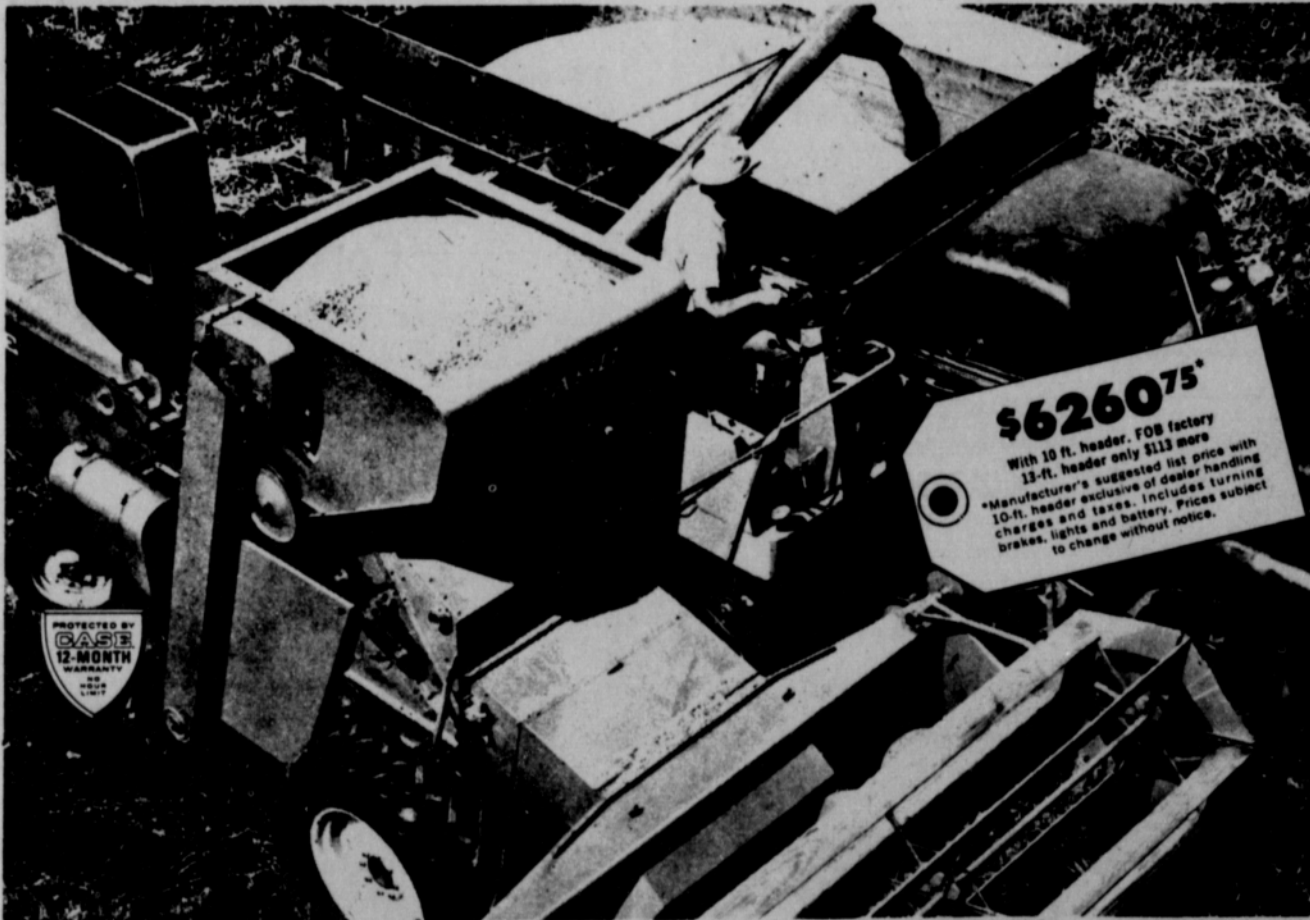

Its 40-inch cylinder is not only wider but heavier—develops the momentum to handle slugs without faltering. Add to this 40-inch wide separation with exclusive air lift action—4,480 square inches of it. And then top

it off with cleaning capacity to match. Result: maximum grain saved, minimum dockage.

Do you grow high bushel yield? Shouldn't your next combine be a 40-inch, high-yield Case 600 Self-Propelled? See your Case dealer. He'll widen your chances for saving more grain. J. I. Case Company, Racine, Wisconsin.

Five Case combines to choose from: Case 600 (illustrated), 400 pull-type, 900, 1010 and 98 Hillside Self-Propelled.

ROBERT ADAMSON

A reliable rule for estimating the cost of living: Take your income and add 25 percent.

GRUB CONTROL BOOSTS CALF WEIGHTS
A livestock specialist with the Texas Agricultural Extension Service here says grub control in beef cow herds can sometime increase calf weaning weights as much as 40 pounds.

The Specialist, Dr. Dixon Hubbard, says grub control costs as little as 12 cents per cow and few management practices

will pay such dividends. According to Hubbard, heavy infestations of grubs can reduce a beef cow's milk production as much as 2.5 pounds per day. Multiply this times a 205-day suckling period and it means a loss of more than 500 pounds of milk.

Experiment Station research indicates 500 pounds of milk can make a difference of 40 pounds in the 205-day weaning weight of a calf, the livestock specialist said.

Hubbard's co-worker, Entomologist Don Rummel says cost of control varies with the method of systemic treatment.

Using recommended dosages and procedures, the grub control costs per head are about 22-cents for spray, 50-cents for pour-on, and 12-cents for dipping, he said.

Grubs can also be controlled through feed that contains a systemic. Stockmen should consult their feed dealer for information on this method.

Treatment should be made after the end of the heel fly season. In the High Plains area that is about June 15.

Ken Camp Is Critically Injured

Ken Camp, graduate of Spearman High School, has been in critical condition in the Memorial Hospital in Siloam Springs, Ark., hospital after being electrocuted May 1.

According to a report from his mother, Camp, a former Lynx football player, was electrocuted when he climbed a power pole to fix a light.

There was a loose wire with 7200 volts. It hit him and knocked him to the ground.

His left collarbone was cracked and he had internal injuries. The report from his mother said there would have to be skin grafts done on his left hand and foot.

Anyone wishing to write to him may send it to Room 9, Memorial Hospital, Siloam Springs, Ark.
