

# The Hansford Plainsman

VOLUME VII., NUMBER 75

SPEARMAN, HANSFORD COUNTY, TEXAS 79081

SUNDAY, JULY 9, 1966

We suppose everyone has something in life he has always wanted and will probably never own. With us, it is a horse.

It's not that we can ride, it is a jarring experience everytime we meet a saddle. However, we have always liked being around horses and watching someone ride who does it well.

Friday afternoon we went out to take one picture of Wanda Greene and her horse, Señor Ray, winner of the 4-H horse show.

We got the picture, then spent an hour watching the little "redhead" put the horse through his paces in preparation for competition Saturday and Sunday in Hugoton, Kan., and Canyon.

The horse has some famous bloodlines and is fast on the patterns the girl rides in the playdays and rodeos and other competition.

Wanda rides the horse in all different events and the animal is so good that he keeps her right up at the top in most every event.

We learned that it is unusual for a horse to be smart enough to be able to run all the different events in a show. It seems that many horses can be used only in one event and do it well enough to be a winner.

Everett Greene, Wanda's father, said he bought the horse late last year and really expected it to be this year before he could be a contender. He was winning in about three months.

There is a close relation-  
(Continued on page 2.)

## Four More Teachers Are Hired

Four more teachers have been hired for the faculty of the Spearman Public Schools, Dr. Bill Reeves, Superintendent, announced Friday.

The employment of the four teachers was approved by the special meeting of the board Friday morning.

Frank Bennis Butcher of Port Arthur was hired as the high school chemistry and general science teacher.

James Chaffin from East Central State College in Oklahoma has been employed as a fifth grade math and science teacher.

Kitty Bowers of West Texas State University has been employed as the Special Education teacher.

Lena Fay Niven of Hart was hired as a second grade teacher. Mrs. Niven has been teaching in Hart and previously taught in Dumus and Hereford.

Dr. Reeves said the positions of choral music director for the school system and the high school principal are still to be filled.

-Plainsman photo

## Little Things Missed Most By Cockrells Living in Arabia

"The little things are what you miss," says Frank Cockrell, Principal of the Parents Cooperative School in Jeddah, Saudi Arabia.

Cockrell and his family are visiting in Spearman until about July 18 or 19. He was a junior high and high school principal here until last year when he resigned to take this job with Trans-World Airlines, running the school in Jeddah.

The Cockrells still own a home in Spearman and are living there during their stay here.

"You can buy refrigerators, washing machines and most of the other big U.S. things, but many little things like bologna and hot dogs, you can't get," he comments.

The Cockrells have finished one year of a two year contract in Arabia, but he thinks the family will stay until the oldest son, Dennis, completes

the ninth grade there. That will be three more years.

Cockrell's school has classes for students from kindergarten through the ninth grade, then the children come back to the states, go to school in Europe or in Beirut, Lebanon.

Cockrell says his school is just another Texas school. All but one of the teachers are from the states and several of them are from Texas.

The Principal said he had 250 to 300 students this year, but more government workers and military personnel will swell the enrollment to about 500 students this fall.

"We are supposed to have a new building this fall, but I don't know if the local labor will get it finished. They don't get in a hurry."

Frank said living in the compounds was mostly like America. We have to do some improvising and co-operating with our neighbors but it is about like the U.S.

Cockrell said the kids like the country, because they can play outside the year around,

and there are lots of family recreation activities.

This really makes teaching harder, Cockrell believes. The kids can play so much and they are prone to feel like being over there is one big vacation, anyway, so they seldom are ready to study in school.

Jeddah is on the Red Sea and Cockrell said it had some of the most beautiful beach and water in the world. There are sharks in the open sea, but there is a small bay where they do not come and everyone swims there.

He said the water was so clear one could go under with a face mask and see all kinds of marine life.

He said the temperatures there in the summer did go to 130 degrees, so our heat wave is rather cool to the visitors.

## Jones Rites Are Held In Gruver

Funeral services for R.Y. Jones of Gruver were conducted at 10 a. m. Saturday in the First Christian Church of Gruver.

Services were conducted by the Rev. Fred Pugh. Burial was in the Gruver Cemetery under the direction of Simpson Funeral Home of Borger.

Mr. Jones died in Hansford Hospital Thursday morning after being admitted to the hospital Wednesday evening.

Jones was an employee of Gruver Motor Co., and had  
(Continued on page 2.)

## Hutchison Sisters Take 4-H Dress Revue Honors

Cindy Hutchison repeated as the Junior Division winner of the 4-H Dress Revue and was joined by her sister, Rebecca, who won the Senior Division to make a sweep for the sisters.

The small show attracted only 16 entries this year and was held Thursday in the Home Demonstration Club Room. Judging began in the morning and the public revue for the girls and their garments was held at 3 p.m.

Runner-up in the junior division was Vicki Rosenbaum, 14, a member of the 4-H Clovers and the daughter of Mr. and Mrs. L.W. Rosenbaum.

Senior division runner-up was Sylvia Parks, 17 of Morse and a member of the Morse Junior Leaders club. She is the daughter of Mr. and Mrs. H.B. Parks of Morse.

The winners are the daughters

of Mr. and Mrs. Dwight Hutchison of Spearman. Cindy is a member of the 4-H Clovers and Rebecca is a member of the 4-H Pals.

Both of the girls will compete in the District Dress Revue in Amarillo on July 19. The five top contestants in the Senior division will be entered in the state dress revue at the State Fair in Dallas, late in September.

Rebecca Hutchison made and modeled a coat and dress. The coat is a loosely woven pimento red wool flannel, cut on a slim A-line with slightly lowered round neckline with collar and shoulder tabs which held a paisley scarf of brown and shades of red to blend with color of dress.

Her accessories were pimento bag, shoes and gloves with a brown beaver felt hat with pimento stitched band.

Cindy Hutchison made and modeled a pastel pink wool crepe blouse and skirt with a white and pink polka dotted smoke ring scarf. She wore white shoes.

Both of the winners are very active in 4-H work and school activities. They have been consistent local, district and

state contenders in 4-H activities.

Blue ribbon winners in the junior division were: Delinda Head, Vicki Cummings, Gloria Lopez, Rebecca Alexander, Donna Reed, Cindy Hutchison, Valorie Uptergrove, Vicki Rosenbaum, LeAnn Shieldknight and Sherilee Maupin.

Red Ribbon winners were Sherry Simmons, Karon Hamilton, Melanie Schaefer and Lindy Ward.

Blue Ribbon winners in the senior division were Rebecca Hutchison and Sylvia Parks.

## Get Reservations For Show 'Texas'

Tickets for the show "Texas" in the Pioneer Amphitheatre in Palo Duro Canyon are scarce according to a story Saturday in the Amarillo Daily News.

The tickets are \$3.50 for upper elevations, \$2 for reserved seats and \$1 for general admission. All seats are 50 cents higher on Friday, Saturday and Sunday. Children are half price except in the upper elevations.

To write for tickets the address is Texas Panhandle Heritage Foundation Inc., Box 268, Canyon, Texas. The Canyon phone number is Olive 5-4272.

The show has been playing to a full house each night and it is advisable to have reservations.

## Greene Wins Horse Show

Wanda Sue Greene of Spearman compiled 17 points in show and riding events to win the Hansford County 4-H Horse Show held on the Buddy Murrell ranch west of Gruver Wednesday morning.

The top six entries in the show will compete in the District 4-H Horse Show in Dumus on July 14.

The top six in the show and

### Shelly Home From Vietnam

M/Sgt. Richard L. Shelly of the U.S. Air Force who had been stationed in Viet Nam a year on July 3 arrived home on Friday.

Mrs. Shelly and children Kathy, 14; Dana, 11; and Terri, 4 years of age have resided at 909 S. Haney during his absence.

Mrs. Shelly is a sister of Mrs. Jack Kemper of Spearman.

Mr. and Mrs. Don Denham and Randy and Robin spent the holiday weekend in Hot Springs, Texarkana and Hope, Arkansas visiting relatives and friends.

Mr. and Mrs. Orvil Brown and daughter from Waxahatchie, Tex. visited her parents Mr. and Mrs. Elmer Longley and two sisters over the Fourth of July weekend. They returned home Tuesday.

### Group Attends Youth Camp

Attending elementary camp this week at Ceta Canyon from the Methodist Church are Sheila Patterson, Debbie Daniel, Liz Hohertz, Ronnie Head, Bobby De Armond, Bill Ownbey, Teddy Laws, Jody Healer, Becky Beck, Lee Watson, Maria McWhirter, Scott Latham, Susie Sell, Kay Wysong and Leann Shieldknight.

Those who planned to attend the Junior High camp were Debbie Sell, Patsy Powell, Sandra Shufeldt, Linda Willis, Sheryl Curry, Jane Ownbey, Pat Sloan and Larry Laws.

Councilors for the Junior High camp will be George and Dorcas Collard, Lloyd McWhirter, Bette Brown, Sue Stubblefield and the Daniel clan.

### Royal Service Meeting Held

The W.M.U. of the First Baptist Church met on Wednesday at the church for a Royal Service Program and business meeting.

Prayer calendar was read by Joy Ralls and Marie Berry led in prayer. The minutes of the previous meeting were read by Magda Garnett with Pat Denham giving the nominating committee report.

Betty Uptergrove conducted the business session after which Patsy Gates brought the lesson, "Thriving American Cults." She was assisted by Magda Garnett, Wren Holt and Joy Ralls. Approximately 20 members attended.

Mr. and Mrs. Robert Rosser, employed by Baker and Taylor, have returned to Spearman after working out of Woodward for some time.

R. L. Schroder and daughter Kay spent last week in Walsh, Colo. visiting and helping his parents Mr. and Mrs. Ora Schroder with harvest.

### Engaged

Mr. and Mrs. Allen Ricketts of Spearman announce the engagement and approaching marriage of their daughter, Gloria, to Larry Ed Beck, son of Mrs. Velma Beck also of Spearman. The wedding will be August 27 at 2:00 p.m. in the First Methodist Church of Spearman. Friends are invited.

Mr. and Mrs. Roy Lee Jones and family of Lovington, N. M., spent the holiday weekend with his parents, Mr. and Mrs. Roy Jones. While here they visited friends in Pampa on Sunday and ate dinner in Borg-er Sunday evening. They returned to Lovington on Monday.

By July 1 of this year, U.S. motorists will have paid an estimated \$100 billion in state and federal motor fuel taxes since the first levy was enacted in 1919, according to Oil Facts. Citing U.S. Bureau of Public Roads figures, the American Petroleum Institute publication says that with collections running about \$20.5 million a day, the cumulative total is expected to reach \$104 billion by the end of 1966.

### Gladiola Club Holds Swimming Party, Picnic

The Gladiola Flower Club met Thursday evening at 7 p.m. at the swimming pool park for their annual picnic.

The children came at 6 and went swimming before the picnic lunch was served. A menu of fried chicken, a variety of

salads and cole slaw, baked beans and a dessert of home made ice cream and cake were served.

Attending were John and Wanda Brown and Bobbie, Walter and Patty Spoonmore and sons, Craig and Bodell Hutchison and family, Ray and Sylvia Robertson and daughter, Hugh and Jackie Banks and boys, Lloyd and Dorothy Buzzard and Patty, Don and Gwen Smith and family, Ed and Dorothy Haner and Tommie, Marcus and Jo Larson and family, Bill and Lil Turner, Louis and Barbara Schnell and Bill and Estelle Jackson.

### Petroleum Output Triples

The amount of petroleum transported in the United States has more than tripled in the past quarter-century, Oil Facts reports.

More than 1.3 billion tons of crude oil and refined products are moved in this country in a year's time. Pipelines transport 44 per cent of the total, trucks 28 per cent, ships and barges 26 per cent, and railroads 2 per cent.

Oil Facts points out that competition among different forms of transportation helps keep petroleum prices reasonable.

### MANHATTAN SALE

## Athletic Blazer Fund Receives First Donations

The athletic blazer fund for Lynx athletes is beginning to grow, after a slow start, head coach George Wright said this week.

Four individuals and one business firm have now donated to the fund. Those making the donations are Irvin Davis, Jimmy Shieldknight, George Wright, Harold Danson and Cates Men and Boys Wear.

These donations are for purchasing blazers for the Lynx Athletic department. The players will wear the coats when on road trips representing the school.

They will be turned in at the end of the season and issued to students participating in the next sport.

Anyone wishing to donate to this fund should deposit their donations to the Lynx Blazer Fund, First State Bank, Spearman.

No one will call on you asking for donations, this is strictly a voluntary drive.

their points were: Greene, 17; Walter Murrell, 15; Mack Murrell, 11; Mindy Murrell, 10; Doug McCloy, 8; and Tommy Boone, 7.

In the show each entry showed their horses at halter, then performed in two of four different riding events. They could enter barrel racing, pole bending, reining and western pleasure.

This is the first year for Hansford County to have the 4-H show. It is becoming a very popular event over the state with 4-H members interested in riding and raising horses.

## Get Bagworms On Evergreens

Bagworm damage to evergreens such as arbovitae, cedar and evergreen species is being reported from many areas in Texas.

Phil Hamman, Extension entomologist, Texas A&M University, says evergreens should be watched carefully at this time of year, especially if old worm bags are found on the twigs. Wingless females crawl out and die after laying eggs inside the bag. In this case, each bag may contain hundreds of eggs which hatch into tiny larvae, he explains.

The newly-born larvae immediately start to make bags by chewing off small pieces of the tree. Young worms carry the bags wherever they go. The larvae can be killed with insecticides applied when the bagworms are still small. Chemical controls are ineffective when worms are full grown.

Chemicals suggested as controls include sprays or dusts of Toxaphene, Sevin or Malathion. Directions on the container should be followed carefully, the Texas A&M entomologist emphasizes.

If control measures are initiated too late, hand pick and burn the bags, because the worm goes through the winter in the egg stage within the bag, said Hamman.

Of the 114,600 substances tested by the drug industry in the United States in a recent year, only 40 reached the druggist's shelf.

### FLASH! New Horizons for Sunday Painters--

Every so often a hit-or-miss experiment produces a brand new medium. That happened when one inspired artist, reaching for a new effect with water colors, mixed detergent into poster paint. The result was spectacular. Here, on ordinary paper, were textures and "hot" effects previously possible only with oils on canvas. Here was a medium to make any dabbler look like a professional—a medium easy to handle, inexpensive, and clean. When the artist was ready to wash the brushes, they were already saturated with detergent!

The word spread, and soon people who had never before had a brush in hand were out "Sunday painting" and enjoying it to the hilt. More important, they were learning a great deal about technique because they felt no inhibitions in handling this stuff.

So, would-be artists, get started. Here is a convenient way to practice a new craft

without the expense of professional materials and paraphernalia. Just add one part detergent to two parts tempera—sometimes called poster paint. This gives the paint more flexibility and body because the detergent acts as a thickening agent. Painting with this mixture makes a highly skilled art technique suddenly easy to master.

This new medium also eliminates the usual clean-up problems of oil painting. There are no messy paint rags, turpentine, solvent, or chemical thinners to cope with. There is nothing dangerous to spill, nothing can be permanently stained. Since the detergent is part of the paint formula, brushes and containers can be washed in a jiffy.

The kitchen is a convenient "studio". Spoons and kitchen utensils can double as art supplies. You can use muffin tins to mix the paint and detergent. A cookie sheet or wax paper can serve as a palette. A spatula, the back of a spoon, or a serrated knife will create in-

teresting modern effects, and cotton swabs will produce delicate touches.

The painting surface can be any kind of paper. Shirt cardboard makes an excellent surface and is easy to frame. Paper towels, paper bags, or construction paper are also satisfactory. To approximate the texture of canvas, use the wrong side of oilcloth or a piece of rough cloth stretched and pinned over cardboard.

As your first still life, arrange garden flowers or vegetables. As soon as you feel sufficiently deft at applying the paint, you can pre-mix it and move outdoors. Adding a few drops of glycerine to the mixture will keep it moist longer. Should the paints dry out on your palette, just add some water.

At first, it may help to sketch your design in with pencil. Eventually, you will be able to block out your ideas with diluted colors made by adding more water to the tempera-detergent mixture. When you are satisfied with

the basic composition, start painting your picture with heavy strokes. The heavy daubs will build up on your initial sketch just as oils do. In fact, all the techniques of this medium are similar to oil painting.

For fine line work, highlights, or delineate the objects you are depicting, dilute the paint slightly with water to get a flowing consistency. This permits loading the brush with paint to produce smooth-flowing, continuous lines while retaining an oil-like quality. To change the texture of certain areas, or heavily painted elements of the design, just scrape the paint off with a knife before it dries.

Once the painting satisfies you, here's how to preserve it. Allow it to dry about 24 hours, longer if the climate is humid. Then cover the entire picture with a clear shellac, using a soft-hair brush. Shellac thinned with denatured alcohol is best, giving your painting two thin coats rather than one heavy one. Let the first coat dry for about four hours before applying the second. This will give the picture an oil-painting finish and protect the colors. Tempted to try it? It's fun, easy, and rewarding. And it's an activity which the entire family can enjoy, in or out-

## Rigs Will Be Probing Ocean Floor for Oil

About 150 mobile offshore drilling rigs will be probing the oceans of the world for new oil and gas reserves by the end of 1966, according to Oil Facts, published by the American Petroleum Institute.

The total value of these rigs will be approximately \$600 million. Some will be able to drill exploratory wells in water 1,000 feet deep.

Some industry leaders believe that in another five years the number of seagoing rigs will reach 200, with a total worth of \$1 billion. By that time, some oilmen believe it will be possible to drill exploratory wells from floating

doors, without mess, expense, or bother. There may be an undiscovered Rembrandt in your home. Mix tempera with detergent and find out!

LAST NOTE: Trying to get a word in edgewise with some people is like trying to thread a sewing machine with the motor running.

rigs in water 3,000 feet deep. So far, the petroleum industry has invested an estimated \$3.5 billion in offshore operations in U.S. waters and an overall total of \$10 billion in similar projects throughout the world. Oil Facts points out that the dollar return from these activities still lags far behind the amounts spent.

Several new concepts in ocean exploration are being developed, including proposals to send complete drilling rigs enclosed in watertight shells to the ocean floor, where drillers could work for long periods of time. Another idea being discussed calls for sending a crewless rig to the bottom of the sea, to be operated by one man on shore.

## Experts Are Astonished At Oilmen

A Wyoming oilman who recently found oil in a hand-dug well 21 feet astonished the experts, according to Oil Facts.

Al Smith resorted to a pick, shovel, and a few sticks of dynamite because time was running out on his lease and no drilling rig was available.

Although more than two million holes have been drilled in the United States in search of petroleum in the past century, no other hand-dug well is known to exist. The average well is more than 4,000 feet deep, and only one out of nine drilled in unproven areas finds even a trace of oil or gas.

Guests of Mr. and Mrs. M. D. McLaughlin were Mr. and Mrs. Joe Vanderford of San Francisco, California.

Mr. and Mrs. Everett Tracy spent the holiday weekend visiting his parents Mr. and Mrs. Frank Tracy at Mulberry, Kan. and with her mother Mrs. Charlotte McDowell at Liberal, Kan. On Sunday they drove to Branson, Mo. and visited their son Richard and Ernest Wilmeth who are both at summer camp near Branson.

Mary Lou, James and Dennis De Armond are visiting this week in Amarillo with their aunt and uncle, Mr. and Mrs. Wally Cayton and girls.

Mr. and Mrs. James Markle and son, James Ora from McPherson, Kan. visited recently with Mrs. Kate Gray and Mrs. Frances Sim. While here they redecorated their home on Roland street and have rented it to Mrs. Morris, Spanish teacher in the Spearman schools for this fall.

Mr. and Mrs. J.W. Wagner have returned to Spearman after spending the last several months working near El Reno. They also visited their son and family in Oklahoma City to get acquainted with their new grandson.

## V-7 CHISEL... MULTI-PURPOSE PLOW

# NEW

The V-7 is engineered to solve the deep tillage problem that soil conservation men have been asking for — The V frame plus forward sweep teeth enable you to accomplish with your farm tractor what was formerly possible only with industrial equipment.

### What the V-7 Accomplishes

1. Breaks virgin sub soil.
2. Enables soil to capture and retain sub soil moisture.
3. Stubble mulch and chisel plow in one operation.
4. Bed, chisel and fertilize in one operation.
5. Reduces operating cost with light draft.
6. Conserves soil for future by erosion control.

### SPECIFICATIONS

Length — 10 Ft. Weight — 1380 Lbs. 7 chisels with hard wedge on points. Chisels on 20" centers. Shear pins for protection. All steel welded frame.

### Optional Features

Mulch Knives — Middle Buster — Gauge Wheel Bracket — Row Marker

## R. L. McClellan & Sons Inc.

"Your Complete Farm Machinery Headquarters"

## Atomic Energy Used To Test Soil Moisture

McGREGOR.--There's a fascinating machine here that uses atomic energy to measure soil moisture.

Agricultural scientists at Texas A&M University's Livestock and Forage Research Center, McGregor, are using the rig--and they say it's providing many needed answers about soil moisture storage. It's just another example of what a sophisticated science agriculture has become.

The rig sends neutrons out into the soil. By the number that bounce back into a neutron trap, soil moisture can be accurately recorded, says G. W. McLean, A&M researcher in charge of the tests.

The process looks simple enough. Seamless steel tubes about one and one-half inches in diameter are driven some five feet into the ground. At McGregor they have about 200 of the tubes scattered over the station.

Then, a probe containing beryllium-fluoride is lowered into the steel tubes. The beryllium-fluoride releases neutrons in all directions into the soil. Neutrons are tiny, about one-billionth of a millimeter. They travel out at the speed of light until they hit something, bounce back and are captured in the neutron trap in the probe.

According to McLean, if a neutron strikes something in the

soil smaller than itself, it will not bounce back into the trap. If the neutron strikes something much larger, it will bounce back too fast to be caught--it passes on through the trap. However, the neutrons that hit something of nearly equal or slightly larger mass, bounce back more slowly and are captured in the trap. These are the ones that are counted.

The captured neutrons mainly bounce back after hitting a hydrogen ion. Water is the main source of these hydrogen ions. Thus, the more water in the soil, the more hydrogen ions. And the more neutrons bouncing back slowly enough to be captured.

The number of neutrons captured are measured and recorded. This, then, indicates the amount of soil moisture.

The rig costs about \$1,600--probably not practical for everyone to have one. But the A&M researchers cite one especially practical use it has--it can tell you exactly when to irrigate. It measures the moisture at various depths and eliminates any guesswork.

It has many other uses valuable to the A&M researchers. McLean says it gives an accurate record of moisture use of different crops--some use more than others. Also, it gives a record of moisture used by different crop rotation systems.

## Gruver Girl Wins Science Center Grant

Jackie L. Hudson of 806 Cluck street of Gruver, a student at Gruver High School, has been awarded a National Science Foundation grant to attend the Pre-College Science Center at the University of Bridgeport.

Miss Hudson is one of 80 high school students throughout the United States to have been selected to attend the seven week program, July 10 through August 27, in space science at the University of Bridgeport in Bridgeport, Connecticut.

The space science astronomy "lectures" take place every morning at the Museum of Art Science and Industry Planetarium. Students will be taught and encouraged to use the extensive electronic equipment of the Planetarium. In the afternoon these students study mathematics, radiation

physics, astronomical geology, and space biology.

Except for a limited number of lectures and activities of a general scientific interest, each student can concentrate on his branch of science.

Operating six days a week, the Center will utilize both the classroom and laboratory approach. The content of each program is deliberately planned to avoid duplication of a normal high-school or college course. The laboratory is planned to give the participant a realistic experience in logical, systematic, and meaningful independent investigation.

It's the season when students put down their placards, shave, pick up their diplomas and start wondering what in the world the younger generation is coming to.

## Spearman Cowboys Take Canadian Rodeo Prizes

Several Spearman cowboys were in the top money and prizes in the annual Fourth of July rodeo in Canadian over the weekend. Eddie Stewart placed second and Danny Jackson third in the bareback bronc riding.

In the Headin' n' Healin' second go round, A. D. Reed and Dale Hawkins were third with a time of 11.8. In the average for the event A. D. Reed and Bob Payne were fourth with combined time of 34.1.

In the second go round of the calf roping Darrel Renfro of Spearman split second and third with Wimp Gilbert.

### Plan Activities Around Safety

AUSTIN, TEX.--Plan summer activities for youngsters with safety in mind. The Texas Safety Association reports that well-planned recreational activities include safety precautions. Don't spoil a memorable summer by forgetting to put safety first.

An observant person 1) makes promises sparingly and 2) keeps them faithfully and abundantly.

**Effective July 2**

## Grassroots Opinion

Columbia, Miss., Progress: "So far as we have been able to observe, there are two kinds of taxes: good taxes and bad taxes. Good taxes are those that are levied upon other people and bad taxes are those that make us pay...If you will thoroughly understand the distinction that we make in regard to taxes...you will be able to understand a great deal of the squawking you hear."

Delmar, Del., Weekly: "There is no argument... against a self-sustaining Post Office Department, but we sure do wish that Washington would take the same approach when it comes to financing some of its other services...Oh well. You can't have everything. But you do sort of wonder sometimes about a system which doesn't even flinch when it comes to paying the freight on a capsule bound for an uninhabited, zip-codeless place in space, but gave up completely when it came to maintaining the penny post card."

Port Huron, Mich., Times Herald: "Teen-age fads are carefully calculated to scandalize adults...German WWII helmets are showing up on youthful motorcyclists in place of crash helmets. German crosses, to be worn as necklaces by the girls are appearing. Adults of America, arise! Let us arise and sit at the same time--sit this one out. Nobody complain. Nobody ground the kids. No petulance. Just silence. Maybe we can win this one."

Ellis, Kan., Review: "We have always been of the opinion that the man who earns the money is more entitled to spend it than the politicians in Washington. If there is danger of inflation from too much spending the best place to start is in Washington."

## WATCH STEP IS CAUTION FOR SNAKES

AUSTIN.--Now that the stop-everywhere passenger trains are becoming less in vogue, safety authorities are borrowing a standard train step alert for still another potentially fast-moving field.

That is "Watch Your Step." And if the populace does ignore the old walking admonition to "Keep Your Head Up" for a few months the safety officials will be happier.

It's all because the snake season in full bloom, along with the wild flowers and the safe and pretty natural accoutrements.

In fact, a Texas Parks and Wildlife Department spokesman cautioned that trips afield to explore enticing tracts of bluebonnets and other flowers very often means contact with snakes.

If and when a person, without his snake leggings or flak vest, finds himself face to face with a big bad snake, here's what the Department's official snake guide suggests:

"If a poisonous snake is discovered close by, the best protection is to remain as still as possible until the snake has moved away. It should be remembered that a snake is quick to strike at a moving object, so to quickly step away at such a moment may be disastrous.

"If a rattlesnake is heard nearby but cannot be located, do not begin wild dash for safety. Location of the snake may be misjudged and by taking a step you are likely to walk into, rather than away from, it. Again, remain still until the snake is sighted and, when it is certain the snake is at least five or six feet away and no others are nearby, slowly back away. If you must move away, do so as slowly as possible."

In other words, Brethren, retreat to prepared positions. And don't even say "BOO!" May be an ornery pooch around and if they see your teeth, somebody said, that means "CHARGE!"

# High Plains Plans 10th Observance

The High Plains Research Foundation at Halfway, Tex., will observe its Tenth Annual Field Day on Thursday, September 8th.

Traditional tours of the Foundation's research and educational facilities will start at 1:00 p.m. when the visitors will be taken to each tour by members of the Board of Trustees of the Foundation. A feature of the Annual Field Days is a historical observance of West Texas hospitality by greeting the guests arriving at the days festivities with representatives of Civic Clubs and Chambers of Commerce of the area. Members of the Young Homemakers

Clubs and staff members of the Foundation will greet and register visitors at various registration tents on the grounds of the Foundation and the Halfway Community Center.

The tours will continue throughout the afternoon. Included in the tours will be the new Moody Memorial Education and Communication building where the visitors will view the administration offices, TV and Radio rooms, and exhibits. The Killgore Foundation building tour will include the scientific staff offices and laboratory continuing through the Jim Hill Greenhouse. The shops, seed processing laboratory, and Laboratory Gin will be another tour available for guests. The tour of the research farm will be on seated trucks with professional agricultural leaders to stop where some of the major research projects underway will be explained by the Foundation staff.

## Five Million Texans Are Licensed Drivers

AUSTIN, TEX.—The population of Texas is over 10 million persons. Approximately one-half of this number are licensed drivers. So, the Texas Safety Association says, remember, you are not the only driver on the road. Drive the best you can and respect the rights of other drivers.

Americans use a million matches every 5 minutes of the 24-hour day.

Husbands who come home late for meals often get scraps instead.

Fainting is due to a temporary deficiency of blood flow to the brain and usually is not an indication of organic disorder.

Common sense and personality will get a person much farther down the road than beauty.

In 30 years, THIS will be the "Good Old Days."

A feature of growing popularity is the display of the latest in farm equipment put on by 67 business firms last year. Guests touring the farm will find at this display where free cold drinks will be available.

The evening program will include a free barbecue and a program featuring an outstanding nationally known speaker in entertainment and a drawing for prizes from the

Riverside Church, New York City, as the world's largest carillon—70 bells.

California now has 33 times its 1847 population.

registration cards. Dr. Earl H. Collister, Executive Vice-President, says he anticipates a large crowd beyond the 6,500 attending the Field Day last year.

## Dress Review Pictures Ruined

We take pictures of many different kinds of activities in the counties and are always looking for good picture prospects. However, we seemed to be jinxed when it comes to 4-H dress reviews.

This is the second year in succession we have missed pictures of the winners.

Last year we arrived at the event too late to get the picture. This year, one switch turned the wrong way on the camera and we have beautiful clear film where the winners and runners-up should be.

July 1, 1847—The first U. S. Postage stamps were issued by the Post Office Department in New York City. The issue consisted of two stamps: a 5¢ red-brown stamp depicting Benjamin Franklin and a 10¢ black stamp bearing the likeness of George Washington.

July 4, 1776—The Declaration of Independence was signed first by John Hancock of Massachusetts, President of the Continental Congress, and then by Charles Thomson, secretary in Philadelphia, Pa.

July 8, 1835—The Liberty Bell cracked as it tolled for the funeral of Chief Justice Marshall.

July 16, 1945—The first atom bomb was exploded in a test at Alamogordo Air Base.

July 21, 1773—The first Doctor of Laws honorary degree by Harvard College was awarded to John Winthrop.

### Oakes Attends Convention

Mr. and Mrs. Jack Oakes and children, Pam, Teresa, Dave and Jan returned home on Wednesday from a 3 weeks vacation trip. The first week was spent at El Paso where Jack attended a C. P. A. convention.

The last two weeks were spent in California where they visited his brother and family, George Oakes of Los Angeles and with his mother, Mrs. Oakes, and her sister in Pacific Grove. The family also enjoyed many side trips, including Disneyland and Marineland.

Mr. and Mrs. Rupert Moore of Seagraves were Saturday

guests of Wesley and Beth Daniel and family, Dana Daniel who had spent the weekend with the Moores returned home with them.

Mike and Marty Garnett and son Jon Slade spent the holiday weekend with his parents, Mr. and Mrs. Wesley Garnett.

Holiday weekend guests of Mr. and Mrs. V. M. Bradley and Mrs. Zula Gilliam of Abilene were Mr. and Mrs. Billy Haden and boys and Mr. and Mrs. N. W. Cayton.

### School Prayers

One should never read a headline in a newspaper without reading the rest of the story. But, neither should a newspaper allow a headline to stray too far from the intent of the story.

At any rate, a combination of these plus the ramblings of misinformed and misguided radio commentators has resulted in the mass misconception of the Supreme Court's ruling two years ago on prayer in public schools.

At the time the decision was announced, we well recall the headlines on the metropolitan papers. One reported: "School Prayer Struck Down!" And another read, "Court Bans Classroom Prayer."

Both these and other similar heads were essentially truthful, but their impact overshadowed the resulting stories which related exactly what the court had ruled on. However, even some of the stories were slanted away from the truth--not as a result of prejudice so much as ignorance.

The result was, and is, that many Americans believe until this day that school students are prohibited from saying their own prayers in public schools. From what they've read and heard from the mass media, many of us think that prayer has been outlawed.

Nothing of the kind has taken place!

What the Supreme Court ruled was that: the school, or state if you will, cannot ask or force students to say any PARTICULAR prayer as a part of the everyday curriculum.

That's it. And it adds up to the fact that those schools which did have a short, simple prayer every day or at regular intervals could no longer do so.

This in itself sounds bad until fully explained, for the prayer in question before the high court was simple, direct, and to most of us just right for students.

BUT, the real question was the true and full separation of church and state. And the Supreme Court did exactly what it should have done in ruling that they be kept separate!

For example: you will recall that when the late President Kennedy was running for office, many felt that his Catholic religion was reason enough to keep him from the Presidency. Many felt the strong pull of rigorous Catholicism with him might endanger our separation of church and state in this country.

As it turned out, of course, President Kennedy did everything possible to keep his religion far, far away from his presidential duties. BUT, had he been a tyrant or the kind of person so inclined to impose his religion on us, he would have been prevented from doing so in our schools by this very ruling of the Supreme Court!

In other words, had he--by some stretch of the imagination--desired a Catholic prayer be said in public schools, this ruling would have dashed that desire.

It is ironic that this late and great president is the one so often wrongly blamed with the Court's school prayer ruling, when in reality he should have been the one blessed because of it. God is not a dirty word in our schools. And prayer has not been banned. But the proposition that anyone--state, federal or anybody else--can tell us what to pray has been ruled unconstitutional.

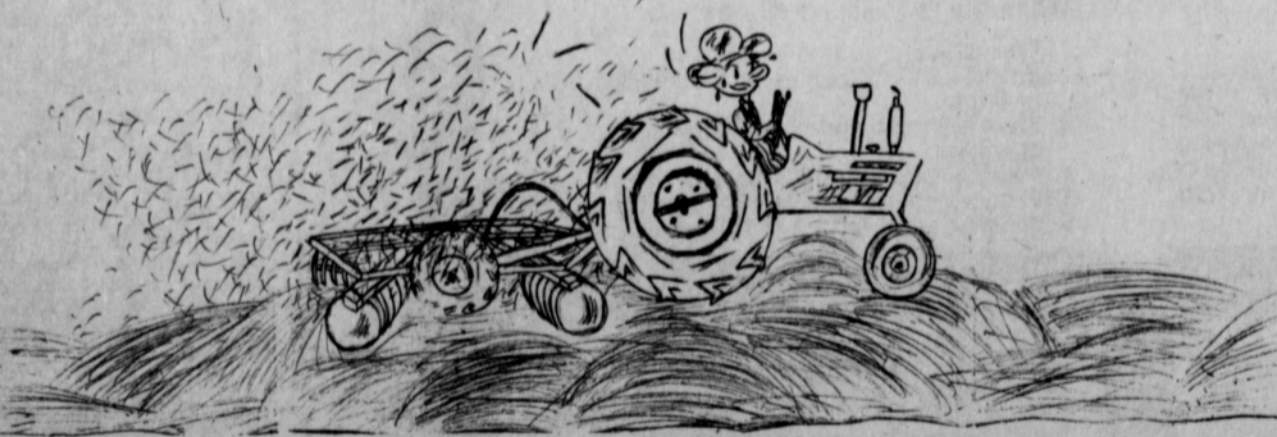

The court actually upheld the long-standing principle of religious freedom, which was, after all, one of the reasons this country was founded in the first place.

It is a commentary on our growing population and expanding educational values that the decision had to be made at all. It is a sadder commentary on man's communicable capabilities that the decision was not better explained in the beginning.

Instead of mimicry and ridicule, this was one decision by the Supreme Court that should have been greeted with cheers from us all.

The Free Press Diboll----Paul Durham

# -EASY AND PRACTICAL- URAN AND WHEAT STUBBLE Working Hard To Hide Your Straw

Information from the Congressional record March 23, 1964 stated wheat straw rather than legumes is the most valuable crop to improve the land. All the straw need is 30# of nitrogen from Golden Uran per ton of straw.

### TO FIGURE STRAW YIELDS...

-take 3700 pounds and add 80 pounds of straw per bushel of grain produced.

Add 'enuf' Golden Uran to properly convert the straw to useable organic matter.

**Arcadian**

**WE CAN TURN MANY ACRES PER HOUR OF THIS  
RESIDUE INTO LIVING ORGANIC MATTER!**

As the Congressional record states, the straw from a wheat crop is as valuable as the income from the grain itself. Come by now to discuss this further.
