USDA requests comments on 1984 wheat program

WASHINGTON.--Deputy Secretary of Agriculture Richard E. Lyng today asked for public comment on possible provisions of the 1984 wheat program. The deadline for comment is June 6. Although the statutory deadline for announcing the 1984 wheat program is Aug. 15, Lyng said he plans to give details well in advance of that date to allow farmers additional time to make program decisions. Lyng said he will study the public's recommendations and the most current data on U.S. and world crop conditions, supply and demand before he makes final decisions. Comments are requested on:

- the loan and purchase prices, the target price and national program acreage.
- whether USDA should

- establish an acreage reduction or a set-aside program and, if so, the percentage of acreage adjustment.
- whether there should be a payment-in-kind program and, if so, the provisions of the program.
- whether USDA should establish a voluntary acreage reduction and, if so, the level of such a reduction.
- provisions governing allowance of haying, grazing and conservation usage of set-aside acreage.
- a land diversion program and payment for land diversion.
- offsetting compliance requirements for an acreage reduction program.
- methods for determining 1984 crop acreage bases for wheat.

Lyng also asked for comments on provisions for a

farmer-owned reserve, commodity eligibility, premium discounts, the establishment of county rates and all other provisions necessary to carry out a loan and purchase program for wheat. Comments should be sent to the director, analysis division, USDA-ASCS, room 3741-S, P.O. Box 2415, Washington, D.C., 20013. Comments will be available for public inspection in that room during regular business hours.

Armadillo Jockies Needed

Attention all potential Armadillo Jockies. The Spearman's first Mechanical Armadillo Race will be Saturday, May 28, at 2:30 p.m. during the Hansford Roundup. This shy, sluggish, armored creature (The Armadillo) is a full-fledged symbol of the Lone Star State. The mechanical Armadillo is the property of Sam Reeves of

Reeves of the Southwest in Burleson, Texas. Mr. Reeves will bring four mechanical armadillos, starting gates, stopping gates, computer timer device, video monitor and a P.A. system. This is a lot of fun and if you are interested in riding an armadillo and/or sponsoring a team contact the Chamber of Commerce office, 211 Main.

Franks named Administrative Assistant

Gaines Franks, a veteran of more than thirty years of service to Panhandle area agriculture, has been named Administrative Assistant of Amarillo Production Credit Association.

Franks, who served as Oldham County Extension Agent for ten years and Potter County Agent for twenty years before retiring in January, 1982, will be working with farmers, ranchers, and agribusiness people throughout the Association's twelve county territory.

James VanPelt, President of Amarillo Production Credit Association, said in making the announcement, that the addition of Franks to the staff would be very beneficial to the lending institution in serving the credit needs of the Panhandle agricultural community.

"Gaines has as much experience in working with area farmers and ranchers as anyone in the region," said VanPelt. "For that reason, we believe he will serve as an outstanding liaison between

the Amarillo Production Credit Association and the area agriculture."

Amarillo Production Credit Association serves a twelve county area comprised of Potter, Randall, Deaf Smith, Carson, Armstrong, Hutchinson, Hansford, Sherman, Moore, Oldham, Hartley and Dallam Counties.

Give your crop a head start to higher yields.

Broadleaf weeds are tough on your sorghum crop. They compete for moisture and nutrients, and can slow down sorghum development. Cut into your final yield and your profit.

With an early application of Banvel[®] herbicide... when sorghum is in the 2- to 5-leaf stage... you knock out dozens of broadleaf weeds when they're most easily controlled—as seedlings.

Banvel herbicide controls many of your toughest broadleaf weed problems in sorghum: field bindweed seedlings... pigweed... kochia and many other difficult to control broadleaf weeds. Banvel also reduces competition from established field bindweed problems.

Banvel herbicide penetrates weed leaves. Is absorbed by the roots. Moves throughout the plant for better control of even those weeds 2,4-D leaves behind. Plus, Banvel herbicide is easy on your crop. And, it won't carryover.

For higher sorghum yields and better weed control, ask your ag chem dealer for Banvel herbicide.

Understanding Your Body

Ulcers - Bland Diet Theory Disproved

Surprising to many Americans is that a bland diet of small, frequent meals and lots of milk and cream aren't the best treatment for ulcers. That theory has been disproved by research showing that patients with normal diets healed as well or faster.

Actually, it's been found that frequent eating stimulates acid secretion leading eventually to an overall increase in gastric acidity. Milk tends to stimulate acid production in the stomach and is not recommended in large quantities for ulcer patients.

This information comes from Smith Kline & French Laboratories, discoverers of the prescription drug "Tagamet".

The protein in milk has been found to increase acid production in the stomach.

Stacey Cook, daughter of Mr. and Mrs. Ron Cook of Spearman, was crowned Miss Rodeo Texas Tech 1983 on Tuesday, May 3. Stacey will be a junior this fall at Texas Tech University. The Housing and Interiors major will reign over Tech rodeo events and will compete for the state and national rodeo crowns. Competition consisted of interview, modeling and horsemanship.

The first American actor known to appear abroad was James Henry Hackett, who made his debut in April, 1827, at Covent Garden in London.

Among the many things that have been manufactured to coddle the owners of pets are a pair of doggie sunglasses - also doggie pajamas.

Cattle were brought to the New-World by Christopher Columbus on his second voyage.

The now-extinct ancestor of the horse, *echippus*, had a short neck and stood no higher than a medium-sized dog.

Safety experts agree that the use of seat belts dramatically reduces the risk of injury or death.

According to the National Highway Traffic Safety Administration, about 50 percent of all people who die in passenger cars, light trucks or vans--35,000 could have been saved if they had been wearing safety belts.

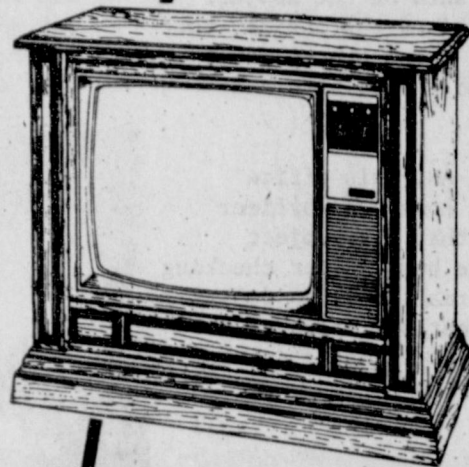

A safety belt prevents vehicle occupants from colliding with each other.

Safety belts help occupants in five ways:

1. There is the "ride down" benefit, in which the belt begins to stop the wearer as the car is stopping.
2. The belt keeps the head and face of the wearer from striking such objects as the steering wheel, windshield, interior post or dashboard.
3. The belt spreads the stopping force widely across the body.
4. Belts prevent vehicle occupants from colliding with each other.
5. Belts help the driver maintain vehicle control, thus decreasing the possibility of a second collision.

It's important to remember that wearing a belt gives you twice as good a chance of living through a crash as if you wore no belt at all. Using a lap/shoulder belt combination makes your chances of survival three to four times better than they are if you drive beltless.

"Time is precious, but truth is more precious than time."

POLICE REPORT
May 13, 1983

D. J. Alberts,
Chief of Police

On Tuesday, May 3, 1983, this office received a telephone call from a Spearman resident advising that there was a prowler inside the house across the street from her residence. Officers were dispatched and arrived and searched the house and area for the prowler, but were unable to locate anyone. The owner of the house advised the officers that he could not find anything missing.

On Tuesday, May 3, 1983, this office received a telephone call requesting an officer to investigate trespass of a resident's property. The officer was advised that someone had torn down a fence and pulled a trailer through his yard, without his permission and would like to press charges. The officer then spoke with the individual that moved the trailer and was advised that the trailer was moved, and that attempts had been made to obtain permission to come across the yard, but was unable to make contact with the complainant. The officer was advised that repairs would be made to the fence on arrangements with the complainant.

On Friday, May 6, 1983, while on routine patrol an officer stopped a subject at approximately 1:00 AM and had the dispatcher check with the computer files to see if there were any warrants on the subject. In checking with the computer, the dispatcher advised the officer that the subject was wanted in Oklahoma for False and Bogus Checks (felony). The subject was arrested and arraigned and waived extradition and was picked up by Oklahoma authorities.

On Saturday, May 7, 1983, at approximately 10:05 AM, this office received a report of a juvenile missing from his home. An officer was dispatched to the residence and was advised that the subject was to have returned on a bus, but was not on the bus. After checking with the bus terminal in Spearman to obtain information as to departure and arrival times the officer sent a telecommunications message to Amarillo to check their bus terminal for the subject. Later in the day contact was made with the juvenile.
