People Will Talk.

Yes, people will talk,
The saying is true—
They talk about me—
And they talk about you.

If we go to the opera,
Some one will say,
We should go to church
And learn how to pray.

If we go to church
And offer our prayers,
They say we are hypocrites,
And putting on airs.

If we are rich,
They call us a thief,
Scoff at our sorrows
And laugh at our grief.

If we are poor,
They say we shirk,
We're always lazy,
And never would work.

They talk about our prospects,
They talk of our past,
And if we are happy,
They say it can't last.

They talk of our loved ones,
They talk of our foes,
They of our follies,
They talk of our woes.

They talk of our joys,
They talk of our fears,
They talk of our smiles,
They talk of our tears.

They talk if we are single,
They talk if we are wed,
They talk of us living,
They talk of us dead.

Tho' we live like an angel,
With circumspect walk,
Our efforts are useless,
For people will talk.

DISTINGUISHED VISITOR.

Last Tuesday word came to the News office that Land Commissioner Terrell was in town, so we put on a clean collar and went straight to the hotel; keeping all the time on the lookout for the distinguished-looking citizen, diked out in plug hat, white shirt, kid gloves, tailor-made suit and patent leather shoes. Just as we started to inquire, a plain man dressed in soft hat, flannel shirt and overalls quietly informed us his name was Terrell and that he lived in Austin and was here looking into the land business.

Mr. Terrell is a man of heavy build, and looked a little young for a man of fifty. We found him to be a very affable gentleman and a man of deep convictions and the moral courage to act on them. It is a pleasure to meet a public man who is still one of the people.

While in town, Mr. Terrell made a public talk, in which he outlined his school land policy and declared himself the friend of the small settler as against the large land owner. He went further and said that those who used force and fraud to get possession of large bodies of school land, were public enemies.

Mr. Terrell was on his way to Lubbock, and from there he will return through Terry county to the railroad at Stanton, he having left it at Big Spring, and come through by double rig. The trip was made to see if the settler was proving up according to law. After a brief stay here, he left for Lubbock.

Speaking Monday Night.

We are authorized to announce to the people of Lynn County that the Hon J. F. Cunningham of Abilene, Texas and candidate for Congress to represent the Sixteenth District will speak at the Court House in Tahoka on Monday night October 30th. It has been a long time since our community has had the honor of entertaining such a well-known public man who easily takes front rank, both as a Democratic orator and a student of public questions. Let every one come and bring their families to the speaking and become that much better qualified for the duties of citizenship, and also hear a fine speech.

D. N. Arnet, manager of the Spades outfit, came in from the plains ranch the first of the week and will remain in town several days attending to matters of business. He recently shipped several

is in many respects similar to a railway engine. Let an engine be run without oil or cleaning and before long it will stop dead. Upon examination it will be found that the friction and wear and tear has ruined the machinery, it is fit only for the old iron heap. Likewise your watch: you put it in your pocket and while there is a kick in it, you, in your mistaken economy, do not consult the watchmaker and consequently rob your watch of years of good service and also much of its former accuracy. The time keeping qualities of a good watch are maintained and often improved by timely and skilful attention. If you want your watch to be true to you, you must be true to your watch.

I am thoroughly equipped with up-to-date tools and a knowledge of clocks and watches, and would appreciate the patronage of the good people of Lynn County. Just leave the timepiece or other repairs in the jewelry line at the Tahoka Drug Store where it will be sent directly to me.

Application has been made for entrance in the postoffice as second class matter.

Mr. D. M. Glass, who lives 18 miles southeast of Tahoka, has the lumber on the ground for the erection of a stor building, and he also has one load of goods. Mr. Glass is also trying to have a post office established at his place. This is a good move, as these country stores are a great convenience to the farmers, and help to keep Lynn County money in Lynn County where it belongs. They are also a benefit to the county seat as they compete more with the railroad towns than with Tahoka. A farmer does considerable trading at his neighborhood store, and when he wants a larger stock to select from, than the country store keeper can afford to handle, he has hardly enough to go to the railroad for, so he comes to the county seat and gets what he wants.

Whenever a trade is made, somebody makes something, and it is better that a Lynn County man should make it than an outsider. To build up Tahoka and Lynn County we must trade at home as much as possible.

Every country post office should have a school house, church, a store or two and a blacksmith shop. There should be a post office and store, near the county line, on every public road in Lynn county. They would not hurt Tahoka, and they would draw trade from neighboring counties.

Build up Lynn County. Talk up Lynn County. Write up Lynn County. And **TRADE AT HOME.**

These lots are each 100x180 feet and will make him a nice home in a growing town in one of the banner counties of the great plains.

Benefits of Newspapers.

Speaking of what a newspaper does for a community, United States Senator David Davis, of Illinois, made an address that remains ever green in the memories of newspaper men. He said: "Every year every local newspaper gives from 500 to 5000 lines of advertising matter for the community in which it is located. No other agency can or will do this. The editor in proportion to his means does more for his own town than any other man. He ought to be supported, not because you happen to like or admire his writing, but because a local paper is the best investment a community can make. It may not be crowded with great thought, but financially it is of more benefit than both preacher and teacher. Today editors do more for less pay than any men on earth. Patronize your home paper, not as charity, but as an investment."—Big Spring Herald.

"Where did you get this calico?" "At Conway's." "What did you pay?" "6 cents." "Why I paid 7 cents for mine."

Mr. Coffee sold to Louis and Edward Swift of Chicago and he will have to vacate it in 60 days. We understand this 16,000 acre tract was sold at \$3.50 per acre. The new owners will stock the ranch with grade beef cattle. They are finding it very profitable to do their feeding on West Texas ranches.—Big Spring Herald.

HIS PATENT CURES

MEDICINES ARE PUT ON SAME BASIS AS LIQUOR.

Internal Revenue Department Declares Manufacturers Must Pay Rectifier's License—Druggists to Pay a Saloon Tax.

Washington.—Manufacturers of patent medicines which contain distilled liquors have been put upon the same plane as rectifiers and liquor dealers by druggists who handle these patent medicines are put in the saloonkeepers category, and as such must take out the regular liquor dealers' license.

The commissioner of internal revenue has given a decision here which brought about this new status of the patent medicine maker and seller. By doing so he reversed the decision of his department made many years ago.

The new ruling will not become operative until December 1. This is done to prevent an injustice.

The commissioner, in a letter of instruction to collectors of internal revenue, says that there are many compounds on the market going under the names of medicines that are composed chiefly of distilled spirits, without the addition of drugs or medicines in sufficient quantities to change materially the character of the whisky.

He authorizes collectors to impose the special tax upon manufacturers of every compound composed of distilled spirits, even though drugs are declared to have been added thereto. "When their presence is not discoverable by chemical analysis or it is found that the quantity of drugs in the preparation is so small as to have no appreciable effect on the liquor."

"The same ruling," declares the commissioner, "applies to every alcoholic compound labeled as a remedy for disease and containing, in addition to distilled spirits, only substances or ingredients which, however large their quantity, are not of a character to impart any medicinal quality to the compound."

Collectors are instructed to send out notices to all druggists and merchants dealing in proprietary medicines, that after December 1 they will be required to pay the special tax as liquor dealers.

While no statement is made by the commissioner as to the medicines that will be affected, it is believed that the decision reaches several prominent and highly advertised medicines. In all instances these medicines have been found to contain as high as 45 per cent. of alcohol, and there are many on the market, it is said, that contain 15 per cent. of alcohol.

These medicines are said to have immense sales in prohibition communities, figures collected in Massachusetts recently showing that one such advertised compound with a high percentage of whisky had been bought to the extent of 409,000 bottles in one year in prohibition communities of one New England state.

PHONE ROUND EARTH

IOWA ELECTRICIANS INVENT NEW WIRE SYSTEM.

Sioux City Men Claim to Have Originated Device Which Will Make All the People Each Other's Neighbors.

Sioux City, Ia.—Two Sioux City electricians, M. L. Garrett and E. W. Preston, claim to have found a way to talk around the world.

By the use of an invention just patented by them it will apparently be as easy for Americans to converse with their neighbors in Europe as it has been to talk ten blocks across the city.

Only girdle the world with wire, these men declare, and they will make it possible for the Swiss maiden in her Alpine home to flirt in the morning with young men on Florida plantations. Only bisect the two American continents with copper wire, they declare, and it will be mere child's play for the lowan to order cattle from Patagonia over the telephone.

And it is true that the instrument is quite simple. Loosely speaking, it might be said that it consists of a telephone receiver put to the mouth of a telephone transmitter. In other words, that it brings the ear-piece of the ordinary telephone up to a mouthpiece that the earpiece may talk into the mouthpiece and sent on the sound.

Garrett and Preston solved the problem by putting together what are really two separate telephones. The central piece is a Eureka transmitter, such as is used by many telephones to-day. This is simply the diaphragm, or disk, seen in any mouthpiece, the vibrations of which are sent over the wire.

Back of this disk are placed two electro-magnets. These electro-magnets are similar to those used in telephone receivers so, roughly speaking, it might be said that two receivers are put against the disk. The sound from one direction comes over one of these electro-magnets, or receivers, is communicated directly to the disk, which vibrates just as the disk in the original instrument, and the sound is sent on just as it came from the original instrument, 200 miles away. Sound from the other direction passes over the other electro-magnet and to the disk, and goes on its way in the opposite direction, and thus people at opposite ends of the wire can converse with one another.

Heretofore only one receiver magnet has been used in devices of this kind and this is why it has never before been possible to talk but one way. The manner in which the two currents are kept separate is not explained by the inventors, who are not making public some of the details of their instrument.

Washington Rich at 27.

Recent examination of the records of Fairfax county, Virginia, show that George Washington owned 50,000 acres of land when 27 years old, and at the fall slaughtering in 1786 the Washington family killed 150 hogs for use. The examination also set out the fact that in 1787 the father of his country sowed 580 acres of grass, 400 acres in oats, 700 acres in wheat and 700 acres in other grains. He owned 140 horses, 112 cows, 500 sheep, and had 250 negroes on the plantation.

HAS RIGHT TO GET DRUNK

Butte Judge Decides Once in Thirty Days Is Proper Average for a Man.

Butte, Mont.—"Any man who pays his liquor bill and is not too boisterous is entitled to get drunk once a month," said Police Judge Warren in acquitting Luther Wilson, charged with being a periodical drunkard. The prosecuting attorney cited the fact that Wilson had been a regular offender during the past year, and asked that he be given a jail sentence.

The prisoner argued that he had never been arrested twice in the same month, and expressed the opinion that any man was entitled to a "quiet jag" once a month. The point was well taken by Judge Warren, who said: "I am of the opinion any man who does not create a disturbance or make a nuisance of himself is entitled to get drunk once each 30 days if he cares to. You may go, Wilson, but don't let your jag dates conflict, for if you are arrested twice in the same month you will be punished. Take my advice and stick to the water wagon until after the Fourth of July."

BECOMES BALD IN A WEEK

Young Man Loses His Hair in Remarkable Way and the Doctors Are Puzzled.

Connersville, Ind.—Clarence Maple was arrested for alleged assault. Maple is a married man and has a family. Since his incarceration in jail he has lost his hair and now is as bald as the average man of 70 years, the only semblance of hair on his head being a small growth near the front. When placed in jail Maple possessed a heavy head of hair.

Instances have been known of a person's hair turning suddenly white when suffering from fright or grief, but the present instance is believed to be the first on record of the kind. A physician whose attention was called to the matter could not account for it, but said it was of great interest to medical science.

HISTORIC PAINTING FOUND.

Supposed Long-Lost "Last Supper" Is Located in New York in Deposit Vault.

New York.—In a vault at the Lincoln Safe Deposit company, in Forty-second street, is a very old painting with a romantic history. It is believed by those who own it to be an unfinished work by Raphael.

The picture is alleged to be the long-lost "Last Supper," which was stolen or disappeared during the Spanish pillage of Rome in 1527. That there was such a picture, and that it was an unfinished work, art histories show. It is also a matter of history that it disappeared at the time mentioned.

One hundred and fifty years ago the picture, now in the Lincoln vaults, is alleged to have been in the possession of an old Spanish sailor, who lived in a hotel near New Orleans. He kept it locked in a tool chest, and would never show it, not even to his family. He is supposed to have got it either by theft or by purchase in Spain.

It is now in the possession of Samuel O. Trudell, who will take it to Europe to be passed upon.

WINS FIGHT OF 17 YEARS.

Stubborn Man Finally Gains His Point and Closes Toll Road—Conflict of Long Standing.

Lancaster, Pa.—For 17 years Columbus O. Rate, residing near the city limits, has fought unaided the Big Spring & Beaver Valley Turnpike company, whose road passed his property, and which, he maintained, was a public nuisance. His victory has finally been won, the court having just ordered the turnpike condemned.

As far back as 1888 Rate first began condemnation proceedings against the company. The latter resisted, and a suit resulted, which Rate won; but the decision was reversed by the supreme court. Rate then refused to pay toll, and threatened to tear down the gate house, thereby inviting another suit to test his allegation that the turnpike was a nuisance and an unnecessary public infliction.

Again he was prosecuted, and won the suit in the lower court, only to be again reversed. Still unrelenting in his determination to close the toll gate, Rate, with the assistance of his neighbors began an agitation for the extension of South Duke street. It was finally opened to a point beyond the company's tollhouse, enabling travelers to get into and out of the city without paying toll.

This was a practical victory for Rate, for the company's business was in the almost completely destroyed. The road was soon in a deplorable condition, owing to lack of repairs, and then Rate again took steps to have it condemned and the toll gate removed.

These have at last been successful, and the turnpike is now a free public highway. Nearly the entire length of the turnpike was within the city limits.
