Payment of Bank Loans Sounds Optimistic Note

"PHANTOM" cotton crop produced in Motley county during 1954 deserves a niche in the history of unusual events. It was an exceedingly profitable crop which the farmers who planted and worked the cotton land "did not expect" until the harvest was almost half completed.

Polio Drive Continues Active In Communities

Continued activity of the polio fund drive in all communities of the county is gratifying to Mrs. Rose Turner of Roaring Springs, fund chairman. In a letter to the Tribune, Mrs. Turner said:

Time fingers the controls of stiny with deft fingers and a passes like the changing of projected picture.

Nothing remains of the past except unrelated scenes from memory's film. Broken carbons that once red with young dreams. The tender has branded many a verick year since I last found lost wagon endgate on winding prairie roads, or a bright reeboo.

day night, maybe you saw the snowmen on the backs of the cars. They were "real gone", the latest thing.
 The snow also helped in having fun at school. Bright and early Monday morning, one or two M. H. S. students were getting rolled in the snow, or getting snow dabbed in their face and hair, but, of course, everyone enjoyed it. We do not have a nice snow like that very often, and especially one so big.
 All in all, everyone enjoyed it very much, the fun and scenery, as well as the moisture it brought us.

From where I sit ... by Joe Marsh

A Pretty "Snappy" Menu
 Cuff Taylor had a near riot in his hen yard last week. Seems the hens were scratching around the cold ground when they found a piece of rubber band frozen in the ice.
 "One hen pecked at it," says Cuff, "and it snapped right back. She backed off clucking while another hen tried it, and another. And the 'worm' kept right on snapping back. They all got their feathers ruffled. You never heard such a ruckus!"
 "I finally had to break up the ice with an ax before those hens would get back to business and start laying eggs again."
 From where I sit, some people raise a pretty big fuss over nothing, too. Take the fellow who would deny me a temperate glass of beer with my game of checkers. Maybe he'd rather have coffee! Well, that's all right. He has a right to his own preference. But so do I. And there's no point in his "snapping" at me just because his choice isn't the same as mine.

Everybody loves a bargain...

... and the biggest bargain in your budget today is your electric service. The fact is that West Texas families get almost twice as much electricity per dollar today as they did twenty years ago. For mere pennies a day electric service helps you live better, feel better, play better, work better. Just a few examples:
 For about a nickel you can refrigerate all your food for a whole week end. Hot water is always on tap for just a few pennies' worth of electric service. Television is enjoyed by one and all for just a few cents of electric power a day. Everything comes out clean in the family wash for just pennies of electric service.
 And all this low-cost electric service is right at your finger tip... around the clock. Usually bargains don't come this easy, or this big. No wonder everybody loves this bargain... ELECTRIC SERVICE.

America's Most Successful Homemaker

Ivy Baker Priest, Treasurer of the United States and one of the judges, presents the "Most Successful Homemaker of 1954" award to Mrs. Hubert G. Olson, Bloomington, Minnesota. Mr. Olson, who nominated her in the nation-wide contest conducted by community newspapers, has good reason for smiles.

CHICAGO, ILL.—Proclaimed America's Most Successful Homemaker of 1954, Mrs. Hubert G. Olson, 50, of Bloomington, Minnesota, received honor and a \$2500 cash award before a throng of national leaders of women's and civic activities here recently. She was chosen from among thousands of entries by a panel of nationally known judges, and brought to Chicago for the presentation.

Quoting Mrs. Ivy Baker Priest, keynote speaker at the Ceremonial Luncheon:

"The homemakers of America will lead the way to peace and blessing for all the world. The American homemaker is the unsung heroine of the most important part of our way of life."

Numerous messages of recognition to homemakers were sent in. Bishop Fulton J. Sheen wired:

"Wishing you every blessing and assuring you of my prayers."

J. Edgar Hoover, director of the FBI:

"It gives me great pleasure to extend my personal congratulations to the Most Successful Homemaker of 1954."

The Rt. Rev. Magr. Nicholas H. Wegner, Boys' Town, wrote:

"To this good woman I convey the heartfelt felicitation from 900 homeless boys . . . Without a good family life, no nation can long endure."

The atmosphere of sincerity and emotional depth, which prevailed throughout the audience should inspire all homemakers throughout the land, and encourage them to recognize their vocation as the greatest of all professions.

Pied Pinions

BY MR. S. M.

"Middle age is that time in a woman's life when her girlish figure has changed to a girlish figure." (Dan Bennett in Quote)

How can one feel too ancient when one receives a card which says, Happy Birthday, you "charmer" you! and especially when the sender is younger than one; handsome, and male?????

And when one receives a lovely gift from a 12-year-old with this notation: "Happy birthday—to my twin"

And one's horoscope (in a mail-order catalog) declares, "If you were born under capricorn your head will rule your heart; you're ambitious, aggressive and brainy . . . What's furthermore, you're smart! You're big-hearted, benevolent, loyal with patience your greatest virtue—So if you're not an armchair shopper . . . We'd sure like to convert you!"

Lucky Months: March and November; lucky day: Saturday. And this footnote: You should select a mate born under Cancer or Virgo. Which possibly explains a lot of things, since Mr. M. is Taurus and should have married one born under Scorpio or Virgo, and it appears the only thing we have in common is the fact that we should have both married a Virgo.

Life then can be, if not exactly beautiful, at least not too revolting.

Our celebration was more or less progressive, with lunch at the Marvin Pattons and afternoon tea at the Algie Groveses, with gifts at both stops, not to mention other remembrances

and cards for the occasion, from other friends.

We were sorry we didn't make Janie's and Carolyn's birthday celebration, and appreciate being included in the invitations to the party, since it is Janie with whom we share our birthday, and who so generously claimed us as her "twin". We hear that everybody had fun at the party.

We are ready to concede defeat and admit that our nieces are smarter than we are. Donna, 7, can read words and sentences to us, and doesn't even know one letter from another. The same as all the other little beginners; but we still haven't figured out how they do it.

And, although we never have

been much of a musician, when we were "taking" music, the notes were printed there on the staff in black and white, so Nola 12, really had us stumped when she showed us her latest instructional book, in which the notes of the F clef were indicated by letters, representing accompanying chords to be played with the left hand.

It's the little things in life that make one feel really old.

Modern Living Is Cause Of Bursitis

AUSTIN, Jan. 20—"A hundred years ago nobody worried about bursitis because nobody had it," said Dr. Henry A. Holle, State Health Officer. It wasn't until about forty years ago that there was enough of it around for it to be given a name. Today an estimated two and a half million Americans suffer from the hurting joints caused by bursitis.

The reason for the big increase seems to be found in modern living. So many of the things people do—typing, working adding machines, driving, handling compressed-air tools, exercising strenuously on week-ends—are the very things that can cause attacks of bursitis. Too, people live longer nowadays and bursitis most often attacks after forty when age weakens tendons.

Between the moving parts of muscles, tendons and bones there are cushions—tiny, flat sacs filled with an oily substance. These are the bursae. As the parts move, the two inside surfaces of the sacs glide against each other providing satin-smooth action.

The body has more than 140 of these little sacs. Most important is the subtendinous bursae in the shoulder, which helps the major shoulder muscle operate.

It is the most important because the human shoulder wasn't designed for the work it now has to do. The result is that though bursitis can occur in any of the 140 bursae and often does affect elbows, hips, ankles and joints, 80 per cent of the time it is in the shoulder.

If an attack of bursitis occurs, a physician should be consulted. He can control bursitis but he can't control the results of neglect. Curing bursitis takes time and patience.

AUSTIN—A CIO blast at Governor Allan Shivers and Attorney General John Ben Shepperd has been answered by the latter.

Shepperd said "certain fanatics in CIO have never yet admitted that they made a mistake in bringing the Communist DPOWA into Port Arthur in 1953."

At a CIO convention here, John V. Riffe, executive vice president of the national CIO, called for an immediate settlement of the Port Arthur strike.

He sent a telegram to 11 Port Arthur businessmen asking for a "peace conference."

Port Arthur people declined to meet with the CIO.

Riffe said he hoped to find an end to the long dispute while he was in Texas. At the same time he asked Shepperd "to use his good influence" to bring about a settlement.

Shepperd stated that he and Governor Shivers were willing to meet anywhere at any time with labor and management representatives to seek a settlement of the strike.

Meanwhile the CIO set aside \$200,000 to finance continuation of the 13-month-old labor dispute.

Land Board
A decision on what to do about \$1,187,758 of South Texas land deals said to be fraudulent was delayed by the State Veterans Land Board.

Three South Texas land companies had offered to assume liability on that amount of land transactions which the firms promoted during the last four years.

Attorney General John Ben Shepperd, who said the land sales showed evidence of fraudulent misrepresentation, told the Land Board that acceptance of the offer would violate the State Constitution.

The Board agreed to a one-week investigation period before announcing its decision.

Mental, TB Patients
An increase of 1,100 beds for Texas TB patients and better treatment of mental cases has been urged by Gov. Shivers.

Two other steps advocated to a state hospital advisory committee by Shivers included:

1. Making provisions for at least 50 beds for children under six suffering from tuberculosis.

2. Abolishing procedure of trial jury to determine a person's sanity, with admission to a settlement.

Tribune, Matador, Motley County, Texas, Thursday, January 20, 1955

mental hospitals based instead on medical examination.

Turnpike Funds
Texas Turnpike Authority members have authorized the issuance of \$58,500,000 in revenue bonds to finance the Dallas-Fort Worth toll road.

Members voted to make an offer to the Republic National Bank of Dallas to be one of the three trustees for the bonds.

After approval by the Attorney General, the bond issue is expected to undergo a Texas Supreme Court test to determine its legal validity.

Oil Money
Financial problems facing the Texas legislature have been slightly eased by oil production boosts.

A 257,307 barrel increase permitted for January in oil allowances brings to about 400,000 barrels the total boosts allowed since October.

As a result, state tax revenue will be \$1,500,000 a month higher.

Oil Outlook
Prospects have never been brighter for the state's oil industry than in 1955, says Railroad Commission Chairman Ernest O. Thompson.

Thompson said that heavy demands for gasoline and distillate fuels were responsible for the optimistic outlook.

Marriage Ban
Abolishment of Common Law marriages in Texas has been asked by a State Bar committee meeting in Austin.

Judges on the executive committee of the Bar's judicial section said the law would reduce the problem of illegitimacy and would help save welfare funds.

Insane People
"Not all the insane people are in the asylums" says Mrs. Richard Bergen, coordinator of volunteer activities for the Austin State Hospital.

As proof, Mrs. Bergen submits evidence of some of the gifts sent mental patients for Christmas. They include unwashed underclothing, dirty neckties, ripped dresses, shattered plaster plaques, cigar butts, used facial tissue, worn-out gloves that don't match, soles shoes covered with paint, lots and lots of junk costume jewelry and some lewd articles... all of which came wrapped as Christmas gifts.

More than one-third of the 6,000 gifts sent the patients were of this nature.

Austin police are "searching" for a redheaded woman with a birthmark on her left hip.

COLD FRONT APPROACHING NORTH PANHANDLE AREA

An occluded front is approaching the Amarillo area and should arrive tonight and bring colder temperatures. Weathermen said the occlusion

itself would make little difference in the weather, but the low pressure trough in the upper air which is accompanying the front will bring in the cold.

Some showers are expected with the passage of the front, but the weathermen said they

would probably be limited to the mountainous region west of the Pecos Valley.

Three Stations To Rotate Service On Alternate Service

Three Matador service stations have announced a plan for one of the trio to remain open on alternate Sundays and allow the remaining two stations to close.

The plan involves Magnolia Service Station, operated by Loyd Latimer; Phillips '66' Station operated by Howard Edmondson and Williams & Son Station, operated by Buford and Pete Williams.

Magnolia and Phillips credit cards will be honored at any of the stations so that customers may avoid inconvenience. Since the three stations are within a block on US Highway 70, the customer will find it easy to locate the open station for Sunday service.

One of the group declared the plan was arranged to make it possible for owners and employees of the two stations to attend church services and enjoy a day of rest. Because of the lighter gasoline sales on Sunday, one station can easily serve the customers of all three stations. The new plan will go into effect Sunday.

URANIUM FEVER AT SPUR STIRRED ANEW BY ASSAY REPORT

SPUR, January 18 (Special)—Flames of visionary riches were fanned anew here today as a Spur area rancher told residents that an assay report indicated there is "producible" uranium on his mother's land.

Although Herman McArthur stressed that uranium content of the rock assayed was "not high" the word spread like a prairie fire through the city.

"Uranium" echoed through the canyons and arroyos all along the "rim of the Caprock" country. Many people took the word calmly and adopted a "wait and see" attitude; others were ready to find themselves a gieger counter and go huntin' for riches.

Ever since last week, when word first spread that a possible "strike" of uranium had been

made on Mrs. Tom McArthur's ranch 18 miles southwest of here, tongues have been wagging. Rumors—many of them completely unfounded—cropped up on every hand.

Two truckloads of rock were sent from the McArthur ranch to an unidentified New Mexico firm for assaying. The air around Spur was filled with expectancy. Today, Herman McArthur said the report was back.

Although declining to give exact details of the report, he told Spur residents that his family believed it would "be worth our while" to start producing the find.

Content "Not High" He stressed that uranium content of the rock assayed was not high, but that didn't dampen the enthusiasm of the more-excitable Spur residents. McArthur said the family had received a call from Wichita Falls from persons interested in leasing the land, but indicated the family preferred to undertake its own production.

McArthur's report was certain to result in a flurry of prospecting all along the Caprock country. It also could result in an increase of activity by persons trying to sell "uranium stocks."

Along that line, however, the Lubbock Better Business Bureau has warned area residents to "go slow."

"Before buying uranium stocks inquire and get an analysis to the securities," the BBB advised. The organization pointed out that persons making investments are "speculating" until "pay is proved."

The BBB advised consulting brokerage and investment installations or banks before buying any uranium "stocks." Geological consultants have repeatedly warned, also, that even when uranium is found in one spot there is no reason to assume that it exists on nearby land. It is also very possible for gieger counters and scintillators to indicate presence of uranium when, in fact, the amount present is insufficient to make mining practical.

As one person pointed out, some of the 49ers of a century ago and some uranium prospectors on the Colorado Plateau in recent years became rich—but for each of those who found a fortune, dozens failed.

LIONISM CITED . . .

ed. Lion Waller was accompanied here by Lion Jack Payne of the Plainview club.

Visitors introduced at the Tuesday meeting included Commissioner Boone Simpson, of Northfield; Garland Rattan of Canyon and John Quattlebaum of Lubbock.

In a summary of the club's activities Boss Lion Whitworth said the March of Dimes and Community Chest campaigns were progressing in a satisfactory manner. He announced that the Matador club had contributed \$531.50 to the Lions Cripple Children Camp at Kerrville during the past year.

A report by General Chairman Lion Ben Edwards of the Father-Son banquet showed the plans advancing rapidly. A meeting of committees has been called for this afternoon in the Commissioners Court room.
