

# War Board News

A weekly column contributed by members of the Howard county USDA War Board.

## Important Tips On Gardening

1. Look for insects as soon as plants are in sight. An early start is half the fight.
2. The equipment for applying poisons is usually as important as the poison itself.
3. Either a plunger, rotary, or bellows-type duster is satisfactory if it has a long delivery tube.
4. Many kinds of sprayers are suitable. The smallest suitable for garden use is the compressed-air sprayer.
5. Sucking insects are killed only when hit with poison. Both sides of leaves must be covered thoroughly.
6. In general, repeated applications are necessary at 5-7 day intervals as long as needed.
7. No material containing sulfur can be safely used on squash, cucumber, melons, etc.
8. Deep winter plowing or spading destroys many insects in the soil.
9. Destroy weeds in and around the garden. Many insects breed and hide in weeds.
10. Destroy old plants as soon as crop is harvested. Leave nothing to feed and shelter insects.
11. To make a percent nicotine sulfate dust: Secure a gallon can with light fitting lid. Fill the can not more than half full with hydrated lime and put in 4 or 5 small stones for a breaker. For each quart of lime add 2 tablespoonful nicotine sulfate (Black Leaf 40). Shake vigorously for 5 minutes. Dust should be used within 24 hours. Dust should be applied when the plants are dry, no wind, and the temperature

above 70 degrees F.

12. To make cutworm bait thoroughly until well mixed, 1 tablespoonful Paris green or cryolite dry. Mix 1-2 pint cheap molasses and 1 gallon water. Slowly add water to bran and stir thoroughly until well mixed. Spread in late afternoon.

## Protein Can Be Cut If Cows Are On Green Pasture

Dairy cows grazing green permanent pasture will need only from 12 to 15 per cent protein in the grain mixture, and in view of the prevailing shortage of protein feed this is of vital concern to dairymen, according to E. R. Eudaly, dairy husbandman for the A. & M. College extension service.

A cow getting a high protein roughage needs only three pounds of grain mixture to make a gallon of milk, but with low protein roughage she needs four pounds for the same production.

Cows getting dry roughage probably would require one-third to one-half of the grain mixture in cottonseed meal, pointed out Eudaly, where as those on green pasture would need only one-fourth to one-sixth of the mixture in cottonseed meal.

In winter green pasture is best furnished by oats, wheat or barley and in other seasons buffalo, carpet, rescue, ryegrass, sudan, mesquite and Johnson grasses all suffice. Alfalfa, cowpeas, peanut and clover hay are high in proteins.

Eudaly said that good sudan pasture is worth as much as (green) oats and on the average will furnish good grazing for three months. It may be planted up the same for maximum benefits and in this area many already have in their sudan.

## Keeping Down The Vegetable Insects

Control of vegetable insects is not as difficult as many persons seem to think, says Dr. H. G. Johnston, entomologist for the A. & M. College extension service.

The ideal strategy is to wage an offensive battle, beginning as soon as the first invaders appear in the garden and never giving them a chance to become established. This battle should continue at intervals of four or five days until the enemy is mopped up.

Insecticides necessary for the job include erythrolin and calcium arsenate to control flea beetles, cucumber beetles, cabbage worms and other insects which feed upon the fruit and foliage of the plants;

## Diverting Of Water Runoff A Major Item In Success Of Your Garden

That sweet pitter-patter of rain on the roof can make you sleep all the sounder, Mr. and Mrs. Victory Gardener, if you are playing smart and diverting the run-off into your garden plot.

In the first place this excess water, which otherwise would be wasted, can be used where artificial watering is not possible, or prolong periods between watering if facilities are available. Moreover, pure rainwater simply does more for plants than water piped in for man-made irrigation.

Care should be exercised in selection of a garden plot so that runoff water can be diverted to it. It is possible in some cases to construct a terrace above the garden spot to trap the water, which flows into the garden by means of a pipe through the terrace.

Of course, the plot should be no larger than the runoff justifies if this is the sole source of water. Where the runoff is bigger than the garden plot, some have found it wise to have a second but fallow plot so that excess water may be diverted to it for storage for the next year.

Garden plots to be thus serviced

should be as nearly level as possible, which may be accomplished with rakes, hoes, drags, etc.

Generally speaking, it is wise to construct levees around the garden area some six to eight inches high to impound the overflow until it has time to soak in. These also may serve to keep out excessive water when the plot has been filled.

Gardeners will find it more profitable to use this type of garden plot for vegetables which require considerable seasoning to produce, leaving beans, peas, corn, etc., to be planted in the field or areas where run-off water is not available.

Assistance in utilizing this free and best source of water may be had from the Soil Conservation Service, the county agent, or any vocational agriculture teacher.

## Pressure Cookers To Be Rationed

Because the supply of pressure cookers is so far short of meeting the demand, all pressure cookers produced in 1943 will be rationed.

The U. S. department of agriculture will allocate pressure cookers to the states, but no other details of this phase of the rationing program have been announced. During 1942, material for only 150,000 pressure cookers has been released by the War Production Board to three manufacturers, through the efforts of the U. S. D. A. Because of the rationing plan, the manufacturers will fill no orders from individual users.

The wartime cookers will be made of steel rather than aluminum, and will be equipped with a flat rack but no basket or pans. The cover will have a protective tin coating, while the body will be enameled. Capacity of the cookers will be seven quart jars. The tin and enamel coatings scratch more easily than aluminum, so they must be given special care. Scratches cause the steel base to rust, and rust weakens the walls of the cooker.

Avoid sharp blows, over-heating, boiling dry, or cleaning your cooker with hard, abrasive powders. Heating grease or fat at high temperatures in a tin plated cooker may cause the tin to melt, so the cooker should not be used for rendering lard or searing meat.

No shortage in glass jars or jar seals is foreseen unless the greatly expanded food preservation program causes a "run" on canning supplies. There is no restriction on the number of tin cans that may be sold to home canners.

## Maximum Feed Grain Production Asked Of Farmers

COLLEGE STATION, April 15.—Texas farmers were asked this week to plan for maximum production of all feed grain crops during 1943.

Citing increases in cattle, sheep, hogs and chickens throughout the state for 1943, B. F. Vance, chairman, Texas USDA War Board, declared this week that it would take maximum production of all grain crops to see them through the year and provide a backlog of feed for 1944.

"We now have 812,000 more cattle, hogs and sheep and over five

## Soybean Crop Uncertain In This Section

Howard county is having difficulty in subscribing a quota of 200 acres planted to soybeans, a crop that is getting rave notices from industrialists and nutritionists over the nation.

There may be good reason for local reluctance in planting soybeans for many who have tried to raise them here declare the crop to be uncertain and unprofitable. One of the chief objections is that the pods crack open and lose the beans before harvest times.

But that doesn't change the food value and possibilities of soybeans, which are winning wide

## Travis Co. Girl Winner Of 4-H Scholarship

A 17-year-old Travis county 4-H club girl, Evelyn Wisland, has been selected for the Maggie W. Barry college scholarship offered annually to a club girl by the Texas Home Demonstration association.

Chinaberry beads are her trademark, for she sold strands to customers in 27 Texas counties and in six other states, making a profit of \$324 from the venture. She purchased 12 war bonds and has started a bank account for her expenses at Texas University, where she plans to major in home economics.

Her scholarship was won on her balanced 4-H program of planning and making her clothing, growing a garden, conserving food, in raising chickens, and in beautifying her room and home.

## Blackout Stops A House Filibuster

HARRISBURG, Pa., April 15 (AP)—A surprise blackout test last night disrupted, among other things, a democratic filibuster in the Pennsylvania house of representatives.

Republicans sang, when the chamber was plunged into darkness, "Praise the Lord and Stop the Filibuster."

Democrats countered with "Praise the Lord and Save the Constitution."

## Wealthy Street Cleaner Perth, New Zealand (UP)—A street cleaner who dropped dead here was found to have 5,000 pounds on his person. He was over 70 years of age and had acquired his "fortune" working for the Wellington Public Works Dept.

In 1942, there were 859,894 persons on U. S. federal pension rolls.

million more chickens than we had during 1942 and for these reasons we are going to need enormous amounts of food grains this year," he said.

## Soybean Crop Uncertain In This Section

Howard county is having difficulty in subscribing a quota of 200 acres planted to soybeans, a crop that is getting rave notices from industrialists and nutritionists over the nation.

There may be good reason for local reluctance in planting soybeans for many who have tried to raise them here declare the crop to be uncertain and unprofitable. One of the chief objections is that the pods crack open and lose the beans before harvest times.

But that doesn't change the food value and possibilities of soybeans, which are winning wide

popularity for some of the following reasons:

They are rich in vegetable oil, which has uses similar to cottonseed oil, and the residue following an oil crush makes excellent high protein stock meal. Both the oil and the solid content of the bean are readily adaptable to industrial uses such as moulding of plastics, manufacture of paints, etc.

Soybeans are now making their appearance here in small packets, which resemble roasted peanuts in taste. When milled, the beans yield a smooth, golden flour, and grinding converts them into a nutty sort of meal. They may be consumed as dried or as fresh beans, either ranking at the top in food values.

Rich in proteins and low in carbohydrates, the soybean ranks far ahead of other beans in this respect, and for any wheat product for that matter.

Means of preparing them for the table are almost limitless. The late Dr. Ross Fraser, who formerly

lectured here occasionally, was a rabid soybean fan and frequently prepared an entire meal from soybeans for local guests. She used them as base for soup, "meat," and as vegetables, and dessert.

What she and others preached is now finding favor, but America has a long ways to go in catching up with the Japanese and Chinese who long ago found it to be the "miracle food."

Flies take about 10,000 human lives annually in the United States.

There are 679 windows in the Capitol at Washington.

## Meet The Bombardiers— Other States Represented In New Class Of Cadets

**PENNSYLVANIA**  
Walt Senio is a bachelor of science from the University of Scranton. He's a native of that picturesque little village of Mayfield, and until recently has earned his living by doing features for many newspapers in surrounding communities. Walt goes in for golf and tennis, and is a whiz at both. His brother, Pete, is at Keesler Field studying aviation mechanics. Another bachelor of science by the name of Frank Sanderson is in training here. Frank, a native of Carnegie, graduated from high school in Oakdale, and went on to take his B.S. degree at Muskingum college in New Concord, Ohio. He traveled plenty for an education, and then went ahead and got himself a job as a traffic man for the Pennsylvania railroad, so he could keep on traveling. Frank enlisted in the army last June, and was previously stationed at Ellington Field.

Thomas is a hotel worker from Scranton. His favorite sports are football and baseball. Robert has been in the army for over two years now. William Spotts is a Pennsylvania State college student who left school last June to fight the axis. He hails from the town of Milton, and is strong for basketball, football and baseball. Willis is in a hurry to put the kibosh on the axis, so he can go back home and finish school. Robert Swift is a machine operator from Harbor Creek. Bob's favorite sports are pistol and rifle shooting, and he can coax some very sweet stuff from the piano if you can coax him first. His ambition in life is to own a fur farm.

**RHODE ISLAND**  
From this tiny state come two boys, both of the billy town of Providence. Mike Seald, Jr., is a hardware salesman who leans to singing and dramatics. Mike graduated from Central high school in '40, and is very impatient to graduate from this bombardier school so he can go back to selling hardware—to the axis. This time Mike's willing to deliver the goods free of charge and waive his commission. Edward Bradley is the other lad. He's also a product of Central high school, and his civilian occupation is that of a merchant and display man. Until recently he worked as manager for one of the numerous chain stores of Carroll company, a large New England firm. Eddie's favorite sports are flying, swimming and golfing, and his ambition in life is to own and operate a chain of perfume and cosmetic stores.

**SOUTH DAKOTA**  
The only boy from this state is Erwin Neuharth, a student of agriculture. Erwin graduated from the high school in his hometown of Eureka, and then spent several

years at the Agricultural College of the University of Nebraska in Lincoln. In between his studies, Erwin has worked on a number of farms in the middle west in order to get the practical as well as the theoretical end of farming. He has been in the army almost a year now, and was previously stationed at both Fort Snelling, Minnesota, and Ellington Field, Texas.

**TENNESSEE**  
Walter Satterwhite, Jr., is from Knoxville. He is a boy of many schools. Graduating from St. Andrews Prep school, he went on to the Tennessee Polytechnic Institute, and later studied at the University of Tennessee. He was a letter man in both baseball and football. Walt is an amateur photographer and a professional accountant. He is a member of the Phi Kappa Phi Honor Society and the Shutterbug Camera club. From Gainesboro we have Edgar Jackson, a Central high school grad. And he certainly is no yardbird. He's been in the army since November of '40, and came here from Ellington Field. Ed has a brother in the navy. William O. Walker, better known as "Willie," is from Covington. Willie is a University of Kentucky lad who left school to team up against the axis. He's a football letter man and an expert swimmer. In addition to his outstanding athletic ability, Willie also a member of the Perishing Rifles, and is a devotee of literature and music.

A native of Elizabethton, Robert Ray Winlers, was a printer in civilian life. Robert is for both football and tennis, and does very nicely at both sports. He also played for three years in the City Football league. Billy Moss from Memphis is next. He's a Phi Delta Sigma from Memphis State college who left school to join the army. Billy is more at home in the water than he is on land, and the only thing he dislikes about Big Spring is the lack of swimming facilities. That little pool in the park is too confining. He likes to spread himself around an ocean.

**TEXAS**  
Houston, San Antonio and Hillsboro send us one boy each. Joe Matthews, the Houston boy, began his studies at Rice Institute and continued at Texas A. & M. He left school to enter the service, and has been in the army since last June. His sports are football, basketball, track and swimming. Joe's brother-in-law, Lt. Col. H. T. Loftin is a provost marshal in the army. The San Antonio lad is one Grady Reed, Jr. He spent several years at the University of San An-

tonio, left to study at the University of Texas, and left again to study bombardiering. After he polishes off the axis, Grady wants to come back and study airport management. Leslie Ralph Mercer is from Hillsboro. He's an oilfield man and a former employee of the Humble outfit in New London. Leslie graduated from Hillsboro high school back in June of '40, and when he isn't busy working, he's usually somewhere dancing or wrestling. His current ambition is to graduate from this bombardier school and do his part to win the war.

**UTAH**  
This lad is a truck driver. His name is Edward Bunderson Jr., and he's a graduate of Santa Ana Junior college in California. He's not only a first class boy at basketball, but he can blow on an saxophone until you cry for help. Eddie is a native of Mayfield.

**VIRGINIA**  
Alfred Paradise is from Arlington, where he graduated from Washington-Lee high school in '41. Football, track, baseball, basketball, bowling, swimming, dancing and talking are his favorite sports to mention just a few. Al's civilian job was that of a storekeeper, and his ambition is to attend West Point and remain permanently in the army. A Richmond lad is next. His name is Harold Reynolds, and he was a clerk for a gravel company before his enlistment in January of last year. Harold's brother, Johnny, is a staff sergeant in the army, and he's stationed at Key West, Florida. Robert Mosby Wade is a native of Roanoke. He's a swimmer and a track man from Williams & Mary college in Williamsburg, Virginia, and his civilian occupation is advertising. Robert's last job was with Procter & Gamble in Cincinnati, Ohio.

**WASHINGTON**  
Judd Semml is from Seattle. He graduated from Roosevelt high school there, and went to work for the Puget Sound Power & Light company as a bookkeeper. Judd is as fast and clever a basketball player as one could hope to meet. In addition to his high school activities in this sport, he was the star basketballer of the

Lake Forest Park Athletic club for five successive years. Another of his accomplishments is mountain climbing. Give him a pick and a piece of rope, and he'll meet you on the other side of any mountain you choose for him to climb. Judd's brother, George, is a navy man stationed in Alaska.

**WEST VIRGINIA**  
Harry Siegrist, a native of West-on, was a handyman in the pipefitting department of the Bethlehem Fairfield shipyard in Baltimore. Harry was a letter man in both football and basketball during his days at Glenville high school. His favorite sport is fishing, and his ambition is to win the war and then go into a business of his own. From Follansbee we have Nick D'Emilio. Immediately upon his graduation from Follansbee high school in '41, Nick enlisted in the army. His only interest in life at the moment is to visit Tokyo and drop a few thousand pounds of calling cards on our little brown opponents.

Alphonse Szymanski, a Wheeling boy, is next. He's a first rate swimmer, and a connoisseur of good books and good chow. Al almost three years now, and his brother is an aviation cadet in the navy.

**WISCONSIN**  
John Secois is from that very charming little town of Fond Du Lac. He's a softball-football-basketball boy, and earned his living as manager of the men's furnishings department in Sears Roebuck Fond Du Lac store. Johnny is a member of the Order of Ahepa, and his ambition in life is to have a business of his own.

**WYOMING**  
The little town of Riverton gives us the last boy in this class of bombardier cadets. His name is Howard Meyer. Howard graduated from the high school in Pavillion, and went to work on his father's farm. He joined the army in January of '41, and has since been gnashing his teeth and biting his nails in a futile effort to get himself sent off to foreign service. He finally tried the cadet bombardier, and now things look very good for Howard, and very bad for the axis.

## Tractor Tire Restrictions Are Relaxed

**COLLEGE STATION, April 15 (Sp)—**Keeping tractor and other farm implements operating full time on the farm front is the goal behind two recent actions regarding tires, the Texas USDA War Board announced this week.

The first action lifts county quota restrictions on farm tractor and implement tires, while the second action specifies farmers may obtain tires recapped with reclaimed rubber without rationing certificates.

Farmers now are required to apply only to their local rationing boards to obtain sufficient tires for farm use. The local boards have been advised by OPA that substantial district, state and regional reserves have been established to provide for needs.

The principal reason behind the move which frees recapping with reclaimed rubber from rationing restrictions was the desire to have farmers reap their tires in time to prevent total loss of worn tire casings. As a move to conserve rubber, replacements will not be issued for tires that can be recapped.

Previously, recapping of rear wheel tractor tires was not required and replacements were granted even though the tires to be replaced were suitable for recapping.

M. Weaver, AAA administrative officer, also announced that the war board had informed this office here that under certain conditions a farmer may change from steel to rubber tractor tires. The farmer may apply for the rubber tires if he has to drive his tractor over a paved highway for

a long distance to reach his farm, or if the nature of the soil he is farming is such that rubber tires are needed.

These two conditions apply where the farmer has purchased or put a tractor into use after May 1, 1942.

**CHANGING TIRES WINS PRIZE**  
CAMP ROBERTS, Cal. (UP)—The Artillery Replacement Service is training its men for peacetime jobs in the automobile industry. In a recent combined military and athletic contest the two contestants who won first prize changed all tires on a jeep in 7 minutes and 5 seconds.

**March Rains Helpful To Texas Range**

AUSTIN, April 15 (AP)—Late March rains improved Texas range and pasture lands greatly, except in the Panhandle, trans-Pecos and some southwestern counties, the USDA reported today.

General rains early in April over most of the Panhandle, however, were of great benefit in starting grass. The trans-Pecos also benefitted by scattered showers, the bureau of agricultural economics reported in its bulletin of conditions as of April 1.

The first three weeks of March were very dry and cold and held all range growth at a standstill. Feed in all parts of the state, before the rains, was becoming scarce and cattle were shrinking rapidly. The protein concentrate situation continued tight but with new grass available, the demand was slackening. Feeding was very heavy during early March, and available grain and roughage supplies were disappearing rapidly.

Nearly all cattle and calves and sheep have been taken off wheat pastures in the plains counties and shipped either to market for immediate slaughter or to northern feed lots for further finishing.

The condition of cattle on April 1 was reported at 81 per cent of normal, a 1 point improvement over a month earlier.

Sheep are in fair to good condition. The hard freezes of early March caused considerable loss of flesh, but death losses among ewes were light.

There were heavy losses among fresh shorn goats, and some losses of new born kids. Mohair was being sold on an active market at 52 to 62 cents per pound for adult hair and 70 to 74 cents per pound for kid hair.

Sheep marketing continued in record numbers during February with 164,000 head moving compared with 91,000 during the same period a year earlier.

**Berlin Suffered Heavily In Last RAF Attack**

ANKARA, Turkey, April 14 (Delayed AP)—Travelers arriving from Germany today said that "literally thousands" of fires were started in Berlin and that thousands were homeless throughout the city after the last RAF raid, which they described as Berlin's worst.

The British were reported to have used aerial torpedoes which blasted windows and lifted off roofs in entire districts. Some of the explosives, it was said, apparently were set with time fuses because numerous areas were blocked off for seven days.

The removal squads mostly were war prisoners promised their freedom if they did the job successfully.

The travelers said that after the March raids 70,000 were homeless in Berlin and that the dead totaled at least 500.

Although German soldiers were declared to be eating well, the food and clothing situation in the capital was described as bad.

Civilian morale, the travelers reported, was poor. "The old confidence in Hitler has disappeared, the hope of victory has been given up, and everyone is asking when the war will finish," they said.

### Franklin Life Buys \$25,000 In War Bonds Locally

Howard county's War Loan campaign got a \$25,000 boost from the Franklin Life insurance company of Springfield, Ill. which, in following a policy of investing heavily in government securities, bought locally in tribute to Joe Pond, local agent. Pond is pictured above at the right delivering a check to Chester O'Brien, Victory Fund chairman, and receiving the bond, as Ira Thurman, War Bond chairman, and Ted O. Groebel, special chairman of the current drive look on with satisfaction. The drive was handled through the State National bank. In last year's bond

campaign, Franklin also bought through Howard county. Pond received the following telegram from the president of his company, Charles E. Becker. "We have today wired the State National Bank in Big Spring, instructing it to enter our subscription for \$25,000 new offering government Victory bonds and are forwarding check in payment. Since this nation's birth the unceasing aim of our free people has always been the defense and protection of the American home. This will always be true. Life insurance and Victory bonds are the pillars of protection for our future

society. We are proud that for more than one hundred years life insurance companies have been a great contributing factor in developing and maintaining the American way of life. The Franklin is investing a very large portion of its income in government bonds to help win the war. x x x We will all be called upon again and again to subscribe for additional Victory bond issues and the Franklin Life will in the future, as in the past, invest a very large portion of its income in Victory bonds." (Perry Photo).

### Little Nations Will Be Helped, Hull Pledges

WASHINGTON, April 15 (AP)—The peoples of the little countries the world over had authoritative assurance today that the United States will continue to champion the rights of the small nations. Secretary of State Cordell Hull made this clear in an address before the Pan American Union last night in which he vigorously advocated worldwide adoption of the good neighbor policy as a sort of global magna charta of the nations.

Amid the clash of arms and confusion of world conflict it is more than ever important, he said, "to keep clearly before mankind the principles to which we have dedicated ourselves,—the principles of sovereignty, equality, law, order, justice, morality, non-intervention, friendliness and cooperation on which the solidarity of this hemisphere is based.

### Nazi Columns Hit From Air

MOSCOW, April 15 (AP)—Air battles increased over the Russian front today, with the Red army's fliers concentrating again on Nazi supply columns and their fighter planes successfully battling off German raiders.

### Wall Street

NEW YORK, April 15 (AP)—Stocks hit a fast early dip on the recovery track in today's market but profit taking barriers eventually stemmed the sprint and extreme gains running to 2 or more points generally were reduced in the final hour.

### GOP Plugs For Pay-As-You-Go

WASHINGTON, April 15 (AP)—A statement by senate republicans endorsing the Ruml plan became the fuse today for a new explosion of the pay-as-you-go income tax issue in the house ways and means committee.

### Here 'n There

Lucille Thompson of Coahoma is now employed at the Greyhound Bus terminal to bring the company's staff here to include four women replacing men now in the armed services.

### New Markup System For Vegetables

WASHINGTON, April 15 (AP)—OPA prescribed a new "markup" system of pricing fresh vegetables at retail today while officials intimated that the step was a preliminary to bringing down the cost of garden produce in compliance with President Roosevelt's order to reduce the cost of food where possible.

On carrots, lettuce, peas, snap beans, spinach and tomatoes, the markup was set at 39 per cent for all types of retailers, although classifications were set up which may be the basis for some differentials in the future.

### Livestock

FORT WORTH, April 15 (AP)—Cattle 1,000, calves 200; steady; good fed steers and yearlings 14.00-15.00; common to medium cattle 10.00-12.50; good beef cows 11.25-12.50; bulls 9.50-12.00; good fat calves 12.50-14.00; common to medium butcher calves 10.00-13.00; stocker steer calves topped at 16.00; best stocker heifer calves 10.50-14.00.

# BIG SPRING BUSINESS AND PROFESSIONAL REVIEW

PRESENTING EACH WEEK NEWS ABOUT LIVE PROGRESSIVE FIRMS AND INDIVIDUALS OF BIG SPRING

## Easter Season A Time For Permanents

### New Styles Are Offered At Settles Beauty Shop

When you join in the Easter parade this month, your new Easter bonnet and spring dress will be a compliment to you provided your hair is also looking its best. Mrs. F. F. McGowan, owner and manager of the Settles Beauty shop in the Settles hotel, urges that her customers come in soon for a new permanent and one of the newer hair styles.

Shoulder length hair and long bobs just don't fit into the spring picture, Mrs. McGowan says, as all the newest hair arrangements are short, easy to take care of, and fit the ready for work or play mode that is spring.

The shop features a Rilling Cooler Wave, a machineless wave that conditions the hair even as it curls it. It is a cream wave and not drying to the hair as some permanent solutions.

To take care of the rush of customers for the permanent season, of which the Easter season is one of the most important, Mrs. McGowan has six operators besides herself working in the shop.

Along with a new spring permanent and hair styling, Mrs. McGowan advocates changing to lighter and different make up. The shop sells all the products of the cosmetic line of Contoure. Especially in demand for this area is Contoure's special skin formula for dry skin.

For those who wish to try the line, there are make up kits containing small jars of the products, in neat kits that are a boon to travellers.

### VINEYARD NURSERY

Now is the time to plant all types of Fruit Trees, Pecan Trees, Evergreens and Decorative Shrubs. We have complete stocks at present but many items will be difficult to replace so see us at once for your needs.

### Take Care of What You Have

When you have a new machine, you should take care of it. It is the only way to get the most out of it. Your electric appliances are more valuable today because production of most appliances has been stopped to conserve metals for the machines of war. Take care of those you have because they must serve you well for the duration.

TEXAS ELECTRIC SERVICE COMPANY  
C. S. BLOMFIELD, Manager

**Harry Lester's Specialty**— Harry Lester's Auto store carries a complete line of automobile parts, but the thing that sets it apart from other businesses in the same line is his well-equipped machine shop, a part of which is pictured above. Motor re-boring, crankshaft grinding and brake drum turning are among the many services offered by the shop. The motor repair and rebuilding services offered by Lester are of more importance than ever, in these days of wartime economy when new cars are to be had only by ration certificate and parts extremely scarce.

## Stephens Firm Offers Popular Broad-Risk Insurance Policy

Insurance coverages are many, but one that has gained importance and has become more prominent in the last few years, particularly with Big Springers, is that of inland marine coverage which the Big Spring Insurance Company is selling along with many other policies.

Under this coverage, you may secure all risk insurance on jewelry, furs, fine arts, silverware, and many other items of personal property, due to a variety of different causes.

Fred Stephens, who will have been operating the Big Spring Insurance company exactly 25 years on April 22, started writing policies as Big Spring's first insurance firm.

Other than the inland marine policy, the agency writes all forms of insurance except life policies. Some of the group includes fire, tornado, hail, along with an ex-

tended coverage which includes vehicle damage, smoke, explosion, riot and aircraft. The aircraft coverage which ordinarily would sound rather improbable, is providing a rather valuable policy today because of the number of army flying fields which have been built throughout the country.

"Numerous aircraft fly over Big Spring daily, and should one fall on your property, you would be covered, provided your policy has the extended endorsement attached to it," Stephens explained.

He further stated that some persons have an erroneous idea relative to the payment of insurance losses, as they are often asked the question "Should I have a loss would the company pay the full amount of the insurance, or would they just pay three-fourths of it?"

The three-fourths value clause does not apply in Big Spring, consequently the companies pay the full amount of the insurance if the property involved in the loss has the same or greater value as the insurance carried.

**YOU OWE YOURSELF A GOOD PERMANENT**

With less time to care for your hair than ever before, you should have a good basic permanent.

## Zinnia Seeds Offered Free By Firestone

### Book On Victory Gardening Also Is Available

Free packets of Super Giant Zinnia seeds are being distributed by The Firestone Tire & Rubber Co., through its dealers and stores. People in this vicinity who are interested in growing zinnias may get their free packets from the local Firestone store located at 507 East 3rd. Firestone's new Garden Guide booklet is also free to all who are interested in planting a garden.

"While we are urging war gardeners to devote the major portion of their time and space to the production of vegetables," says D. J. Sheppard, head of the local Firestone organization, "there are always places for flowers. For instance, borders of flowers add much to the attractiveness of the main vegetable garden."

"The garden guide booklet entitled, 'Helpful Information for Growing a War Garden' incorporates modern scientific principles of vegetable growing and reflects the Firestone company's 27 years of experience as sponsor of the largest industrial employees gardening project in the United States. The booklet gives complete information on planning, fertilizing, planting, cultivating, insect and disease control, harvesting and storing of vegetables for winter use."

Funds made available under this project will provide for additions and improvements to existing water facilities which are necessary to care for the population increase caused by military and industrial expansion in this area.

The cost of construction and other expenses estimated at \$53,000 will be financed through a federal grant of \$32,000. The city of Abilene will furnish the remainder of the funds.

Approval of an allotment to provide for a health center there also was announced. No amount, however, was disclosed.

### You Can Help National Defense

by gathering all available scrap iron, brass, copper and other metals immediately. We pay best market prices for all types of metals.

## Big Spring Iron & Metal Co.

1501 West Third Phone 973

**Modern**—That's the word for equipment used by Dr. George Wilko, veteran optometrist who has been serving people of this West Texas-New Mexico area in Big Spring for more than 20 years. He has constantly improved facilities and maintained the most up-to-date devices for measuring vision, such as the one pictured here. Care and precision are his watchword on all orders.

## D & C Packing Co. Is This Area's Largest

Despite rationing and price restrictions that actually have imposed losses in many cases, the D. & C. Packing company is continuing its record of service in the Big Spring area.

Quotas have pinched operations to a degree, but D. & C. still qualifies as the only "slaughterer" in this immediate territory under the OPA's reservation of that term for those who handle 350,000 or more pounds annually. D. & C.'s pork slaughtering alone exceeds that amount, and the output on beef carcasses runs the annual volume in the neighborhood of a million pounds of meat.

No shortage of choice beef is anticipated for the company maintains its own select pens of calves for feeding. These are killed off when they reach the proper degree of finish, and thus nothing but

## BUTANE GAS

We offer the users of Butane Gas in this area a complete sales and service organization. Furthermore, the Butane sold by us is the ONLY SWEET GAS distributed in this territory. Let us take care of your needs.
