Pay more? What for?

Fifty Years Forward on the American Road

You don't have to pay costly-car prices for costly-car comforts. Ford brings you everything [and we mean everything] you've ever wanted in a car, at a price that's well within your reach! And according to recent surveys, a Ford returns more of its original cost when sold than any other car at any price!

Here are a few of the "Worth More" advantages you'll find in the '53 Ford:

- 1. A V-8 engine—powerful and smooth!** Ford's famous high-compression V-8 is a leader in quiet, flexible, economical performance. Ford, remember, has built more V-8's than all other makers combined—over 13 million!
- 2. America's most economical Six engine!** If it's a Six you want, Ford offers you the high-compression, low-friction Mileage Maker . . . the engine which, with optional Overdrive, won over all other cars, regardless of size or weight, in this year's Mobilgas Economy Run! And it's yours for the same kind of money that buys less modern sixes in other cars.
- 3. America's finest and most versatile automatic drive!** Fordomatic Drive is the "automatic" which gives you both the get-up-and-go of automatic gears and the smoothness of a fluid torque converter. If you choose Fordomatic, you will find that it makes all your driving easier . . . more relaxing.
- 4. Automatic gas savings!** Ford's Automatic Power Pilot (on Six and V-8) meters just the right amount of gas, times ignition precisely, burns fuel evenly and completely. You get full high-compression performance from every drop of gas—regular or premium.
- 5. America's newest and finest power steering!** Ford's Master-Guide power steering gives you new ease, stability and safety in guiding your car on smooth roads or rough. Your car gains in sure-footed roadability and you expend up to 75% less effort in driving—and parking.
- 6. Largest choice of models in the low-price field!** Ford alone gives you a choice of 18 different models . . . a SIX or V-8 . . . Fordomatic, Conventional or Overdrive . . . the widest variety of body, color and upholstery combinations. You can practically "design" your own Ford!
- 7. A body that's the style-softer!** Only Ford in its field gives you the advantages of a hull-tight Crestmark Body . . . the trend-maker in design and beauty. Ford's body is the longest and Ford's trunk, the largest. You enjoy more usable space.
- 8. New driving conveniences!** Ford's first in its field with such "Worth More" features as camera-acting, suspended pedals that eliminate floor hoes . . . foam rubber cushions on front and rear seats in all models . . . and convenient Center-Fill Fueling.
- 9. An automatically controlled ride!** When you Test Drive this Ford, notice how the wide front tread (widest in the low-price field) takes tilt out of turns . . . gives you a more level ride. With new "balanced suspension," new spring and shock absorber action and new rubber compression bumpers, road shock in the front end alone is reduced up to 80%.
- 10. It's worth more when you sell it!** An impartial survey of used car prices proved that Fords return a greater proportion of their original cost than any other cars in America. It's another fact to add to Ford's reputation as the "Worth More" car. But don't take our word for it. Stop in and Test Drive this Ford for yourself. We predict you'll be sold before you're in second! It was true last year and it's even truer this year: you can pay more, but you can't buy better than Ford.

WORTH MORE WHEN YOU BUY IT . . .
WORTH MORE WHEN YOU SELL IT . . .

What is the most valuable thing General Electric ever built?

Is it the jet engine? In 1942, General Electric gave America's air arm its first jet muscles. Would you say that is our most valuable product?

Or would you elect the fluorescent lamp? We placed the first ones on sale in 1938. With the growth of fluorescent lighting Americans are using 3 1/2 times more light than even 10 years ago.

Maybe you would say our star performer is the steam turbine. All you do is flip a switch, and a turbine somewhere instantly responds to provide the power to pump for you, or push or lift.

How about x-ray? Your doctor holds a negative up to the light and peers at bones he says are really yours. Who can say how many lives the x-ray tube has saved?

Important as these products are, more valuable to us—and to you—is something these products have helped to build. Something born quietly in 1878, when electricity was still a curious toy. And something that has grown steadily through the years.

The most valuable thing we ever built is your good will. For your year-after-year confidence in the things we make has given us the means to serve you better. Better engineering, research, manufacturing—all have come from your belief in us. It returns to you in a constantly improving and expanding way of life.

You can put your confidence in—

From where I sit ... by Joe Marsh
Heard About the Electric Weather Predictor?
Squint Smith built up quite a reputation last month by predicting the weather. What he said usually came true.
It got so that folks would sit around his little Antique Shop just to get his opinion.
Last Monday, though, he said he didn't know what the weather was going to be like next day. That surprised us and when we asked what happened, Squint said, "Slipped up on my electric bill and was turned off. I'll get to my radio again tomorrow though." Squint had been getting the weather over the radio—just like anyone else!
From where I sit, that's the way it goes with some "experts." They often don't have any more inside information than you can get for yourself. Like those who "know" cider is the only thirst-quencher after a day's work. Far as I'm concerned, I'll take a temperate glass of beer. But—I won't try to "predict" your choice for you.
