vious appropriation bills have dealt only with this fund.

Appropriations set by the committee were estimated to be within the revenue that the state will receive during the coming biennium, thus it would call for no new taxation.

The bill provides \$180 a year pay increase for state employees and up to \$300 a year pay hikes for university and college teachers.

The House has backed up Representative Max C. Smith of San Marcos, chairman of the appropriations committee, in his statement that under House rules no other appropriation bill may be acted upon until the general appropriation measure is passed by both houses.

That rule stymied public school teachers, who have been pressing hard for action on a measure that would give them salary increases of \$600 per year.

Charles Tennyson, secretary of Texas State Teachers Association, says that no smaller amount will be acceptable to the teachers. It is provided in a bill by Representative Lamar Zivley of Temple.

The administration is supporting a measure by Representative Joe Kilgore of McAllen to up the teachers' salaries by \$450 per year. In an attempt to woo the teachers, Kilgore changed the figure in his bill from \$240.

A third bill by Representative Floyd Bradshaw of Weatherford would raise the salaries of beginning teachers by \$600 per year, but the increases of older and more experienced teachers would be lower.

Twelve hundred teachers were in the gallery when the House appropriations committee held a hearing on the teacher pay bills.

At the hearing, R. L. Proffer of Denison, president of the teachers association said, "If we don't do something constructive for the teachers in the immedi-

ate future, our whole education system is going to pot."

Kilgore warned the House that "it will require the biggest tax bill in the history of this Legislature if the school folks get a \$600 per year general raise with state funds."

.....

The Legislature, meanwhile, seemed little inclined to pass new tax bills.

Hearings continued on a proposal to raise \$84 million a year by increased taxes on oil, gas, beer, and various natural resources, and by placing new taxes on chemical industries and presently untaxed resources.

Passage of this omnibus bill is considered very doubtful.

Other tax propositions are dead or dying. The House revenue and taxation committee killed a two per cent levy on merchandise sales.

A new tax bill on natural gas pipelines is comatose in the committee, with no hearing set. A one-cent increase in the gasoline tax is in the same condition.

.....

Letting bills die in committee is the way the Legislature gets rid of most of them.

At every session, more bills are introduced than the members can possibly consider, much less debate and either pass or defeat.

Thus it was that a house committee gave an overdose of sleeping powders to a bill by Representative Maury Maverick of San Antonio to regulate lobbyists.

The bill would force members of the "third house" to register, tell whom they represent and how, and list their expenses.

The committee heard arguments for and against the bill, then sent it to a sub-committee from whence it is not likely to emerge.

.....

A fight was promised by labor organizations against a bill by Representative W. H. Abington to rewrite the workmen's compensation laws.

The Texas Federation of Labor, the Texas CIO and the rail brotherhoods contend that the bill would reduce partial dis-

ability benefits for many workers and exclude others from benefits for which they are now eligible.

Industry spokesmen said they might not support the bill in its present revised form, although they favored it as originally written.

The bill has been passed by a committee.

.....

Legal action will be taken against distributors of Communist propaganda in Texas if they can be arrested, said Attorney General John Ben Shepperd.

Shepperd disclosed that one of his assistants went to New York for the purpose of conferring with the attorney general of that state in an attempt to apprehend the persons who mailed Red leaflets to Texans recently.

Dell Taylor, with the official group repeating.

Remarks of faithfulness to their official trust, were expressed by Mrs. Lula Hughes, treasurer and chairman of Improvement committee; Mrs. Scott, parliamentarian; and Mrs. Evelyn Titus, chairman of the membership committee. The improvement committee will be in charge of the health, and beautification of school and church grounds projects.

Principal Osborne expressed appreciation for colored eggs donated by parents for the Easter hunt, and announced that the highest number of eggs (one dozen) were found by Frank Bailey, Jr., with Anna D. Tucker locating the next highest number, eleven eggs.

Farm Leader Would Increase Gas Tax

If additional revenue is needed to finance teachers' pay raises, super highway programs and other projects now being debated in Austin, the money should come from a tax on natural gas, John Ray Hunter, president of the Motley County Farm Bureau declared.

"Natural gas does not now pay its fair share of the tax bill. Gasoline is being taxed at about

30 percent of its retail value; yet natural gas is taxed at only about 14 percent of its retail value," Hunter said.

"There are some special interests which would like to see all taxes borne by the people in the form of sales taxes, etc.," the county farm leader said. He pointed out that the Governor already has proposed that the sales tax on gasoline should be raised from four to five cents a gallon. Also mentioned was the fact that Shivers' school financing plan which is embodied in House Bill 3 would place more of the tax burden on the people in the districts.

"This great natural resource is not inexhaustible," Hunter said. "The natural gas that is leaving Texas today can never be replaced. There will never be another opportunity for Texas to benefit from a tax would enable that diminishing resource to pay its fair share of the tax burden."

No matter the size or type of truck you need—what better proof could there be that a Chevrolet truck is your best buy!

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

Recently published official registration figures for the last full year show that truck users in every single State bought more Chevrolets than any other make!

It is difficult to imagine more convincing proof of Chevrolet's superiority, for such clear-cut and overwhelming preference can lead to but one conclusion: Chevrolet trucks must be better, must

enjoy solid advantages over other trucks. Such preference must rest on a firm foundation of good, sound value. And, of course, it does—as owners of Chevrolet trucks can testify.

So before you buy any truck, see how much more Chevrolet trucks offer you. Stop in and see us soon. Continuation of standard equipment and trim illustrated in dependent on availability of material.

1953 SCHOOL YEAR NEARING A CLOSE

The school year of 1953 is about to come to a close, but there are still several events ahead which no one should miss.

This year school will be out before the graduation exercises are held. School is out the 15th of May. Baccalaureate Service will be at 8 p. m. the 17th, and commencement exercises will be at 8 p. m. the 18th.

The eighth grade graduation program will be the 18th at 10 a. m. in the high school auditorium.

Everyone is cordially invited to attend these closing events.

SENIORS LEAVE ON SAN ANTONIO TRIP

The Senior Class left today at noon on their senior trip. They are going to San Antonio, where the annual Battle of the Flowers Fiesta is being held. They will spend three nights in San Antonio at the Brackenridge Lodges and are expected back sometime Sunday evening.

Those going on the trip are Charles Keith, Ronald Hobbs, Pat Reeves, Gary Laughlin, Wayne Shelton, Marlene Bailey, Frances Traweck, Emmie Lee Carson and Eleanor O'Kelly. They will be sponsored by Mr. Bill Word, Mrs. Welton Bailey and Mrs. Elbert Reeves.

EACH YEAR thousands of acres of our soil suffer from wind and water erosion, vast areas of our range and timber land become more depleted and large quantities of our water resources are lost, all to the detriment of Texans.

The rich soils and abundant water supplies of this great State of Texas were created to benefit mankind through the material blessings of food and fiber. During the past thirteen years 166 soil conservation districts, covering approximately 95 per cent of the land area of Texas, have been organized under State Law to combat soil and water losses. These soil conservation districts and the Texas landowners who operate them, assisted by the many organizations concerned with conservation of our soil and water resources, are proving that known conservation techniques and practices will stabilize our soil, conserve our water and render each acre of land more productive.

Soil and water conservation is bringing economic benefit to all Texans, and it is fitting that all groups and individuals, whether government, civic or private, should assist in this program and its observance.

THEREFORE I, as Governor of the State of Texas, do hereby designate the period of May 3-9, 1953 as SOIL CONSERVATION DISTRICT WEEK.

ALLAN SHIVERS

The Seniors aren't bragging, but they seem very pleased with the outcome of their play. Everyone seemed to enjoy it very much. Now they are all excited about their trip to San Antonio this week-end. M. H. S. wishes them the best of luck on their trip.

We know Cora and Betty Ruth had a wonderful week-end last week. Cora left Friday afternoon and went to Fort Hood to see Bill and Betty Ruth left Thursday afternoon to spend the week-end at Wichita Falls with Joe.

The eighth grade television show was a great success. It was greatly enjoyed by everyone. Those students surely showed a lot of talent.

With school so nearly out, all the students can't help but be excited. Only one more month of school! The school year has been so long but still it is hard to realize that in a month we will be out for the summer.

Have you noticed Frances'

arm lately? She quietly sat still and let Gary cut her name on it. No, Kids, it isn't a new fad!

And when you sit behind the wheel and feel the effortless surge from Pontiac's famous power plant you'll know that you're driving a mighty proud performer.
