ANIMATION drained out of the highways of Texas after midnight Monday, when the gasoline rationing ban, most severe wartime measure, became effective. A strange lassitude has appeared on the once ing arteries of commence and travel.

C. A. Pitts, chairman of the Moliey county War Price and Eationing Board has worked day and night with extra clerks and the full membership of his board to clear all applications for additional gas privileges. The vast amount of work has been completed and Motley county motor vehicle owners are becoming adjusted to the new world which has been created by necessary tire conservation measure.

Filling stations throughout the ounty reported the greatest sales in history for the last day of selling unrestricted gasoline. The picure had changed abruptly Tuesday morning. One station manager said he had not sold a single galion of gas. Others had made only mall sales.

#### All Gas Tanks Filled

Every gas tank on all operating vehicles was filled before the ban dropped at 12:01 a. m. Tuesday morning. However, observers were unable to notice any shortage of automobiles, trucks and pick-ups on the streets of Matador Tuesday afternoon. Traffic on Highway 70 was lighter than usual and all vehicles were moving at a slower pace. No unusual amount of 's affic was noticed on busses that serve Matador.

Effect of the gasoline rationing is expected to become more evident as filled gas tanks and additional supplies are exhausted. Sportsmen from several distant sections of the state were here fuesday morning to hunt during the first day of the quail season. One visitor said he drove to Matador late Monday, filled his gas tank, and would use his valid
