WHO IS THE FARMER'S FRIEND?

FARM BUREAU ACCOMPLISHMENTS

- 1. The Farm Bureau has cooperated fully and furnished leadership in all civilian war
- 2. The Farm Bureau sponsored the Bankhead-Steagall bill placing a loan of not less than 90% of parity under farm products.
 - (a) The loan rate on cotton for 1944 is ten cents per pound above that of 1940.
 - (b) The loan rate on wheat for 1944 is seventy cents per bushel above that of 1940. (c) The price of peanuts has been raised from \$94.00 per ton in 1942 to \$160.00 per
 - ton in 1944. (d) Support prices similar to above are now in effect for all staple crops grown in
- 3. The Farm Bureau successfully sponsored the recent movement to get WFA to purchase 1944 crop of cotton and wheat at parity resulting in millions of dollars to our farmers
- 4. The Farm Bureau sponsored the recent amendment to OPA which raised ceiling prices on all agricultural products, or products processed therefrom, to reflect full parity to the farmer.
- 5. The Farm Bureau helped in getting policies adopted in Washington to provide increased machinery and supplies for maximum farm production.
- 6. The Farm Bureau helped defeat bills which would have crippled REA program.
- 7. Supported successfully continuance of our National Farm Program.
- 8. Supported continuance of Bankhead-Jones Farm Tenant Act to aid low income
- 9. Helped get funds for agencies serving farm people.
- 10. The Farm Bureau successfully sponsored legislation directing the president to use all agencies of Government to raise prices of farm products to parity, and to take into account the increased cost of farm labor.

FARM BUREAU ISSUES

- 1. Shall agriculture be recognized as a war industry with sufficient allotment of machinery, supplies, gas, oil, rubber and transportation to produce and harvest the largest possible crop for the war effort?
- 2. Shall the farmers of Texas sit idly by while there is a concerted move on foot to introduce a bill at the next session of the legislature to repeal the 4-cent refund on gasoline used in farm tractors
- 3. Shall farmers receive a fair price (parity) for their products, "cash-in-hand-on-thebarrel-head" at their market places, or shall the Government "roll back" the market price, and sometime in the future mail the producer a "subsidy check."
- 4. Shall the increased costs of farm labor be included in the "parity formula" which sets fair prices for farm products?
- 5. Shall ceiling prices on farm products be set at levels that will assure necessary production for the war effort and in all cases reflect full parity? 6. Shall the farmer be guaranteed reasonable floor prices on all agricultural products,
- year-in, and year-out? 7. Shall the farmers continue a National Farm Program in cooperation with Government that will promote soil conservation, expand rural electrification, provide crop insurance, adjust production to consumption, safeguard a sound farm credit system and guarantee full parity?
- 8. Shall farmers cooperatively render for themselves any and all services which are not now efficiently handled?
- 9. Shall farmers continue to insist that laws already passed providing for their protection be honestly administered?
- 10. Shall the farmer understand that while it is essential to present a united front in war time to maintain full production, it is also equally essential that farmers be represented around the peace table where will be decided such far reaching questions affecting agriculture as trade agreements, expansion of exports, fair relationships as between agriculture, labor and industry, and with other nations?

Shall the farmer also realize that the formula for World Peace is now being work ed out by both national and international economists and staetsmen, and therefore it is of the greatest importance that agriculture's proper place therein be fully under-

11. Shall the farmer understand that the big issue now before Congress is reconversion to the from a war-time to a peace-time economy; and that it is of vital interest to the farmer, as well as to the national welfare, that such reconversion shall provide for ample production of consumer goods, an expanded world trade, a parity economy at home and prohibit monopolistic cartels which bottle up essential strategic moterials, resulting in an economy of scarcity, inflation, unemployment and much suffering to fering to our people?

We urge all farmers and all interested in the future of agriculture to become a members of the Texas Farm Bureau. Annual membership fees are \$5, which will provide a fund to fight the big-interests lobbists. We hope to report a favorable support from Motley county at the district meeting to be held in Lubbock on November 9th.
