## General Crude to Drill on Eiring Ranch

Location is Near Birnie Gas Well

OIL INTEREST in Motley County took a swing to the northwest over the week and when General Crude Oil Co., operating from Houston, announced it will drill the No. 1 F. M. Eiring, 12 miles northwest of Matador to 9,500 feet to test the Pennsylvanian.

Only production in the neighborhood is the Pan American No. 1 Birnie, shut-in Pennsylvanian gas discovery.

The new location is about 5/8 mile southeast of Birnie gas discovery which was rated at 1 1/2 million cu. ft. of gas and an undisclosed amount of distillate. The gas well was made producer in 1958.

Amerada Oil Company first drilled the well to 10,010 feet in 1950 and abandoned the hole.

In 1958 Pan American re-entered the hole and attempted to make a producer at 9,400 feet. Later the company moved up in the hole to 8,400 feet and after fracturing, production of gas and distillate was obtained.

The new location was staked Monday, followed by preparation to construct a road, build a cattle guard, and other arrangements before actual drilling is started.

Unconfirmed report is that drilling will start within a few days. Name of the firm to do the drilling was not available late yesterday.

Production in the area would be of great economic value to Matador and would possibly spread exploration to other sections of the county.

Curbstone estimates as to the cost of drilling well such as General Crude has staked on the Eiring Ranch are in the neighborhood of \$100,000.

### TRAIL DUST

By DOUGLAS MEADOR

Deceit has many masks but the most frightening is worn in the costume of friendship, to be discarded when a purpose has been exploited.

Brown grass is a moving carpet on the abandoned road held in the patient arms of the hills. Time is the only vehicle on the phantom thoroughfare, but the ghosts of a thousand journeys are in the dust, the hopes, the dreams, the unremitting spirit of the traveler.

Beauty is deserving of its noble place in the world, with the artist as its custodian, but its scope is limited. Rare indeed is a voice raised because of the ugliness in a signature on a valid check.

It is logical to concede that a live coward may be preferred to a dead hero, but fearful things are in so many directions that a coward doesn't know which way to run.

A pretty ankle may turn a man's head but the enticing aroma of skillfully cooked foods is more apt to turn his feet.

Loafing is like water without the bourbon, unless it contains the ingredient of unfinished tasks. If the glass is rubbed with the rind of necessity, the bouquet will be improved.

The happiest people on this stunned star are those who are so rich in service to others that they have never felt the need of money.

If opportunity uses enough time to stand on a doorstep and knock, it usually leaves its motor running.

By Johnny Ezzell

MIGHT of the Matadors Friday night fenced in the Class A Ralls Jackrabbits with a 31-8 score here on Burleson Field. The victory gave the Matadors a 6-2 seasonal mark.

As usual, the Big Red mixed a powerful ground attack with an unyielding defense to take their fourth win in a row. They pounded out 373 yards, all on the ground, to 34 rushing and 63 passing by Ralls. The Matadors led in first downs 18 to 5.

The Matadors defense, led by Pete Davis, Kenneth Davis, Dale Dixon, Mike Barton, Ros Bearden, and Gary Lancaster stopped Ralls on the ground. Jimmie Green halted Ralls' aerial thrusts with two interceptions. Charlie Edwards, Ralls' defensive mainstay ranged far and wide to make almost all of the Jackrabbit tackles. Garbage and litter was scattered on the streets here and watermelon rinds were thrown against windows.

Brush control

improves ranch. The right combination of brush control, deferment, and rain, this year have brought about literally, a sea of grass northeast of Matador on the J. T. Martin ranch.

Mr. Martin, as a part of his planned conservation program, sprayed shinnery this spring on the north 1753 acres of his ranch. The next practice on the schedule was a growing season rest for the pasture. This rest coupled with the spraying and rains brought about the increased density and vigor of the grass.

Mr. Martin developed his conservation plan this spring in cooperation with the Upper Pease Soil Conservation District and assisted by Reginald Johnson of the Soil Conservation Service in Matador. He used an

aerial photo of the ranch containing a forage, soil, and physical inventory. With this information, he was able to plan and schedule complete treatment.

Along with the brush control and deferment, Mr. Martin has cross fences, wells, storage facilities, and proper grazing planned and scheduled for the ranch.

To help in applying his plan, Mr. Martin is using the cost-share assistance of the Great Plains Conservation Program and the Agricultural Stabilization and Conservation program in Motley County. These cost-share programs are the way everyone can have a part in conserving and maintaining the land for future generations.

About Your Health

A weekly public service feature from the Texas State Department of Health.

Henry A. Holle, M. D., Commissioner

AUSTIN—Between now and mid-December is the critical period for taking immunizing shots against influenza—particularly for people in "high risk groups."

Health and medical authorities are in unanimous agreement as to the probability of an upswing in influenza this fall and winter. Especially vulnerable, say the experts, are people with heart disease, pulmonary disease, diabetes and other chronic illnesses, persons over 65, and pregnant women.

Recommended vaccinations procedures, drawn up by the national advisory committee on influenza, have been mailed

from the State Department of Health to all local health officials throughout the state.

Most of the 86,000 flu-triggered deaths between September 1957 and March 1960, were among people in these categories, the record shows.

Some Asian flu outbreaks are expected, since they come in two or three year cycles. Also, Texas is due for Type B flu outbreaks, which usually come in four to six year cycles.

Asian influenza has been dormant in Texas since March 1960, and it has been more than six years since Type B has caused much of a flurry.

State Health Department officials say susceptible persons should be vaccinated early for maximum protection. Generally the most troublesome time for flu in Texas is toward the latter part of December.

To reduce the hazards to persons in high risk categories, it is recommended that they be immunized with a multiple-virus vaccine—a product which will protect against more than one form of the disease—well before the beginning of the flu season.

Protective antibodies usually develop within two weeks after inoculation, so it is important that the vaccine be administered before epidemics occur.

A second dose is recommended approximately two months after the first. Persons previously immunized should be re-inoculated with a single booster dose each year.

In view of the predicted upswing of influenza for 1961, it is recommended that serious consideration be given to the vaccination of people in public posts.

## Junior Students Discuss Manners

"Where Are Your Manners" was the title of a guidance program presented in assembly program Thursday morning by members of the junior class.

This program was the first in a series that will be presented in the form of panel discussions dealing with problems that confront the teen-ager of today.

The following students took part in the discussion Thursday morning: Jane Hamilton, Ann Garnett, Pat Cooper, Judy Hart, Gary Lancaster, Vaden Hays, Pete Davis, and Mike Barton.

## Corps Presented Spectacular Show

Homecoming night brought forth the Matador Drum and Bugle Corps to put on a spectacular half-time show.

After going through the regular routine, the corps did something new for everyone, including themselves. They spelled Matador, forming one letter from another.

Forming the word Matador across the field seemed to be a hit, so they formed a heart in which the Sweetheart, Cheri Barton, was crowned.

During the crowning ceremony, Tom Wheeler and Mary Newman played "Let Me Call You Sweetheart" on the cornets.

## PICNIC PLANS ARE MADE BY JUNIORS

Pete Davis, president of the junior class, called a meeting in the English room October 19, to discuss plans for a party. The class party will be a picnic, November 2, on the Whiteflat Middle Pease River. A food committee was selected to plan and prepare the food.

## MOOD IS SNAPPY AS SWING KINGS PLAY

The weekly pep rally was held Friday, October 27, at 3:10, in the high school auditorium.

The Swing Kings—Larry Keltz, Jack McCallie, Robin Brown, David Rattan, and Robert Brandon—put everyone into a snappy mood as they entertained with several selections.

The pep squad and the three cheerleaders "showed their spirit" as they did enthusiastic yells and songs.

## Freshman Facts

Homecoming was as much fun as the freshmen had expected it to be. Everyone helped plan activities, and our main job was to build the bonfire. Although we had to build it a second time, it was really better than the first one and twice as much fun. We all want to thank the townspeople and students who helped us. We hope you enjoyed the bonfire as much as we did.

Judy Rogers, who has been living with her grandparents, Mr. and Mrs. Jim Dobbins of Northfield, has returned to her home in Amarillo. Everyone enjoyed the time she spent at school with us and regret to see her go.

Linda Hagle, who graduated from grade school with us last spring, has started back to school. She has been living at O'Brien. Welcome back, Linda!

## Senior Sidelines

Thursday, October 19, 1961, was an exciting day for the Seniors. Our pictures finally arrived after we had anxiously waited for many weeks.

Miss Sondra Stevens, drum majorette for the Drum and Bugle Corps, presented the trophy to the school that the corps won in Hedley. The corps marched there in the Cotton Festival Parade and was praised by some two thousand spectators.

The Seniors saw themselves on television as they went through an electronics exhibit Thursday. This was made possible for the Seniors by Fort Worth College. We saw and tried out new machines we had never seen before.

We thought we were drifting out into space because of the electronic apparatuses but decided we were only shaking the trailer house—couldn't have been on account of our weight. This was a very educational exhibit and was enjoyed by all Matador Seniors.

## New Negro School Opens in Floydada

FLOYDADA—Teachers and students of the Della Plains High School for Negroes held

open house in a new building recently.

The structure—said to be Floydada's answer to integration—was built at a cost of \$125,000, raised through a bond election.

The 14-room building includes a gymnasium-auditorium, laboratory, typing room, home economics area, library, study hall and lunch room.

The school serves about 90 students from Floydada, Matador, Silvertown and Lockney. School officials, faced with a choice between integrating or building a new school, called the bond election.

The old school, which was built in a dry lake bed, was flooded each time it rained.

"When the drought broke," one observer explained, "the

school was under water for weeks at a time." The school had to close during such periods.

Negro leaders in the area agreed on a new building rather than integration.

## Formby to Fight Unfair Automobile Insurance Charges

Marshall Formby said in Dallas recently he expects to announce as a candidate for governor early next week and that one plank in his platform will be to change "the unfair merit automobile insurance plan."

Formby, former chairman of the State Highway Commission,

said he is vigorously against the plan which is now in effect by orders of the state insurance board. Under the system, a driver who is convicted of a moving violation not only pays the ordinary fine but must pay a penalty in his insurance premiums for three years.

**Double Jeopardy**  
"I just don't think that a driver who is convicted of a minor traffic violation should be penalized \$60 to \$100 a year in insurance payment during the next three years," Formby said. "Going 35 miles an hour in a 30-mile zone does not necessarily make a man an unsafe driver."

Formby, a practicing attorney, added:  
"When a man is convicted of a traffic violation or any crime, the courts set a penalty as provided by law as his punishment. Under the ruling of the insurance board, a driver convicted of a minor traffic violation not only pays the fine provided by law but he also must pay the insurance penalty for three years as set out by the insurance board. To me, this is double jeopardy."

Formby, owner of a group of radio stations, was in Dallas to attend the Texas Association of Broadcasters meeting.

He was asked in an interview or his opinion of the arguments and claims going on in Austin among Democratic hopefuls for the office of governor in 1962.

"I don't want to get involved in intra-party squabbles," Formby said. "Every man who wants to run has a right to run on his own platform and not necessarily against the platform of some other candidate. My hope is to be the Democratic nominee in November of 1962 and to have all the Democrats for me at that time."

Lloyd Fulkerson of Odessa attended Matador Homecoming and visited his parents, Mr. and Mrs. Arthur Fulkerson.

# FLOYDADA SEED & DELINTING CO.

Now has expanded plant facilities to better serve you. We have added a new 54 by 100 foot warehouse with 10 by 20 foot stalls for storing seed. Our entire plant has been re-built to add new step-down Acid machine, and boot pit for easy unloading.

We now have a truck and four trailers for use in catching your seed at the gin. We will pick them up at the gin and store them until January 1 with no extra charge to you.

By using wet acid delinted cottonseed we feel that they were and will be your first step to insure added profits. When having your cottonseed Wet Acid delinted, they are given a bath in 93% sulphuric acid (staying in it only 30 seconds) then they are washed with water to rid them of the acid. Second step is the drying process. The seed are then run through the dryer, staying not over one minute and never reaching a temperature of more than 120 degrees. Your seed are then cleaned in a modern crippeen cleaner. From this point they are run to an Oliver Hi-Cap Grader which floats the heavier seed up hill and into the seed treater. In the treater we apply a recommended dosage of treatment to the seed.

By having your seed processed this way you can be assured of:

- 1—Your seed going farther.
- 2—Faster Germination.
- 3—Germinating with less moisture.
- 4—No planter box clogging.
- 5—Being free from seed and soil-borne diseases.
- 6—No injury whatsoever to your seed.

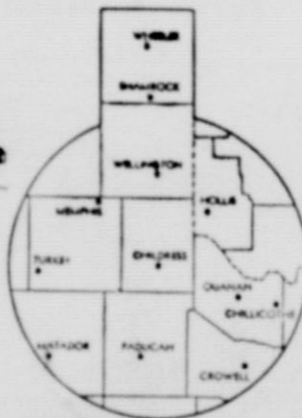

We invite you to visit our plant 1/2 mi. south on new Lakeview Road.

Homecoming this year but not seen in former years, except possibly on one occasion, were Wanda Nelson Vaughn and Glenda Nelson Brock, both of Lubbock, the Lee Nelson daughters.

One of the first jobs Glenda ever had was with the Tribune as office girl (in some places they call them receptionists) following her graduation here.

Coming to attend their first Matador Homecoming were Noma Mitchell Grooms of Amarillo and Eleanor Mitchell Bond of Lubbock, daughters of Mr. Mrs. G. C. Mitchell of Lubbock.

Mr. Mitchell was owner and publisher of the Motley County News for eight years, and Noma, who is employed at the Amarillo Globe News, learned to operate the linotype in her father's shop here. The newspaper was then located in the Masonic building on the highway, where the PCA now has offices.

Eleanor is teaching in South Plains College at Levelland, and Donna Williams of Matador is one of her pupils.

The Mitchell sisters expressed their enjoyment of Homecoming and their regrets that they had not attended them all.

Typical of the early-day pioneer woman, "Aunt Susie" Long was always available to help a neighbor in distress. She frequently rode horseback, side-saddle, and was a familiar figure in the sparsely settled country, often journeying many miles to reach the bedside of a sick child or to minister in other crises.

Mrs. Long, who had been in failing health for a number of years, is survived by one brother, Joe Meador of Matador, and a number of nieces and nephews.

The last Matador TD came with 10:39 to go in the game. It was set up when a Rails fumble was recovered at the Rails 35. Bearden hit off right tackle and went 31 yards for the payoff.

Edwards moved Rails 35 yards to score with 30 seconds left in the game. He hit Left End Donny Moore with a 10-yard scoring

### Location Made for Translator Station

The site is secured and application sent to FCC in Washington for a translator station for Matador, Roaring Springs and surrounding area, it was announced this week by Arville R. Setliff of Turkey, owner.

Site is on the Harry Carter land south of Highway 70, west of Matador. Construction of the station will be done by Odell E. Setliff of Turkey and engineering will be in charge of Loyd Hickman of Memphis. The application covers three Amarillo channels and national networks.

The new hookup will not affect the existing stations, Setliff said. UHF (ultra-high frequency) will prevent the translator station from interfering in any way with existing channels.
