TRAIL DUST

By DOUGLAS MEADOR

The facts are not conclusive but trends indicate that good fortune harbors contempt for the man who is afraid to take a chance.

Gross imperfection in mortal man supplies the transgression that produces humility and compassion which beseech forgiveness.

The hurt produced by sincere kindness heals more quickly than the deeper wound left by gentle deceit.

When a man starts to plow at the fence corners of his memories, chances are he will find some discarded implements that should have been used instead of the gadgets of destiny discarded in his path. Perhaps more important than his achievements are the joys which he found in his work.

Car manufacturers are making some wonderful improvements in the performance of motors. It is unfortunate, however, that they have not been able to eliminate the drag from the monthly installments.

Getting into some of the new plastic packages is almost as much of a challenge as earning enough money to buy the item in the first place.

MISS FAIR PERFORMS AT LINO TYPE CONSOLE

This is the third issue of the Tribune made possible by the patience, endurance, loyalty and skill of Miss Ida Fair at the console of the mighty (and frequently contrite) Mergenthaler.

Proficiency of Miss Fair at the machine that creates type from molten metal is outstanding, as is her continued good nature when the "music" plunges into discord. The Tribune expresses its appreciation for the fine performance and also the harmonious atmosphere that prevails in the department in which is centered the most important factor in the production of a newspaper.

FLIES PLANE HOME

Charles Ray Cox visited here from Wednesday until Friday with his parents, Mr. and Mrs. B. C. Cox and other relatives. He is employed by Braniff Airways in Dallas. He has a pilot's license and flew a Cessna plane to Buzz Field, for a brief visit.

Wallace W. Rattan of Fort Worth arrived Friday for a visit with his brothers and wives, Mr. and Mrs. L. Rattan, Mr. and Mrs. V. A. Rattan and Mr. and Mrs. Ward Rattan.

Annual Sale will Begin Here Today

Annual July sale, traditional with Salem Dry Goods, will begin in Matador this morning at 9 a. m. Ronald Christian, local manager, announced that plans for the event had been completed and that unusual advance interest was being shown by customers.

A page advertisement in this issue of the Tribune lists many values in almost every department. Tom Salem, owner of the firm, has an established policy of January and July sales in which stocks are reduced to make room for new merchandise. High quality of merchandise and the genuine savings offered make the sales anxiously awaited events. Prices offered in this sale apply only to the Salem store in Matador.

Mesdames Pat Sheridan, George Springer, Tommy Edwards and Hazel Dirrickson visited in Quanah this week with Mrs. B. H. Hobbs, a patient in the Quanah Hospital.

N. L. (Bill) Moss, Matador Vocational Agriculture Teacher, checks starting characteristics of electric motors at Motor Lesson Workshop sponsored by Southwestern Public Service Company recently in Amarillo. School was put on for Area 1 VA teachers.

County Agent Bill Palmeyer will be out of his office July 19-20 to attend annual training of the Army Reserve Unit at Fort Sill, Oklahoma, according to an announcement made this week.

Farmers and ranchers with any questions or business are urged to contact Mr. Palmeyer before these dates.

Palmeyer will serve as Captain with the 4166 ARSU, Lubbock Unit for the two weeks training. This is in addition to the 24 meetings attended during the year.

Mrs. Palmeyer and children, Paula and Will, will visit in Chillicothe with her parents, Mr. and Mrs. Marvin Henson and in Oklahoma City, Oklahoma with relatives during her husband's absence.

Ranchers Wage War Against Mesquite

CONTINUOUS WAR between stockraisers and the infestation mesquite, shinnery and juniper (cedar) on the range land is being waged. Through the aid of the Soil Conservation Service, the ranchers are winning ground around that will produce quality beef and enhance the economic position of the stockraiser and the entire area.

Primarily a stockraising country, Motley County has 400,000 acres in range land. A fiscal summary by the SCS for the past 12 months shows that 156,289 acres have now been treated for the control of brush. About 20,000 acres were treated for brush control during the past year. Another 80,000 was placed under range deferment, with the installation of five stock water facilities and the building of eight miles of cross fences.

During the year some 18 farmers and ranchers signed agreements with the Upper Pease Soil Conservation District, while five elected to enter agreements with the Great Plains Conservation Program. During the five-year life of contracts 67,078 acres will receive treatment.

Conservation treatment of the county 111,000 acres of cropland is progressing at a slower rate. About 38,000 acres of cropland in conservation crops, with 22,000 acres in conservation cropping systems, which is rotation of soil-improving crops, with soil depleting crops.

Contour farming for moisture conservation is being practiced on 48,000 acres, with a yearly gain of approximately 1000 acres. While farm soil conservation is progressing, still 60% to 75% of the tilled land needs a combination of treatments to maintain and improve the soil.

Soil, water and plant conservation affects the entire population of Motley County. When production is improved the welfare of every citizen is proportionately enhanced.

Totals Now Close To Record of 1960

YES, THE WEATHER is rather damp for this time of year. In fact it is so damp that the average farmer would hardly venture in his field for fear of becoming "bogged" down.

More rain over the week end and again Tuesday evening (and perhaps more before this gets into print) has brought the 1961 total to within 1.28 inches of the total at this date a year ago.

According to the careful records kept by Pharmacist Bob Stanley, Matador has received a total of 14.41 inches up until yesterday afternoon, since the first day of January as compared with 15.69 for same period in 1960.

Last year the entire month of July recorded 5.02 inches. To the present date 4.51 inches have been recorded in 1961.

Here is a comparison of the two years by months (first figure is 1960): Jan. 1.52—80, Feb. 1.65—2.05, Mar. 81—1.18, April 14—17, May 2.70—1.55, June 3.85—4.03 (note that both Aprils were extremely dry) 6 months totals 10.67—9.80.

County Is Soaked

Reports indicate that the entire county has been soaked. At 5 p. m. Sunday Flomot had received a total of 14.3 inches according to Rev. Ed Spivey, Pastor of the Flomot Baptist Church. He said no crop damage had been reported from the soaking rains Saturday and Sunday. Heavy rain fell there Saturday afternoon with one inch measured in 20 minutes.

Northfield has reported from 3 to 6 inches of rain (more probably received Tuesday night). Roaring Springs has made similar reports.

The first storm Tuesday night which caused some interruptions in electrical service, was from the east and did not reach Matador. The second wave was from the northwest, accompanied by some wind.

RECEIVES BURNS

Mrs. Doyle Rose received severe burns on both arms and legs, Saturday when a pan of grease ignited on the cook stove, and she attempted to carry the flaming vessel from the house. She dropped the pan when wind whipped the flames toward her face and hands. She was treated at Stanley Hospital, where she was conveyed by her neighbor, Mrs. John Irwin.

County Judge Elbert Reeves said the flag remained up all night because the ropes had become fouled and it could not be lowered. On the morning of the 5th when the wind subsided, the ropes were relaxed and the flag lowered.

Schools Will Begin Season August 28

DOORS WILL OPEN here August 28 to begin Matador Independent School District's 1961-62 terms in both grade and high school departments. Facilities are complete and the school plants are rapidly being placed in condition. Supt. Bert Ezzell said this week that Mrs. Grace Timmons has been elected as English instructor in the high school.

A third teacher, Mrs. Calvin Stripling (formerly teaching in Roaring Springs) has been employed to augment the Matador colored school faculty.

Matador will transport eight colored students daily to Floydada to attend high school at a tuition cost of \$225, plus transportation expense of operating the bus 60 miles daily. Calvin Stripling who also taught formerly at Roaring Springs, has been employed by the Floydada school system and will drive the bus daily from here. It is estimated the overall cost during the term for the eight students residing here will be a minimum of \$3,000.

Plants Improved

Both school plants here have been repaired during the vacation season. Vinyl tile has been installed in seven rooms in the grade school building, and floors have been sanded and conditioned in four high school rooms. The school campus is also in excellent condition. Supt. Ezzell declared.

Old Desks Available

Those holding sentimental attachments for the rapidly vanishing way of life 20 to 30 years ago, may now own a symbol of that era. And at small expense. For only \$1.50 it is possible to buy an antique desk from the Matador school. Many of the desks have old carvings by former students, some of whom may have grandchildren attending classes here. The desks are in good repair. Purchase may be made by contacting building custodians. Approximately 200 desks are available for disposal.

Some light on a dark subject

Ever wonder why some pills come in clear, transparent bottles, while others hide behind brown or dark-green glass? It's no accident, but by design. Why...? Simple daylight can reduce the potency of some medications. Consider how sunshine fades a rayon print, for instance. Thus, where needed, we use dark bottles, not to hide anything, but to preserve the medical effectiveness of the drug your physician prescribed for you. This is but one of many precautionary measures that are taken to provide you with the best in pharmaceutical service.
