CAMPUS CUES

Congratulations to Linda Kay Rattan for being crowned Football Queen. MHS is very proud of Kay.

Freshmen have a knack for almost anything. It was learned the other day that there is a poet in the freshmen class: Kenneth Davis. Here is a poem written by Kenneth: "When I die don't bury me at all. Just put me in the study hall. Put my English book at my feet. And tell Mrs. Timmons she can't be beat. Put my Algebra book at my chest, tell Mr. Bradshaw I did my best. Put my Science book at my head and tell Mr. Moore that's why I'm dead."

"Twirp Week" is coming up February 23-27, and some girls have already asked for dates. A sign seen in the hall to remind the girls to get busy goes like this: "Announcement—Work for the car. The day isn't far. Start saving your money. To spend on your honey." "Twirp Week" is going to be full of fun and parties. The boys will feel as if they are on a vacation when the girls start buying popcorn and gas.

Anita Martin returned to school Tuesday of last week. The students of MHS were glad to see Anita again.

Here is another congratulation to Pat Seigler for being a runner-up in the Merit Scholarship competition.

MIKE'S MUSINGS

by Mike Groves

Some high school boys and girls have been going in for slumber (?) parties. After the football banquet Harry, Hamilton and Ronald Bailey were hosts for the boys and Sue Cross was hostess for the girls at slumber parties. Wednesday night, February 4, James Bearden invited some MHS boys to his house for the night. Lots of sleepy-eyed students have been coming to school in the mornings.

All of the boys are either griping about too many dates or not enough dates during the coming "Twirp Week". The girls should start asking now for dates if they haven't, for the supply of available boys is going down. "Twirp Week" will give both boys and girls a taste of how the "other half" feels on dates.

The football jackets finally came in. The long awaited awards were presented Tuesday evening about 3:20. If the weather seems warm, yet an MHS boy or girl is wearing a red jacket, you'll know that it's a football jacket.

In closing, here's a "nugget of gold" to think about. "When you get to the end of your rope, tie a knot in it and hang on."

Seigler Runner-Up In Merit Contest

Pat Seigler has been commended by the National Merit Scholarship Corporation for his outstanding performance on a nationwide test of educational development.

The Matador High School student was the Texas runner-up in the 1958-59 Merit Scholarship competition. John M. Stalmaker, President of NMSC, believes that the 10,000 students who received the commendation rank are in the top two or three per cent in ability of the senior students in

their respective states and should be given every encouragement to continue their education.

The annual National Merit Scholarship competition offers the largest system of privately financed scholarships in the United States. The program is open to all high school seniors in the United States and its possessions.

The students receiving Certificates of Commendation are the next highest scorers, after the Finalists, in each state.

Finalists and Commended students receive many scholarships apart from the Merit Program. NMSC estimates that over \$5 million in scholarships for the freshmen year alone will be awarded these students in addition to the regular Merit award.

LIBRARY LAPSE

by Judy Hobbs

The book for this week is "Dawn of the Morning" by Grace Livingston Hill.

As the book begins, Dawn Van Rensselaer is entering a Quaker school for girls. Her mother has died and her father has remarried. She is going to this school to try to mend the break in her heart.

Dawn grows up in the Quaker school, and there she meets a man who claims to be in love with her. His name is Harrington Winthrop, and he intends to marry her against her will.

The plans are made, but the day before the wedding, Harrington is found guilty of having a wife and child. Dawn is not told of this, and she marries Harrington's brother, Charles, who is really in love with her, thinking it is Harrington.

Dawn is really in love with Charles, but she thinks he married her out of pity, so she runs away.

Every page is full of suspense, as each time Charles almost reaches her, she is gone again.

If you are interested in knowing whether Charles and Dawn are ever reunited, the book may be found in the MHS library.

"We have some real treats in store for you tonight, kids. About Your Health

A weekly public service feature from the Texas State Department of Health.
Henry A. Holle, M. D., Commissioner

Rabies is serious business, but there is a lighter side. Early this month for instance, the laboratory technician whose duty it is to prepare the brain tissue for microscopic scrutiny on suspect rabies cases was enjoying a game of dominos during the noon hour.

He was interrupted and informed that there was a "head"

outside, but desiring to finish the hand he said he'd be out in a second. He would have forgotten the game had he known what kind of head.

Because two ladies were waiting with a real genuine African lion's head. It seems that the lion had been raised from a cub, but lately turned on its master and had to be destroyed.

There was little chance of rabies, but it pays to be sure about any suspect case. So the head was sent to Austin for examination. It was negative.

Lab technicians have examined fox heads, skunk heads, cat heads, thousands of dog heads and even a nutria head a short while ago. Among the strangest

was a deer head. It proved to be negative, but the man who brought it in insisted the horns be cut off. The technician was convinced the hunter just wanted a cheap way to get the horns.

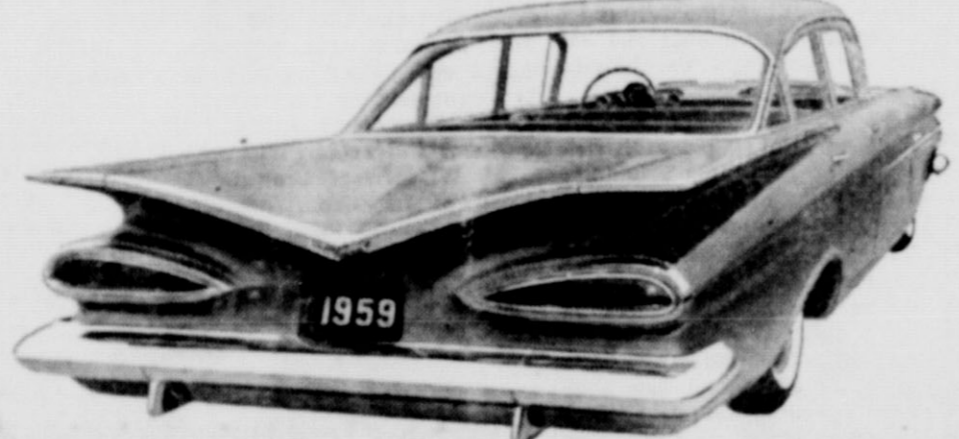

Winter and early spring see a slight rise in the number of positive findings of rabies in State Health Department laboratories. More effort is needed to inform and educate the public about the dangers of rabies and the means of controlling outbreaks.

Last year there were 491 laboratory cases of rabies plus reported clinical cases in animals.

GOES AND GOES AND GOES ON A GALLON!

Biscayne 4-Door Sedan shows the Fisher Body beauty of Chevrolet's lowest priced series for '59.

CHEVY'S NEW HI-THRIFT 6

More miles are back in a gallon of regular-grade gas—up to 19% more—and Chevy's new Hi-Thrift 6 engine puts them there. It also gives you more "git" in the speeds you drive the most.

Here's an engine that always seems able to coax extra miles out of a tank of regular-grade gas. In fact, if you're one of those drivers who keep tabs on things like gas mileage, you'll soon see for yourself that this new Hi-Thrift 6 gets up to 19% more miles a gallon.

Another thing you'll like about this 135-h.p. 6 is the

extra pep it gives you for passing and climbing hills. This is due to higher torque at normal speeds.

It may be hard to believe anything that looks and moves like this '59 Chevy can be such a stickler for economy. But—whether you pick the Hi-Thrift 6 or a vim-packed V8—this is just one more reason Chevy's the car that's wanted for all its worth. Stop by your dealer's and see.

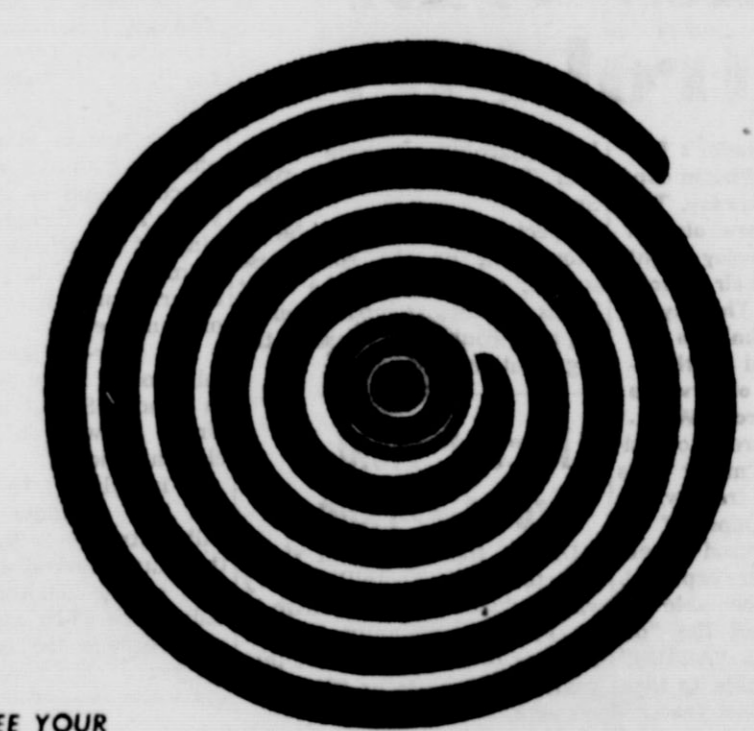

The smart switch is to the '59 Chevy!

Rogers Points Out GOP Farm Snafu

The following article is by Walter Rogers, Member of the House of Representatives, and is addressed to the people of the 18th Congressional District, whom he represents.

THE FARM MESSAGE

The President sent the Congress last week another farm message. It was in keeping with her farm messages he has sent to the Congress in that it is a blanket endorsement of the policies of Ezra Taft Benson, Secretary of Agriculture. In this message the President used the memorandum submitted to him by Secretary Benson as a part of his message.

The message actually had two main points. The first point was the extensive criticism by the President of the present farm program in which the farmer finds himself. The second point is that the President underwrites the policies of the Department of Agriculture under Mr. Benson which have placed the American farmer in his present plight.

It will be remembered that Mr. Benson set up the soil bank and took great pride in claiming it as his author; yet, like many of his recommendations, he is now trying to sever all connections between his name and the soil bank. He has had full control and operation, insofar as the administration of the Department of Agriculture has been concerned for the seven years referred to, and the President has stood by him and given him every power he sought.

Under the circumstances, it is interesting to note that under the stewardship of Mr. Ezra Taft Benson, the costs of the farm programs did increase from 306 million dollars in 1952 to 1 billion 936 million dollars in 1956, according to the Agricultural Statistics published by the Department of Agriculture. This publication was under the Stewardship of the same Mr. Benson, so they are his figures.

The cost remained well above 1 billion dollars in 1957 and 1958. It is also well to note that under the stewardship of Mr. Benson, the Department of Agriculture has increased its employees between 1952 and 1959 by almost 25 percent. In other words, Secretary of Agriculture Benson is now employing 18,500 more people on the public payroll than were employed by the Department of Agriculture when he took over to settle the farm problems.

It would seem to me that if the present Administration wanted to solve the farm problem, it would practice some of the business principles that it preaches. For instance, the operators of any business would certainly have difficulty in explaining to the board of directors why a manager should be kept on the payroll, who had increased the labor force by almost 25 percent and multiplied the cost of a program by more than 5 times.

Homemaker's Hints

By Ruth Wilson
Home Demonstration Agent

You can create your own "rosy glow" these days by using colored light bulbs. If you are using these, here are a few points to consider. Colored bulbs produce about one-third less light than white ones of the same wattage. For this reason specialists suggest that homemakers buy 150 watt colored bulbs to replace 100-watt white bulbs.

Specialists recommend using colored bulbs in ceiling and wall fixtures and in lamps that are used for decorative purposes rather than for reading, sewing or other demanding visual tasks. Never neglect the principles of good lighting simply to create decorative color effects.

Jan Barton, one of the outstanding 4-H club members in Texas, makes another trip this week in connection with her office of Vice-Chairman of the Texas State 4-H Council. Jan will represent some 200,000 youth in Texas that are affiliated with 4-H, FFA, and FFA as she attends the San Antonio Rural Youth Day Activities in San Antonio February 13.

HUMPS ARE GREAT! BUT...

NOT FOR CARS

'59 MERCURY CUTS THE HUMP IN THE FLOOR WAY DOWN. FIRST CAR WITH REAL COMFORT—EVEN FOR CENTER-SEAT PASSENGERS

For 1959, Mercury's got what the other new cars forgot. For example, Mercury is the only new car that remembers "the man in the middle."

Other new cars still have that big tunnel-hump in the center of the floor. The so-called "6-passenger" models are only comfortable for 4 passengers. Center-seat passengers ride with their legs doubled up. But Mercury has cut the hump in half—shrunk it into a footrest. Seat cushioning is deep and soft. There's solid, stretch-out comfort wherever you sit.

Stop in. See all the ways Mercury turns problems into pleasures: windshield wipers that clear even the center, doors that are easy to get through (wider than in the costliest cars). And so much more—all at a price that 2 out of 3 new-car buyers can afford.
