Phony Inspectors Reported In Area

Area consumers are advised to be on the lookout for individuals that are impersonating utility company inspectors. We have received reports that there have been phone calls and door-to-door appearances by these "phony" inspectors. They may pass themselves off as inspectors for the state government or from one of the local South Plains utility companies.

Consumers have found that after the alleged inspection, there were valuables missing from their home. Consumers should note that no utility company or state agency will contact you to make an inspection. Inspections

are only conducted at the request of the consumer. Consumers who are contacted by the imposters should contact the BBB office immediately.

Also, South Plains consumers are receiving phone calls from a company called Eastern Travel, Inc. This company offers vacation trips to Las Vegas for a fee of \$89.00. Consumers are told they have been won something which is not true. We advise caution in purchasing a trip. Consumers should make sure they realize what they are buying and what is not included in the trip. For further information contact the BBB office.

Dear Matador Friends,

To those we know and especially our neighbors, our home has been Matador since 1925 and still is, so I have many friends who are still in Matador for 55 years and of course many are dead and with God in Heaven. That's not a bad place to be, even tho they are missed in Matador.

Our closest neighbor for 55 years is Hazel Donovan. That gal is our Sweetheart. Also friends alive we recall all of those 55 years are Ollie Echols Birnie, Bill Pipkin, and Opal, Marvin Patton, Alfred Barton Jr., (Bill, Marvin, Alfred golfing friends).

In 1926 D.I.W. Birnie, fresh from Scotland, where golf originated, decided Matador needed a golf course. So we organized a golf club with about 40 members. He and I were the only ones that had played golf and we had a few clubs -- Mashie, Mid Mashie, putter and driver. We took no tapes, went East of Matador, made deal with Mr. J. E. Jameson to have a 9-hole golf course, rented \$75.00 a year. We started in Southeast corner of this pasture and walked 400 yards Northeast to a suitable place for a green, then East across a gully for another green, 3 par, 180 yards. Then Northeast about 400 yards for another green, 4 par. Then West about 200 yards. Then West about 400 yards for another 4 par. Then West over 500 yards for another 5 par. Then East about 400 yards for another 4 par. Then Southeast for over 500 yards for No. 9. Less Guthrie took contract to make all greens 30 feet in diameter, scrape ground to 4 inches deep, mix sand with distillate or kerosene oil, and put on 4 inches of the mixture. He said he made a bad deal and lost money. Any how, we had a golf course.

Some of the members gon to Glory are Harry Campbell, D. E. Pitts, Dr. E. W. McKinsey, Knox Crews, Mitch Glenn and of course D.I.W. Birnie.

During 1930's depression we had plenty of time to play golf. Elmer Stearns (gone) was our best golfer. We formed a golf league - Matador, Paducah, Spur, Floydada, Lockney, Crosbyton, Post. Matador won the League every year. Elmer Stearns was never beaten. We had 10 golfers from each town to play in League. Many took the Lord's name in vain and lost money because they could not beat Elmer. And Post had the next best team as they had some golfers from Scotland.

Later, ladies took up golf and that was the reason for the course South of town. Marvin P., Bill P., Little Alfred, Joe Campbell are the only members left to play from the first club.

Pappy Campbell in contest East of Matador had a match with L. R. Bishop. I happened to meet them coming to 9th hole. Bishop took the Lord's name in vain. And then he said, this is not fair - you matched me with a pro. I've lost every hole. Pappy had a jug of water wrapped with a toe-sack carrying it in his golf bag.

Harry Campbell's ambition was to beat D. E. Pitts. Finally he did and this ended his golfing career, and Abie as he was called.

Caddie fees were 15¢ for 9 holes. Little Alfred would ride a horse 3 miles to caddie for me, his fee was 15¢.

We expect Matador to be our home as long as we live. Our prayer is 25 years more. My health prevents me from living in Matador, which we love. We tell our many friends in Zapata we love Matador where our seeds were planted and our roots are still there. I could write a book of our experiences there.

I am a Charter Member and still a member of Matador Lions Club. I could be the only surviving charter member unless E. M. Rice, the Club's first secretary, is still alive. Rat Whitworth was secretary for many years. Rachel Patton was Club Sweetheart. They put their hearts and souls into their jobs. Some of the famous presidents were Joe Murrell, Elmer Stearns and many more likewise Tailtwisters - I was one. Fines were 10¢, then later Ralph Stapleton and Henry Ford were the most famous and vicious. Ralph, by vote of club, fined some members \$20.00, of which I was a member, as many others. \$20.00 was the maximum fine. If you bought a new car, \$20.00, picture in paper, \$20.00, and many other offenses. Also, I belong to Matador Masonic Lodge (about 55 years), also Scottish Rite, Dallas.

We are members of the Church of Christ, wherever we are, in Matador, Zapata, or on the road. I expect to make Matador our home the rest of our lives, our prayers 25 more years. I soon will have one year on my next 25, making me 105.

Praising R. E. Campbell Sr., the present Baptist Church should always remain as is for a memorial to Pappy Campbell. I know he put his heart and soul in building this church. As my Dad did back in Kirkland, Texas. They asked my opinion about tearing down this same church and building another Church of Christ in Childress. I objected as I thought this building should have been left to my Dad who did as Pappy Campbell. They refused, and Kirkland can never mean as much to me as before. Incidentally, it resembled the Matador Baptist Church very much.

God Bless all our friends in Matador, Motley County and West Texas.

Down On The Farm: Computers

Innovative farmers are hitching their tractors to computers—and consumers may reap the benefits in prices lower than they would otherwise be.

Alabama cotton grower Hugh Summerville, for example, now runs his 700-acre farm with a collection of programs he developed.

"I'm hoping that computers can help farmers provide the food and fiber needs of consumers by allowing us to stay in business. Our biggest problem is income erosion. We've been hard hit by inflation, but unlike other industries, we can't pass along any cost increases. Farm commodity prices have not increased enough to keep pace with rising costs.

"If computers give us improved efficiency, we can keep our costs down—and this, of course, helps all consumers," Summerville explained.

Quite a few cotton growers and other farmers are learning to use personal computers. In fact, Summerville's latest project is the development of farm-oriented programs to sell to other farmers.

"Small personal computers will do anything that the big ones will—they're just a little slower, and before you can really use them in your farm business, you have to develop pro-

grams for your specific applications.

When I got my computer in 1978, I didn't even know how to operate it. All I had

was the manufacturer's instruction book. With the help of an employee who had some computer experience, and by reading a lot of books and magazines, I learned how to program it.

After a while, I was able to write programs and now I'm beginning to make some of my farm programs available to other farmers.

One of the top jobs Summerville assigned to his computer involved tax management. Farmers traditionally have problems in tax accounting because they frequently don't know how much profit they've made on their crops until after the first of the year, when it's too late to time their purchases for favorable tax treatment.

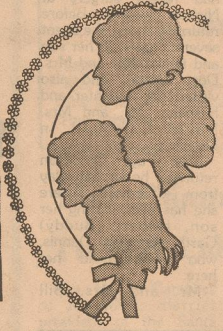

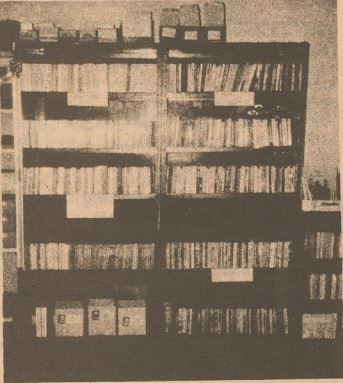

Summerville's computer also keeps track of every penny spent on the 25 or so individual fields on his farm. With it, he can gauge the amounts of fertilizers or other farming practices needed in each field for best yields.

"Computers certainly aren't magic; they depend on the quality of information we feed into them. But they can keep track of a lot of information, organize it logically, and present it so that it makes sense. In my opinion, the computer is the biggest advance in modern farming since tractors replaced mules!"

"It is always incomprehensible to a man that a woman should ever refuse an offer of marriage."

IRS Publications Answer Farmer's Tax Questions

Today's modern farmer has many unique tax situations, and a free publication from the Internal Revenue Service can help answer the questions that arise from these situations. IRS Publication 225, "Farmer's Tax Guide," covers a wide range of subjects, such as soil sales, crop destruction, chicken purchases, casualty losses and share farming. Examples of how to prepare the Form 1040 and related schedules, and listings of

important tax dates which affect farmer's throughout the year are also included. "Farmer's Tax Guide" is written in a clear, understandable style and can be a source of valuable information for today's farmer, according to the IRS.

This handy reference can be ordered on the order form in the tax package, or by calling the IRS Tax Forms/Information number listed in the local telephone directory.

Telephone Customers Get No Tax Cut

The nation's telephone customers will not get a one percent federal excise tax reduction on telephone service during 1981 as expected.

President Jimmy Carter signed the Fiscal Year 1981 Budget Reconciliation Bill Dec. 5 which contained a provision maintaining the excise tax on telephone and teletypewriter service at the two percent level in effect during 1980.

The tax, originally 10 percent, was enacted as a "temporary" measure during World War II. Congress voted in 1970 to

gradually eliminate the tax, reducing it one percent per year beginning in 1973 until completely eliminated in 1982.

The continuation of the 1980 two percent tax level during 1981 delays elimination of the tax, and is the first time the reduction has not been made on an annual basis since 1972.

General Telephone Company of the Southwest estimates continuation of the two percent level means its customers will pay \$4.5 million more in excise taxes during 1981 than if the one percent reduction had occurred.

Cattle, shells, nails, hatchets, tobacco, furs, rice, tea, and dates have all been used for money at one time or another.

Food budgets make it big... with these values!

EVERY MATERIAL HAS ITS MARKER

There is good news for people who want to make their mark in the world. Specially-made industrial marking products are designed to work just about anywhere and on most surfaces.

Skip-free marking, even on grease, is possible with "Paint-On" Crayons. The markers work like a crayon, yet dry like a paint on wood, stone, asphalt, cardboard, lumber, metal and other hard or smooth surfaces. They cover completely and last through hail, sleet, snow and rain-storm.

Innumerable uses can be found for another remarkable product—Dixon's Redi-Mark broad and fine point felt-tip industrial markers. They lay down a permanent mark in one of eight rich colors. The marks are fade resistant and won't wash off. Neither will they flake

Special marking crayons for heavy duty applications are lead-free, resist water, fading and smearing—and last up to ten times longer than the ordinary crayon.

If your marking problems seem insurmountable, you may want to present them to a representative of the Joseph Dixon Crucible Co. for analysis. Technicians at Dixon have been solving marking problems for the world's industries for almost 150 years. Chances are they can solve yours.
