Jack Spray Is Elected In County's Only Race

Gov. Allan Shivers' political machine—the people of Texas, went into action Saturday. It renominated him for an unprecedented third term with an impressive lead of 92,400 votes over Ralph Yarborough. A total of 1,454,974 were cast in the governor's race.

Motley county voted for Governor Shivers 62 plus per cent as compared with the state average of 53.15 per cent. Shivers received 547 votes as compared with Yarborough's 318 votes. One box, North Matador voted over 2 to 1 for the Governor. Roaring Springs voted over two to one for Shivers. Only two boxes, Flomot and Union Corner, favored Yarborough.

In the county's only runoff campaign, Jack Spray of Whiteflat was nominated county commissioner over incumbent J. E. Monk by a majority of 17 votes. Spray received 119 votes to Monk's 102. Motley county had approximately 260 qualified

voters who did not go to the polls, as compared with the first primary vote of about 1125. The total county vote Saturday in the governor race was 866.

Associate Justice Few Brewster was nominated for re-election by 777,476 to 428,301 over Austin Attorney Alfred Scott.

Here is the way Motley county voters marked their ballots in the Saturday 2nd Democratic primary: Commissioner—Whiteflat—Monk 16, Spray 75; Flomot—Monk 81, Spray 37; Absentee votes—Monk 5, Spray 7.

TRAIL DUST

By DOUGLAS MEADOR

Sobbing on the shoulder of a melancholy violin spoke the things men's lips never speak; the mystery and loneliness of the soul. Dancers moved in a sea of futility, beneath swinging lanterns and boot heels scraped rough pine flooring like the regular beating of waves on a rocky shore. Tall cowboys dropped coins into the musicians' hat while their eyes spoke appreciation and deft fingers lifted plaintive notes from inlaid strings; only the violin cried. It peeled away layers of the heart with a knife of painful beauty and left tender dreams drifting in a sea of futility. Colors of dust and sweat and the smoke of camp fires clung to men's rough clothing but the light wore its own special fragrance. Against the cheek of circumstance the violin breathed its half-prayer, half music.

An equitable judge must deliberate in order to weigh his own weaknesses with the evidence of guilt.

A newspaper church advertisement warns that improper spiritual treatment can develop more harm than good. The statement may be true but it is highly unethical since the burden of proof rests too lightly on assumption. A physician to the soul, unfortunately, can only prescribe treatment. The patient's cooperation is the only medication.

The years have come gently with such devastating certainty that I now worry at length without being able to remember the cause of my anxiety.

Some demagogues encounter complications in their careers when they attempt to adjust a halo over horns.

Tuition to the school of experience is paid on the daily basis, including students who return for a refresher course.

Truth is a chisel cutting into the rustless steel of time and leaving a salient monument to inspire further progress in the advance of society.

KENNY METHOD IS BASIS FOR BEST POLIO TREATMENT TODAY

MINNEAPOLIS, MINN.—Men of medicine generally today accept the Kenny Method as the basis for the best treatment offered polio patients anywhere in the world.

Few medical ideas in history gained momentum and prestige so rapidly as the Kenny concept and treatment for this disease. As was characteristic of the late Sister Elizabeth Kenny, however, she personally always felt that the progress of her efforts toward a cure was too slow.

On the other hand, as is characteristic of the medical profession, once the effectiveness of the method was established, it became the basis for polio treatment everywhere.

Early efforts to win approval for the method were spearheaded by the Sister Elizabeth Kenny Foundation, which was established in Minneapolis in 1943. Previous to that, Sister Kenny was afforded quarters for her work at the Minneapolis General Hospital, an institution maintained by taxpayers of that city.

The Foundation provided funds for the establishment of the Elizabeth Kenny Institute in Minneapolis, where, as of today, more than 8,000 polio patients have been hospitalized and given Kenny treatment.

The Institute is the Kenny Treatment center for a large Upper Midwest area and serves also as the international training center for Kenny Therapists, those indispensable men and women to whom Sister Kenny passed on the heritage of her skill. Other thousands of patients have been cared for at Sister Kenny centers in various states across the country.

"Abandonment of immobilization" in the treatment of polio was

the objective of Sister Kenny's endeavors. The goal has been accomplished to such a degree that many of those now treating the disease have forgotten that it was the practice to carry out prolonged immobilization.

There remains little doubt but that Sister Kenny's determination and the force of her character were important factors in helping focus on polio the attention which lent work to being done and the day is yet to come. In the meantime, polio will remain a scourge against which the Kenny Method will continue the best combative force.

The annual polio fund appeal of the Kenny Foundation, now under way, will provide the funds necessary to continue and expand the Kenny organization's program.

That program includes the training of additional registered nurses and physical therapists to become Kenny Therapists who, under medical supervision, administer the treatment, sponsoring of medical seminars, conducting research and providing emergency assistance to areas where incidence of the disease is at high level.

Even after a proven vaccine has become generally available, there will be work for a period of years to give all possible assistance to what are known as residual polio cases, those to whom Kenny Therapists can give continuing aid with a view to establishing maximum recovery.

The Kenny Treatment is made available to polio victims, regardless of age, race, creed or financial circumstances, upon request of a physician.

and Mrs. John Brogdon and Mr. and Mrs. Lewis Clifton, all of Roaring Springs.

Miss La Nelle Rattan was maid of honor and Cpl. Ralph Bradley of Fort Hood, Texas was best man.

The bride was attired in a ballerina length dress of turquoise taffeta, fashioned with fitted bodice, low V neckline, and three-quarter length sleeves which were tied with a bow of matching material. Rows of shirred ruffles extended from the empire waistline, to the length of the circular skirt. Her accessories were black and she wore a sixpence in her shoe for good luck. She also wore the traditional something old, new, borrowed and blue.

Miss Rattan wore a white linen dress bordered with white seed pearls, fashioned with a low neckline and a ballerina length skirt.

Mrs. Clifton attended school at Flomot and also Matador High School. Mr. Clifton was a graduate of the 1951 Roaring Springs senior class.

After a short trip, Mr. and Mrs. Clifton returned to Matador, where they are at home in the Bennie Cox apartment.

Kenny Therapist Highly-Trained Aide to Doctor in Polio Cases

MINNEAPOLIS, MINN. — Because acute polio patients are very sick people who require regular care, in addition to the special techniques of the Kenny treatment, the Kenny Therapist is primarily a highly-skilled assistant to the physician.
A corps of over 100 Kenny Therapists already has been trained to administer the full Kenny treatment as originated by the late Sister Elizabeth Kenny, Australian nurse.
Annual public appeals provide funds that make it possible for the Kenny Foundation to train more urgently-needed Kenny Therapists and to carry on other phases of the program. These include sponsorship of research and medicine seminars.
As the Kenny Foundation trains additional Kenny Therapists, too, will benefit to polio victims generally accepted as the basis for the best treatment offered polio patients anywhere in the world.

Publisher Named District Chairman Of Bond Campaign

Morrie Higley, publisher of the Childress Index has been named District Chairman in an 8-county district in the new stepped-up campaign for U. S. Savings Bonds throughout Texas.

The new district chairman will help give leadership to all phases of the Savings Bonds program in the district, which includes Cottle, Childress, Dickens, Hall, Kent, King, Motley and Stone-wall counties. "Times throughout the world now are, and for the next several years probably will be, as critical as any experienced during the past quarter of a century. Therefore, it is highly essential that everyone of us do everything we can to keep ourselves, our community, our state and our nation strong," Higley said. "Purchasing Savings Bonds is a way that everyone can help insure financial and economic strength.

"Purchases of Saving Bonds must be substantially increased the remainder of the year in order to put the county quotas and the Texas goal over-the-top. The 1954 quota for the district is \$937,000 and for the state is \$199.3 million. The national goal calls for "A Billion More in '54."

New Trademark For General Telephone

A search for a simpler, easier to understand and remember trademark for General Telephone System has successfully ended with the adoption of a new, trapezoid shaped trademark. The new trademark, which bears a schematic drawing of a telephone handset centered between the words, "General System", will appear in this month's General Telephone advertisement in this newspaper.

The old General trademark was circular in shape with a telephone pole and crossarm inscribed on the circle and the lettering "General Telephone System" around the circle.

Not only will the new trademark be used in all General advertising, but eventually it will go on all stationery, forms, bulletins, annual reports, dividend enclosures to shareholders, building plaques, vehicles, and telephone booths throughout the System.

New Slant Given Flower-Bee Story

Our self-fertile cotton plant can reproduce its kind without help from winds, insects, or animals to carry the fertilizing pollen from the flowers of one plant to those of another.

Even so, cooperative experiments by ARS and Arizona experiment station entomologists show that it may be profitable to give nature some assistance. At the U. S. Southwestern Bee Culture Laboratory, Tucson, yields were increased 22 percent through accidental cross-pollination of cotton by honeybees

seeking nectar and pollen from the flowers.

Bees had their greatest effect on early flowering cotton, causing 20 percent more of the blossoms to develop bolls. These early-set bolls contained an average of 23 seeds—4 more than bolls from plants denied bees. Average lint yield was boosted 21 percent by the insects.

Research plots were grown in plastic-screen cages. The scientists are planning further experiments to see whether the pollination honeybees are effective in raising yields under ordinary field conditions.
