THIRD YEAR—No. 13

MATADOR, MOTLEY COUNTY, TEXAS, THURSDAY, JUNE 1, 1967

PRICE SEVEN CENTS

TRAIL DUST

By DOUGLAS MEADOR

A friend tells of an East Texas
...who had been given five hundred silver dollars by his late father.

The amount of money once considered
...sufficient to feather a nest, would hardly pay for the air conditioning today.

The grinding mills of chance prove
...some of the gold dust that falls to the sandals of those who mean to have taken an elevator to the heights.

The naked truth could at least
...be more modest when strangers whom we are trying to impress, are present.

The beauty of success is often
...established by constant polishing against mistakes that rub hard against the grain.

Letting off steam is not recommended
...as a method for taking the pressure off the routine of daily life.

A pocket bill clip is about the most useless article I have ever
...seen. Greenback fades before I can get a clamp on it.

Most smokers who have "kicked"
...the habit do not carry matches or a lighter. Perhaps the suggestion of a habit is where treatment should first begin.

Officers Installed

"Knowledge of our duties is the most essential part of the philosophy of life. If we escape duty we avoid action," said Miss Glenn in introducing Mrs. Grundy for the installation service.

Using the club flower, carnation, as a symbol of sewing and reaping, Mrs. Grundy explained that for a theme she was borrowing that of the district, "What you sow today—tomorrow you reap," taken from 2nd Corinthians, 9:8.

"The quality of an organization is determined by its leadership."

PLAY AT HAMLIN

Tuesday, May 23, Tommie Edwards, Mary Meason, Catherine Bird, Lucretia Grundy and Hazel Donovan went to Hamlin for their Guest Day. There were players from Stamford, Sweetwater, Knox City, Abilene and Haskell. Their course is a challenging one—what with play across and along side of the lake, and BIG trees, one of which swallowed my ball—at least I never did find it after hitting the tree—even looked in the mistletoe, thinking it might have lodged there!

After a most delicious lunch, trophies were awarded. Catherine won low putts (29) in 18 hole Championship Flight; Lucretia received golf socks for having the most putts in 9 hole flight—and Hazel tied with Arnell Denton of Knox City for putts (17) and had to putt the tie off. We tied on the first cup.

At the LUNCHEON, Sis McClellon presided with her delightful charm, wit and humor. The tables were most unique in their decorations and depicted characteristics of area golf courses—as Sis said, "What we saw and remembered" at HEAD table was a windmill which looked like it would really run (owned by Norris Hildee). Sis said it was for the lovely old windmill on No. 1 at Airport Club, "which makes us feel young and gay again and gives us a nostalgic feeling" had our sand (real) green by the mill.

PADUCAH was shown with sand greens—AND THE OUT HOUSE! VERNON had sand traps and a ceramic bull—as a wild bull got

CHILDRESS GUEST DAY

GRAND morning for playing and we surely did enjoy being there. Some played bridge while waiting for everyone to finish playing, and others went to town.

On the mantel were green and gold tee with wood club. Sis read the poem, "Golf" and players were amazed as she described each club. Luke Barry was recognized, came to eat lunch and had some heart attack) and was chairman of the girls for play this year.

After a MOST delicious lunch Mildred Brown, Tournament Chairman, presented the trophies, hole flight, Mary Meason winner (48 gross) and S. J. Paducah, was runner-up (54) and Lillian Thacker won putts (18) in 18 hole play in Championship 1st flight, for runner-up in 1st tie Louie Harp won the draw.

Malathion has the lowest oral and dermal toxicity of any cotton insecticide. BROAD REGISTRATION. In addition to the U.S.D.A. registration for control of thrips and boll weevil on cotton, Malathion is the only ultra low volume insecticide registered for use on 20 food and forage crops and beef cattle at 2 to 16 ounces per acre. FREEDOM FROM DRIFT RESIDUE WORRY. Drift residues to adjacent food or forage crops or cattle present no problem at recommended rates. ALL-SEASON USAGE. Malathion has given outstanding control of boll weevil on cotton when used early for over-wintering weevil, later in the season for subsequent broods and up until killing frost in diapause control. ECONOMICAL. Cost of material alone does not establish true economy. To the cost of material per acre must be added... proven effectiveness in 3 years of commercial use... low hazard to the applicator and all target areas... broad registration, permitting application even on beef cattle... freedom from drift residue worry... and all-season usage on cotton from emergence to frost. These advantages PLUS low per acre cost makes Malathion LV Concentrate the No. 1 economical, ultra low volume insecticide for boll weevil control.
