Spearman Teachers Shift Positions To Fill Vacancies

The Spearman school board and administration, used some home-town talent to fill vacancies in their school system. Eddie Clemmons was elevated to high school Principal, G. W. Robinson accepted the Jr. High Principal position, and Ed Moore the "Kentucky Wonder" accepted the head basketball coaching job for the Spearman boys this year. A new assistant band director was hired, and the board voted to keep the \$1,000 above state pay for the local teachers.

Most everyone is familiar with Eddie Clemmons, the new high school principal, but for those who don't know Eddie we have some information on him. He has served his community well as the Jr. high principal. Eddie has excellent public relations with the community, and we appreciate him so much at the newspaper, as he was first to call us when some of his students won an honor. And, he has so many honor students in his Jr. high, we probably missed half of them on several occasions. This Jr. high school enjoyed a great deal of success in the field of athletics as well as literary field.

G. W. Robinson, the new Jr. High Principal, was a surprise to your newspaper; he had previously held this

job, and turned it down, but readily accepted it this time. G. W. is almost a native to Spearman, he loves the community, the school, and is a collector of Indian Artifacts, which he keeps in his class rooms for his pupils to study and observe. G. W. is another of those top men in our school system, and we all are surprised and pleased that he has accepted this position.

Ed Moore "the Kentucky Wonder" has accepted a position that all of the school board, the fans and the players themselves feel will be a re-building position. Ed was coached by Adolph Rupp, and comes from Kentucky where they give you a basketball when you are old enough to hold one, and tell you to "run and shoot" the thing through the hoop. He has had phenomenal success in his Jr. high program, and the entire community plans to back Ed with his new "run and gun" basketball program.

The new assistant band director Dana Reynard is from West Texas State University. He was commissioned a 2nd Lt. in the army, and went right into the service from W. T. He comes highly recommended for this position, and the board feels that he will be a big asset to our school system.

SHIRLEY ABBOTT, of Spearman, won 2nd place in the state Twirling Contest in Austin over the week-end. Shirley is the daughter of Mr. and Mrs. H. O. Abbott of Spearman.

Ring Around The Collar

This 193-inch (that's a little more than 16 feet) steel ring will eventually become the "tire" on which a giant industrial drum will turn. Here a workman at Standard Steel of Burnham, Pa., is harnessing the ring to a lifting collar that will be hooked onto the hoist of an overhead crane. Then the crane will carry the finished 30,000-pound forging to a freight car for the trip to its new home. Standard Steel also makes specialty forgings for aerospace, aviation, nuclear, marine and power applications.

Eastern Star Meeting Held

Texas Oil and Gas Reserves Low

DALLAS--Texas crude oil and natural gas reserves are at the lowest points since the end of World War II, Texas Mid-Continent Oil & Gas Association reports in its new reference leaflet, 75 Facts About Texas Oil and Gas.

Distributed free to the public each year, 75 Facts is the latest in the series that highlights principal facts and figures on Texas' major industry.

But, if fact-seekers aren't happy with the current status of reserves, there are some pleasant facts, too. For instance, 75 Facts points out, oil or gas is produced in 211 of the state's 254 counties and Texas royalty owners received \$1.4 billion last year as their share of the production. Value of the 1974 production of crude oil, natural gas, and natural gas liquids was \$13.1 billion.

In addition, 75 Facts says, "Production, refining, and processing of Texas oil and gas generate jobs, economic vitality, and nearly \$1 billion a year in taxes to support state and local government and education in Texas."

And another fact: some 247,000 Texans are directly employed in the petroleum industry (one out of

every 18 Texas workers) and draw wages of \$2.7 billion annually.

The new 75 Facts covers eight major categories of industry operations and lists key facts and figures for each -- general, offshore, drilling, production, refining-processing, employment, economics, and taxation.

Distributed as a public service, the leaflet is a reference for students, researchers, government officials, industry employees, or just the mildly curious.

Copies of 75 Facts About Texas Oil and Gas may be obtained free from Association offices, 1341 W. Mocking bird Lane, Suite 1111-E, Dallas 75247

Doke Is Rotarian Speaker

Tim Doke, who recently returned from a ten month stay in Scotland as a Rotarian Fellow at the University of Edinburgh, shared with Spearman Rotary Club members some of his experiences at the Monday noon meeting of the Club.

Presiding at the meeting held at Eddie's Steak Garden was Pete Fisher with Chet Wyatt assisting as Secretary and Mark Neff as Program Chairman who introduced the speaker for the noon program. Members were reminded that the next meeting of the Rotary will be June 20th with a joint installation with Perryton being planned.

Mr. Doke, son of Dr. and Mrs. J. W. Doke of Gruver, explained that the Rotary Foundation Program is a private body within the Rotary community with approximately 100 fellowships and what courses of study they will pursue. He selected the University of Edinburgh for he felt that aside from its academic reputation, that he would have a common language with the people there—a supposition which was proved wrong with the Scottish brogue compounding any ease of conversation.

He was assigned a counselor who was a scrap metal dealer exporting mostly to Western Europe and Alexander Wilkie, a clothing merchant who became a fast friend of Tim's, occasionally playing 'squash' with him which Tim decided was a game, the object of which was to run the other fellow to death!

All Rotarian Fellows are ambassadors of our country and none is bound to pursue any particular study with Tim choosing International Law as his course of study there. He received no advanced degree as a result of his studies but all invaluable fund of knowledge. He found that various aspects do not come in the classroom only and he particularly gained much as a member of the "H.M.S. S. Pinafore" cast which included 85 British members and one from the U.S. -- Tim!

Three outstanding things left an indelible impression on Tim: (1) Scots have a slow-paced life and live each day for itself; (2) Scots have a definite sense of history and accept good times and bad times for what they are and where they are; (3) the opportunity of being "British" and adhering to British way of life to the point of even forgetting that he was an American which is actually the purist form of patriotism when one can look at one's country with all the bias of another country and still know that our American system is the very best!

In a brief question and answer session, Mr. Doke brought out that in the past three or four years, the Socialist State has been built up considerably and the government now controls all of industry and groups of all kinds. Wages are on an average one-half of ours and prices are either the same for various articles or two or three times as much. Gasoline is \$1.85 and imperial gallon which is 1/5 larger than our gallon approximately. Mr. Doke concluded his talk with appreciation for having been the recipient of the local group to participate in the program and back some area youth for this honor.

Sunday evening, Mr. Doke spoke before an interested group in Gruver at the Fellowship Hall of the Gruver First Christian Church which his father pastors.

How much of the revenue collected locally comes from property taxes?

The subject of taxes and operating costs has become a matter of major importance in cities and counties all over the country. Many of them are in financial difficulties and are going all out in their search for new ways of raising money.

In some communities, reconsideration is being given to various new forms of taxation that were proposed in previous years and were rejected at the time. As for the taxes that are currently on the books, they are being progressively increased.

In Hansford County, according to the latest figures from the Department of Commerce, property taxes account for 81.1 percent of all locally-raised revenue.

By way of comparison, in other areas of the country the amount collected through property taxes averages 63.5 percent of the total. In the State of Texas it is 60.0 percent.

The figures show that the property tax continues to be the mainstay of most local governments, producing a large part of their revenue.

The Tax Foundation estimates that \$51 billion was so-generated during the past year. That was \$3.8 billion more than was collected in the previous year.

According to the latest nationwide survey, there is a wide variation throughout the country in property tax revenue.

In Hansford County it amounts to \$339 per capita per year. Elsewhere in Texas it averages \$153 per resident. The United States average is \$205.

Although the property tax has been getting bigger in terms of total yield, it has been declining in importance in recent years as many communities have turned to sales taxes and local income taxes for additional operating funds.

The yield from these two has tripled in the last decade, the figures show.

The Tax Foundation notes that widespread demands for property tax relief have induced the Federal Government and some of the states to expand revenue sharing with local communities to help ease the pressure on this tax.

LIONS ENJOY PROGRAM

The Spearman Lion Club enjoyed the program brought by Wilson Buchanan, head of the North Plains Water District.

Program Chairman Clay Ghisler introduced Buck Buchanan who discussed the water need for the Hansford County area.

The club discussed entering the beautiful new Lions Club float in the Darrouzett and Perryton parades, plus many others in the area. Lion Hall is in charge of the float and he will have the beautiful float, complete with the queens ready to enter parades in the local area.

Also Lion Kirk plans to take his German made Mercedes to the big parade in Darrouzett.

RECORD LOW TEMPERATURE

Record low temperatures hit Hansford County this week with the temp. dropping to the low 40's on Wednesday morning. This is probably an all-time low for this time of the year, and we have had cold, damp rainy days along with the extreme cold.

Guests in the home of Mrs. Faye Lynch over the weekend were her son, Art and his fiancée, Karen Balwierczak and her sister, Paula Balwierczak of Irving.

\$11 Million To Protect Waterfowl

AUSTIN--A 1975 water bank program aimed at helping preserve waterfowl habitat has been announced by the U. S. Department of Agriculture (USDA).

More than \$11 million tentatively has been made available for the program to be concentrated in the north central, west of Red River and Mississippi River waterfowl flyways.

The program, first conducted in 1972, compensates participating farmers for maintaining wetlands and providing additional habitat for nesting and brooding places of migratory waterfowl.

Agriculture Commissioner John C. White said state, federal and private conservation wildlife agencies will be consulted to assure coordination of the program.

The USDA Agriculture and Stabilization and Conservation Service administers the water bank with planning assistance and technical services provided by the Soil Conservation Service.

Speaker the next regular session. I would predict that he will be elected for a second term as Speaker of the House.

The 64th Legislative session has produced major legislation in several areas including constitutional revision, public school finance, utilities regulation, mass transportation and medical malpractice insurance. I have supported efforts to revive constitutional revision and an improved proposal will be submitted to the vote of the people on an article-by-article basis this November for the first time in 100 years.

The basis for the public school finance bill as finally passed is the ability to pay by local school districts. The ability to pay taxes is based on the ad valorem tax. Since the ad valorem tax results in a tax primarily on real estate, the rural areas of the state including our district, contributes a disproportionate share of the cost.

Some significant progress was made on the medical malpractice insurance problem. The public utility commission bill provides an option for local municipalities but extends original jurisdiction in the commission on telephones, and unincorporated areas. The regulation of gas rates is retained in the railroad commission.

A record number of bills were passed by this Legislature concerning and affecting many different areas and problems. I am sure that you will be receiving information affecting your areas of concern and interest within a short time.

Now that the session is over, we will be moving back to Perryton. The mailing address there is P. O. Box 520, Perryton, Texas 79070 and the telephone number is 806-435-5535. The Austin office will be open on a part-time basis. The address of the Austin office is P. O. Box 2910, Austin,

Texas 78767 and the telephone number there is 512-475-3127. Please call or write if there is any help we can give you on Legislative problems or state matters.

Last but not least, I appreciate this paper printing these weekly legislative reports as a public service.

Now, back to the panhandle and the best folks anywhere.

Fly The Flag

Be responsible for making of color--red, white, and blue that is--especially for Saturday, June 14, a day

Flag Day 1975. Notwithstanding the too-popular custom of mobile holidays, Flag Day has apparently escaped the fate of most of our other national holidays and remains tried and true as being observed on the 14th of June each year.

President Harry S. Truman signed the National Flag Day Bill, August 3, 1949, thereby giving official recognition to June 14th as Flag Day. Every year since the President has designated by proclamation the same date as Flag Day and has urged that the Stars and Stripes be displayed and that suitable ceremonies be performed in honor of the flag.

The first national observance of Flag Day was in 1877, celebrating the centennial of the adoption of

the 1777 Flag Resolution. Congress ordered the flag to be flown over all government buildings of that day. In 1890 North Dakota and New Jersey enacted legislation requiring that every school fly the flag daily.

In 1890, too, the Connecticut branch of the Sons of the American Revolution proposed that June 14 be marked by a countrywide display of the flag. Other branches of the Sons of the American Revolution, the Daughters of the American Revolution, and the Colonial Dames later joined in forwarding the idea.

The first official Flag Day ceremony conducted, other than in a school program, was in Philadelphia on June 14, 1893. The Governor of New York is-

sued a similar proclamation in 1897 with other cities and states soon joining the observance.

The modern observance of the day is relatively quiet with all citizens urged to fly the flag in front of their homes and places of business. Every year at Independence Square in Philadelphia Flag Day activities are climaxed by the presentation of the Leopold C. Glass Memorial Award for "outstanding achievement in the cause of Old Glory".

A well-known part of the American Flag heritage is the repeated statement accredited to General George Washington about the origin of the flag's colors when he presented it to the Congress: "We take the stars from the heaven, the red from our mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity, representing her liberty".

Show your colors--the red standing for strength and courage; the white, symbol of purity and innocence; and the blue, for vigilance, perseverance, and justice. Fly it--June 14, 1975--it will remind us of our past greatness, our present need, and our future responsibilities to the world. It's a "Grand Old Flag" with a brand new meaning for each of us!

It has been a most interesting experience for me as a new member... at times exciting and inspiring... at other times, not so exciting and not so inspiring.

I have been very impressed with the caliber of the some 29 new members.

Nelle's News By HD Agent Nelle Evans

This week I'm on annual leave but as busy as ever. We are enjoying having my two nephews from Colorado for a visit. My niece from Dimmitt is also here this week. But the real purpose of being off is to assist with vacation church school. I've always found working with children especially rewarding. They let us know how they feel and their likes and dislikes.

Too bad we can't always have the curiosity and eagerness of childhood. The creativity too could help us. We, as adults, are to blame for squelching some of this in children. We should encourage their questions. Not telling how much can be learned by finding the answers to children's questions. And their creativity is an inspiration to all our imaginations. How do you think the telephone, the electric light, etc. were invented? Because someone was creative and imaginative.

We can help encourage creativity in children and ourselves. Don't give youngsters a color book but rather paper and crayons to draw their own designs. Give blank books that you write yourself. Encourage make believe and imaginary play that use the mind. Keep in mind too that children are great mimics. This is true in actions, words and deeds. If adults working with children are willing to try something new and different children will too.

But too many adults are afraid they will fail and the child will see this failure. Don't worry. It's good for children to know that adults fail too at times, or have to try several times to do something. Or don't know the answer. Not a single one of us knows or can do everything and it takes a big person to admit this.

Take advantage of being with youngsters while school is out this summer. It helps our outlook on life and is a real inspiration. We need to be proud of all the great youngsters and what they are accomplishing. The news tells us much of the bad. Children seem children very long. Let's try to make these most precious ones for whom to enjoy and cherish!

Dad's Are For Loving

Fathers come in all sizes, shapes, ages and colors and are sometimes referred to as Daddy, Dad, Pop, Papa, or Granddaddy, but whatever the name or figure, he is the one who needs to be told in a very firm manner that you love him very, very much. This should be a daily type of activity but especially should it be true this Sunday 15 June

1975 which has been designated "Father's Day". The earliest observance of this important occasion officially took place at Fairmont, West Virginia, 5 July 1908 and is now observed each year on the third Sunday in June. This seems to be a unique occasion for only in modern America is a special day set aside to honor fathers. A number of people have

figured in the growth of Father's Day with Dr. Robert T. Webb holding the first recognized Father's Day service at the Central Church of Fairmont, West Virginia and in 1912 at the suggestion of the Reverend J. H. Bevinger, pastor of the Irvington Methodist Church, the people of Vancouver, Washington, conducted a celebration. Harry C. Meek, past president of the Uptown Lions Club of Chicago, promoted the idea of Father's Day in 1915.

Father's Day most influential promoter was Mrs. John Bruce Dodd of Spokane, Washington. The idea of a celebration was the result of her father having accomplished the amazing task of raising six children following the death of his wife at an early age. She chose 5 June for the date, that being her father's birthday, but this did not allow time for the ministers to prepare

sermons and actually the first Spokane Father's Day took place on the third Sunday in June. The wonderful idea spread through newspaper articles and stories and in 1918 President Woodrow Wilson had a part in the Father's Day celebration by pressing a button in Washington D. C. which unfurled a flag in Spokane. In 1924, President Calvin Coolidge recommended that all states note the day. In 1972, Father's Day was finally established permanently when President

Richard Nixon signed a Congressional resolution. However, he reminded that it should not take a Presidential proclamation to honor fathers and let it be not for just one day in the year but for all days. HAPPY FATHER'S DAY 1975.
