

Aaron Slick

from

Punkin Crick

Soon to be presented by the Domestic Art and Agriculture Classes of Spearman High School. An idea of the amusing nature of the play may be seen from the following synopsis:

ACT 1.

Mrs. Berry's kitchen on an Oklahoma farm. Gladys May is chased by an awful cow. Merridew, the city slicker, meets his match in Sis, the tom-boy. The downfall of Aaron Slick.

ACT 2.

Same scene, later in the afternoon. The charming widow almost gets a proposal. Sis hides in the clothes basket. The mysterious Clarence Green who spouts poetry. Oil on the farm. Aaron triumphant.

ACT 3.

A Chicago cabaret, a year later. The girl in red gets the best of Aaron—almost. Merridew in the toils of the law. Back to Oklyhomy.

RADIO FLASHES

The New York-to-Brazil airplane carried a two-stage radio receiving warnings, time signals, news bulletins and entertainment.

All ships sailing from American harbors and carrying 50 persons are required by law to maintain and operate a radio set capable of covering at least 100 miles.

Every one of the 15 air-mail stations in the United States is radio-equipped. It is planned to provide a few of these with radio telephone, as well as radio telegraph, service.

Montclair, N. J., has installed in its high school an aerial equal in size to some of the broadcasting stations. The receiving set is in the physics department and many of the pupils are licensed operators.

It is reported that government experts have noticed that high-frequency waves from radio broadcasting stations nearby have caused vegetation to take on a larger growth and reach maturity sooner than under ordinary conditions.

It is proposed to increase the facilities for broadcasting by varying some of the many 300-meter stations by 25 or more meters. It is believed that this arrangement would permit more of the stations to operate at the same time and make it unnecessary to divide the time into so many rather short periods of operation.

No one ever does anything very important with gloves on.

Blessed are they who were not satisfied to let well enough alone. All the world is today, we owe to them.—The Shur-on Chronicle.

Take care that the face which looks out from your mirror in the morning is a pleasant face. You may not see it again all day, but others will.—The Watchman.

HELP FOR THE CRIPPLED

Funds aggregating \$44,000 per annum for use for the rehabilitation of persons injured in industry or otherwise will be available for Texas in the event of the passage of the bill now before the legislature which provides for the acceptance of the Federal Vocational Rehabilitation Act. Acceptance of the Federal Act is being strongly urged throughout the State by social and educational workers, who call attention to the fact that Texas is one of the few states that still remains outside the Federal-State rehabilitation system.

The Rehabilitation Act was passed by Congress and became effective June 2, 1920. To date, 35 of the states have accepted the provisions of the act and have set up state-wide rehabilitation machinery. Seven of the remaining states, in addition to Texas, are taking legislative action on acceptance at the present sessions of the legislatures.

The method employed in the Federal Act is the "State-aid" system. States may receive Federal funds for use in the vocational re-training of handicapped persons on conditions that the Federal grant be matched dollar for dollar by State or local appropriations for the same object.

But there is no mandatory provision in the act. The state may accept as much or as little of the Federal quota as it chooses. For the year ending June 30, 1922, the States were equipped to accept only 31 per cent of the available funds. However, this shows a marked increase over the expenditures for the preceding year, 1920-'21, when only 11 per cent of the Federal funds were accepted.

Texas advocates of acceptance point to the very satisfactory record that has been made in civilian rehabilitation work in the 35 states now co-operating with the Federal Board.

In the recent report to Congress of the Board for the year 1921-'22, it was reported that 17,089 cases of disabled men and women were handled by the states in that year. This compared with a total number of cases handled in 1920-'21 of only 3,893. During 1921-'22, the board reported that 15,407 new cases were registered by the states. The number of cases on the live rolls of the states on June 30, 1922, was 8,147. Each case is handled on an individual basis, being given thorough "follow up" attention by the state agents throughout the period of training until the ultimate goal of satisfactory employment is reached.

Rehabilitation more than pays its own expenses, experts declare. By giving vocational retraining to men and women who would otherwise be incapacitated for employment, it is adding an annual increment to the income of the state during the whole life-time period of the rehabilitated worker. In the long run, this addition to social earning power more than checks off the cost to the state of industrial rehabilitation, it is claimed. While costs have not been standardized in the states, the state of Ohio has reported an average cost for the completely rehabilitated man of \$137.36. This is thought to be an approximation of the average cost in the states generally.

If Texas establishes an industrial rehabilitation bureau, it will find a large eligible field. For the year 1921-'22 there was reported to the state a total of 95,323 non-fatal accidents in the industries of Texas. In 1920-'21, the number of non-fatal accidents totalled 94,564. In 1919-'20, they numbered 65,000. Since the Rehabilitation Act provides for persons disabled by public accident and disease as well, the total eligible field will probably approximate three times the number of reported industrial victims.

WORDS OF WISDOM

A hen is the only living critter that can set still and produce dividends.—Exchange.

About the time you think you make both ends meet, somebody moves the ends.—Exchange.

Prosperity will come when men watch their work instead of watching the clock work.—The Beehive.

Never imagine that only fact's matter. Sentiment is a fact, too, and an important one.—Edward Goldbeck.

Our grand business undoubtedly is, not to see what lies dimly at a distance, but to do what lies clearly at hand.—Carlyle.

It would be an unspeakable advantage if men would consider the great truth that no man is wise or safe but him that is honest.—Walter Raleigh.

A business organization must resemble a cobweb; a straight and direct connection must lead from each point to the center.—Edward Goldbeck.

The Santa Fe Cow, Sow and Hen Special will be in Spearman till ten o'clock, Tuesday April 3rd.

A COAL SALE

Colorado Nut ----- \$11.00
