

FRESHMAN ORIENTATION — Tech senior Butch Frazer, right, distributes campus maps and informational booklets to prospective freshmen Becky Botkin and Brice Fowler at opening sessions of Tech's summer clinic for entering students. Frazer

is a member of Saddle Tramps which is assisting the student Senate in welcoming the newcomers. Becky's hometown is Borger and Brice is from Monahans.

Early Registration To Orientate 3,000 Entering Freshmen

More than 3,000 entering freshmen will complete registration for the fall semester in the next five weeks.

The early registration program for freshmen will consist of nine two-day sessions this month and next. The second of the clinics is being conducted today.

Objectives of the clinic are to give the entering freshmen an opportunity to visit the campus, to engage in individual counseling, to determine courses to be taken this fall and to complete all phases of registration, said Dean of Admissions Floyd D. Boze.

Dean Boze said participation is voluntary but is limited to entering freshmen who have completed all of Tech's admission procedures. Between 350 and 400 students are expected for each of the sessions.

Each clinic begins with registration in Wall and Gates halls before noon. The formal program begins following lunch with a general session for everyone in Tech Union Ballroom.

In the afternoon students meet with academic advisors in their respective schools for consultations concerning course programming.

The office of the Dean of Student Life conducts evening ses-

sions for parents and students at which college officials and Student Senate representatives discuss various college policies and orientate students to campus life.

The Student Senate is also conducting tours of the campus for the new students and Tech Union sponsors a dance during each session.

Students who complete registration may also purchase their books while on campus and have their ID pictures taken.

Sessions will be held on July 25-26, 28-29 and Aug. 1-2, 4-5, 8-9, 11-12 and 15-16.

Specialist To Head Center

Kem Bennett, programming specialist from Palo Alto, Calif., has been appointed systems engineer at Tech's Computer Center.

Bennett will be working with computer software systems and research information retrieval.

He was formerly a developmental programmer with Lockheed Research Laboratories in Palo Alto and a scientific programmer for the Martin Company in Orlando, Fla.

He holds a bachelor of arts degree in mathematics from Florida State University and is presently doing graduate work at San Jose State College in California.

George K. Hutchinson, director of Tech's Computer Center said, "Bennett is expected to make a valuable contribution to Tech's computer system, particularly in the area of information retrieval."

Bennett says he is enjoying working in a college environment rather than in industry.

Bennett has a background of experience in both scientific and business applications programming.

He has designed and implemented sophisticated computer systems for automatic page composition, text editing, and in information retrieval.

KEM BENNETT

Coordinating Board Approves Degrees

Effective September 1, 1967, five new degree programs will be enacted at Tech. These requests were approved Monday by the Coordinating Board of the Texas College and University System and had previously been approved by the college Board of Directors.

W.M. Pearce, academic vice president, in announcing the program said that it was a step forward in academic development and expansion at Tech.

The Board approved master of science degrees in accounting and agricultural engineering, the bachelor of arts degree, major: geography, the bachelor of science in physical education for men, and the bachelor of science in physical education for women.

Graduating Seniors

Tuesday will be the last day for seniors graduating in August to pay the \$5 graduation fee. Summer commencement ceremonies are set for August 20.

621 Cheerleaders Due For Training Sessions

Six hundred and twenty-one high school and junior high students will arrive on the Tech campus Sunday afternoon for an annual cheerleader school.

The students will be coming from Texas, New Mexico, Oklahoma and Colorado to take part in the 5-day cheerleader-training

session.

Instructors for the sessions will be 14 women and 3 men, all members of the National Cheerleader Association and former college cheerleaders.

This year's enrollment is an increase of 100 more than last year's school.

— What's New Pussycat? —

Lions Cause 'Uproar' On Plane

BRUSSELS (UPI) — The trouble started when pilot Paul Wuhrman felt a warm, wet tongue lick his boot as he was flying along at about 14,000 feet.

It ended several hours later when a slim, 50-year-old female zoologist armed only with a broomstick and a net, climbed aboard Wuhrman's plane and chased out three lions which had escaped from their cages and terrorized Wuhrman and his co-pilot.

Police and firemen armed with sub-machine guns and water-hoses watched in stunned silence along with the shaken Wuhrman as Mrs. Agatha Gyzen shooed the huge beasts into crates, gently urging: "Go on pussy, go on pussy."

Wuhrman, 36, was flying a twin-engine Dart Herald for Globe Airlines of Switzerland chatting amiably with co-pilot Max Schomenberger, 25. They were about two and a half miles high over St. Nicholas, Belgium, with clear weather ahead to London.

"I turned around and saw the heads of two lions peering through the curtain between the cockpit and the fuselage," Wuhrman said. "A third lion was licking my boot."

Wuhrman grabbed for the radio and Schomenberger grabbed an axe.

"Brussels, Brussels, can I make an emergency landing?" Wuhrman shouted. "I have three lions in my cockpit."

The Brussels operator thought it was a joke. "Just stick them in your gas tank," he replied.

Wuhrman, desperate, jammed the microphone in the face of one of the beasts and a huge roar convinced the operator.

Wuhrman said he called Brussels control tower because it was

the nearest and asked for a top-priority landing while Schomenberger "kicked" them out of the cockpit with his axe.

"Max swung a third seat in the cockpit around to block the lions.

"They growled but disappeared back into the fuselage.

"I dived straight down from 14,000 to 500 feet in record time. Never have I done it so quickly. Max kept beating the lions back until we had landed.

"I was told I made a bad landing but I do not remember much about it. We jumped out of the cockpit emergency exit.

"We were in a cold sweat the whole time."

A heavy net was thrown over the cockpit to prevent the lions from following the pilots out. A call went out for Mrs. Gyzen and the gendarmes watched as the plane reverberated from the roars and wild pacing of the animals.

First, Mrs. Gyzen cracked the door, poked her head in, and ducked back out with a three-month-old cub by the scruff of the neck. "What's new pussy cat?" she asked as she dropped him into a cage.

But then the situation got stickier. The two others were full-grown Ethiopian lions, each weighing about 175 pounds.

She picked up a broomstick and a thick net and crawled into the narrow fuselage. Gently, she edged behind the lions, coaxing them to the door.

There, four zoo assistants grabbed them by the neck and legs and shoved them into their crates.

"You have to know how to handle them and there is not too much danger," she told the admiring gendarmes.

Freshmen Scholars Announced

Two entering freshmen, Michael Schall, Midland, and Olivia Hernandez, Lubbock, have been awarded scholarships to Tech this fall.

The Spanish staff of Tech's Foreign Language Department named Miss Hernandez the recipient of this year's Hiram Parks Scholarship on the basis of character, leadership and high school records. She placed first in national Spanish examinations sponsored by the South Plains region of the American Association of Teachers of Spanish and Portuguese in 1965 and 1966.

Schall was named winner of the Pan American Petroleum Foundation undergraduate scholarship in petroleum engineering at Tech. He received the award after college officials considered his high school record.

4 Year Basis

Both scholarships are on a four year basis stipulating the students maintain satisfactory academic standing. Miss Hernandez will receive \$500 each year. Schall is to receive \$700 for the first year, \$800 for the second, \$900 for the third and \$1,000 his senior year.

Miss Hernandez plans to teach Spanish after college. She is the first Lubbock resident to win the Parks award since 1947, after its establishment in 1945.

DEADLINE SET

The grade of "W" will be given for courses dropped on or before Tuesday. Students desiring to drop a course should report to the dean of their school to initiate a drop.

Coed Enters Pageant

Susan Logan, sophomore from San Angelo, is in Fort Worth this week representing Lubbock in the Miss Texas Pageant. Miss Logan, a drama major, won the Miss Lubbock title in March. The new Miss Texas will be named tomorrow night and will represent Texas in the Miss America contest.

Miss Logan is also a Tech Beauty, one of the ten most beautiful coeds at Texas Tech.

Tower Sets Talk

Senator John Tower will speak at Coronado High School tonight at 8 p.m.

Senator Tower plans to report on the situation in Viet Nam, NATO, the right to work law and domestic affairs. He will also speak on matters pertinent to the South Plains area such as the Cotton Research Act, wheat prices, tax credits for education research and water for the future.

Senator Tower has represented Texas in Washington for six years. He serves on the Senate Armed Services Committee and the Banking and Currency Committee.

In 1965 Senator Tower's name was on nine Senate bills. In 1965 he also visited Viet Nam and returned again in 1966.

Senator Tower is expected to arrive at Lubbock Municipal Airport today at 3:30 p.m.

CAL MOORE

Ex Enters Pilot School

Cal Wayne Moore, 1965 Tech advertising graduate, recently enlisted to enter the Air Force Officer Training School.

Moore has worked in the student publications center since his graduation. Prior to that he was director of photography for Tech publications from 1959-65, and was a member of Kappa Alpha Mu, professional photography fraternity.

Because of his photography interest and aerial photography experience, Moore was selected for pilot training after completion of the three month officer school.

Frank, Mia Hide After Vegas Rites

PALM SPRINGS, CALIF. (AP)— Singer Frank Sinatra honeymooned, somewhere, with his third wife Mia Farrow today after a Las Vegas wedding performed between plane flights.

Exactly where they went hasn't been determined.

Sinatra, 50, flew from London to New York and from there to Las Vegas, landing two hours before the wedding Tuesday. Miss Farrow flew in from Los Angeles in another of his company jets. The marriage is the first for the 21-year-old star of "Peyton Place."

Destination Secret

Minutes after the wedding was performed before a few friends at the Sands Hotel, the couple announced they were flying to New York and boarded their plane.

They filed no flight plan, and airport authorities in New York reported the jet did not land there. There were unconfirmed reports that they flew here instead, but airport officials had left the field by that time. Later, two jets similar to Sinatra's touched down at Van Nuys Airport, about 100 miles northwest of here, with no passengers aboard.

Sinatra maintains a home at this

desert spot but the house was quiet and dark Tuesday night.

The marriage ceremony took about four minutes. District Judge William Compton officiated at the single-ring rites in the hotel apartment of Jack Entratter, Sands president and longtime friend of Sinatra.

Afterward the couple walked out on the apartment's patio and Sinatra beamed: "How are you, baby. My 'Bride!'"

Miss Farrow just smiled.

Caught By Surprise

Miss Farrow, her close-cropped blonde head hatless, wore a two-piece white silk-faille suit, with diamond-like buttons, and white gloves.

The family of neither the bride or groom were present. Entratter gave away Miss Farrow. Film producer William Goetz and his wife were best man and matron of honor. Others in the wedding party were comedian Red Skelton, two daughters of Entratter and two of his grandchildren.

The wedding capped a romance that began in 1964, when Sinatra and Miss Farrow were frequently seen together at Hollywood parties, restaurants and baseball games.

UNION MOVIE — Natalie Wood and Steve McQueen star in tonight's free Tech Union Movie, "Love With The Proper Stranger." Miss Wood was nominated for the Best Actress Academy

Award for her performance in the movie which also stars Edie Adams, Herschel Bernardi and Tom Bosley. The movie will be shown at 8 p.m. tonight in the Union Coronado Room.

Tech Union To Offer Silent Movie, Forum

"Tumbleweeds," third in the Tech Union's series of silent movies, will be shown Tuesday at 8 p.m.

The 1925 production tells the story of the land run into Oklahoma Territory. The costly and ambitious production was the last movie in the career of western star William S. Hart.

Also on the program will be the last reel of the 1914 film "The Spoilers," which features one of the most famous fight sequences in movie history between William Farnum and Tom Santschi.

The movies will be shown in the Union Coronado Room at 8 p.m. with musical accompaniment for the silent movie provided by Lubbock pianist Larry Schroeder.

Two more movies are scheduled in the series; "Phantom of the Opera" with Lon Chaney, Aug. 2 and "Personalities Program No. 8," Aug. 9.

Noon Forum

Suzanne Allstrom, sociology teaching assistant, will present Thursday's Noon Forum on "West Texas Boomtowns."

Entry Ports To Change

Two of Texas Tech's traffic entry stations will be placed in new locations early next week in a move to further ease driving at Tech, Traffic Chief Bill Daniels announced Thursday.

Daniels said that Station No. 1, located on the Broadway entrance, will be moved approximately 200 yards to the east. Station No. 2, currently near Tech Bookstore, will be moved to the east about 100 yards. Daniels said the moves may be temporary.

"We want to make the faculty, students and townspeople aware of the move in order to keep the new traffic system functioning smoothly," Daniels said.

Daniels said that a new entry station is scheduled to begin operation in September on the street near the Tech Men's Gym. This will bring the number of entry stations to five.

Former Tech Tennis Star Gives Lessons

Former Tech varsity tennis player Joe Wheatley is conducting tennis lessons at the Lubbock Tennis Center during the summer.

Wheatley, now a professional player, has given lessons in Beverly Hills, Calif., and Las Vegas, Nev.

Private and group lessons are offered by Wheatley at the center, which is sponsored by the Lubbock Tennis Association.

Membership in the Center is \$6.67 for Tech students for the remainder of the summer. The fee includes the use of eight courts, dressing room facilities and reservation service.

Hours for the Center are Tues.-Sat., 8 a.m. to 7:30 p.m.; Sun., 1 to 7:30 p.m.; and Mon., 5 to 7:30 p.m.

The Tennis Center will be the site of the Lubbock Tennis Tournament today and tomorrow. Tech students interested in entering may do so by calling SW5-9722 by 12 noon today.

The Tennis Center is located east of Coronado High School on West 34th Street.

JOE WHEATLEY

Missile Grant Awarded To Electrical Engineers

A research grant for improvement of air to surface missiles was awarded Tech by the Missile Development Center, Air Force Systems Command, of Holloman Air Force Base, Alamogordo, N.M.

Electrical engineering department head R. H. Seacat will direct the study on "Effects of Control Parameters on ASM Terminal Guidance Testing." Dr. W. W. Wilkins will be associate investigator.

The research will be directed toward enhancing accuracy and improving the design of the missiles, Dr. Seacat said.

Funds of \$15,000 have been budgeted for the first year's study, which is being set up on a cost-plus basis.

Walk In a country garden or commute to town in the classic simplicity of the "girl's" suit. All feminine nicety of tailoring, all purity of line... typically John Meyer. Tussah-woven rayon-cotton-and-silk in a bouquet of flower colorings.

America's Top Active Air Ace Fights In Third War

SAIGON, South Viet Nam (AP)—America's No. 1 active air ace, Col. James Jabara, is fighting his third war—this time in the skies of Viet Nam.

Jabara, 42, downed 15 Communist jets in Korea and is credited with three and a half Luftwaffe planes in World War II.

He was offered a chance to make a combat mission in Viet Nam after he ferried an F100 Super Sabre jet from England Air Force Base in Louisiana.

He winged off with a flight of

Instructors Participate In Ag Tour

More than 30 vocational agriculture teachers from throughout West Texas have participated in the agricultural short course tour hosted by Tech's agricultural education department Wednesday through today.

Agricultural education Prof. L. M. Hargrave said the tour left Lubbock at 8:30 Wednesday. Lubbock stops included the Lubbock Swine Breeders operation, the Greenhouse Tomato Plant and the Simmons Feed Lot.

Area visits were made to the Holly Sugar Plant, Rinhour Vegetable Processing Plant, and vegetable fields, all of Hereford. A tour of the Swift Packing Plant and auction sales facilities at Clovis, N.M. and a visit to the Don Stout farm near Tulia was included.

Before returning, the teachers visited the Abernathy vocational agriculture department and calf feeding operations. Hargrave said the short course is a non-credit offering. T. L. Leach is head of the agricultural education department.

Three F100 jets in a ground strafing mission in the rugged 3rd Corps area of South Viet Nam.

Buildings Damaged

The mission was credited with damaging six buildings used by Viet Cong Guerrillas—tame stuff for a man who started off in a prop-driven Mustang against the Germans in World War II and attained fame as the deadliest of them all in the air duels with Communist MIGs in Korea.

Lean and trim, Jabara will have a relatively short combat tour in Viet Nam. He commands the 31st Tactical Fighter Wing, Homestead Air Force Base, Fla., and is scheduled to return there in about one week.

The Air Force did not say whether Jabara would fly more missions in Viet Nam.

Jabara started combat flying out of England in World War II. In addition to his three and a half victories in the air he destroyed six German planes on the ground and

flew ground missions as Allied armies drove across Europe. He shared credit for one of the Luftwaffe kills with another pilot.

In MIG Alley

When the Soviet-built MIG15s made their appearance over North Korea, Jabara was flying the North American Sabre Jet with his squadron in Seoul.

Along the Yalu, in what was known as MIG Alley, Jabara quickly won his rating as an ace—a flier who downs five enemy aircraft. He went on to become history's first triple ace in Jet aircraft.

In Korea, pilots were limited to 100 missions in MIG Alley and Jabara was ordered home after flying the required number.

The official records still list his number of missions as 100 but fellow pilots acknowledged at the time that the cool and collected Jabara had squeezed in a large number of missions that somehow never got on the record books.

WORKSHOP LUNCHEON — Paul Swensson (center), executive director of the Newspaper Fund Inc., a subsidiary of the Wall Street Journal, visited Tech Tuesday to confer with the staff and students of Tech's Photojournalism Workshop for high school and junior college teachers. During

a luncheon in the Tech Union he discussed the workshop with Tech President Dr. R. C. Goodwin and Mrs. Rosemary Tittle, journalism instructor at Odessa Permian High School. The workshop, sponsored by a grant from the Newspaper Fund, is directed by Journalism Prof. Ralph Sellmeyer.

Computer Center Aids In City Water Study

Successful completion of a research project concerning water utilization was announced by Tech computer center director G. K. Hutchinson.

The study, performed for the City of Lubbock by the local consulting engineering firm of Parkhill, Smith and Cooper Inc., examined two stages in the future development and expansion of Lubbock's water distribution system. City engineer Sam Wahl said the system was divided into the western and eastern section, each containing about 200 major distribution mains.

"Our prime objective," he explained, "was to ascertain the most economical means of delivering an adequate high quality water supply with satisfactory pressure." Wahl reported city officials were pleased with results of the study, which he said "has given us something to think about."

Combined Resources

Tech's computing center processed the computerized model of the water distribution system. "We're happy," Dr. Hutchinson said, "to use our research capabilities to serve the community when it falls within the scope of our normal functions."

"This is an example," the director pointed out, "of combining Tech resources—both faculty and equipment—to benefit the entire community." He termed the study of general interest because economical use of water is a problem facing every city, particularly those in arid and semiarid areas.

Parkhill, Smith and Cooper project leader H. B. Reaves said a thorough analysis of large water systems such as Lubbock's would have been impractical without a computer because of the many

calculations involved. He said Lubbock was "fortunate" to have access to Tech's computer center for the study. "Without it," Reaves pointed out, "an extensive analysis of Lubbock's distribution system would not have been feasible."

Continued Research

Tech civil engineering Prof. C. M. Parrish, who prepared the computer programs and served as project advisor, said the methods and techniques used were of a general nature applicable to similar programs in the future.

Placement Interviews Scheduled

The Placement Service has scheduled two interviews for job openings with the Rexall Chemical Company, Odessa, and the Scott Paper Company.

Interviews for the Rexall Company is today for 1966 graduates with a BBA in Accounting. Appointments should be made at once at the Placement Office, Room 252, Electrical Engineering Building.

Interviews with the Scott Paper Company are set for today and Friday, August 5, for 1966 graduates in agriculture, business, agriculture economics, English, government, history, economics, finance, management, marketing, retailing, advertising or any other majors interested in sales. Appointments should be made at the Placement Service.

Honor Grad Enters AF

Honor graduate Deborah Johnson entered the Air Force Officer Training School, and after completion of the school will enter the space program.

This is a new career field never before offered graduates of OTS. Her studies involve earth orbiting object position predictions, orbital analysis operations, space object identification and computer use for orbital analysis.

Miss Johnson received her B.S. degree in chemistry in May with a 3.87 grade point average. Her college record was an important criteria of selection for the program.

TEXTBOOKS!

(OFFICIAL TEXTBOOK LISTS)

- The Book and Stationery Center has many features you will admire:
Friendliness, Convenience Prompt Service, Assistance in all aspects.
- Plus all the materials and supplies you need.
- Come by and see us soon.
