

## Peace Corps Volunteers Set For Training At Tech

Fifty-five Peace Corps volunteers for Costa Rica will arrive on the Tech campus Aug. 31 for an intensive 11-week training period under terms of a \$144,000 grant announced earlier this week by Rep. George Mahon.

It is the second Peace Corps project for Tech in as many years. Last year, 56 trainees received preparation here for assignments in Ecuador under an eight-week, \$80,000 grant.

Tech Prof. of Park Administration, Horticulture and Entomology George O. Elle, who will direct the program, said corpsmen would receive instruction in urban community development and credit union operation.

### Urban Work Set

"It is our goal," he said, "to train these volunteers in urban community development work with emphasis on working with cooperatives and assisting in the establishment and operation of credit unions in Costa Rica."

The volunteers will conclude their training at Tech on Nov. 15, then go to Puerto Rico for an additional month's instruction.

Dr. Elle said another goal of the Tech program would be to make the corpsmen as proficient in Spanish as possible in the nearly three month's training slated here.

—By Tech President Goodwin—

## Med School Need Discussed

by DAVID SNYDER

MIDLAND—Tech President R. C. Goodwin, while in Midland Tuesday, said it was "his understanding" that the next medical school established in Texas would be in West Texas.

He said that Lubbock, Amarillo and El Paso have indicated interest in securing the medical school.

Dr. Goodwin was speaking at an "idea and planning session" of the West Texas Chamber of Commerce Education Committee, whose No. 1 project is obtaining a medical school for West Texas.

### Hospital Needed

It was pointed out that a "teaching hospital" provided by the city is a necessity for establishment of a medical school.

Gov. John Connally, in addressing Tech faculty members last spring, had said Tech is "not yet ready" for a medical school because the proposal lacked community support. He vetoed a bill for a medical school at Tech during the last session of the legislature.

"It will take a combined effort of West Texans if we get anything like an immediate appropriation for a medical school," Dr. Goodwin said. "There will be one—it's just a question of how fast the people of West Texas push for it."

### Cost \$30 Million

Dr. D. M. Wiggins of Lubbock, a former president of Tech and now a member of the State Coordinating Board for Higher Education, told the committee the initial cost of establishing a medical school with a teaching hospital is "in the neighborhood of

Other phases of the Tech project will cover instruction in such fields as anthropology, economics, history and government, as it relates to Costa Rica, and such varied fields as nutrition and technical skills.

Dr. Elle said the trainees would be working with Lubbock's Latin community in the development of language skills, and in certain urban development aspects of the over all program.

Staff members who will assist in the project include Mrs. Harley Oberhelman, coordinator of the language program; Dr. David Vigness, Costa Rica area studies; Morley Jennings, coordinator of physical education; Dr. Arthur Sweeney, field assessment officer; and Miss Mary Hamlin of the City-County Health Department, coordinator of community development.

Dr. Elle said 60 Tech faculty members and consultants for other colleges and universities would be involved in the program.

He said the volunteers, not all of whom are selected yet, will be housed in a local hotel and much of the formal instruction would be conducted there.

He said the Peace Corps was hoping to recruit as many young married couples as possible for the Costa Rica project.

\$30 million" and that operating expenses are high.

Dr. Wiggins said the No. 1 project in education is "strength in teaching in our senior institutions."

Dr. Goodwin also questioned whether a medical school was the

No. 1 educational need for the West Texas area.

"We could use a lot of things to more immediate advantage than a medical school," the Tech president said, referring to the need for additional undergraduate facilities.

## 2nd Session Dates Issued By Registrar

Registration for the second summer session will be held July 11 from 1:30 p.m. to 5 p.m. and July 12 from 8 a.m. to 12 noon. Between 4,800 and 5,000 students are expected to enroll for the second session, said Evelyn Clewell, assistant registrar.

Registration permits for all students, graduates and undergraduates, living off-campus and on-campus, will be distributed beginning next Wednesday in room 165 of the Administration Building. The permits will not be mailed.

Class tickets must be stamped "PAID" by the college cashier in order for students to attend classes which begin at 7:20 a.m. Wednesday, July 13.

Hulen, Clement and Murdough Halls will be the resident halls open for the second session. They

will open for new students July 11 at 10 a.m.

Finals for the second summer term are scheduled Aug. 16 and 17. Commencement exercises will be held Aug. 20 for summer graduates. The deadline for graduating students to order senior invitations and reserve caps and gowns at the Bookstore for summer commencement is July 13.

Library hours will remain the same for the second session. It will be open Monday through Thursday from 7 a.m. to 10 p.m., and on Friday and Saturday from 7 a.m. to 5 p.m. The Library will be closed on Sunday throughout the summer.

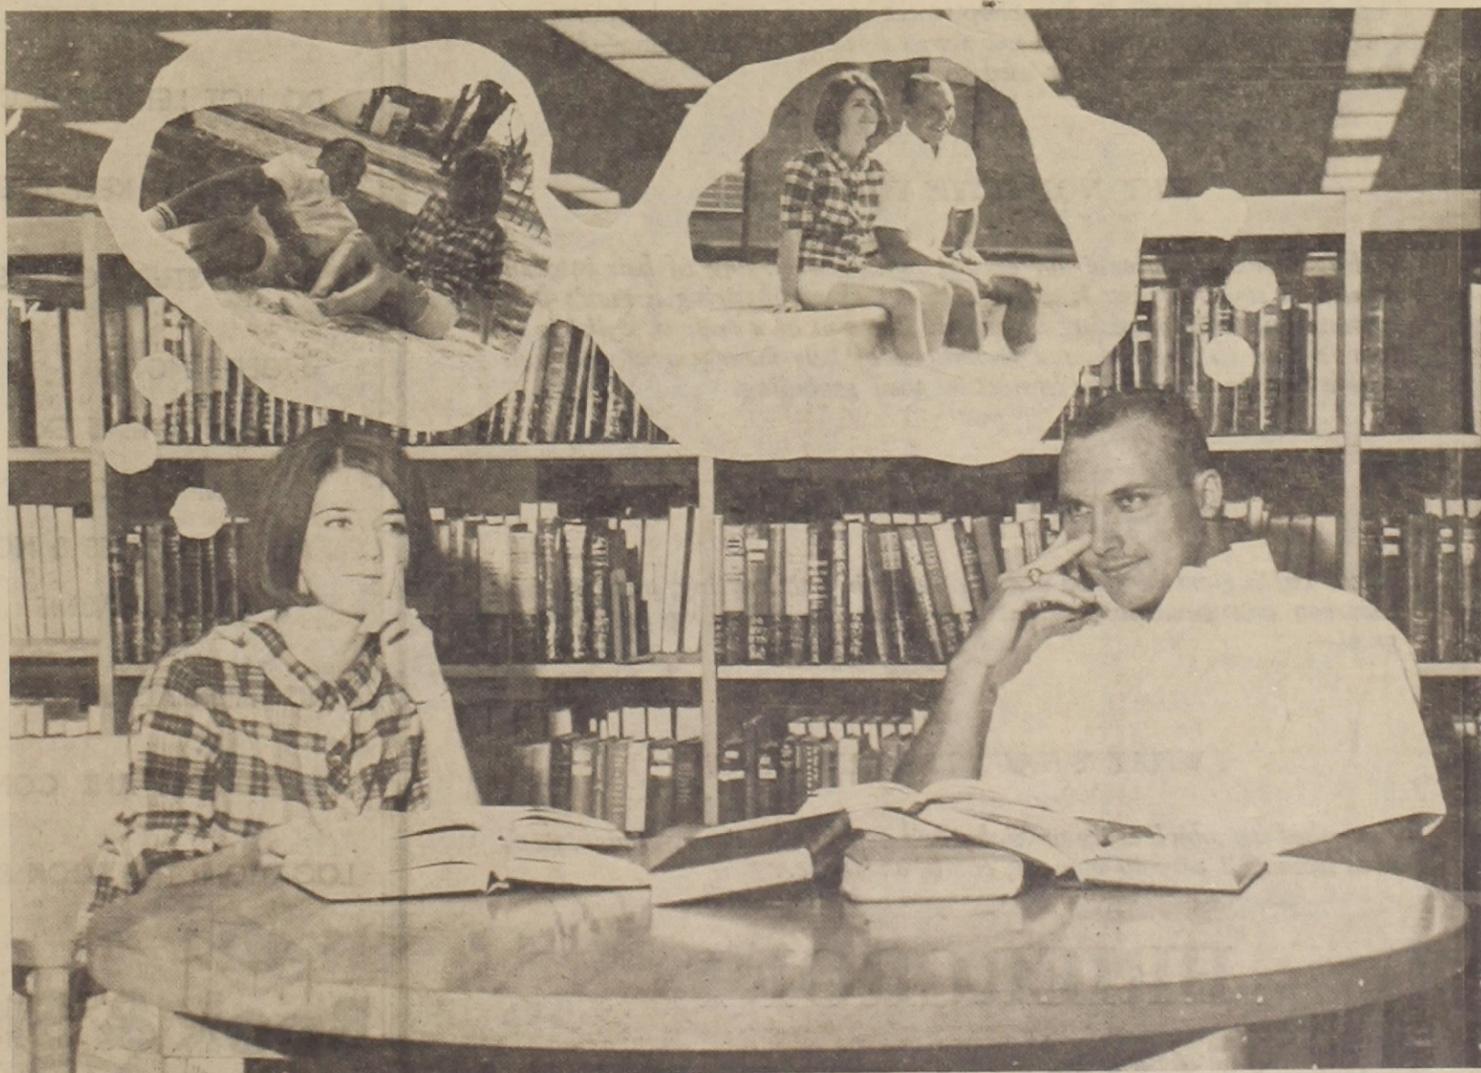

This is the last issue of the Toreador for the first summer session. The next Toreador will be distributed July 12.

## Final Exam Schedule

EXAMINATION TIME	CLASS MEETING TIME
<b>Thursday, July 7</b>	
7:30-10:00 a.m.	7:20- 8:50 a.m.
10:30- 1:00 p.m.	1:20- 2:55 p.m.
1:30- 4:00 p.m.	9:00-10:30 a.m.
<b>Friday, July 8</b>	
7:30-10:00 a.m.	10:40-12:10 p.m.
10:30- 1:00 p.m.	3:00- 4:30 p.m.

Requested changes in the schedule of individual students will be considered by the Dean of the School in which the student is registered.

Examination time for classes having both lecture and laboratory periods will be determined by time of lecture meetings to find corresponding examination period.

**TO STUDY OR NOT!**—With the Independence Day holiday and exams falling the same week, many students may find themselves in the predicament of freshman Judy Candler and senior Walter Cunningham. Most Techsans, however, probably won't get caught daydreaming as studying won't even be attempted on the only

holiday for the summer sessions. Hundreds of Tech students are expected to make a mass exodus for Buffalo Lakes, Mackenzie Park, the golf links or home for the long weekend.

(Photo by Allyn Harrison)

### ID Photos Made

Students planning to return to Tech next fall should have their ID pictures made in the east wing of the foyer of the Ad Building Tuesday and Wednesday.

Pictures will be made from 8:30 a.m. to 5 p.m. both days. The pictures for the cards will be in color for plasticized IDs.

## AFROTC Sets Exam

Air Force ROTC headquarters has announced that male college freshmen must pass a pre-registration qualifying examination before enrolling in Air Force ROTC courses, according to Aerospace Studies Prof. Lt. Col. Henry L. Gantz Jr.

The examination, a shortened version of the Air Force Officer's Qualifying Test, is similar to college entrance examinations. The test will be given by the Department of Aerospace Studies during freshmen pre-registration.

The examinations will be given at 4 p.m. in room 215 of the Social Science Building on July 18, 21, 25 and 28 and Aug. 1, 4, 8, 11, and 15.

Col. Gantz said the test is designed to select "those students who possess the qualities desired in future Air Force officers."

# Nursery Serves As Lab

by MARIE NAGLE  
Staff Writer

The Tech Nursery has several openings for children between the ages of 2½ to 4½, for the second summer term, according to Mrs. Winnifred Gifford, director.

The Nursery operates under the philosophy that the preschool programs at Tech offer children an opportunity to further their development in an environment planned with their physical, mental, social and emotional needs in mind. It is an extension of the home and supplements the home by providing more open space for more free play, child-size furnishings, playmates of about the same age, consistent gentle guidance and experiences geared to the children in the group.

### Dual Purpose

Although this is the main purpose, the programs would not exist if it were not for an additional purpose of training future homemakers, teacher and other professional workers. Mrs. Gifford said, "it is basic in the philosophy that, for a program to be good for the college students, it must and fore-

most be good for the children enrolled in the programs."

The Nursery supplements the theory courses in child development and family relations by providing the students with a laboratory to see theory in action.

With planned activities, the children learn as they play. By making pictures with seeds and through picking up the little seeds, and other similar activities the children prepare for the time when they will learn to pick up and use pencils.

### Each Child Different

Through their play, the children develop confidence in themselves that is necessary before they can learn to read and write. As they run, jump and play, they develop muscles and will find it easier to sit for a length of time when they are old enough to go to school.

As they observe the children at play and as they apply what they learn in books, the students find that no one child fits into a pattern. Each is different, even in size among children the same age.

Anyone who is interested in enrolling children in the preschool

program may call Mrs. Gifford at Ext. 4112 in the morning or SW9-8954 for further information.

## '65 Graduates End Training

Two 1965 Tech graduates have completed 14 weeks of training for the Peace Corps.

Betty Deavours, Shallowater, and Dan Bradshaw, Houston, were trained at Camp Radley in Arecibo, Puerto Rico, and the University of Hawaii respectively.

Miss Deavours left Thursday for Costa Rica where she, along with 115 volunteers, will work in a community development among the residents of newly colonized lands in a government resettlement program.

Bradshaw and his wife Nancy are among 700 volunteers working in India. They will be assigned to poultry development, gardening and nutrition projects in the states of Maharashtra, Mysore and Orissa.

## QUESTION...

Why be satisfied with second rate barber work at first rate prices? Try "Fabulous" Briercroft Barber Shop, meet our six renowned stylists, see our beautiful manicurist, and get a wax shine from Mr. Shine—all for the same price you are now used to paying.

### WHY NOT STYLE YOUR HAIR?

*Styling is not effeminate nor does it mean the glueing of hair into an unnatural style. Styling is merely the art of emphasizing a man's best features and deemphasizing his worst. The aim of a trained stylist is to show a man the methods and techniques of hair management that will enable him to achieve the utmost in good grooming.*

### WHAT IS RAZOR CUTTING?

*Razor cutting employs the use of a razor in hair cutting, using special shampoo and conditioners that leave your hair looking and feeling great—*

### WHAT IS HAIR STRAIGHTENING?

*A method by which curly or kinky hair can be chemically straightened, thus leaving it easy to manage, comb, and style.*

# University Theater Play To Open July 9

by NAN TODD  
Staff Writer

Ramsey Yelvington's "The Will To Win" will open July 9 in University Theatre as the first full production to be done for a master of arts degree in speech at Texas Tech.

Tickets will be sold at the door for 50 cents with no reserved seats.

Yelvington is a noted Texas playwright who has had many plays about Texas history produced by Paul Baker.

His historic play about the battle of the Alamo, "A Cloud of Witness-

es," inspired the building of the Texas Historic Theatre in San Antonio.

Under the direction of Mrs. Romana Peebles, "The Will to Win" is a dramatization of Yelvington's belief that competition is vital to the success of any society and that in America the competitive will to win is promoted through athletic competition.

It is a play of conflicting thought and ideas set at a Texas university where an attempt is being made to eliminate competitive sports from the curriculum.

The primary conflict evolves around Lockridge, the college president, played by G. W. Baily, and Bud Kellum, the head coach, played by Glenn Polk. Lockridge feels that competitive sports serve no truly useful purpose in the educational system and should be excluded from the curriculum of the college.

Kellum, acting as the author's mouthpiece, contends that the athletic program is vital in the training of Americans. He believes that when a nation loses the will to win

and its ability to effectively compete, it is on its way out.

Personal conflicts between Kellum and his son Buster, played by Roland Myers, and between Kellum and Lockridge, intensify the drama.

**Confusion Of War**

"The Will To Win" unravels amidst the confusion of World War II and has an underlying theme which is particularly applicable to the America of 1966.

It probes the problems and con-

flicts confronting young men going into military service, their feelings of displacement in a world they didn't create and a war they didn't start.

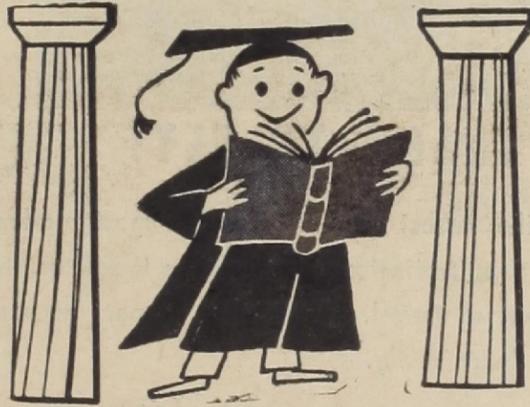

UNIVERSITY THEATRE—In a scene from "Will To Win," which opens July 9, Bud Kellum (left) played by Glenn Polk, stands dejectedly after losing his job as head coach. College President Lockridge, played by G. W. Bailey, triumphantly plans the university's future without competitive athletics.

Ironing Wanted: Shirts, blouses, skirts. Fifteen cents each or \$1.50 per dozen. SH4-6478.

# Tech Prof Shows Paintings

Home Economics Prof. Billie Wolfe currently has a photographic exhibit, "Windmills—Legacy of the West," on display at the National Cowboy Hall of Fame in Oklahoma City.

The exhibit, the result of eight years work and featuring historical types of windmills in Texas, Oklahoma, Colorado and Kansas, was

hung at the personal invitation of Hall of Fame Director Dean Krakel.

Miss Wolfe, an amateur photographer for the past 20 years, has had individual showings of her work at Tech and at Mississippi Southern University in Hattiesburg.

Her Hall of Fame exhibit includes eight 16x20 color photos, seven 11x14 color photos, six 11x14 in black and white and 15 8x10 photos in color.

"My interest really," she said,

"was to collect historical data on these windmills. In addition to my research, photos seemed the best way of capturing all the details."

Miss Wolfe, who joined the Tech faculty in 1955, is a graduate of Tarleton State with a master's degree from the University of Texas.

### SCHOLARSHIP ESTABLISHED

Phillips Petroleum Company will establish a \$500 four-year scholarship in Texas Tech's petroleum engineering department beginning this fall, Engineering Prof. Philip Johnson has announced.

In addition, Phillips will provide summer employment for the scholarship holder next year, provided he meets certain company requirements.

The petroleum engineering department, following review and counsel with Phillips officials, will select the scholarship winner.

### ZINN NAMED TO BOARD

Dr. Dale W. Zinn, acting head of the animal husbandry department at Tech, has been elected to the Board of Directors of the American Meat Science Association.

Dr. Zinn's election came at a recent meeting of the Association at Cornell University attended by some 175 meat scientists from colleges and universities, governmental agencies and the meat industry.

Directors also serve as the executive committee of the Reciprocal Meat Conference. Prof. Zerle Carpenter of Texas A&M was elected chairman of the Reciprocal Meat Conference committee.

★ ★ ★

### HOME EC PROF SELECTED

Dr. Donald S. Longworth of Bowling Green (Ohio) University will join the Tech faculty this fall as

professor of home and family life, Tech Home Economics Dean Willa Vaughn Tinsley has announced.

Dr. Longworth holds BS and MA degrees from Bowling Green and the PhD from Ohio State University. He has served on the faculty of his alma mater since 1949.

Dr. Longworth's chief interest is in family life instructional programs with emphasis on preparation for marriage. He has taught more than 6,000 students in this field during the past 20 years.
