

Dillard Named Chief Justice

Student Senate President Bill Beuck today announced the appointment of Lonnie Dillard, Lubbock junior as Chief Justice of the Tech Supreme Court, pending approval of the Senate tonight.

Dillard, former freshman council advisor, student senator and varsity cheerleader said he would stress reform in appointment procedure and court policy.

In his policy statement to the Daily Toreador, Dillard said, "The history of our Supreme Court has been filled with cobwebs of disuse and has become little more than a repository for political 'has-beens.' "

"Without cases no court can properly function for the just treatment of student grievances and issues," he said.

"The strength of the Supreme Court depends upon the interest and support of the student body," he said.

Beuck said concerning Dillard's appointment, "Dillard's excellence ability in speech, parliamentary procedure learned as president of the MUN and in law make him well qualified for the position. He has indicated an extreme interest in the court which should help upgrade it."

'H2O-A-GO-GO'

Slated Tonight

'H2O-A-Go-Go,' featuring synchronized swimming and diving exhibitions, begins a one-hour performance today at 8 p.m. in the Tech pool.

Students of Tech's physical education department and the Dolphins, men's swimming fraternity comprise the cast of the show. Jim McNally coaches the 29 coeds and Dolphin members who will perform.

Modern dance sequences, diving clowns and an exhibition by Tech's varsity divers are included in the program. The pool is located in the Mens' Gym near the intersection of 6th and Boston.

LONNIE DILLARD

Dillard will replace Bob Fillpot, this year's Chief Justice.

Dorm Towers Loan Studied

Tech executives and architects were in Fort Worth over the weekend reviewing the loan application for construction of the new highrise dormitory complex.

Making the one-day trip were M. L. Pennington, vice president for business affairs; Robert Price, comptroller; and architects Howard Schmidt and Bob Messersmith.

The application to the Department of Housing and Urban Development for the loan of \$4 million was made in December and a final decision is expected this summer.

The College Housing Loan Pro-

gram, a branch of the governmental agency, has financed the construction of all other Tech dormitories since the construction of Weeks Hall in the 1950s. The loans are then paid by bonds.

Price explained that the total estimated cost of the Wiggins Complex is \$8 million and said that the governmental loan is half that amount. The remainder of the finances will come from a bond sale to the open market.

Three dorms of the six dorms are scheduled for completion by September 1967, and the remaining three are tentatively scheduled for September of 1969.

Graduation Concert Set For Today

Texas Tech Symphony Orchestra, conducted by Paul Ellsworth, will present the 6th Annual Commencement Concert at 8:15 tonight in the Union Ballroom.

Student soloists, selected by audition from the studios of Frank Bowen, Gene Kenney, Charles Post, Benjamin Smith, and Richard Tolley, will play in the concert. Student conductors were selected by Ellsworth.

Astronaut Will Take Longest Space Walk

CAPE KENNEDY, Fla. (AP)—Astronaut Eugene A. Cernan is to take man's longest space walk and will shift through the skies with a rocket-powered back pack during next week's Gemini 9 flight.

Cernan and the command pilot, Air Force Lt. Col. Thomas P. Stafford, also will collaborate on a simulated space rescue and Cernan will conduct scientific and photographic experiments while outside. He will be attached to a lengthy tether which will permit him to move out as far as 140 feet from the spacecraft.

The main goals of the planned 2-hour 25-minute space stroll will be to determine how well man withstands an orbiting ship and how well the back pack operates.

RONALD REED

Crash Kills Tech Man; Funeral Set

Ronald Reed, 19-year-old Fort Worth freshman, was killed early Sunday when the car in which he was riding crashed through a construction barrier and hit a power line pole.

Reed, who was an engineering major, lived at 3620 Ruth Rd. in Fort Worth.

David Jay Kava, a 20-year-old airman from Reese Air Force Base, and William Correll Bronson of 4319 30th were also injured in the crash.

Funeral services will be today at 4 p.m. in St. John's United Church in Fort Worth. He will be buried in Mt. Olivet Cemetery.

Tech's Fight For SWC Entry Recounted

FOND RECOLLECTION—Athletic Director Polk Robison views a momento of Tech's admission to the Southwest Conference in 1956 after nine unsuccessful attempts to gain entrance. The announcement was an occasion of jubilation and opened the way for an enriched athletic program at Texas Tech. (Staff Photo)

Editor's Note: This is the first in a two-part series in observance of Tech's 10th anniversary in the Southwest Conference. Tomorrow's article will deal with the influence of Tech's SWC membership in the past 10 years.

By JIM JONES

Assistant Managing Editor

On Saturday morning, May 12, 1956, Howard Grubbs, executive secretary of the Southwest Athletic Conference, burst into a crowded room in the University of Arkansas Student Union Building and began passing out mimeographed sheets to a group of newsmen.

Sports writers from throughout the Southwest were waiting in the small room for the biggest story to come out of a spring meeting of the Southwest Athletic Conference since Oklahoma A&M left the conference in 1925.

The reason for the newsmen's concern was made clear in the first paragraph:

"By unanimous vote, Texas Tech was invited to appoint a committee to work with a Southwest Athletic Conference committee for the express purpose of working out details under which Texas Tech may become a member of the Southwest Conference."

Like unto Armistice

This news, as exciting as it was to sports writers, did nothing to the rolling Ozark Mountains. Nor was it a banner-headline story in Austin, Houston, Waco, Fort Worth, Dallas or College Station.

But 500 miles to the southwest,

the news had the effect of the signing of the armistice ending World War II. Impromptu pep rallies were held on the Tech campus and downtown in front of the old Lubbock Hotel.

The pandemonium began at 10:32 a.m. when Jack Dale, broadcasting from Fayetteville on KFYO radio, shouted into the microphone, "Texas Tech is in the Southwest Conference."

The bells in the Ad Building tower began their traditional toll of a Tech victory. Students flowed out of dormitories and academic buildings onto the Ad Building parking lot.

Celebration Begins

The students then began to wind their way downtown where townspeople joined the victorious parade led by the Tech band. When the surging marchers reached the hotel, more than 50,000 had gathered to join the revelers.

Dr. E. N. Jones, president of Tech, spoke to the students expressing his, and the students' gratitude, to Dr. William J. Davis, government professor and chairman of the Athletic Council (Dr. Davis still holds this post), and DeWitt Weaver, head football coach and athletic director. Weaver and Davis had worked for several years for Tech's admittance to the conference and were in Arkansas when the announcement was made.

Mayor Speaks

Lennis Baker, mayor pro-tem of Lubbock, told the students the people of Lubbock would "be forever grateful for Tech making

this honor possible for Lubbock.

The celebration of Tech's admittance to the Southwest Conference culminated a 29-year struggle for membership in the most prestigious athletic conference in the nation.

The struggle began in 1927 when Tech made application to the conference. Subsequent applications, which were all turned down, were made in 1929, 1931, 1938, 1939 and 1941.

After the 1941 application for membership was turned down, the Tech Board of Directors, their toes stepped on seven times by the conference, passed a resolution saying Tech would never again apply.

Try Again

But again in 1948, Dr. D. M. Wiggins, then president of the college, wrote a personal letter to conference officials renewing the 1941 application. It was also turned down by SWC members.

At the 1952 meeting of the SWC, at which Tech's final application was turned down, the conference would be by invitation only.

At the 1954 meeting of the conference, supporters of Tech were again at work trying to get the Raiders in the coveted SWC. This time Tech got a whiff of the sweet smell of success as the school got four of the required five votes to get in the conference.

Three Object

The University of Texas, Texas A&M, Baylor and TCU voted to let the South Plains school into

NEED A SUMMER JOB? Need summer-time help after finals. Jobs filled from now to June 10. 5 experienced truck-trailer drivers, commercial license, transporting non-pressure chemicals, short hauls, 4-6 weeks work, guaranteed 50 hrs. per week, and overtime, \$1.00 per hour. References needed. Resume to R. E. Frederiksen, 4265 48th, Lubbock, NO PHONE CALLS.

LOST AND FOUND

Brown western billfold. Lost men's 43M or I.E. Building. Reward for return of papers, Ext. 4049.

German Clubs Elect Officers

Tech's German club, Der Liederkranz, and the German language honorary, Delta Phi Alpha, have recently chosen new officers.

President of Der Liederkranz for next year is Linda Draughon, sophomore math major; vice president, Gary Barron, freshman architecture major; and secretary-treasurer, Jane Kight, freshman biology major.

Officers of Delta Phi Alpha are: president, Betty Jones, Lubbock;

vice president, Helen Kott, Fredricksburg; secretary-treasurer, Marvin Watson, Amarillo. The faculty advisor is Alexander P. Hull Jr.

New initiates of the chapter are Jamie Axtell, Mary Ann Baber, Mary Margaret Davis, Julie Jakobsmeier, Valda Jirgensons, Suzanne Langley, Frank Lasater, Jugo Lentze, Betty Menke, Judy Roeh, Christa Smith, George Stanley, Marvin Watson and David Wilkinson.

Der Liederkranz was founded in the late 1920's when Tech was still young. Official membership at present is approximately 30 persons, although some of the meetings are attended by as many as 100.

The main purpose of Der Liederkranz is to further interest in the language, culture and people of German speaking countries.

As the club evolved, its activities broadened. Programs presented at meetings include professional and amateur films of Germany, Austria and Switzerland. Slides have also been shown with talks by people who have visited these countries.

This year Suzanne Langley, a German student, gave a talk on Austria where she studied for a year. George Camp, who spent last summer in Germany, showed slides and spoke about the city of Hannover, Germany.

Professors also speak at meetings. Last year the club heard a talk by Dr. Karl Reuning, visiting professor in the English depart-

ment and a native of Germany. He discussed German folk songs and their development.

Delta Chi Alpha plans for the upcoming year include the sponsorship and production of a German play. It will be presented at the 1967 state convention of the Texas Association of German students to be held in San Marcos. Other plans include a series of informative programs about life and customs in German speaking countries.

Probably the biggest annual activity of Der Liederkranz is its sponsorship with Delta Phi Alpha of a German play production. Last year the two organizations presented "Die Unbekannte aus der Seine" here in the German language theatre and at the state meeting in Dallas.

All the programs at the regular meetings of Delta Phi Alpha are conducted in German. Members of both organizations feel that the meetings are intellectually stimulating to their growth in learning the German language.

Barbara Birmingham Awarded Best Angel

Angel Flight awards were presented and Arnold Air Society officers installed at a dinner meeting for the two Texas Tech organizations Thursday at Underwood's Cafeteria.

Angel Flight drill instructor Barbara Birmingham of Dallas received the Best Angel award. Jane Sosnowy of Texas City, retiring commander, was presented the Angel Flight Commander's Award. The drill team's appreciation

award went to Arnold Air Society member Tommy Singleton of Lubbock.

Mackie Curry of San Angelo was installed as commander of the Arnold Air Society. Other officers are Norman Schuessler, executive officer; Frankie Figueroa, administration; Rudy Baumgardner, operations; Paul Honig, information; Gerald Paige, comptroller; and J. B. Stringer, chaplain.

Angel Flight Commander Virginia Fry of Lubbock introduced 10 new pledges. They are Susi Jones, Gail Hawes, Donna Johnstone, Sherry Cannon, Jane Moore, Ann Blackburn, Mary Ann Cook and Joyce Keddie.

\$9,800 Awarded

Texas Tech's chemistry department has been awarded a \$9,800 National Scientific Foundation matching fund grant to purchase instructional scientific equipment.

The total fund of \$19,600 will go toward purchases of instruments and equipment to improve undergraduate instruction in bio-chemistry, said Chemistry Head Dr. Joe Dennis.

New equipment will include PH meters, spectrophotometers, elec-

trophoresis and chromatography apparatus, Kjeldahl digesting units, polarimeters, mettler balances, fraction collector and spectrofluorometer.

"This equipment purchase will either make possible experiments which cannot be done now, or, by making additional equipment available, permit students to work individually," Dr. Dennis said.

The bio-chemistry staff includes Dr. Dennis, Dr. John A. Anderson and Dr. Pill-Soon Song.

Directors Appoint Six

The board of directors of the Tech Foundation appointed six new board members in a Saturday business meeting and received reports from the academic deans and various board committees.

The six new appointees are James Milam, Lubbock; William Evans, Lubbock; Mrs. W. C. Holden, Lubbock; Mrs. Edwin B. Hopkins, Dallas; Roy Tolk, Amarillo; and Robert L. Cash.

Bill J. Parsley, Tech vice president for development, submitted a

financial statement comparing contributions to the foundation for the first four months of the past two years. Contributions for 1966 total \$209,262 for the period Jan. 1-April 21, an increase of \$48,000 over the same period for 1965.

Dr. William M. Pearce, vice president for academic affairs, discussed Tech's role in higher education as outlined by the State Coordinating Board at a noon luncheon in the Tech Union. Dr. Pearce said, "The most significant action

of the Coordinating Board, so far as Tech is concerned, has been the designation of the institution as a 'university.' The real meaning of this classification is that the college is free to develop other resources and to enlarge the scope of its programs."

In other action board chairman J. F. Maddox, presented the report of the executive committee, and M. L. Pennington, vice president for business affairs, submitted the treasurer's report.

It's SWC Anniversary Time

THURSDAY MARKS an important date in the history of Texas Technological College—it is the tenth anniversary of this university's admittance into the Southwest Conference.

Assessing the exact value of this membership in the SWC is a near impossible task since it deals with a multitude of intangibles. The amount of physical and academic growth attributable to SWC membership, the increased meaning attached to a SWC school degree, the benefits of national publicity via athletics and the closer association and identification with

other universities just cannot be explained in terms of quantity.

It is obvious, however, that these points made possible by SWC membership have been a significant factor, and perhaps *the* significant factor, in making Texas Tech the university it is today.

The Southwest Conference is unquestionably one of the top athletic conferences in the nation. Identification with such a body puts a school in the national eye and encourages it to maintain a program of improvement enabling it to compete with other universities.

Athletics can in no way be said to overshadow the academic environment of a university, but they can work toward the common goal of university excellence. We see athletics as a stepping stone toward academic excellence at this school, for they are earning invaluable prestige and reputation for Tech.

These are two necessary qualities in the pursuit of academic excellence, qualities which athletics can build much faster than a record of academic achievement. This is fortunate for a school only 40 years old.

Tech athletics have not always enjoyed the success in the SWC they enjoyed this year. Some persons opposed Tech's entrance because they would be the door-mat of the conference. To a certain extent this was true, but 10 years' time has cured that fear and enabled Tech to compete on an even level with the top schools of the conference.

The rewards since that time have several times overshadowed the limited number of cellar finishes. Tech made nine attempts for conference admittance, beginning in October, 1927, before finally meeting with success. Hindsight makes us grateful for this persistence.

The first 10 years have been prosperous and progressive ones. We can hope the next 10 will be as profitable. We can also hope that other areas on campus will take this cue and work toward advancement even if it means initial hardship.

NO LONGER is Texas Technological College a small, backwoods institution of higher learning which can isolate itself from the affairs of the state, nation and world, nor has it been for many years. Its sheer size indicates a diversity of interest and opinions, an exchange of ideas and a belief among its students that they are intelligent enough to formulate opinions on things other than which social gathering they will attend the following weekend.

Because Tech is gradually becoming a national university rather than a West Texas university, it is also becoming more involved in national affairs. More and more nationally and internationally acclaimed speakers are coming to Tech, and more and more Tech professors and administrators are being asked to lecture or present papers, some even abroad.

Today's dynamic world situation also dictates that potential leaders (such as found on university campuses) be informed as to what is happening on the other side of the nation or world because improved communication and transportation have made these happenings a direct influence on their future.

Knowing that many students read no newspaper other than this one, **The Toreador** will next fall begin a slow transformation from a "college daily" to a "university daily."

By "college daily" we mean one which contains only announcements of campus meetings and news stories pertaining solely to the school. By "university daily" we mean one which contains the more important national and international as well as campus news.

This change, however, will not mean a de-emphasis in campus news nor a halt to publication of meeting announcements. Next year's larger size paper will enable the continuation of one and the inauguration of the other.

We also hope to editorialize to a certain extent on these happenings, but not to the point that it will interfere with our "Program For Progress" outlined several days ago.

A main purpose of education is to teach the individual to think and to formulate opinions for himself, and not only in the academic area which he is studying. For this to occur in regard to national and international affairs, the person must be adequately informed as to current happenings in these areas.

It will be our goal to stimulate this interest in national and international affairs next year with the belief that an increasingly large student body has necessitated the change. It is an indication of the gradual maturation of this university.

★ ★ ★

ANOTHER FEATURE which will be incorporated into next fall's **Toreador** is a weekly column, probably on Saturdays, answering "Letters to the Editor" appearing that week. In many instances letters deserve an explanation, a reply or a rebuttal, but we don't believe it should be tacked on to the end of each letter.

Letter-to-editor writing is often discouraged if students feel that they will be ridiculed or their points weakened by a "slanted" reply from the newspaper. Readers should be able to express their opinions without fear of this. Nevertheless, the editor does have the right to defend himself, and in other cases letter writings are misinformed. By instituting the column at the end of the week, we hope that both will be satisfied.

★ ★ ★

FEW COULD DENY THAT POLITICIANS are a clever group, especially when it comes election time. Often they discover that there is more than one way to get around a law, and they are quick to take advantage.

The most recent example of this was the gubernatorial campaign for governor of Alabama. Gov. George Wallace was prohibited by law from running for another term, so his wife ran for the office, enabling Wallace to maintain the position in every way except for owning the title "governor."

It can hardly be said that this is wrong, because Mrs. (or should it be Mr.?) Wallace's victory was obviously an indication that the residents of Alabama wished to maintain the present state administration.

However, we do wonder about the first social function the Wallaces attend. Instead of the usual "Gov. and Mrs. Wallace attended . . ." in the resulting news story, it will have to read something like "Governor and Mr. Wallace attended . . ." Hopefully, it will be a woman reporter who covers the story!

★ ★ ★

GRADUATION IS ALWAYS A SAD TIME of year in the offices of **The Toreador**, at least in the respect that several members of the staff will be departing. For some reason a newspaper is not like a grocery store crew or a staff of salesmen, for a sense of loyalty, kinship and respect always seem to develop among its members.

This year is no exception. This year's seniors **Cecil Green, Mike Ferrell, Eugene Smith, Mike Lutz, John Armistead** and **L.H. Shrader** will be certainly missed in the halls of the **Journalism Building** next fall, and we feel sure the feeling is mutual.

They have devoted innumerable hours to the publication of **The Toreador**—139 issues this year, as well as three previous years for some of them. To them we say "well done" and wish them good luck.

Something's Lacking

The year's fourth and final production of the University Theater "Gallows Humor" by Jack Richardson, ended its run yesterday.

Tickets remained unsold for yesterday's performance, as well as for those Friday, Saturday and Sunday, indicating, we believe, that there is a lack of something somewhere.

The University Theater is an experimental theater. But its experimenting does not stop within the speech and drama departments. Its productions are not put on simply to give the participating students a place to air their talent—or lack of it—before an audience of fellow drama students.

The experimental part of the Theater's work extends to the entire campus community. It is an experiment not only in performance but in attendance.

Part of the duty of the University Theater is to give to the faculty and students of Texas Tech an opportunity to attend and experience theater in the works; to expose them to an important facet of their culture; to broaden their scope of interests.

These opportunities ignored and unheeded result in harm to no one more than to those who ignore them.

It is they who lose out.—BW

Academic Area Growing

EDITOR'S NOTE: This is the second of a two-part series on the development and expansion of Texas Tech and what can be expected in the future. The first story dealt with physical expansion; this one is concerned with academic expansion.

PHYSICAL EXPANSION is only part of the growth process that changes a college into a university and that is changing Texas Tech from a technological college to one of the leading universities in Texas.

The classification of this school by the state's coordinating board on higher education as a university and as one of the four top universities in Texas has laid the

By
**Barbra
Worley**

plans for academic expansion to match and move hand in hand with the physical expansion.

Come September the

Tech campus will see the addition of 115 new faculty members, according to Dr. William M. Pearce, vice president for academic affairs, and this is only a beginning.

ALSO EFFECTIVE in September the departments of philosophy and education are to be separated, Pearce said, adding "it will be best for the two disciplines. Also we have a request in now for a school of education to be created, we hope, in September, 1967."

Pearce said there would be no major course changes or additions in the 1966-67 year beyond those already authorized because "the Coordinating Board has been concerned with developing the board role and scope of the institutions of higher learning and has not acted on individual program requests."

1967 being the first year of a new biennium, it is expected more new programs will take form then, Pearce said.

ONE OF THE MOST important and far-reaching academic changes to occur in 1967 will be the opening of Texas Tech's School of Law. "With the school's head, Richard Amandes, and its librarian, U. V. Jones, appointed and assuming their duties in June, it will be their job during the next year to get their faculty and begin ordering and assembling a law library," Pearce said.

Entrance requirements for the law school include a baccalaureate degree, an acceptable undergraduate record and a satisfactory score on the Law School Aptitude Test.

Only first-year law students will be admitted in 1967, but the school's enrollment is expected to eventually reach 585, with a yearly increase until 1975.

"WE WANT TO IMPROVE our recruiting and our scholarships," Dr. Pearce said, "and increase our interest in research, which I think will definitely happen when President-elect Murray takes over.

"Our classification as a university is indicative of the academic progress we have made during the last five years, including 10 doctoral programs added in that time.

"Our big job now is to get the good students into the doctoral programs we now have. We need to work on this intensely during the next few years, so that we can justify what we now have and can continue with the main purpose of the school—learning.

"If we can do that," Dr. Pearce said, "if we can justify the programs we have now, then that will be the springboard to other advancements."

Raider Roundup

ITALIAN SLIDES

Dr. F. D. Maurino, professor of foreign languages, will show movies of Italy Monday at 7 p.m. in the Ad Building, room 217. The movies will feature both ancient and modern Italian life, and the showing is open to the public.

JUNIOR COUNCIL

New officers for Junior Council are: Terry Terrell, president; Marcie Windler, vice president; Judy Gordon, secretary; Susan Esterak, treasurer; Kathy Harrison, projects chairman; Janis Langley, AWS representative; Janie Kinney, BSO representative; Janie Harris, reporter; Peggy Griffith, senior sponsor; and Peggy Williams, faculty sponsor.

BAND OFFICERS

The Tech Band has elected officers for the 1966-67 school year. They are: Keith Clayton Thomas, president; Roy James Grubbs III,

vice president; John Ted Bartley, secretary; Susie Ramzy, treasurer; and John Michael Weed III, social chairman.

DPS

Col. Homer Garrison, director of the Texas Department of Public Safety announced June 6 as the deadline for applications to the next DPS recruit training school for patrolmen.

To qualify for employment in the uniformed services of the DPS, a man must be between the ages of 21 and 35, not less than 5 feet 8 inches tall, have a high school education or its equivalent, be in sound physical condition with good vision and must be a citizen of the United States and a resident of Texas for at least one year immediately prior to the date of application.

AGGIE COUNCIL

The Aggie Council elected Randolph Schaefer Aggie of the month for May and Darrel Ueckert outstanding student for the year in the School of Agriculture.

Newly elected officers are Bill Countiss, president; George Mitchell, vice president; Bill Harris, secretary; Allen Wuensche, treasurer; John McNeil, marshal; and Dicky Greenwood, reporter.

Box Serves As Range Consultant

Texas Tech Range Management Prof. Thadis Box will take a six weeks leave of absence beginning May 15 to serve as a range management consultant in the Somalia Republic for the Food and Agriculture Organization of the United Nations.

Dr. Box's assignment will include assessing range resources, locating areas and methods for improving range production, formulating plans for future projects and establishing range management authorities. He will be working with UN agricultural experts currently in Somalia.

The Tech professor will report his findings to the Somalian government and to the UN Agricultural Committee. His recommendations are expected to provide the basis for future range land development and practices in Somalia.

Somalia, located on the east coast of Africa, is roughly the size of Texas. The country has few hard surface roads and Dr. Box expects to encounter some rough terrain during his work. The country is hot and dry and he has been warned to expect dust storms "similar to those on the South Plains."

"We will study the area carefully in an effort to conclude what can be done to improve range production to sustain the growing population in Somalia," he said.

SWC Fight

(Continued from Page 1)
 their ranks. But SMU, Rice and Arkansas held back their stamp of approval.

Then, in 1955 and the early opponent of Tech's membership months of 1956, the tide began to change for Tech. SMU, the biggest in the conference in previous years, announced it would support Tech's ninth bid for entry in SWC.

As the May, 1956, meeting approached, Rice and Arkansas still

held back on their support. Clouds of doubt for Tech built up again as rumors began to circulate concerning the upcoming meeting in Fayetteville.

Baylor Holds Out

Baylor was said to have considered the University of Houston and Tech's membership as a package deal, since the Houston school also wanted in the conference. Therefore, Baylor would not vote for Tech without Houston being included.

Although Baylor officials denied the rumor, Tech supporters began

to have doubts about Tech's chances at the meeting.

More doubt was nurtured when Rice and Arkansas were reported to have offered A&M a "package" deal. If A&M would vote against Tech, Rice and Arkansas would vote to remove A&M from NCAA probation.

Although this also appeared to be nothing more than a rumor, Tech supporters began to view with doubt what they had been assured of only a few months before.

Many Wondered

There were also some Techsians who were apprehensive about Tech's admittance into the powerful SWC. Many wondered aloud why Tech should give up that perennial Border Conference championship, which Tech had enjoyed for several years to be the underdog in a bigger and much stronger conference.

Tension mounted on the campus as the May 12 meeting in Fayetteville approached. Harold Ratliff, Associated Press sports writer for SWC, assured his readers on May 11 that Tech would make the Southwest Conference an eight-way race after the upcoming meeting.

And Ratliff's readers were not disappointed with the writer's prediction when the news flashed out of Fayetteville the next morning that Tech was finally in the Southwest Conference.

Southern Methodist Now Off Probation

Dr. William Davis represented Tech at the Southwest Conference Faculty committee meeting last weekend in Austin where SMU was lifted from its probation.

The SWC lifted a two-year probation against SMU for recruiting violations. When the NCAA follows suit the Mustangs will be eligible for a bowl game again.

With removal of SMU, the only school left in the hot seat is Texas A&M, which is under probation for practicing out-of-season and taking athletic scholarships out-of-season.

It was decided that the coaches would be given the pre-enrollment application forms five days in advance of the signing date. With this type of applications from the schoolboy athletes, the coach can be on the boy's "front porch" at 8 a.m. the day the signing period opens," said Dr. Alan Chapman of Rice, president of the conference.

In an effort to clear up controversy over baby sitting—that is, hiding out athletes—the committee adopted a recommendation from the athletic directors and coaches that the coaches be "discouraged" from isolating players 24 hours before the signing date.

Closed circuit television will be banned from conference football games unless the two coaches agree to its use. There is no rule for non-conference games.

It was voted to make an exception to the rule that forbids payment of athletes other than for athletic trips. The expenses may be paid for athletes attending meetings of the Fellowship of Christian Athletes.

Howard Grubbs, executive secretary of the conference, said there was a discussion of a possible tie up with the Big Eight Conference to furnish teams for the Cotton Bowl. No action was taken or any plans made to contact the Big Eight, he said.

A possible change in the rule gov-

erning junior college transfers to get it in line with the NCAA was discussed, but not action was taken.

The conference allows a junior college graduate immediate eligibility without laying out a year under the transfer rule but the NCAA not only permits this but allows a junior college undergraduate with 48 hours of work with a C average and one with 25 hours work with B average to become eligible immediately.

Dr. Chapman said the conference could continue to have a stricter rule than the NCAA if it so wanted. The conference can't have a rule that is less stringent.

A Tech athlete got favorable ruling from the conference meeting.

Jerry Hrnciar, Tech golfer, got another year of eligibility although he participated in the Border Olympic Golf tournament as a sophomore. He wasn't entered but played regardless and the question arise if it would count as a year of eligibility. The conference voted not to penalize Hrnciar and he was granted another year's eligibility.

Prof To Talk

Texas Tech's visiting professor of English Dr. Andrew Scott Cairncross will address a meeting of Sigma Tau Delta, English honorary, at 6 p.m. today at Wayland Baptist College in Plainview. Dr. Cairncross, an authority on Shakespeare, will give an analysis of the play, "Antony and Cleopatra."

A native of Scotland, Dr. Cairncross received his doctor of literature degree from Glasgow University. His professional career includes both classroom teaching and administrative posts as English department head and headmaster in secondary schools in his native Lanarkshire.

Tech Ends Season With ACC Wins

Abilene: The Tech diamondmen ended their season on a good note as they downed the Abilene Christian Wildcats 7-2 and 6-5.

That made the Raiders season won and lost record the best in the last few years—10-13.

Just last week the Raiders had blown a chance for their first .500 or better season as they dropped two to the 'Cats 1-0 and 3-2.

This was the last game for seniors, John Dudley, Larry Anderson, Don Nash, Jim Miller and Ronny Holly.

"Too much couldn't be said about Holly in this series," said Head Coach Berl Huffman. "He played a fine game in the field and at bat. He really came through when we needed a hit. He ended his season in a blaze of glory," said Huffman.

In the series Holly went 4-7 and drove in four runs and made only one error for the two games.

In the first game the Raiders jumped on starter and loser Craig Collier with singles by Dudley, Holly and a two-run producing single by pitcher David Callarman.

The 'Cats came back with one run in the bottom half of the third. Mike Ward got to first on a fielder's choice and scored on a single by Johnny Huff.

The Raiders came back in the top of the fourth with a homerun by Jerry Haggard which made the score 3-1 Tech.

The 'Cats scored again in the bottom of the fourth on a triple by Gary Smith and a single by Larry Adams. This ended the scoring for the 'Cats in the first game.

The Raiders added three runs in the fifth and one in the sixth. In the fifth, Eldon Frost drove in two runs with a double and he scored on a single by Dudley. The lone run in the sixth came on a triple

by Chris Galanos and a sacrifice by Haggard.

David Callarman went the distance for the Raiders giving up two runs on six hits, walking four and fanning one. Craig Collier went the distance for the 'Cats giving up seven runs on 11 hits, walking three and striking out seven.

Second Game

Tech really came out fighting the second game as they scored two runs in the top of the first, only to have ACC score three in the bottom half of the inning.

Eddie Stiles got to first on a walk and John McIntyre got on with a single. They both scored as Holly got one of his three hits of the game. On the hit there was an error by the 'Cats third baseman that let both McIntyre and Stiles score.

In the bottom of the first ACC's John Moses scored on a double error on his hit and a fielder's choice on ACC's second baseman. Smith reached first on a walk and advanced on Lawson's sacrifice. Larry Adams singled to score both Smith and Lawson.

In the second the 'Cats picked up one more run on a single by Massey and a double by Huff.

The Raiders came back with two runs in the third on singles by McIntyre and Watts. McIntyre scored on a sacrifice by Frost and Watts scored on a single by Holly.

In the fifth the Raiders picked up one more run on a walk to Holly and a sacrifice by Larry Anderson which made the score 5-4 Tech.

The 'Cats tied it in the sixth on a home run by Mike Ward.

The Raiders scored the final run in the seventh on a single by Frost and a double by Holly.

Eldon Fox went the distance for the Raiders giving up five runs on 10 hits, walking one and striking out six. Gilbreth went the distance for the 'Cats as he gave up six runs on 10 hits, walking five and striking out nine.

Leading hitters for the Raiders were Holly 4-7 for the series and McIntyre with 3-6 for the series.

The power was provided by Holly Adams 4-7, Ward and Huff 3-8 for the series. Power was provided by Moss and Huff with a double, Huff and Smith with a triple and Ward with a homer.

Leading hitters for the 'Cats were

Adams 4-7, Ward and Huff 3-8 for the series. Power was provided by Moss and Huff with a double, Huff and Smith with a triple and Ward with a homer.

Coach Of The Year Will Speak at Banquet

Hugh (Duffy) Daugherty, 1965 coach of the year, will be the honored speaker at the Red Raiders Club's All-Sports banquet tonight.

After sweeping through a rugged 10-game schedule undefeated and untied, en route to a 14-12 Rose Bowl loss to UCLA, Daugherty's Spartans were named national champions by the United Press and by the National Football Foundation and the Hall of Fame.

Honoring Texas Tech's athletes in seven sports, the banquet will be held in the Lubbock Municipal Coliseum. Food will be served from 6:30 to 7:30. Outstanding athletes will be honored, and the Pete Cav-

ention and Dell Morgan Memorial awards will be announced.

Dean Killion's Court Jesters will play at the banquet.

Matson Zaps Mooney; Ed Takes 2nd In Shot

Tech's Ed Mooney grabbed second place in the shot put and fell victim to an accident which cost him valuable inches in the discus at the SWC meet in Austin.

Mooney threw the shot 58-2 and as he prepared for the discus, he was hit on the ankle by a discus thrown by Randy What's-His-Name from A&M. His 160 feet, four and one-half inches effort was good for third place behind Rice's Gerald Holtzman who's platter sailed six inches farther.

The Raider thinclads were only able to muster 12 points in the meet mainly because of injuries. Tech finished seventh, only one point higher than the cellar-dwelling TCU Frogs.

Mooney's second place in the shot put was the only red ribbon effort for the Raiders. His place in

the discus and Art Carroll's 14.5 nigh hurdles time were a pair of thirds. A few more Raider points were picked up when Sam Hart placed fifth in the pole vault and Foster Miller got another fifth in the high jump.

The meet ended the 1966 track season for the Raiders.

MAJOR - MINOR

Joy Jarvis, Houston junior, received the award for outstanding Major-Minor Club member recently at the Major-Minor picnic and Mock Olympics.

President Jo Sanders presented a desk pen set to two instructors, Margot Purdy and Colleen O'Connor. Janice Mitchell presented the second place trophy from the "Little 500."
