An Editorial...

J T King fielded a fighting team Saturday night.

It was evident from every seat in the stands; it was evident on the scoreboard; and it was evident from the way the Raiders completely outclassed the giant Froggies—Tech went out to play a game and they did!

Speaking of the game, King said Monday:

"This team is setting a pattern for things to come at Tech."

We definitely hope so.

The Raiders were a different team Saturday night from the previous week. True, they made mistakes, but they stemmed mostly from inexperience—something only time can alleviate. But the most important facet was the way the Raiders found themselves and showed that they now have the determination to win.

During the half Saturday night, the Raiders, plagued with fumbles throughout the first two periods, vowed as a team, that if they lost, it would be because TCU would beat them—not because they had beaten themselves.

This is the kind of spirit we need at Texas Tech.

It is common knowledge that we openly criticized the Raiders after the A&M game. We felt it was a deserved criticism—we still do. However, we now proudly offer praise.

The odds Saturday night against Baylor in size, experience and manpower may be too much for King's crew, but if they have the same "I-want-to-win" attitude, Baylor may go home a "wounded" Bear.

The kind of game the Raiders played Saturday night helps Tech, helps Techsans and most important, helps the Raiders themselves.

WE SALUTE THE RED RAIDERS.

—Toreador Editorial Staff

HONORED DADS—The youngest dad attending Dad's Day, Charles Wilson of Fort Worth, was escorted to the pre-game ceremonies by Judy Price of Lubbock. The dad who came the longest distance, Leo Stark of Long Island, N. Y., was escorted by Kay Armstrong of Lubbock.

HALL OF FAME INITIATES—During halftime ceremonies at the TCU game Tech named five men to its newly created Hall of Fame. Those inducted were Elmer Tarbox, Agriculture Dean Emeritus W. L. Stangel, former Raider coach Pete Cawthon, Walter Schlinkman and the late Ransom Walker.

FIRST DATE QUESTIONS—She: "Will he?" He: "Should I?" For techniques, see feature on page 8

Demos Map Plans At Meeting Tonight

Discussion of progress on the all-expense paid trip to Washington, D. C., will head the agenda at the Young Democrats meeting at 7:30 p.m.

Interested parties are invited to attend the meeting tonight at the north door of the Flame Room at the Pioneer Natural Gas Co., 10th and Texas.

ROTC Officer Speaks To First Tech Forum

The first Tech forum of the year will be held at 7 p.m. Thursday in the Tech Union. Capt. Joseph Macklin, Army ROTC instructor, will speak on the "Effects of Nuclear Weapons."

A graduate of West Point, Captain Macklin is considered an expert on atomic warfare and nuclear weapons.

According to Carol Bray, chairman of the Ideas and Issues Committee, which sponsors the forum, "We hope to have these forums on each first and third Thursday nights of the month. Guest speakers will include authorities on a variety of subjects."

Dr. John Guilds of the Tech English department will speak in the near future at the forum. Dr. Guilds taught English at the University of Damascus, in Syria and will speak on the ability of foreign students to master the English language.

In addition to guest speakers, the forum will include debates on various issues between Tech students, panel discussions on controversial matters and book reviews.

The forums are a service of the Tech Union and are free to students and faculty members.

Homemakers Present Awards At Banquet

Scholarships will be presented to 13 Home Economics majors at the annual awards banquet of the Texas Tech Home Economics Club at 6 p.m. today.

Dr. Willa Vaughn Tinsley, Home Economics dean, will formally present the 1961-62 grants at the dinner in the Union Ballroom. Presiding at the banquet will be Nickie Woelfel of Bovina, Home Economics Club president.

Be Shiao from Formosa will be among those receiving scholarships. Miss Shiao is a foreign fel-

lowship student sponsored by the Home Economics Club and Phi Upsilon Omicron.

Others receiving scholarships will be Priscilla Ann Gibson, the Borden Award; Sunny Jean Courington, Helen Fay Foster and Susan Brady Jungle, the Sears-Roebuck Scholarship; Judith Ann Cowger, Olivia June Dvoracek and Sylvia La Rue Elliott, the Melba Mae Maxey Scholarship; Janice Kay Holloway, Carol Jean Purl and Margaret Jean Smith, the Ethel Foster Scholarship; Lela Jo Glimp, the Johnnie Michie Scholarship; and Shelley Carol White, the Lubbock City Panhellenic Scholarship. Dorothy Kathleen Brennan will receive an anonymous scholarship.

Another highlight of the program will be the presentation of a plaque to Carolyn Vines of Albany, student Home Economist of the Year at Tech. Miss Vines was selected for the honor last spring by the Home Economics Club. She is Tech's nominee for the State Economist of the Year and will compete for the honor at the annual meeting of the Texas Home Economics College Club in Denton Oct. 26-28.

Also to be recognized are Home Economics majors who have received scholarships outside the School of Home Economics and Tech's outstanding sophomore in Home Economics.

Autumn leaves will provide the theme for the banquet and the Ballroom will be decorated in fall colors of brown, orange, and rust. A Home Economics Club decoration committee, with Miss Judy Dawson of Tullia as chairman, will use chrysanthemums in the table decorations and in the guests' corsages.

Fish Petitions Due For Cheerleaders

Three boys and three girls will be chosen freshmen cheerleaders for the 1961-62 season.

Petitions, which are in the Student Council office, are due by 4:30 p.m. Wednesday. A 50-cent filing fee must be paid when the petitions are picked up. Before being returned they must have 50 signatures. The names of those running will be announced Thursday.

Tryouts will be in the old boys' gym at 6:30 p.m. Oct. 26, and there will be no runoff elections. Results, which are final, will be published in the Toreador Oct. 28.

'62 CORVAIR MONZA NEW FACE, SAME SPORTING HEART

We might as well tell you straight off: Corvair's the car for the driving enthusiast. Think that lets you out? Maybe. Maybe not.

Until you've driven one, you really can't say for sure, because Corvair's kind of driving is like no other in the land. The amazing air-cooled rear engine sees to that. You swing around curves flat as you please, in complete control. You whip through the sticky spots other cars should keep out of in the first place. (Especially this year, now that you can get Positraction, as an extra-cost option.) You stop smoothly, levelly with Corvair's beautifully balanced, bigger brakes.

And Corvair's found other new ways to please you this year. A forced-air heater and defroster are standard equipment on all coupes, sedans and both Monza and 700 Station Wagons. So are dual sunshades and front-door armrests and some other goodies. You'll note some new styling, inside and out. Nice. And safety-belt installation is easier, too, and cheaper. Another extra-cost option well worth considering is the heavy-duty front and rear suspension; it turns a Corvair into a real tiger.

So you can see we haven't really done much to Corvair this year. Why on earth should we? If this car, just as she is, can't make a driving enthusiast out of you, better take a cab.

A New World of Worth

And here's America's only thoroughbred sports car, the '62 CORVETTE. We warn you! If you drive a Corvette after your first sampling of a Corvair, you may well end up a two-car man. And who could blame you?

See the '62 Corvair and Corvette at your local authorized Chevrolet dealer's

News and Views

We Get Letters!

MAIL BAG...

Students and Faculty
Texas Technological College

On the evening of October 7, at approximately 10:47 p.m. we made the worst mistake of our lives. Referring to the story in the previous edition of this paper, we "TANGLED" with two students from Texas A&M College.

We know better than to fight with anyone, much less guests of the college. We realize this was wrong and we ask from the bottom of our hearts that you forgive us. We are lucky to be alive today and we each carry scars that will remain with us the rest of our lives.

The scars on our bodies are unimportant. It is the scars on the minds of you, our friends and fellow students, that hurt the most. Some of our friends have stood beside us and it has truly been a comfort. If they continue to do so, perhaps it is because they realize it was a mistake and all of us are subject to making mistakes. We are not trying to justify our actions, but are only asking that you do not shun us or our friends.

We can only say we are sorry and realize this does not eliminate the damage which is already done. We have thanked God for our lives and we have asked God to forgive us. Our religion teaches us that if we sincerely are sorry for our sins and ask the Lord for forgiveness, he will forgive us for those sins. Now we ask that you forgive us. If God can forgive us, can you? We hope so from the bottom of our hearts.

J. Sam Wright
John G. Wright

Dear Editor and One Glynn D. Baker (whoever he is):

To begin with we must get one thing straight, this Glynn D. Baker has never participated in any form of intramurals according to records in that department. Not only are his statements in his letter (Saturday, October 14) incorrect, but he is showing his ignorance in writing such a letter.

When Mr. Buchanan came in 1956, there was no budget for the Intramural Department; it was simply part of the Physical Education Department for Men. At the present time the budget is approximately \$20,000.00 per year. Would you say the Department has slumped? Also at this time there are 21 sports offered; when Mr. Buchanan came, there were only 9 sports. This is an average of 2 new sports per year, small strides? Approximately 40 per cent of the men enrolled in the long term semesters of 1960-61 participated in some sport and 2 people entered 12 sports.

In the immediate future a \$7,000.00 addition to the Intramural Building is to be built to accommodate an \$800.00 boxing ring.

I would think Mr. Baker could find something else to do to get his name in the paper than write such an unrefined letter as he did.

Thank you,
Jack Tillinghast
and
All Students concerned
with the Intramural Dept.

Dear Editor,

Enough time has passed that most of us have recovered from the exasperating experience of registration. (There are still some, though,

who go into a state of shock by the mere mention of it.)

In a noticed letter from an English friend of mine, I noticed the similarities of entrance in English and American universities.

"I am now a student at Liverpool University. At the moment I am taking part in an introductory conference for 'freshers' which is meant to make new students feel at home in the University. So far it has failed in my case. I still feel lost. Yesterday we went through the university entrance formalities. This afternoon we will be presented to the Vice-Chancellor of the University. Later this week lectures will start.

"I am going to take a special degree course in economics. Originally I wanted to study geography as my main subject, but competition for places in this department was too keen for me. So I am now taking geography as a subsidiary subject in my first year. The degree course extends over a period of three years, if you can pass the annual examinations. If not, you're kicked out! Conversely, it is extremely difficult to get into an English University these days. That's why I spent an extra year at school. This June I retook my G.C.E. examination and managed to gain higher percentages than last year. Even so most universities I applied to refused me. In the end I was lucky to scrape into this one. It is the first time I have ever been in Liverpool. I am a stranger in a big city. Liverpool is the second greatest port in England. When I have explored the city and the campus of the university more, I will write you about them."

How familiar all this sounds. The next time that you find yourself in the grasp of registration day, console yourself by remembering that Liverpool's the same way!

Yours sincerely,
George Stanley

(Editor's Note: We received this letter to late to get it in before Saturday night's game. We'll pass it along now.)

Dear Mr. Carpenter,

Monday morning quarterbacks make me sick! Her's a line to the Raiders—may their tribe increase!

Dear Red Raider team,
We're backing you still,
Though you taken a beating,
We know you've a will,
To win, or at least
to put up a fight,
so we'll be there again,
Come Saturday night!

We heard Miss. State, Texas, A&M too,
We still think you're the most,
We're still rooting for you—
It's not the scoreboard,
That show's a team's might,
It's the way you get
right in there and fight!
The time will come when the
light breaks through
(Perhaps against TCU)
Here's to the Raiders
Hunt, Turner, Coach King—
Your losses to us,
Just don't mean a thing!

—N.W.

Guest Editorial

Communists Have Big Plans

Eventually the world will be all communist or all free. It is not the free world which has placed the future of the world in this rigid either-or mold. This dictum was laid down by the founders of the Marxist movement, and it is one which has never been challenged.

At the same time that communists speak of peaceful co-existence they prepare for armed conflict and wage a nonshooting war, a type of warfare with which the free nations seem unprepared to deal.

They have already declared war on us. To them this cold war is as real as any shooting war, and they are dedicated to winning it. This is something which the West has only recently begun to understand.

Any strategy which will lead to victory in this conflict is moral in the communist context. Treaties and agreements are only an expediency

and the communists will discard them whenever it suits their purpose to do so.

This has been proved countless times. The communists speak of lessening world tensions, but it is they themselves who have created these tensions, and they could lessen them at any time.

What the communists mean when they speak of peace is the absence of shooting in the battle for men's minds. Any means of winning the war short of shooting is peace. It is not the same as our definition of peace, but in the dealing with the communists we must remember what the terms mean to them.

When we hear the word peace mouthed by those who would destroy us, let us not believe that they have given up their idea of world domination.

Peaceful coexistence is only one more maneuver in this cold war.

—Bill Brown
—LSU

At one of the last meetings of the Campus Traffic Committee, it is my understanding that Richard Sharp, student representative on Traffic, was asked to form a sub-committee composed of members of the student body from various sections of the campus. The purpose of these people would be to evaluate the existing parking situation at Texas Tech, and to formulate recommendations for any changes they deem necessary.

This sub-committee, of course, will not be the first group that has discussed the traffic problem with a mind towards solution—but it will be the first student group ever in such a position to have their ideas heavily considered by the people who are in the position to act on them. The solutions these students offer at the end of the year, I am sure, will fall into two categories—as happens in every parlay on this topic:

1. Those solutions which would alleviate the present situation for a few years, but would become out of date soon after they had been initiated.

2. Those solutions that seem radical to the majority of observers because they would change the entire basis upon which our traffic program is formed.

Under the first heading, I am thinking of solutions such as building more parking lots—always a first suggestion. But these become crowded as the campus expands and the population increases. Beneath the second heading would come programs like blocking all entrances to the circle and making the interior of the campus purely pedestrian. Other programs that might fit into either class would include restricting all freshmen from bringing cars to Tech or putting the parking privilege on a purely scholastic basis. I am personally in favor of some kind of idea under the second grouping. During every year that I have been at Tech, the parking situation has been reshaped by students, faculty, and administration without any apparent satisfactory solution that could be applied to the overall program. Most people that would oppose a "drastic" change in the formation of our traffic program seem to forget that the more serious the ailment is, the heavier the dose of medicine is needed—it is usually also that much harder to take, but the results are more stable and satisfactory.

Best wishes to the people working on this committee. I hope that you will be responsible for some MAJOR improvement regarding traffic on our campus. Any program you have, in my mind, should be toned toward the next twenty-five years—and not toward the next twenty-five months.

Many thanks to the Saddle Tramps, the Tech Union, and the members of the Council for doing a great job in extending a warm welcome to Texas A&M and TCU. The only dark spot in the whole picture was, of course, the incident with the two A&M students and five of ours. As one person said in his letter to the editor last week—"We are all Techans"—he was right. Any thing done by any of the students reflects upon all of us. This incident was a prime example of how a few seconds of thoughtlessness by an extreme minority can offset weeks of planning and hard work by a majority of the students who wished to present a friendly welcome and promote the reputation of our school in a positive manner.

LITTLE MAN ON CAMPUS

BY THE WAY, BE CAREFUL THAT'S A HI-POWER ACID IN THAT COKE BOTTLE!

Activities Continue For Men

For the men on campus who are interested in joining a fraternity, this is your week.

Two parties a night are being given in order to allow the estimated 250 rushees a chance to see Tech fraternities in action. The invitational parties are to aid the rushee in making his choice.

However, there are a few requirements which must be met before the rushee is eligible to join. He must have at least a one-point average and be carrying not under nine hours. Also, he must have been a student here for not less than one semester prior to this one. And if the student is on probation, he is ineligible.

Since rush-week began Friday night, three fraternities, Pi Kappa Alpha, Delta Tau Delta and Sigma Chi, have already given their parties. Those remaining are Kappa Sigma, 6 to 8 p.m.; and Sigma Alpha Epsilon, 8:30 to 10:30 p.m., tonight; Alpha Tau Omega, 6 to 8 p.m., and Sigma Nu, 8:30 to 10:30 p.m., Wednesday; Phi Gamma Delta, 6 to 8 p.m., and Phi Kappa Psi, 8:30 to 10:30 p.m., Thursday; Phi Delta Theta, 6 to 8 p.m., and Kappa Alpha, 8:30 to 10:30 p.m., Friday.

Pledge convocation will be Saturday between 1 and 3 p.m. in the Aggie Auditorium. Pledges will submit their bids at that time.

Pianist Debuts In Hall Tonight

Thomas Mastroianni, Tech's new piano instructor, will give his first piano concert in Lubbock at 8:15 p.m. today for the Tech faculty in the recital hall, Tech Music Bldg.

Mastroianni, who has appeared in many concerts in the New England area, will include in his program Sonatas by Chopin, Beethoven and Mozart, two Debussy Preludes and "Gaspard de la Nuit" by Maurice Ravel.

Outside of his concert career in New England, Mastroianni has spent two years in the United States Army, which included work with the 19th Army Band and numerous solo and ensemble performances for Special Services.

Pearce Reviews College Program

Tech Academic Vice President, Dr. W. M. Pearce, is visiting Clemson College this week at the request of the Southern Assn. of Colleges and Secondary Schools.

Dr. Pearce is serving on a committee, appointed by the association, to review Clemson's self-study program. Chairman of the group is Dr. John Hunter, president of Louisiana State University.

Tech Dads Celebrate Day With Awards, Ceremonies

Tech presented its dads with a fine gift Saturday night—a 10-0 victory over a favored TCU team.

Hundreds of dads were on hand for the day-long ceremonies Saturday which were capped that evening with an awards presentation and naming of new officers of the Dads Assn. for the coming year.

Leo Stark, Long Island City, N. Y., was recognized as the dad traveling the longest distance for the day. Stark's daughter, Jeannie, is a sophomore at Tech.

Charles C. Wilson, whose 18-

year-old daughter, Judy, is a freshman here, was honored as the youngest dad present. He is 34.

The oldest dad was Louis Ivey, 77, of Pecos. His son, John Patrick, is a senior here.

All three men were presented plaques designating their awards. Ivey was not at the game to receive his award.

Tech and TCU, through the efforts of the Lubbock Avalanche-Journal and Fort Worth Star Telegram, inaugurated the tradition of playing for the "West Texas Championship" of the Southwest Conference. Winner of the game each year will retain possession of a saddle trophy given the schools by the two newspapers.

Tech's student body presented TCU Coach Abe Martin with a briefcase as a token of the friendship between the two schools. The award, made before the game, is a new idea for Tech this year.

Dad's Day is sponsored annually by the Dad's Day Assn. and Assn. of Women Students. Saturday was the eighth anniversary of the event.

Kaplan Replies To Inquiries

Many inquiries have been received this week by the Toreador concerning the nature of the two organizations to be headed by Dr. Sylvan J. Kaplan, who resigned as head of the Tech psychology department last week.

The organizations are Foundation for International Research and Development (FINRAD) and Institute for International Research and Development (INRAD).

Questioners wanted to know if the two organizations were in any way connected with Texas Tech.

The Toreador talked with Dr. Kaplan Monday concerning the relation of FINRAD and INRAD to Tech. Asked if the two were connected, Dr. Kaplan said:

"No, they are not. The only connection would be a vague one, since several of the Tech faculty members serve as consultants and as members of our board of directors. This would be the only way they could be considered a part of Texas Tech."

J-Day Honors School Papers

Awards were presented to 22 winners of the annual West Texas High School Press Assn. competition during Journalism Day Saturday at Texas Tech.

Honors were announced at a 5 p.m. banquet attended by students and advisers from the Panhandle, South Plains and eastern New Mexico. Schools competed for both newspaper and yearbook awards.

Ralph Carpenter, editor of the Toreador, presented the newspaper awards and Phil Orman, director of student publications at Tech, presented the yearbook awards.

Cagers Start Drills

With the roar of victory hardly gone from Municipal Coliseum, the Texas Tech Red Raider basketballers, defending Southwest Conference champions, began workouts Monday for the 1961-62 season.

Eleven men reported to head coach Gene Gibson Monday, including seniors Harold Hudgens, 6-10; Del Ray Mounts, 5-10; Mac Percival, 6-3; and Roger Hennig, 6-4. Hudgens and Mounts were All-Southwest Conference picks

last season while Percival and Hennig were consistent starters.

Three junior lettermen also took up where they left off last year—Bobby Gindorf, 6-4; Milton Mickey, 6-5; and Gilbert Varnell, 6-5.

Boosting the team are sophomores Mike Farley, 6-3; Royal Furgeson, 6-3; Mike Gooden, 5-9; and Sid Wall, 6-3.

According to Coach Gibson the team reported in excellent condition as a battle shaped up for 6-5 Tom Patty's spot on last season's quintet. Patty fell victim to grades and will be lost to the team for a year.

Gibson pointed out the Raiders' main weaknesses as loose defensive play and lack of consistent rebounding power.

He emphasized their strengths

as the fast break and the ability to come back in the clutch.

"I want them to play with the same determination and hustle of Coach Polk Robison's teams. That is a quality I want to encourage," the mentor explained.

Gibson replaced Robison this season after Robison resigned his head coaching position to take on full duties as Athletic Director and Business Manager.

The new head coach, an assistant to Robison the past seven years and a former player under the coach, sized up the conference battle placing Tech, Texas A&M, and Texas Christian in the top three brackets. Under the initial trio of powers, the coach placed the remainder of the Conference emphasizing that all the teams are vastly improved this season.

"The race this year will go all the way down to the wire," Gibson said. "No one will have an easy job."

In answer to a question concerning the Raider non-conference foes, Gibson said, "Colorado is picked for not lower than second in the Big Eight and Vanderbilt is near the top in the Southeastern Conference."

Gibson concluded that all will be tough, helping to season the Raiders for the Conference slate coming up.

Gibson's choice for freshman coach, Charlie Lynch, a former three year letterman for Tech, greeted a host of first year aspirants Monday as the Fish began workouts.

Included in the freshman first day trials were six scholarship holders who Gibson called "our finest group of freshman prospects yet." The six are Mac Cade, 6-9; Harold Denney, 6-8; Joe Fox, 6-5; Glen Hallum, 6-5; John Loftin, 6-2; and John Walling, 5-11.

SCARLET Scatterings...

By CHARLES RICHARDS
Toreador Sports Editor

What a sight!

Just an uninformed bystander observing the Friday-Saturday football games in Jones Stadium might have thought he was seeing the top freshman and varsity football teams in the conference.

That's the caliber of Texas Tech's play over the past weekend.

Although the Picadors came out on the short end of the score in their game with the Arkansas Shoats, it was clearly evident that the Tech frosh had the better team.

And the Red Raiders were playing such inspired ball that it would have been a battle for any team to have beat them out.

When a team plays like the Red Raiders did Saturday, it's next to impossible to go down the line naming the boys who were the key men in the victory. Against Texas Christian, virtually every player on the Tech squad was playing his heart out.

The reaction from the stands emphasized the fact that the fans appreciated this "new" Texas Tech football team. Although there were not nearly so many spectators (25,500) for the TCU game as there were for A&M (38,500), the cheering of Tech fans was deafening.

Although the band was good, it was the football team that got, and deserved, the praise Saturday night.

The line came through again for Tech.

The Red Raiders, outweighed through the first three games, again found themselves with a weight disadvantage against the Horned Frogs. The Tech linemen did such a good job of manhandling the TCU linemen, however, that the backs were usually two yards past the line of scrimmage before they were first hit.

TCU's conference chances took an additional jolt when an injury to TCU's quarterback, Sonny Gibbs, was discovered after the game.

Gibbs had four ribs broken in the contest, and it is almost a certainty that he won't see action against Texas A&M Saturday at Fort Worth.

Quarterback Johnny Lovelace looked Saturday night more like the runner he was doomed to be. Twice—once in the first quarter and again in the second—he made sizeable gains to get Tech out of trouble and in better position to run their offense.

Although he carried the ball only nine times, he still gained more than any of the Horned Frog backs and was third high for the Raiders.

He was three for three passes as was sophomore quarterback Doug Cannon, although Cannon had one intercepted. Too, both quarterbacks fumbled—Cannon once and Lovelace twice.

The fact remains though, despite the fumbles, both men are beginning to move the team well and with confidence.

The competence with which the team is being run is shown more aptly by the statistics than in any other way.

TCU ran only 34 offensive plays, while Texas Tech had 71. And as the old saying goes—the best defense is a good offense.

Raiders Enjoy Win

By CHARLES RICHARDS
Toreador Sports Editor

It's hard to laugh with tears in your eyes, but that's exactly what the Texas Tech Red Raiders were doing in their dressing room following their 10-0 upset win over Texas Christian University Saturday night.

It was a scene of delirious joy as the Tech players were jumping around and yelling praises at each other. Even the coaches were getting into the act. It was a sweet victory all the way around for the scarlet-clad Raiders.

"That was a dandy wasn't it!" laughed freshman Coach Berl Huffman as he looked at the overjoyed group. "TCU has never been beat that bad. This is the biggest licking they'll get all year."

David Rankin, sophomore half-back and one of the top ground gainers in the game for the Red Raiders, was one of the happiest of the players.

"I've never felt so good in all my life," he said. "That one really helped."

H. L. Daniels, who kicked a 13-yard field goal for Tech in the fourth quarter, could hardly contain himself.

"It's the greatest feeling I've ever had," he said. "They weren't as tough as we thought they were. We're ready now."

Coolidge Hunt wore a big smile from ear to ear as he laughed and talked with his teammates over the win. It was his seven-yard run that gave the Raiders their touchdown.

"That was the greatest win ever," he said. "We made plenty of mistakes, but we got chances to make up for it. Now we know we can do it, and we're going after a Bear next week."

Hunt wasn't alone in his confidence for the future.

"This is a good one—we're finally the Red Raiders. I thought we were," Bake Turner offered. "We'll get the Bears next week, but they'll be ready for us."

"We'll do the same thing to Baylor that we did to TCU," echoed end Jerry Garrison. "We finally got rolling."

If the players themselves were pleased over their performance, Coach J T King was even more so.

"This was a team effort by a bunch of athletes who made up their minds to win. We played the same type game as we did last week, but we had better field po-

sition all night," King commented.

"Because of this," he continued, "we got the key people into the game at the right time. I hate to point out one play as the key play, but if I had to, it would be Lovelace's keeper that got us out of the hole in the first quarter."

As the players started to leave, they paused momentarily to see what someone had written on the big blackboard in the dressing room.

LET'S GET A BEAR!

The gleam in their eyes indicated they may do just that.

HAPPY RAIDERS, HAPPY DADS!
... it's all over but the shouting.

**RCA, builder of Tiros Satellite,
needs young engineers today
for spectacular achievements tomorrow**

Tiros has broadened man's scope of the heavens and earth. From an orbiting observation post high in the sky, it transmits a new wealth of meteorological information to earth-bound stations below.

Tiros is only one of many RCA successes in the wide, wide world of electronics. And as the horizons of electronics steadily expand, the need for more and more competent and creative engineers increases in direct ratio. That's why RCA, now in the forefront of electronic progress, offers such tremendous opportunities for Electrical Engineers, Mechanical Engineers, and Physicists.

If you already know what you want to do in engineering... and are qualified, RCA can offer you direct assignments in your chosen field, and back you up with training and guidance by experienced engineers.

If you're not quite sure which direction you want to go... RCA's Design and Development Specialized Training will help to point the way. You'll receive full engineering salary while you progress

through engineering assignments that give you a clear picture of various fields you might choose.

Or, if you'd like to continue your graduate study... RCA will pay full cost—tuition, fees and approved text—while you go to school or study two days a week, and work at RCA three days.

These are only a few of the many reasons for getting all the facts about a career with RCA. See your placement officer now about getting together with an RCA representative, for an interview on November 13, 14.

Can She Resist?

Men—Don't Miss That Miss When You Try For A Kiss

By CLAY NUNNALLY
Toreador Staff Writer

Suppose this is your first date with one of Tech's lovely damsels, and you have held her breathless the entire evening with sparkling conversation. Examples of sparkling conversation would be: (1) the geological characteristics of the Balcones Escarpment (with assorted maps); (2) reasons why the Ute Indians are diminishing in number, or; (3) why we must not let the Whooping Crane become extinct.

Now you have driven back to her dorm and parked. You are certain she likes you by the way she keeps offering to share the pork

skins she's eating, yet the shy thing is still sitting demurely on her side of the car. The problem is this: how to kiss her goodnight without seeming like a fiend.

Naturally, a personage of low birth, will strongly consider hurling himself across the seat, grabbing her, then kissing her ear with demonic vehemency. However, this is ill-advised. Not only is it a grave social peccadillo, but to the nearsighted, potentially dangerous. I, myself, before purchasing bifocals, attempted this surreptitious mode of attack with one coed and wound up caressing her left armpit. But enough of my personal imbroglios.

As I was saying, to do this thing right you must appear casual to the point of indifference. Begin picking gum off your shoes or something as equally disconcerting. The effect is two-fold: not only will she think you nonchalant, but tidy as well.

After about five minutes of this (or until there is no more gum on your shoes), turn slowly and gaze longingly at her. It may take time, but if she has any flare at all for these things she will turn and face you.

The moment you have her attention, lift one eyebrow rakishly. This is irresistible! (If you don't know how to lift one eyebrow rakishly, take the precaution of taping it up beforehand.)

When the eyebrow is in place, begin to ease across the seat. It is possible that she may draw back a few inches and mutter, "Are you one of the bad boys Mommy told me about?"

From here on I can help you no further. I can only say that there are but two possible excuses for not emerging victorious if you have followed my lucid instructions. One would be if she looked at you askance and said, "Listen, ya bum, touch me and I'll give ya ah thick lip!" (Girls who resort to this vernacular usually aren't bluffing.) And the other is if she should suddenly forget her feminine role and lash you into unconsciousness with the weighted end of the seat-belt.

But if nothing such as the aforesaid happens—Gung Ho!!

"Are you one of the bad boys Mommy told me about?"

Gung Ho!
