

# On Rio Grande Coeds ride raging rapids

By DONNA JOHNSTONE  
Staff Writer

Although bruised and stiff from rowing, Deby Akerberg and Phyllis Burns agreed enthusiastically that they would willingly return again any weekend to ride the rapids of the Rio Grande.

Miss Akerberg, a sophomore psychology major from Clearlake, Iowa, and Miss Burns, a junior business education major from Big Spring, traveled to Big Bend National Park two weeks ago where they camped and traveled on the Rio Grande in a rubber raft.

**THE IDEA** originated with Phil Burns, one of the girls' fathers. An avid outdoorsman, Burns borrowed two rubber rafts and several tractor inner tubes from a friend. The trip was planned and nine people, along with sleeping bags, food, and life preservers, piled into two cars.

The adventurers arrived in Big Bend about 3 a.m. Satur-

day. After a few hours of sleep and much preparation, **ATTIRED IN** fisherman's the trip down the river was started in the early afternoon. waders and life belts, they settled themselves in two inner-tubes and two rafts (which strongly resembled giant blown-up doughnuts.)

Miss Akerberg had borrowed rubber waders from a friend. Since they were fairly large and she is only 5-3, they reached to her shoulders. They provided some protection on the trip, but as for keeping her dry—that was impossible.

**MISS BURNS**, who was in one of the rafts, said the girls sat in the middle and let the men do most of the rowing and guiding through the rapids. Everyone had to "assume positions of minimum draft," however.

The position, which became a common command of the trip, called for everyone to sit straight with his feet pushing against the opposite side of the raft. It was used to level the bottom of the raft and prevent it from hitting rocks and getting bruised. It was always assumed when going through rapids.

**MISS AKERBERG** was one of the two girls who chose to ride in an innertube. She felt that her trip was better because "I was on my own more."

"Everything was silent except for the water, the birds,

and the frogs. It was just beautiful," she said.

**THE GIRLS** were amazed at the vegetation and animal life they saw. The sunflowers and Black-eyed Susans in lush green undergrowth and the steep, rocky canyon walls formed backdrops for the deer, jackrabbits, horses, wild burros, and all types of birds.

**THE WEATHER MAN** seemed to comply and while they were traveling down the river, the temperature stayed around 70 degrees. Towards the end of the trip it turned colder, however, and a light rain began to fall. If the travelers got too cold, they would stop and warm themselves, like lizards, on the rocks.

**THE TRIP**, which covered approximately 11 miles and took 5 1/2 hours, started in calm water. About every 10 minutes the rafts went through rapids.

The river was very deep in parts and only a foot deep in other parts. They learned to guide the rafts by the color of the water. If the water was a light green, the river was deep. If it was a dark color, it was shallow and there were rocks.

**AS IN ALL** trips of adventure, there were moments of excitement. One girl flipped over on her innertube and had to be rescued. Miss Burns, on one of the many stops to the shore, climbed almost to the top of a steep cliff while the rest of the crew held their breaths. Miss Akerberg stepped in quick-sand and had to fall back into her innertube to free herself.

About the time it started to get dark, they saw several men and a pack horse on the Mexican shore. The men yelled and followed them for about a mile before leaving.

**THE LAST** half hour was spent in the dark. The group could hear the rapids coming but, as they only had two small flashlights, they could not see well enough not to have some feelings of anxiety. A half moon illuminated the sky, but even that was little help when they had to push off from the rocks.

"It seemed like hours that we were in the dark," said Miss Burns.

**WHEN THE** travelers finally reached camp, they built a fire to warm themselves. They were soaked to the skin and firewood was not easy to find. They had to use roots and cane.

After eating a campfire dinner, they fell into their sleep-

ing bags exhausted, especially after Burns suggested that they pack up and try to travel to a town about 50 more miles downstream.

**MISS BURNS** pointed out that she and her father were the only Texans on the trip. All the others were from the East or the North.

Big Bend seemed to be a very popular place for out-of-staters, the girls agreed. They saw many campers but no one else who dared the rapids. They said it was a perfect vacation spot in the winter because it was quiet, beautiful, warm and relaxing.

**"OF COURSE** we didn't relax!" said Miss Burns.

"Who knows—maybe this is the start of something great! Next we could go to Alaska and shoot the Yukon in a kayak," she added.

**SHOT THE RAPIDS** — Phyllis Burns, standing, and Deby Akerberg gaze across the water as they recall their recent trip down the Rio Grande river. Miss Akerberg traveled in an innertube like the one she is sitting on. Miss Burns made her trip in an inflated rubber raft.

## New approach

The time-honored definition of "education" as viewed by most universities is rather limited in scope, being usually confined to the "acquisition of book knowledge." While this is the foundation of education, a university's academic program should not end with it.

For some disciplines, the logical extension of the university's function is into the field of practical experience through internship programs for academic credit. Some Tech departments have such programs, but not as many as could and should.

However, for disciplines which call for individualism the internship approach to the application of book knowledge is impossible. The humanities are one example, for they require a type of work generally not subject to direct supervision.

In this respect, the possibilities of academic credit for community service projects and other types of field work should be explored. The projects would be the ideas of students, subject to the general supervision of a faculty member.

The student would outline in petition form his program before starting it, and have it approved by a faculty member. He would be responsible for completing the program as outlined.

Credit would depend on the amount of time spent on the project and the student's involvement in the program. It could range from one half-hour to one and one-half hours per semester, with a maximum of six hours of credit during a university career.

Examinations could be by oral discussion with the sponsoring professor, supported by a short paper. The paper would relate the accomplishments of the project and suggest future areas of activity.

Such a field work program for undergraduates would help both the student and the university, for it would be an excellent vehicle for public relations. The enthusiastic student could relate his initiative to his educational interests, and would have the opportunity to move out of the classroom.

The possibilities are unlimited, provided every department on campus consider "out-programs" for undergraduate students—either through internships or special projects—as a means of expanding on the present out-moded, narrow definition of education.

## Pentagon to halt newsmen curbs

WASHINGTON (AP)—The Pentagon has told an inquiring congressman it has no intention of hampering newsmen in Vietnam through extension of court martial jurisdiction to civilians.

The assurance came in a letter from Paul C. Warnke, general counsel of the Defense Department, to Rep. John E. Moss, D-Calif., chairman of the House government information subcommittee.

**MOSS HAD** written Warnke asking whether the extension of court martial jurisdiction meant military personnel would have unrestricted authority to apprehend U.S. civilians in Vietnam and what assurance the Pentagon planned to give that newsmen would not be impeded.

In his reply, the Pentagon official said the new court martial authority only applies "to the limited number of civilians who are serving with or accompanying Armed forces in Vietnam," and "does not give unrestricted authority to military personnel to apprehend and detain U.S. civilians in Vietnam."

**"NOTHING** in the uniform code of military justice could hamper newsmen in carrying out their legitimate functions in Vietnam," he added, "in the circumstances, there would appear to be no necessity for prescribing any special safeguards to insure against such interference."

## No action on 'drys' petition

No action has been taken on the petition of protest filed by "dry" forces after the liquor election held in Justice Precinct Two Jan. 14.

Spokesmen in the District Clerk's Office indicated the petition was filed in 137th District Court to enjoin County Judge Rod Shaw and the County Commissioner's Court from certifying the results of the election, which saw the "drys" defeated by a margin of three to two.

**THEY INDICATE** there is

no legal requirement for a hearing on the petition within a specified period of time, and that action could "just go on pending forever" unless the "drys press further for a hearing, which they have not done as yet.

Grounds for the protest were cited as: "The failure of the Commissioner's Court to appoint a clerk for absentee voting; that the Commissioner's Court failed to designate a place for absentee voting; that the county clerk acted as

judge of the absentee box without having been appointed to such position; and that one absentee box was located in a private business in Slaton rather than in a public place other than the county courthouse."

Judge Shaw and the County Commissioners filed a reply to the notice of contest on February 22, denying all ground for petition and demanding proof.

**BSU OFFICERS**

Don Henry of Lubbock will be installed as Baptist Student Union President in commissioning services Sunday.

Other officers serving for the 1967-68 school year include Wanda Suehiu, vice president, and Elaine Farris, secretary, both of Lubbock.

The services, open to the public, will be held at the Baptist Student Union at 8:30 p.m.

## Raider Roundup

**INTERNATIONAL EDUCATION DAY**

Tech's International Club is celebrating the International Education Day Sunday.

There will be a panel discussion on different education systems in five countries at 3 p.m. in the Mesa Room of Tech Union.

The public is invited.

**MEN'S RESIDENCE COUNCIL**

Men's Residence Council will meet at 6 p.m. Monday in the Conference Room of the Housing Office.

**JUNIOR COUNCIL**

Applications for Junior Council are available for sophomore girls with a 3.0 overall grade point average. If any girl did not receive an application, she can contact Lorrie Woods at SW11 5-4447 before Sunday.

**ALPHA LAMBA DELTA**

Dr. Ahmet E. Uysal will speak on Turkey to members of Alpha Lambda Delta Monday at 5 p.m. in the Mesa Room of the Tech Union.

**RANGE MANAGEMENT**

The American Society of Range Management will meet at 7:30 p.m. Tuesday in the Agricultural Auditorium. Slides taken on the trip to Seattle will be shown and anyone interested in joining the plant's identification team are invited to attend.

# Raiders split double-header

By GARY TILORY  
Sports Writer

A two-out, two-run double by Jim Murrell in the bottom of the seventh inning gave the Raiders a 7-6 come-from-behind victory in the second game of a double header with the New Mexico Highlands Cowboys Friday.

The Cowboys took the first game 6-1 behind the four-hit pitching of Tom Nickeloff. THE RAIDERS ran into trouble in the first game. Eldon Fox starting for the Raiders got the first two men out but then gave up a single and a walk and a triple by Cowboy catcher Bural Eth-

redge that put the Raiders behind 2-0. Fox then walked Jay Cain and in the process of trying to pick Cain off at first, Ethredge came in to score. That made it 3-0. The Cowboys added two more in the third and one in the sixth. THE RAIDERS never man-

aged to scratch the plate until the seventh when Wilbur "Bo" Keith singled and scored on a single by Eddie Stiles. For the Raiders, Fox went two innings giving up three runs, two hits, walked two and struck-out none. Phil Stephenson relieved for the remaining five innings giving up three runs on three hits, walked two and struck out four.

IT WAS Tom Nickeloff all the way for the Cowboys. He gave up one run, four hits, walked three and struck out eight. The second game got underway with a bang as both teams managed to get across a run. The Cowboys struck first as Ron Humpert got on base with a walk and scored on a single by Buddy Roberta.

The stage was set for Murrell's hit. McIntyre beat out his third infield hit of the day and Hampton followed with a walk, Saunders drove in his third and fourth runs with a double and was followed by a single by Carrol Ray. With Saunders and Ray on base, Keith grounded out to third.

WITH THE count knotted at 3-2, Murrell hit a line shot to left scoring pinch runner Jim Montgomery and Ray making the score 7-6. For the Raiders today it will be ace pitcher David Callarman starting. As of press time the starting pitcher for the Cowboys could not be obtained.

## Swimmers host Aggie tankmen in conference meet preview

Tech's Red Raiders will play host to the Texas A&M tankers Monday as they swim their last meet before the Southwest Conference affair next Thursday.

IF SWIMMING is any indication, Tech could well have one of its finest spring sports years this season. Tech, fresh from a win over Eastern New Mexico, will be making final adjustments Monday to prepare for the big one next week.

"We've been experimenting all year," says splash coach Jim McNally, "and will put the pieces together for the A&M meet." Then with a touch of tongue-in-cheek, McNally added, "We are just beginning to peak as a team and I feel we will have some good times against the Aggies."

A&M HAS some good swimmers in Bob Dommel, Tommy Holder, and Jerry Keating, all three sprintmen. Dommel has done a 22.5 in the 50-yard freestyle, and Holder and Keating have done a 50 flat in the 100. Keating has also been timed at 22.3 in the 50.

Considering the competition in the sprints, McNally will keep a close eye on Tech's All-American Robert Graham. "Robert swims well in a head-to-head battle," McNally said, "and I believe that the Aggies will provide just that. I think Robert will have a good time." A NEW ADDITION to the 400-yard medley relay team will be Terry Brown of Houston. McNally believes insert-

ing Terry into the breast-stroke spot will give added speed and could be a threat in conference competition.

PROBABLE ENTRIES: 400 medley relay—Danny Harmon of San Antonio, Terry Brown of Houston, Tim O'Rourke of Houston, Rob McCreary (3:51.3), 1000 freestyle—Bob Skinner of Lubbock (10:59), Frank Shotwell of Lubbock, John Long of Houston. 200 freestyle—Robert Graham of Tyler (1:52.3), Skinner, Gary Aber of Tyler, Long. 50 freestyle—Graham (21.7), Alen Queen of Midland, Rob McCreary of Houston. 200 individual medley—Pete Velde of Longview (2:06.5), O'Rourke. 200 backstroke—O'Rourke (2:13.6), Skinner, Harmon, Shotwell. Diving—Richard Rasch of San Angelo, Nate Holt of Longview, Bill Jones of Houston. 200 Butterfly—O'Rourke (2:09.4), Aber. 100 freestyle—Velde (49.7), Reeve, Graham, Queen. 500 freestyle—Skinner (5:28.3), Long. 200 breaststroke—Brown (2:24.7), Weaver, Bailey. 400 freestyle relay—Graham, Velde, Queen McCreary (3:23.3).

The Tech Chamber Orchestra will present a program of music by Bach and Mahler at 3:00 p.m. Sunday in the foyer of the Tech Library.

Betsy Roe, a soprano will sing "Weichetr Nur, Betrübte Schatten" and Charles Roe, a baritone will sing "Leider Eines Fahrender Gesellen." Both are members of the faculty. Conducting the orchestra will be Dr. Paul Ellsworth.

MUSIC PROGRAM The Tech Chamber Orchestra will present a program of music by Bach and Mahler at 3:00 p.m. Sunday in the foyer of the Tech Library. Betsy Roe, a soprano will sing "Weichetr Nur, Betrübte Schatten" and Charles Roe, a baritone will sing "Leider Eines Fahrender Gesellen." Both are members of the faculty. Conducting the orchestra will be Dr. Paul Ellsworth.

Game time will be 1 p.m. for the single game with Highlands.

FILM CHANGE The movie "The Man Who Shot Liberty Valence" has been canceled until further notice due to mailing errors. It had been scheduled to show at 3 and 7 p.m. Sunday in the Coronado Room at the Tech Union.

Substituting for it will be "Broken Lance" starring Spencer Tracy and Robert Wagner.

HE'S SAFE — An unidentified New Mexico Highlander slides back into first, under the glove of Red Raider Eldon Frost, in an attempted pick off during the first game

of a double header played Friday. The Raiders split with the Cowboys, 1-6 and 7-6, and will play again today at 1 a.m.

# Cindermen defend title today in Fort Worth

The Red Raider thinclads will make their first major track meet showing today at the Southwestern Recreation Meet in Fort Worth.

MORE HURDLE points jump. Threats in the high may come Tech's way this year. Two Lubbock juniors, Comanche junior sidelined Art Carroll, third in the SWC last year with auto wreck injuries; Jim Flowers, Miami intermediate hurdler who is senior; Foster Miller, Llano a college champ for Lubbock Christian, are the Raiders' Abilene sophomore.

The Raiders will go into the meet as defending champions, having won the meet last year. And this year's squad is reported to be even stronger than last season's SRM champs.

JIM McCASLAND, a javelin artist, set the Tech javelin record with a 193-6 1/2 heave last year, but his specialty isn't on the Fort Worth meet.

WHILE TRACK prospects are looking up, Coach Vernon Hilliard is looking forward to the meet with cautious optimism.

Next weekend, the Raiders will again hit the road when they participate in the Border Olympics at Laredo on Saturday. Then it's the West Texas Relays at Odessa on March 18, a triangular with ENMU and McMurry here on March 22, and the Texas Relays in Austin on March 31.

"Where we'll finish is hard to say," points out Hilliard, "because so many others are also strengthened. But we'll make it interesting. That's for sure."

Next weekend, the Raiders will again hit the road when they participate in the Border Olympics at Laredo on Saturday. Then it's the West Texas Relays at Odessa on March 18, a triangular with ENMU and McMurry here on March 22, and the Texas Relays in Austin on March 31.

FOR THE SEASON, especially in the Southwest Conference Meet, Hilliard's own optimism is bolstered by such prospects as Gary Golden, Stephen sophomore, still not in top form after a season of football.

Next weekend, the Raiders will again hit the road when they participate in the Border Olympics at Laredo on Saturday. Then it's the West Texas Relays at Odessa on March 18, a triangular with ENMU and McMurry here on March 22, and the Texas Relays in Austin on March 31.

"Gary's coming along pretty well," says Hilliard. "Of course, running on the football field is a far cry from the track, but with his potential, he may well be one of our top boys."

Next weekend, the Raiders will again hit the road when they participate in the Border Olympics at Laredo on Saturday. Then it's the West Texas Relays at Odessa on March 18, a triangular with ENMU and McMurry here on March 22, and the Texas Relays in Austin on March 31.

DON PARRISH, Richard Hardy and James Jones will team up with Golden to form the strongest 440 relay team to run for Tech in a long time. Parrish, a Daingerfield senior sprinter, has been clocked at 9.4 in the 100-yard dash while Hardy boasts a time of 9.5. Jones, an Austin junior, was anchorman on Schreiner Institute's sprint relay team. All four were on the 440 team that attained the third best clocking in Tech history, 41.3, at Houston in December, being beaten only by Texas Southern.

THINCLADS RICH IN TALENT—Rich Kay, senior miler, will be carrying his share of Tech's burden of defending champions as the Raiders compete in the Southwest Recreational meet in Fort Worth today.
