

Tech Battles Rice Owls

Raiders Can Gain Second Place Tie

by BILL DEAN

Texas Tech, the hottest team at present in the Southwest Conference, attempts to stay hot tonight when they host the Rice Owls at 8 p.m. in the Lubbock Municipal Coliseum.

In a preliminary game the Tech freshmen will play Midwestern at 6 p.m.

Techsans Take Third At Meet

Texas Tech's livestock judging team placed third in competition with 23 other teams Saturday at the Southwestern Exposition and Fat Shock Show in Fort Worth.

A TOTAL of 4,766 points was amassed by Techsans, Texas A&M, with 4,830 points, placed first and Iowa State second with 4,781 points.

The Tech team took third in cattle judging, fifth in hog judging, seventh in horse judging, and thirteenth in sheep judging.

DALE BURNETT, junior from Ropesville, placed fifth in individual ratings and seventh in beef cattle judging. Newton Klutts, senior from Richardson, placed seventh in individual ratings and eighth in sheep judging.

Two other Tech judging teams will finish Monday and today. Tech's dairy judging team, coached by K. L. Neeley, associate professor of animal husbandry, competed Monday. Team members are Reeves Brown of Mathis, Jimmie Hoodenpyle of Tulla, Mack Shurbet of Petersburg and Robert Young of Odessa.

TECH'S MEATS judging team will enter the Intercollegiate Meat Judging contest Tuesday at the exposition. Coached by Coleman O'Brien, assistant professor of **TECHSANS WIN**, Page 5 . . .

The Raiders are currently riding a three-game winning streak which has seen them bounce from the second division to undisputed possession of third place in the conference, a half game behind Baylor and a full game behind league-leading TCU.

Included in those three triumphs, which started with Texas, are TCU and Texas A&M. Their latest outing was Saturday afternoon's 57-46 win over the Aggies. This brings Tech's conference record to 4-2. Baylor is 5-2 and TCU 5-1.

Rice is seventh in the race with a 1-4 mark, their only win being an upset over Texas A&M. They have lost to Texas, Arkansas, TCU and Baylor.

The Owls of Don Suman are dangerous though. Led by redoubtable Tommy Robitaille, 6-9 center, and driving Dale Ball, 6-0 guard, the Owls can deal out plenty of misery.

This will be the first meeting of the two teams this year. Last year the Raiders took both decisions, winning at Houston and Lubbock. In the series, which began in 1941 Tech has won three and lost four.

Tech could move into a tie with **TECH SHOOTS**, Page 6 . . .

APPLICATIONS ARE OPEN

Applications for the spring rodeo team will be accepted at the Rodeo Association's first meeting of the semester when they meet Thursday at 7 p.m. in the Aggie Auditorium, according to John Schlitter, president.

VARSIETY SHOW CAST — shown above are nine members of the 1959 Varsity Show cast. The remaining five members of the cast were not available for photographs. Sitting, left to right,

are Marilyn Campbell, Dwight Bellamy, Betty Townsend, Mary Jane Campbell, Roy Moore and Dick Scales. Standing are Janis Jones, Glen Burns and Doug Pummill. (Staff Photo)

Varsity Show Names Fourteen to '59 Cast

Fourteen Tech students were named Monday to the cast of the 1959 Varsity Show — "Something for Nothing", by Johnny Gilbert — to be presented April 2 and 3 in the Lubbock Municipal Auditorium.

MEANWHILE, dancing tryouts were scheduled from 5 to 7 p.m. today in the Tech Union Ballroom. Although dancing is of primary importance, applicants also will be tested for singing ability.

Applications were also being taken for stage manager. "Anyone in any way interested in working on the Varsity Show should sign up at the Varsity Show office in the Tech Union," Claude Rogers announced Monday.

STUDENTS and the parts they play include: Dwight Bellamy, sophomore English major from Monahans — Benjamin Skinner, a "meek molecule of acquiescence."

Janis Jones, sophomora government major from Thornton — Elvira Skinner, overbearing chairman of the board and president of the Women's A.A. (Alumna Association).

GLEN BURNS, sophomore architecture major from Lubbock — David Currie, a restless, angry young man who defies tradition.

Dick Scales, senior education major from Lubbock — Joe Cooper, football hero and the epitome of "College Joe" in person. Mary Jane Campbell, junior

business education major from Rule — Susan Rodgers, coed with dramatic aspirations.

MARILYN CAMPBELL, freshman music major from Lubbock — Hazel Ledbetter, doing astrological research for her M R S degree.

Bobby Boyd, graduate music major from Idalou — Charlie Skinner, reluctant subject of Hazel's M R S degree.

RAY MOORE, senior music education major from Lubbock — Christopher Fairchild, a distinguished author-critic, who discards his pessimism and regains his lost ideals.

Betty Townsend, senior music education major from Amarillo — Shirley Jamison, Joe Cooper's girlfriend.

Linda Hart, freshman music major. **VARSIETY SHOW**, Page 2 . . .

No Record Seen; Tech Enrolls 7,427

Students stormed the halls of Texas Tech Thursday, Friday and Saturday and when the turmoil finally died away, 7,427 seekers of higher education had passed through their respective deans' offices with late registration coming up Wednesday.

IT WAS NOT a new record for the West Texas college and a bit of disappointment was expressed by officials in the Registrar's Office as chances of equalling last year's 7,737 figure grew dim and hopes of 7,900 students almost completely disappeared.

Dating odds again favored the

girls since 5,347 men enrolled, more than doubling the 2,089 women.

ARTS AND SCIENCES, as usual, led enrollment among the academic schools with 2,429. Engineering was second with 2,094. Business Administration was next with 1,428, followed by Agriculture with 670. Home Economics and the Graduate School were at the bottom with 434 each.

Late registration begins at 8 a.m. Wednesday. Registration forms for all students are available in the west foyer of the Administration Building, first floor.

Saddle Tramps Elect Officers

Pete Baker, Anson sophomore, was elected Monday to head the Saddle Tramps as president for the coming year.

ALSO ELECTED were Larry Campbell, Farmington, N. M., sophomore, vice president; Jerry Don Hudson, Anson junior, secretary; James Kerbow, San Angelo sophomore; Joe Smith, Fort Worth junior, sergeant-at-arms.

The newly elected slate of officers will serve until the second semester of next year.

LAST MINUTE 'FLING' — During the recent snowfall, Tech students had their last 'fling' before resuming classes Monday, gleefully directing snowballs at all available targets, including the photographer who took this picture. (Staff Photo)

Techsans Perform In Little Theatre

Seven Tech students and one instructor will combine talents with other Lubbock personalities to present "From Bach to Blues," Lubbock Little Theater's third production this season which will begin a three day run Thursday at 8:15 p.m. in the LLT Playhouse.

FINAL CERTAIN will come down on the Saturday night performance after a special student matinee at 2:15 that afternoon. Student tickets are specially priced at 75 and adult tickets at \$1.75. Reservations may be made by calling Porter 3-1821.

TECH STUDENTS featured in the revue are dancers Kay Adkins, Martha Kenley, Marilyn Morris, and Joyce Tallman doing a

special effects dance to "Some of These Days" and Bob Hancock singing "Temptation." Musicians Ken Doshier on drums and Phil Pearce on trumpet will join the accompaniment. Miss Jane Perry, Tech modern dance instructor, is choreographer for the production. Miss Tallman also does a solo dance to the strums of "Night Train."

Other features of "From Bach to Blues" are the voices of The Flames; the dancing of Jewel Wilkerson; the dance team of Jan Cone and Faye Hunt; Gene Conger's rendition of "Blues in the Night"; the sultry voice of Ruth Hurrence; and star William A. Murphy who will open the show with a Bach Fantasy number.

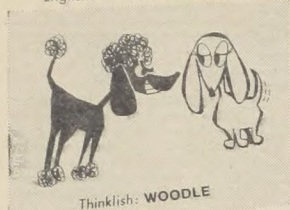

SOME OF THESE DAYS!— the four coeds shown above are rehearsing for their special effects dance to the tune of "Some of These Days," which will be performed in Lubbock Little

Theatre's "From Bach to Blues," beginning Thursday. Left to right are Joyce Tallman, Kay Adkins, Martha Kenley and Marilyn Morris.

Group Plans Installation

Beta Alpha Psi, Texas Tech's new honorary and professional accounting fraternity, will be installed on Friday at 4:30 p.m. in the Tech Union workroom.

AT THAT TIME, the new chapter, Beta Delta, will be officially installed, student members initiated, officers elected and the first chapter meeting held.

Dr. Nolan E. Williams will head the installation team by administering the oath of office to the newly elected officers. Dr. Williams is from the University of Arkansas and is Grand Secretary-Treasurer of Beta Alpha Psi.

OTHERS WHO will assist in the installation will be Dr. Fred W. Norwood, Ronald R. Rushing, and Arthur T. Roberts, all of whom are on the Tech Accounting faculty, and Lubbock Certified Public Accountants, Edwin E. Merriman and L. Edwin Smith.

Climaxing the event will be an installation banquet at 7:30 p.m. in the Tech Union ballroom.

Handsome Man Event Has 16 Contestants

Twelve entries in Club Scarlet's Most Handsome Man contest had been accepted by 5 p.m. Monday.

THE DEADLINE has been extended to 5 p.m. Thursday to give all campus organizations a chance to submit both skirts and Most Handsome Man entries, says sponsoring group Theta Sigma Phi President Carol Thompson.

The first Club Scarlet, A Mock Night Club, was sponsored by Tech Women's Press Club, now Theta Sigma Phi, and took place in the fall of 1938. This year's event on Feb. 28 marks the 20th year of the Club Scarlet production.

PROCEEDS from ticket sales will go toward sending a delegate to the 50th anniversary convention of Theta Sigma Phi in Seattle.

Entries thus far in the Most Handsome Man contest and their

sponsors are: Floyd Dellinger, finance senior, Kappa Kappa Gamma and Kappa Sigma; Jack Henry, pre-med senior, Phi Gamma Delta; Bill Blackburn, pre-law sophomore, Sigma Alpha Epsilon; Larry Merriman, accounting senior, Delta Delta Delta.

ALSO Gayle Mullanax, pre-med sophomore, Alpha Phi; Pete Hudgins, finance junior, Phi Delta Theta; Charlie Lynch, finance senior, Pi Beta Phi; Champ Turner, petroleum engineering senior, Sigma Kappa; Louis Young, speech junior, Sock and Buskin.

Jerrell Snodgrass, secondary education senior, Kappa Alpha Theta; Dwayne Allen, chemical engineering junior, Alpha Chi Omega; Wayne Bird, industrial engineering junior, Sam Houston Rifles; Mike Owen, sophomore advertising major, Delta Kappa.

'Orpheus' Smash Hit; Will Close Thursday

The curtain goes up for the last time Thursday evening on the speech department's production of "Orpheus Descending."

THURSDAY'S performance will mark the close of a remarkably successful week's run.

The house sold out on both Friday and Saturday nights, and tickets for tonight's performance are almost gone.

"Orpheus Descending" is the first full-length production by Tennessee Williams to be presented by the Tech speech department, although seven one-act plays by Mr. Williams have been done here previously. "Orpheus Descending" is written in the typical Tennessee Williams style,

with deep currents of emotion in each character, and a dark, foreboding atmosphere about the entire plot.

THE TECH actors do a commendable job in portraying these characters, even though the depth and movement of the play are difficult for the amateur actor to capture. Notable work is done by Cary Hobbs in the role of Val

Xavier, and by Gail Cooper as Lady Torrance.

Tickets for the final performances may be obtained at the Speech Building box office, or reservations may be made by calling PO5-8511, Extension 356. All seats are reserved at \$1 each, and tickets placed on reserve must be picked up by 7:45 p.m. Curtain time is 8:15 p.m. at the Speech Building auditorium.

Big Exhibits Show Crafts

Two giant exhibits may be viewed in the West Texas Museum during February.

ONE OF THE exhibits, on display in the Rotunda of the Museum, until Feb. 25, features some 50 objects of folk art representing both oriental and occidental lands.

The exhibit was loaned for this showing from the International Folk Art Museum in Santa Fe and features such items as painted wood masks, Balinese shadow puppets, Chinese silk figurines, and a dancing timepiece from Spain.

THE SECOND annual crafts exhibit sponsored by the School of Home Economics will open Monday in the Art Gallery of the Museum. Featuring such articles as pottery, weaving, wood carving, enamels, jewelry, batik, tapestry, and hooked rugs, the exhibit will be centered around the work of some 30 outstanding American craftsmen who have received national awards for their work. The exhibit closes Feb. 28.

Helton To Head Future Farmers

Bobby Helton, senior Agriculture major from Briscoe, was elected president of the Future Farmers of America, Monday for the spring semester.

Named to assist him as vice president is Leland Robinson. Other new officers are Arvid Harris, secretary; Judd Gray, treasurer; Gary Tollett, reporter; and Roland Nauret, sentinel.

Next meeting of the FFA will be Monday, Feb. 16, at 7 p.m. in Agriculture Building, 318.

Legislators—Abolish Poll Tax

DURING THE past few weeks a small percentage of eligible voters have been trudging to courthouses throughout the state to pay a poll tax that was to keep certain undesirables from voting, and, possibly to raise a little money to cover the cost involved in elections.

What are the ultimate results of a poll tax? First, let's look into the background of restrictions that have been placed on voters.

★ ★ ★ ★

In our early history of the United States, people

Students Seek Different Routine

"With all the talk about the deadening 'conformity' among our young people — usually contrasted with the intellectual ferment of the Thirties — the fact is that many of our ablest students are seeking genuine intellectual challenge and stimulation," asserts Dr. Jerome Stolnitz, Rochester University.

"To a great extent, their needs are not and, possibly, cannot be met by the usual academic routine of lecture courses, textbook assignments and fixed examinations," he continued, in an article in "The Superior Student," a campus publication.

According to Dr. Stolnitz, the rate of increase in enrollment in Rochester's Honors Division is far greater than increase of the student body.

TWO HONORS seminars is an entire program for one semester, and six seminars is required for graduation, with four in a single department.

A seminar is devoted to discussion of student papers which are distributed before the meeting to students (never more than eight) and the instructor.

TOPICS AND bibliographic sources are assigned, but the student is allowed a free hand in developing a subject. The seminar meets once a week for three hours.

Final examinations are the only tests given, and they are drawn up and presented by instructors, from other colleges, so that the seminar instructor has no respon-

sibility for the students' grades.

ICP SOME OF the most perplexing problems man faces today will be discussed by professors of subjects ranging from history to biology in a new course, "Great Contemporary Issues," at Kent State University.

SEVENTEEN FACULTY members will participate in the two hour inter-departmental course, and it is open to the public.

ICP* The National Science Foundation has awarded a \$42,000 grant to Linfield Research Institute for a one-year study using earth satellite signals.

THE INSTITUTE is the only research organization in the Northwest to receive such a grant. The institute utilizes a van trailer for its communications laboratory to help determine conditions of the ionosphere and the thickness of the ionized layer above the earth.

Study along this line will help solve outer space communications problems.

ICP* A five-week summer program designed to encourage outstanding high school students throughout the country to choose teaching as a profession will be inaugurated this summer at Northwestern University.

ABOUT 30 high school juniors will be introduced to the theory and practical aspects of teaching on the elementary through high school level.

had to own a set amount of property or pass a certain religious test. After these were outmoded, universal manhood suffrage came into being. It came in, that is, except for the Negro in the South who was deprived of the right to vote despite his guarantee by the constitution.

The most frequently used method in the South to keep Negroes from going to the polls was the literacy test. It didn't make much difference, and still doesn't, whether a Negro passes or not; he can't find out the real results of the test, and usually can't vote.

★ ★ ★ ★

Another method frequently used in the South to keep the Negro voter's influence down was the "white primary." It was a primary held by the Democrats, and since they have control in the South, the negro is left out on his choice of candidates. The "white primary" was recently ruled unconstitutional.

Now we get back to the poll tax. Yes, it also was enacted to discourage Negroes from voting. It also discourages many other potential voters.

★ ★ ★ ★

Texas is now one of five states—Alabama, Arkansas, Mississippi and Virginia being the others—that still require the voter to buy a poll tax.

Those in favor of a poll tax say, "Why it doesn't cost much, and besides it wouldn't keep a person from voting who really wanted to anyway."

Whether it be psychological reason or not, the above statement is a lot of malarkey. Wherever the poll tax has been repealed, registration and voting have increased—by as much as 50 per cent in some states.

★ ★ ★ ★

Presently in Texas the poll tax isn't used as much to keep the Negro from voting as it does to keep the average John Doe from voting, whether he be Negro or White. It isn't a compulsory thing—most everyone can dig up \$1.75—but it isn't handy to pay.

When election time rolls around, too many people say, "Well, I can't vote because I neglected to pay my poll tax." Thus, they don't get to take an active part in their government.

When is Texas going to stop acting so backwoods and repeal the poll tax? It had better do it this legislative session before it is laughed under the table by other progressive states.

What Are They?

Today much discussion is given to the so-called "beatniks" and the intellectual non-conformists. A great many people do not distinguish between, but the distinction is there.

The beatniks are a group which sit around, drink wine, smoke cigarettes by the dozen and discuss how hopeless the whole life situation is.

It seems that beatniks are located throughout the country, but seem to congregate in the larger cities, with San Francisco being their unofficial capital.

They don't seem to think a thing is right the way it is, but that it is useless to try and fight all the things that are wrong. Consequently, they just sit back, look and let the world go by.

Death, to most of them, is the only perfectly happy state. Before this state, they just don't want to be bothered by the complexities living brings.

A statement from an Associated Collegiate Press release pretty well typifies them:

"I don't believe in thuh Government I don't b'lieve in the p'lice force I don't b'lieve in thuh Postal Services I don't b'lieve in thuh 'phone company I don't b'lieve in the Armed Forces I don't b'lieve in the sewage system I don't b'lieve in nothin'."

The principle difference between beatniks and intellectual non-conformists lies in the fact that the intellectuals are generally in a true search for the truth—whether it be truth in art, music, government, religion, science, mathematics or life in general—and they have not given up the ship.

The intellectuals are termed non-conformists because they do not see things in the light as the ordinary person. To distinguish himself from the ordinary non-conformist will often wear a beard or some sort of odd clothing. On this point a person can't distinguish him from a beatnik unless he converses with him.

In all fairness a third has to be added. He is what is called a "pseudo-intellect." He is one who attempts at being a true non-conformist, but just doesn't have the gray matter it takes to discuss things in the intelligent style as a real one.

It would be interesting to know how many of each kind there are around Tech.

Out of The Past

Tech, 1935, one-minute interviews: Question: What do you think of grading by student assistants?

Martha Vernon Smith: It's all right if you know the grader.

Lloyd Turner: I had rather have the instructor grade my paper.

Billy Joe Welch: It's a fair system of grading.

ARCH LAMB: I don't like the practice. More professors should be hired.

Jeff Ray: Assistants are not familiar with notes given by the instructor.

Julia Moore: It doesn't make any difference to me.

VIRGINIA CARLOCK: It's okay for it helps the poor overworked professors.

Joe Bowers: Some student assistants are all right, others are not.

Leo Haliburton: Professors should grade the papers because they are more familiar with what the student should know.

"THEN I SAID: JUST BECAUSE YOU'RE THE STAR OF THE FOOTBALL TEAM YOU NEEDN'T THINK YOU CAN RUN MY CLASS."

Stenis Attends AIEE Meeting

Tom Stenis, associate professor of electrical engineering, is attending a six day meeting of the American Institute of Electrical Engineers through Friday in New York City.

STEINS, who is counselor for the AIEE student branch at Tech, will attend the student branch committee meeting and technical sessions on electrical engineering education, radio tube development, modern circuit techniques and semi-conductive devices.

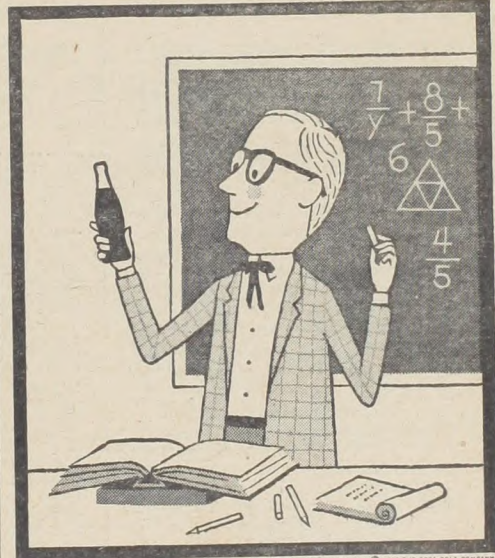

THE MEETING is featuring the largest technical program in the history of the Institute with papers on the latest developments in power generation and distribution, communication and automation.

Techsans Win In Fort Worth

(Continued From Page One)

animal husbandry, the team consists of Robert R. Haas of Lubbock, Louis E. Heinze of Miles, Rudolph Tate of Shamrock and Edward D. Valliant of Sonora. The dairy judging team will return to Tech today, the meats judging team tomorrow.

ANIMALS FROM three of Tech's herds are being exhibited in the 1959 exposition. These include seven steers of Hereford and Angus breeds; 11 barrows — Durocs, Hampshires and Poland Chinas; 23 sheep — Hampshire, Rambouillet, and Southern breeding class, and six fat lambs. The boys showing the animals will return to Tech Sunday.

Q.E.D.

Yes, it's been demonstrated time and time again, that for real refreshment it's Coke every time! Add up that cold crisp taste, that lively lift and you really have a drink worth going after. So whenever the crowd has a multiple thirst, make the high sign of good taste . . . pass around the Coca-Cola! Quod Erat Demonstrandum!

BE REALLY REFRESHED . . . HAVE A COKE!

AFTER BOUT WITH SKIS

Students Limp Back

Broken legs, fractured arms, skinned knees and elbows, and chapped faces are only a few of the consequences of the annual ski trip, sponsored by the Texas Tech Ski Club.

FOUR CAME back with broken legs, six are riding crutches because of sprains and fractures, one returned with a black eye decorated with stitches, and in general, the entire group has that weather-beaten look. It seems that the great outdoor life was just a wee bit too much for them.

Judy Grundy says that she will only have to use her crutches for another week, but she has been on them since her accident.

SUSIE DUVALL has acquired a limp in her walking since she returned, and Jim McPherson is still awaiting the day that the stitches can be removed from above his eye.

Miss Retta Davis, P.E. instructor, can also be added to the list of casualties with a broken leg.

FIFTY TECH students went on the trip sponsored by the Ski

Club. They left Lubbock Jan. 25 and returned Jan. 29 with, they have admitted, many memories—some good and some bad, but almost everyone in fun.

Approximately 200 other Techs ventured to the snow-covered mountains of New Mexico between semesters. Of this group the most serious casualty is Bill Peor, who had to remain in a Santa Fe hospital.

HE BROKE his leg in nine places below the knee and will have to be in traction for an indefinite length of time.

Virginia Integrates

RICHMOND Va. (AP) — Virginia glumly gave way to racial integration Monday and hesitantly took 21 Negro children into seven white schools.

The Negro pupils came and went unmolested at schools in Norfolk and Arlington County. In each community, a few white children refused to attend school with them, picked up their books and left.

GOOD NATURED — Larry Campbell, switchboard operator at men's dorm No. 8, still manages to grin after the latest request received from a person calling into the dorm. (Staff Photo)

To buy a book, Changing Times magazine seriously suggests that you try your drug store, grocery store, or book dealer, in that order.

Switchboard Operator Is Busy Man

by RALPH W. CARPENTER

"I'll ring his room," "I'm sorry he doesn't answer," "Will you leave a number please."

SOEND'S LIKE double-talk doesn't it? Well it's not. Ask Larry Campbell, switchboard operator in Men's Dorm 8. He will tell you that these statements are made time after time, day after day in the course of switchboard operation throughout a semester at Tech.

Campbell, 19-year-old sophomore from Farmington, New Mexico, is assistant wing adviser and switchboard operator at the Dorm. He said the switchboard operation was fairly new to him but he finds the job most interesting.

"**THE BIGGEST** headache we have is trying to get into Drane Hall between 6-8 for all the boys placing calls," Campbell remarked. "During those hours I know every boy in the dorm places a call," he continued. However, Campbell said it was a lot of fun for him and the other operators. He said all the operators made a genuine effort to give the boys in the dorm the kind of service they deserve — the best.

"Some gal who lives in town calls the dorm every time I am on the board," Campbell remarked. "She won't give her name or say who she wants to talk to. She just talks and talks and finally she gets tired and hangs up," he added.

THE FARMINGTON sophomore said he thought operating a switchboard was a good way to earn money while attending college. He feels the operator can meet and learn to know many people by their voice alone. "I have made many new friends while on the switchboard," he remarked.

Switchboard operation in the dorm is under the supervision of Don Phillips, dorm supervisor. The switchboard staff is composed entirely of students.

CAMPBELL, a Pre-Law major, plans to enter the University of New Mexico after graduation from Tech. He is a member of Pi Kappa Alpha, Saddle Tramps and assistant stage manager for the spring varsity show.

When asked how he had time for studies, switchboard operation and student activities, Campbell was quick to answer. "If a student plans his time right, he will find he has time for all phases of college life."

JOB FACTS FROM DU PONT

LIBERAL EMPLOYEE BENEFIT PROGRAM AT DU PONT INCLUDES INSURANCE, SAVINGS AND STOCK PLANS

WHAT'S YOUR LINE? DU PONT NEEDS ALL KINDS OF ENGINEERS

DuPont has always needed chemists and chemical engineers, and still does. But today, there's critical need for engineers in almost every other field—civil, mechanical, electrical, instrumental and industrial engineering, to name a few.

Expansion is the major reason. In 1957, for example, sales at DuPont were at the \$2 billion level. Four new plants were being built. New research programs were being launched. New products were moving into the production and marketing stages. Engineers and scientists of all kinds work in 75 DuPont plants and 93 laboratories in 26 states. All of this tends to broaden opportunities for the young scientist and engineer at DuPont.

If you're interested in finding full scope for your ability, and this includes a great many special fields, DuPont offers you plenty of opportunity to move ahead.

SEND FOR INFORMATION BOOKLET ON JOB OPPORTUNITIES AT DU PONT

Booklets on jobs at DuPont are yours for the asking. Subjects covered include: mechanical, civil, metallurgical, chemical, electrical, instrumentation and industrial engineers; atomic energy, technical sales, business administration, research and development. Name the subject that interests you in a letter to DuPont, 2494-F Nemours Building, Wilmington 98, Del.

PERSONALIZED TRAINING

by H. J. Hollberg
DuPont Representative

When you join DuPont as a scientist or engineer, you're given an actual project assignment almost at once and begin to learn your job by doing it. That's the essence of our training philosophy at DuPont.

Our objective is to give you responsibility at the outset and qualify you quickly for more, because the more we grow, the more we need trained leaders.

Although there is no one training program at DuPont (each of our many departments runs its own), all have several basic features in common. All are personalized—tailored to the new man's background and interests. All involve close supervision on an informal, day-to-day basis. And all permit periodic evaluation of the new man.

This flexible system helps the new man to move ahead according to his abilities. He gets to know DuPont and his job quickly. He gets a head-start on future responsibility.

You probably have questions about this program and how you'd fit into it. I'll be glad to try to answer them when I visit your campus. Why not sign up for a DuPont interview at your placement office now?

Means More Security, Greater Real Income To Young Graduates

DuPont believes that the employee builds his own job security by the way he does his work, by his contributions to the progress of the Company and by his readiness to accept responsibility.

But DuPont meets the employee more than halfway with a program of benefits designed to help him as he advances.

Your employee benefits go to work the day you join the Company. They grow and build equity for you as the years go by. Vacations, life insurance, group hospital and surgical coverage, accident and health insurance, pension and bonus plans are all part of the program.

Let's look at a special example, the Thrift Plan. You become eligible for it after one year with the Company. For each dollar you invest in U. S. Savings Bonds, the Company contributes twenty-five cents toward the purchase of DuPont common stock in your name. Roughly 65 per cent of the Company's 90,000 employees are now participating in the plan.

When you're deciding on a career, security is only one consideration. But it's an important one to you and your family. At DuPont, security is a bright part of the future awaiting the college graduate.

More than 700 of the some 1100 degree-granting colleges and universities in the U. S. are represented at DuPont. Of these 700, more than half are the smaller liberal arts colleges.

Do Y

The M

Puryear Cheers Steers

So far no one's accused the University of Texas' Bobby Puryear of being a tightwad, but when it comes to accepting something free he's a champion.

Puryear, you see, is Southwest Conference basketball's foremost practitioner of the art of converting free throws. He's been at the foul line 53 times this season and 48 of those trips have resulted in points for the Longhorns. That's a percentage of 906 and it's one of the few bright spots in an otherwise lackluster year for the Orange basketballers.

BOBBY CREDITS no one thing in particular with his success at the foul line, "except possibly hard work and concentration."

"I just do the same thing every time . . . always bounce the ball three times, catch it, bounce it two more, then shoot it. It seems to give me confidence. Other than that all I do is think about the ball going where it is supposed to go."

THIS SEASON Bobby missed two of his first 10 free throw attempts then went through eight full games before he missed again against Texas Tech. He had two misses in seven attempts that night, then missed one of five against the Aggies. He was back on the beam against Baylor in Texas' last game with a seven for seven night.

Ranked fifth nationally going into the Baylor game, his perfect night at Waco quite likely has lifted him to the nation's second best at this time.

Workouts To Start

Official opening date for baseball practice is Feb. 16, according to coach Beattie Feathers.

"**THE INFIELD** is secure," said Coach Beattie Feathers, also confirming depth in the outfield.

"It's still too soon to tell whether a few of the players will be back this semester and eligible to play," he commented. No. 1 pitcher is Billy Tombe, a junior from Georgetown. Following closely are Houston Powell, a Lubbock senior; Charles Flanagan, a junior from Dumas, and coming up from the freshman team is Bill Curry, a sophomore from Amarillo.

CATCHER SEEMS to be the main problem, according to Feathers. David Bourland, who caught at Abilene High School, will probably switch from shortstop. Competing with him for the top spot will be Mickey Kirkpatrick and Doyle Huckaby if he returns.

"Just like I said, it's still too early to tell," Feathers commented. So the catcher's spot is still wide open.

GAME SCHEDULES have not been completed as yet but some of the teams Feathers is trying to line up are Colorado, Texas A&M, Rice, Abilene Christian, Midwestern, and West Texas State.

'Mural Action Resumes

by JOHN LEWIS

Intramural basketball action has resumed with the start of the new semester and there is a lot of action in store.

IN THE Dormitory League, Dorm 8 meets Dorm 6, Dorm 5 tries Sneed Hall, West Hall battles Dorm 7, and Gordon Hall takes on Bledsoe Hall. These games begin at 7 p.m. at the Men's Gym, Wednesday.

In the Fraternity League, Pi Kappa Alpha challenges Delta Tau Delta and Kappa Sigma will meet Phi Kappa Psi at the W. B. Atkins gym located at 5501 Avenue U. The games will begin at 7:15 p.m. Thursday.

PHI DELTA THETA collides with Phi Gamma Delta and Sigma Chi takes on Alpha Tau Omega at the Smiley Wilson gym located at 4400 - 31st Street. These games will begin at 7:15 p.m. Thursday.

In the Independent League, the Church of Christ team will battle the Court Jesters, Delta Sigma Pi tackles the Generals, the Slim Jims take on the Gunners, and Alpha Delta Sigma tries the Dwarfs at the men's gym beginning at 7 p.m. Thursday.

THE FRATERNITY League race is still a scramble for the lead with the Pikes, Fijis, and Phi Deltas still tied. The game between the

Fijis and the Phi Deltas Thursday night will eliminate one of these teams from the first place spot.

The Pikes will feel the loss of Clayton Robertson at guard, but have been picked to defeat the Deltas who now own a 1-2 record.

IN A REVISED schedule, the Kager's and the D.I.'s have been dropped from Independent League No. 3 play. The Tuxedo's have the undisputed first place with a 2-0 record. There will be one game played in the league this week when the Chinese Bandits take on the Sports Club at the men's gym Thursday night beginning at 9 p.m.

Outlook

By BILL DEAN

Saturday afternoon's win over Texas A&M was, with no doubt, the finest defensive performance turned in by Texas Tech this year.

The Raiders were simply all over the court and all over the Aggies.

This is a far cry from the Raiders that lost their first two-of-three conference games and appeared headed nowhere fast — if there is such a place.

But every since the Texas game in Austin the Raiders have come to life and looked like everyone knew they could.

The insertion of junior forward James Wiley into the lineup has helped. Wiley provided the spark that seemed to ignite this team. His play hasn't been spectacular, but it has been consistent and aggressive. He's made rebounding a little tough on some of his opponents — including H. E. Kirchner of TCU.

Of course, the Raiders were slower this year in coming up to their peak. Last year they hit it too soon. This time it looks like they've hit full stride at just the right time.

The next few weeks are the real crucial ones though. After tonight's battle with the Rice Owls, Tech goes to Fort Worth Saturday night and battles the Frogs. A week later they journey to College Station for a return engagement with the Aggies.

It isn't humanly possible to expect the Raiders to take both these games. An even split would be more than enough.

Regardless of the outcome of these two I think the Raiders, in order to be in contention for the crown must (1) win all their remaining home games and (2) win at Waco and Houston.

Let's say they do just this and lose to TCU and A&M. This would give us a final of 10-4, which would have been good enough to win the crown last year.

Whether it will be good enough this year is another story. It's a cinch that someone else is going to have to beat TCU, starting tonight when the Frogs tackle the Aggies at College Station.

TCU must also play at SMU and Arkansas. Both those games will be crucial.

As you see, the odds are against us — but he who believes in odds sometimes is rather odd himself.

★ ★ ★

In viewing the future I hope I am not misunderstood. Tonight is more important at present than any other game on the schedule.

Rice is dangerous and the Raiders know it. There can be no let-down or slack-up tonight.

Viewing the future is fine — for me. But the ball club must play them one at a time — they can't afford not to!

★ ★ ★

One thing about the last two games in the Coliseum does confuse me. Why were there so

many empty seats, especially last Saturday?

The publicity put out by the business office would leave one to believe that they'd be hanging from the rafters for the A&M game. Yet there were numerous empty seats in the stands and a whole horde of empty chair seats on the floor, not to mention a wide area to the north of the court where there weren't even any chairs laid down.

I'm the greedy kind. I believe the more the merrier. If people want to pay to stand — let them stand. Above all let's fill the coliseum instead of searing people away with ill-timed and poorly co-ordinated publicity.

It's not only bad business; it's a little embarrassing.

Sports Briefs

ELKHART, Ind. (AP) — Terry Brennan, recently fired head football coach at the University of Notre Dame, will quit coaching and take a position with a Chicago bank, the Elkhart Truth said Monday.

The Truth said it had learned from reliable sources that Brennan would make the announcement at a testimonial dinner in his honor in Chicago Monday night.

★ ★ ★

NEW YORK (AP) — Earl H. Red Blaik, who retires Feb. 15 as Army football coach and athletic director, will join a New York company, Aveco Manufacturing Corp., the next day as a vice president and member of the management committee.

The company is active in a number of fields, ranging from space research to television broadcasting. Whether Blaik will specialize in any one field was not indicated in Monday's joint announcement by him and the company.

Tech Shoots for Fourth Straight

(Continued From Page One)

idle Baylor for second place with a win tonight and could possibly jump into a first place tie with TCU, should the Frogs lose.

Coach Polk Robison is expected to start his usual line-up consisting of Gerald Myers (5-10) and Charley Lynch (6-2) at guards,

Gene Arrington (6-4) and James Wiley (6-5) at forwards and Leon "Podd" Hill (6-6) at center.

This new combination has been tough to stop in the last three victories. Wiley seems to have provided the spark that was needed. He replaced Pat Noakes, 6-9 center, in the line-up. Now, of course, Noakes and Harold Hudgens, another 6-9'er, have both become scholastically ineligible.

Suman is expected to start Ball and Steve Galloway (6-2) at guards, W. A. Preston (6-6) and Gary Griffin (6-5) at forwards, and Robitaille at center.

Ball and Griffin are no strangers to this area. Ball played his basketball at Lubbock High School under Dave Cook while Griffin's

cage career began at Pampa High School under Clifton McNeely.

Otherwise in the conference tonight a big one is on tap at College Station where Texas A&M entertains TCU. The other game finds SMU at Arkansas.
