

## 7,000 expected for summer session; Record number receive diplomas

### Gen. Davis is speaker

Even a silver lining has that persistent black cloud hanging over its head, and no one knows that better than the Tech graduates that stood in the rain waiting for their final ceremonies Saturday.

Texas Tech's 41st spring commencement saw a record 1,620 graduates receive diplomas in ceremonies in Municipal Coliseum Saturday night.

Lt. Gen. W. A. Davis, former vice-commander of the Air Force Systems Command and a 1936 graduate of Tech, gave the commencement address and told the graduates that their generation will be in position "to shape the future much sooner than generations that have gone before."

**DAVIS CITED FOUR** challenges now facing the new graduates and their generation. The challenge of a world torn by ideological differences, the great gap between highly developed nations and underdeveloped nations, the need to keep improving the environment in which we live and the overwhelming challenge presented by rapidly advancing knowledge of science and technology.

Graduation picture story, see page 3.

During the ceremonies 136 master's degrees, seven doctorates and four honorary doctorates were presented.

**STUDENTS HONORED FOR** having the highest grades in Tech's five schools were Paula Diane Hefley, Lubbock, School of Agriculture; Nancy Ruth Taylor, Fort Worth, School of Arts and Sciences; Samuel Ray Cummings, Lubbock, School of Business Administration; Stephen James Stephenson, Borger, School of Engineering; and Marsha Ann Wilson, Lubbock, School of Home Economics.

Doctor of Education degrees were conferred upon William Lewis Butefish, Perryton; Donald Cates, San Angelo; and Doris Johnson Webb, Lubbock.

**RECEIVING DOCTOR OF** Philosophy degrees were Forrest Dean Burk, San Diego, Calif.; Anthony Z. Dube, Mount Carmel P.Q., Canada; Porter Andrew Stratton, Portales, N.M.; and Reesa Mae Vaughter, Lubbock.

Lt. Gen. Davis was conferred with an honorary Doctor of Science degree as was Rice University Chancellor Carey Corneis. Honorary Doctor of Law degrees were conferred upon Lt. Gov. Preston Smith and House Speaker Ben Barnes.

### Suicide ruled cause in Coppinger death

Services for John Allen Coppinger, Tech student from Abilene, were conducted Tuesday at the Central Presbyterian Church, in Abilene.

Coppinger's body was found in his car, on a county road several miles north of Lubbock, Sunday.

**SILAS CLARK, JUSTICE OF** the peace, returned a verdict Monday of death by a self-inflicted gunshot wound.

Deputy Sheriff Ray Trammell said that the bullet wound over the right eye, probably was inflicted Saturday afternoon or evening.

He said that a 22-caliber pistol was found near clothing and other utensils in the car, and the deputy said that Coppinger apparently was returning

Summertime, and the living is easy?

### Set for June 12

## Experimental course planned

An experimental course aimed at improving listening and studying skills, vocabulary and concentration will be introduced to the Texas Tech campus June 12.

Tom Fields, supervisor of the Reading Improvement Program in the University Counseling Center, said the five-week course resulted from his classroom observation of students whose vocabulary and listening and concentration habits impeded their ability to "attain their full learning potential." He said he knew of no other such course in this country.

**THE PILOT COURSE WILL** be opened to selected students who already have completed the Reading Im-

provement Program's Basic course in speed reading.

Dr. James E. Kuntz, director of the Counseling Center, said registration for both the basic course and the new program ends June 12, but he cautioned

students not to sign up for the advanced program without a prior interview with the Center staff.

Both courses will meet for an hour and a half daily, Monday through Thursday during the five-week period.

**EVERYBODY SING** — Head Start workers join in song during a session of the orientation for staff members of the child development centers. The five-day orientation concludes today in the Student Union Building.

### All classes begin today; schedules set for term

Floyd Boze, dean of admissions announced Wednesday that an estimated 7,000 students are expected to enroll in the first term of the 1967 summer session.

Boze said that he based this prediction on the number of registration permits issued. He added that this is a fairly reliable figure because most of the "don't show students" are weeded out during the summer sessions.

The total enrollment for the first summer term of 1966 was a record 7,216 students. This included 5,510 undergraduates and 1,706 graduate students.

**REGISTRATION FOR THE** second term begins at 8 a.m. Monday, July 17. The second term finals are scheduled for August 21 and 22.

All classes will meet Saturday, June 10, June 24, and July 8. Saturday classes are scheduled during the summer because of the statute in creditation which provides for a required amount of class attendance.

**REGISTRATION MUST HAVE** been completed by Thursday with all tuition and fees paid at that time. There will be no late registration for either summer term.

"Plans are in-the-making for registration in the Coliseum for the second term of summer school, but the exact details have not been worked out," Boze said.

Residence halls were opened for occupancy June 6 with the first meals being served June 7.

**MURDOUGH IS THE MEN'S** residence hall while Wall and Gates are the women's. The same residence halls will remain open for the duration of the summer sessions, including holidays between sessions.

The normal load for a six-weeks term is six semester hours. A student will not be permitted to register in more than 14 hours in two terms, including correspondence work.

**WITH PERMISSION** from the academic dean, a senior may enroll for 15 semester hours in a 12-week period if this will enable him to be graduated at the close of the current summer session.

### Dorm counselor dies

Mrs. Evelyn Stovall, counselor in Knapp Hall for the past 10 years, died in Elizabethton, Tenn. May 31.

Mrs. Stovall, a native of Elizabethton, was a counselor at Knapp from September of 1957 until her retirement because of ill health last Feb. 28.

She was the widow of the late Dr. J.

Willis Stovall, former head of the department of geology at the University of Oklahoma and Director of the Stovall Memorial Museum there.

Mrs. Stovall taught history and was Dean of Girls at Norman High School, and taught French and history at Tennessee State College.

### Rounds out faculty

## Martin Frey named to law school staff

The teaching faculty for Texas Tech's new School of Law, opening its doors to an estimated 75 first year law students in September, was completed this week with the appointment of assistant professor Martin A. Frey.

Frey's appointment, announced by Law School Dean Richard B. Amandes, brings the faculty to its full authorized complement of six.

**AMANDES SAID** Frey was coming to Tech from the Drake University campus in Des Moines, Ia., where he served last year as assistant professor of law. Frey, a native of Rochester, N.Y., did his undergraduate work at Northwestern University, and attended law school at Washington University, St. Louis, and George Washington University's Graduate School of Public Law, Washington, D.C., where he worked under a teaching fellowship in 1965-66.

Frey, who will teach property law

this Fall, joins Professors Amandes and Glen W. Shellhaas, formerly of the University of North Carolina Law School; Justin Smith, National College of State Trial Judges at the University of Nevada; Maurice B. Kirk, former Law School Dean at Drake, and U. V. Jones, who will serve as law librarian, as well as teach.

**AMANDES SAID** he welcomed Frey to the Tech School of Law "particularly, because of his deep interest in the establishment of a law review at an early date. We are working toward the day when Tech's School of Law will be ranked among the finest in the country. We have put together a first year faculty," he said, "which I believe includes the talent, knowledge, experience and dedication necessary to start us off in the right direction.

"We anticipate an initial enrollment of as many as 75 first year law students and we have a tentative goal of 600 by 1975."

# Four receive Horn 'ships

Four Texas Tech professors — each a nationally recognized authority in his field — were named recipients Saturday of the first Horn Professorships by the university's Board of Directors.

Receiving the professorships, named in honor of Tech's first president, Paul Whitfield Horn, were Dr. F. Alton Wade, professor of Geosciences; Dr. Carl Hammer, head of Germanic and Slavonic languages department; Prof. Elo J. Urbanovsky, head of the department of park administration, horticulture and entomology; and Dr. Ernest Wallace, professor of history.

"THE BOARD of Directors has made excellent choices for the initial Horn Professorships," said Tech President, Grover E. Murray. "Each Horn Professor exemplified the qualities of teaching ability and research curiosity that combine to make him an outstanding authority in his field. Texas Tech is privileged to have these men on its faculty."

THE HORN Professorships were established by the Tech Board in 1966 "to recognize scholarly achievement and

outstanding service" at the achievements.

Eligibility was based on attainment of national or regional distinction for outstanding teaching, research or other creative

1933 with Admiral Richard E. Byrd and returned from his fifth expedition early this year.

A GRADUATE of Western Reserve, Kenyon College and

John Hopkins, Dr. Wade headed Tech's geosciences department from 1954 until 1964 when he resigned to devote fulltime to teaching and research.

He holds two Congressional Medals for his work with Admiral Byrd and was cited for work in Korea by the Air Force in 1952. Kenyon awarded him an honorary Doctor of Science in 1962.

Prof. Elo J. Urbanovsky is one of the leading authorities on parks and recreation areas in the United States. Under his direction, Tech's park administration department recently presented a proposal to Gov. Connally for a scenic parkway system in Texas designed to revolutionize auto tourism in the state.

He has served as president of the American Institute of Park Executives, holds an honorary fellowship in the National Recreation and Park Association and was cited by the association for outstanding work in 1965.

POPE JOHN XXIII conferred the Pro Excelsia Et Pontifice on Urbanovsky in 1963.

Dr. Ernest Wallace, noted historian, teacher and author, joined the Tech faculty 31 years ago. Concentrating his area of historical interest in the Southwest, Dr. Wallace is co-author of *The Comanches: Lords of the South Plains*, considered by experts to be the most thorough and complete history of that tribe. He also is a recognized authority on Gen. Randal S. McKenzie, an early military leader in Texas.

He holds memberships in several national and regional historical societies, and has published numerous historical articles in addition to several novels.

DR. CARL HAMMER JR. joined the Tech Faculty in 1964, bringing with him an international reputation in Germanic studies. He is considered one of the leading authorities on Goethe.

A native North Carolinian, Dr. Hammer was graduated from Catawba College, earned his master's at Vanderbilt and received the doctorate at the University of Illinois where he was Phi Beta Kappa.

OTHER GRADUATE work includes studies at the University of North Carolina and the University of Jena in Germany.

Dr. Hammer recently was selected to head Tech's new department of Germanic and Slavonic languages which opens in September.

He has written eight books and more than 20 articles related to his field and is a constant contributor to journals. Currently president of the Texas chapter of the American Association of Teachers of German, Dr. Hammer was cited by the University of Illinois in 1958 as one of the top ten graduates of the German department in the last 50 years.

HE WAS AWARDED the Schiller sesquicentennial medal by the Federal Republic of Germany in 1956 for his work in promoting cultural relations between the United States and that country. In 1964 he was a guest of the Republic for a special project and lectured in Germany again last summer.

HORN PROFESSORS NAMED — Four Texas Tech professors were awarded Horn Professorships Saturday by the university's Board of Directors. The four are the first to be named to the professorships

which were created by the Board in 1966 in honor of Tech's first president, Paul W. Horn. Selected were, left to right, Dr. Ernest Wallace, Dr. F. Alton Wade, Elo J. Urbanovsky and Dr. Carl Hammer.

**ENROLLMENT:** A PROPER BALANCE OF THE SEXES IS A MUST . . .

**CURRICULUM:** EARLY MORNING, FINISH UP WITH FINISHED, BROAD COURSE OFFERINGS MAKE FOR A WELL-ROUNDED STUDENT.

**Emerald Aisle**  
by Frank O'Hagan, Jr.

In an effort to keep Tech students well informed—the purpose of this column shall be to keep the students abreast of campus news, administrative policy, and everyday problems faced by the student.

In a recent meeting of Texas Tech's Board of Directors, a long-standing controversy between the student body and the administration was settled.

The controversy mentioned, concerns "off-campus housing." The board's approval was given to allow students 21 years of age and older to live off-campus.

Before this change in policy, work permits, medical excuses, or marriage, were about the only acceptable reasons for a Tech student to live off-campus.

This change in policy is not currently in effect and the framework of the new off-campus housing policy will not be formed until President Murray returns from Russia.

Also at this board meeting, the motion was made and accepted that after a new name is chosen for Texas Tech—all graduates will be offered a new diploma with the new name replacing Texas Technological College.

If and when the name is changed, graduates may file for their new diplomas through the registrar's office.

President Grover E. Murray reported that Dr. Byron Abernethy, a key figure in censorship of the Board by the American Association of University Professors, had declined faculty reinstatement and that "the case is closed."

Texas Tech President Grover E. Murray will represent the United States at the organizational meeting of the Commission for the History of Geological Sciences at the International Geological Union in Yerevan, Armenia, USSR, June 1-12.

A student passing through the corridors of the Business Administration Building spied what looked to him like a bomb. He reported it immediately and summoned the Lubbock police and fire departments who soon discovered that the "bomb" was only a tiny electric motor.

Governor John Connally signed a bill authorizing a gigantic educational television network linking 18 West Texas colleges and universities.

The television network will be known as the "Western Information Network, and the will have its center of operations at Texas Tech.

There seems to be some doubt as to when the lightposts at Jones Stadium will be ready for use.

The lightpoles collapsed in 68 m.p.h winds in a sandstorm about five months ago.

As of now, afternoon and early-evening football games are in the planning.

Just before the close of the spring semester a "theft ring" was discovered on the Tech campus.

The "theft ring" did not consist of a couple guys stealing petty things such as hubcaps and other car accessories. The ring was a well-organized group of male undergraduate students that had consistently sold the "hot" merchandise, with a profit mark-up that would make General Motors jealous.

Any reasonable businessman would surely make an investment in an organization that could guarantee him 100 per cent profit. And this organization could produce 100 per cent profit. Their only production costs consisted of a few risks . . . a risk that could gain them suspension from college . . . a few years in the penitentiary . . . and forgo all hopes of good job opportunities.

The reader must realize that the stolen goods were not valued at \$10 or \$100 or \$1000, but several thousand dollars worth of cameras, stereo equipment, electric typewriters, and various appliances.

The members of the theft ring are now awaiting a verdict from the grand jury and have been suspended from Texas Technological College. What their final punishment will be remains to be seen, but one fact remains constant . . . the fact being what economists call the "law of supply and demand"—as long as there is a demand for stolen goods and students on this campus continue to buy stolen articles someone will always be there to sell them.

# Leidigh, Langford, Bassett new hall names

Two members of Texas Tech's original faculty and a distinguished graduate were honored in board action Saturday as directors selected names for the remaining three towers in the Wiggins residence hall complex.

The high rise dormitories, scheduled for construction in the second phase of the multi-million dollar project, will be known as Leidigh Hall, Langford Hall and Bassett Hall.

**THE LATE** Arthur Henry Leidigh, as professor of Agronomy and Dean of Agriculture, served Tech 30 years, from 1925 until he retired in 1945. He was responsible for many of the principles and practices which brought the School of Agriculture to its present state of eminence, college officials noted. Dean Leidigh died in 1955.

Mrs. Johnnye Gilkerson Langford, professor emerita of physical education and a former dean of women, headed Tech's department of physical education for women from 1925 until she retired in 1950, with the exception of the years 1945 through 1948, when she served as dean of women.

**THE THIRD** designation honors the late Capt. Charles A. Bassett II, Air Force officer and astronaut who was scheduled for orbital flight in one of the later Gemini projects at the time of his death Feb. 28. Capt. Bassett received a Bachelor of Science degree from Tech, with honors, in 1950. He had built up an enviable academic and Air Force record, logging in excess of 3,200 hours of flight time, mostly in jet aircraft.

The commons dining hall also was designated as Wiggins Common in honor of former Tech President Dr. D. M. Wiggins of Lubbock for whom the entire complex is named.

**THE FIRST** three towers, scheduled for occupancy this fall, were named Chitwood, Weymouth and Coleman Halls in honor of prominent Texans instrumental in Tech's founding and development.

Each of the three towers will accommodate 572 students with a total occupancy of 3,432 when all are in operation.

Board member Retha Martin of Lubbock headed the special committee which selected the names.

**AND IT SOON WILL BE ON YOUR CALENDAR TOO. SO COME IN SOON AND SELECT FROM BROWN'S COMPLETE SELECTION OF PERFECT GIFTS FOR DAD!!**

**BARDSTOWN SUITS**  
By MERIT

Do Dad up right this Father's Day with a beautiful new suit from Brown's. These Bardstown suits are in cool, comfortable summer and year-round weight fabrics. You may choose from this year's most popular colors and patterns.

**SPECIAL FATHER'S DAY SAVINGS ON SUITS, SPORT COATS, AND SLACKS!!!!**

**IT'S DAD'S DAY EVERY MORNING**

When you give him **BRITISH STERLING**

or any of the other elegant fragrances from Brown's complete line of men's toiletries.

CORNER OF COLLEGE AVE. AT BROADWAY

**MOTHERS PIN BARS** — Among the 38 cadets who received second lieutenant's bars in Saturday's Army and Air ROTC commissioning exercises at Texas Tech were, at right, Mike R. Cowart of Pecos, Army ROTC, whose bars were pinned by his mother, Mrs. Lewis Cowart, and, at right, Terry Bell of Temple, Air Force ROTC, whose mother Mrs. Arthur Bell did the honors.

## Thirty-seven cadets receive commissions

Thirty-seven graduating seniors of the cadets pinned their bars.

**AIR FORCE** cadets receiving commissions were Rondal T. Bell, Temple; Jerry D. Boyle, Graham; Earnest C. Casstevens, Jr., Lubbock; Mackie B. Curry, San Angelo; Frankie A. Figueroa, San Angelo; Clyde W. Harrell, Plainview; Danny Harwell Jr., Sweetwater; Gary T. Hewett, Plainview;

**MAJ. BOBBY J. CARTER**, assistant professor of military science, presented Army lieutenant insignias and Maj. Robert Dyer, assistant professor of aerospace studies, did the honors for the Air Force cadets.

Maj. Robert L. Paradis, assistant professor of aerospace studies, administered the oath of office. Friends and relatives

Springlake; Jerry W. Blythe, Amarillo; John L. Bradley, Silver Spring, Md.; Michael B. Cavanaugh, San Antonio; Michael R. Cowart, Pecos; David K. Current, Amarillo; Michael S. Daugherty, Big Spring; Robert E. Dow, Littlefield; Elbridge G. Fish II, Killean; Richard L. Garlitz, Balmorhea; James O. Hamm, Childress; William L. Long, El Paso; Michael E. Mallett, Lubbock; John D. Nestler, Omaha, Nebr.;

**GEORGE R. RAINHART**, Albuquerque; Michael A. Smith, Florence; Robert A. Sullivan, Electra; Gordon D. Vick, Dumas; David A. Vore, Odessa; James T. Watt, Lubbock, and Arthur G. Willis, Corpus Christi.

## Robert Lane receives Foundation scholarship

Robert Samuel Lane has been named the 1967-68 winner of the Pan American Petroleum Foundation undergraduate honors scholarship in petroleum engineering at Texas Technological College.

The award was announced jointly by C. F. Bedford, Foundation vice president, and by Dean Robert L. Newell, of School of Engineering at Texas Tech.

**BEDFORD SAID** Lane will receive a scholarship award of \$700 for the first year, \$800 for the second year, \$900 for the third year and \$1,000 for the senior year.

After the first year, continuance of the award is dependent on Lane maintaining a B average or better in his college studies.

**LANE WAS SELECTED** as the winner by college officials who considered his high school record along with other applicants. The college will administer the award.

"This award is part of the Foundation's program of encouraging talented young men and women to pursue their academic studies in fields that are important to the nation's future energy supplies," Mr. Bedford said.

**HE POINTED OUT** that the Foundation is sponsoring 48 other undergraduate scholarships in geology, geophysics, engineering and engineering science at 18 leading universities.

"Enrollments in these disciplines have been declining for several years," Mr. Bedford said.

"Since the American economy is highly dependent on abundant supplies of low-cost energy, we feel it is important to have young people of real ability turning their attention to the fields of study that will prepare them for careers in the energy industries."

**PAN AMERICAN** Petroleum Foundation, Inc., was created and is supported by Pan American Petroleum Corporation, the North American oil and gas producing subsidiary of Standard Oil Company (Indiana).

ROBERT LANE

## Swine herd authority to speak here in July

A leading authority on swine herd management will be on the Texas Tech campus in July as guest speaker at a swine short course.

Course Chairman Dr. Sam Curl, associate professor in Tech's Animal Husbandry Department, said Dr. Leland Tribble will discuss "management of the swine herd" in sessions July 6-7. Tribble is a widely recognized animal husbandry educator from the University of Missouri.

**CURL SAID** about 200 swine producers, feed industry representatives, county agents and vocational agriculture teachers are expected to attend the 15th in Tech's annual series of summer swine short courses, co-sponsored by Tech and the Texas Swine Breeders Association. Lubbock producer Buddy Winter is president of the TSBA.

Another highlight of the course will be a barrow show and judging contest, for which producers will be invited to bring in hogs. Curl said "We'll look at the hogs July 6. They will be slaughtered and we will evaluate the carcasses on the following day."

**CURL SAID** the purpose of the course is to "afford producers the opportunity to discuss problems, explore new production techniques and practices and to keep the producer up to date in the overall activities in swine husbandry."

The Triolins

## Techsans to appear on Ted Mack Show

Texas Tech will be well represented when the Ted Mack Amateur Hour takes the air on June 18. This program will feature talent from the South Plains.

The program will feature the Triolins, a string group consisting of Mary Kay Manicappelli, Jan Martin, Nancy Brown, and Sally Ann Manicappelli . . . all students of Tech.

The Triolins, organized in June of 1966, have performed for conventions, wedding receptions, and civic functions in Lubbock.

They were the official music for the Governor's Inaugural last January in Austin and performed in the Senate Chamber as part of the official ceremonies.

All four of the girls are music majors at Tech and are all residents of Lubbock except Miss Martin, who is from Odessa, Texas.

ALSO APPEARING on the same program, will be Richard Campbell, vocalist.

Campbell was a starting defensive end for the Red Raiders last year and is at present working on the redshirt team.

He has performed with the Sourdough Singers, a folk group, and has appeared as a soloist. Campbell is from Matador, Texas and is majoring in journalism at Tech.

RICHARD CAMPBELL

## Textile department begins aid research

Texas Tech's Board of Directors have voted to increase the scope of Tech's Textile Engineering Department and launch a long-range and intensive cotton research program to aid West Texas farmers and the cotton industry.

A concurrent resolution redesignated the adjunct Textile Research Laboratory as the Textile Research Center.

THE BOARD authorized \$250,000 to be spent on a new building to house the new center and another \$250,000 for equipment. An additional \$50,000 for immediate equipment purchase for the existing Textile Engineering building also was approved.

Dr. John Bradford, Dean of Tech's School of Engineering termed the research project "one of the most exciting and challenging assignments given the School of Engineering and the Textile Engineering Department in some time."

BOARD MEMBER Harold Hinn of Plainview and Dallas said the new research facility will tackle problems common

to farmers in West Texas and the rest of the cotton producing regions of the United States.

"We intend for this center to become the focal point for cotton research in the United States," Hinn said.

HIGH ON the research priority list, according to Textile Engineering Prof. M. Earl Heard, is a study of the type of cotton now grown in West Texas.

"Much of today's West Texas cotton is heavily discounted because it does not have the

## Special stage made for summer theater

Drama buffs will be given an opportunity to view three popular plays in "three-quarter round" at Texas Tech's University Theater this summer.

Scheduled for presentation on a rotating basis during the week of July 5-12 are: Noel Coward's "Blithe Spirit," directed by Speech Prof. Larry

Randolph; Shelagh Delaney's "A Taste of Honey," directed by Dr. Clifford Ashby, and Edgar Lee Master's "Spoon River," directed by Mrs. June Bearden.

DR. ASHBY, director of the program, a project of Tech's Summer Repertory Company, said all three plays will be presented at audience level on

a specially constructed stage in the University Theater.

Designs by Technical Director Fred March call for a staging area bordered on three sides by seats for the audience and on the fourth by the scenery. Seating capacity will be limited to 200.

"THIS TYPE of production calls for a different kind of approach," March said, explaining his designs which "places the audience on the stage and in close rapport with the actors."

General admission tickets are \$2 for each individual performance and \$5 for the season. Tickets to Tech students are 50 cents upon presentation of I.D. card. Reservations may be made by calling the University Theater box office, PO2-8811, Ext. 2153.

## Robert Graham named All-American swimmer

Southwest Conference 50-yard freestyle swimming champion Robert Graham has been named All-American for the second consecutive year.

A selection board of the College Swimming Coaches Association chose Graham, who qualified for the honors with his 21.4 clocking in the Conference meet preliminaries.

Graham, a senior from Tyler, has held the 50-yard freestyle title for the past two consecutive years and was named All-American, along with diver Jesse March, last year.

## Coaches, faculty hit links trail

Golf and fellowship will be high on the menu this summer as Texas Tech coaches and faculty members visit 15 area towns, according to Lee Jackson, Red Raider Club executive vice president.

Jackson said the visitors will meet with civic clubs at noon and play golf with fans in the afternoon. Talks by the coaches are scheduled at evening sessions.

RED RAIDER CLUB President Loyd Lanotte and other club officials, along with Athletic Director Polk Robison, Football Coach J. T. King and Basketball Coach Gene Gibson will lead the Tech delegation.

Jackson said former Tech All-American Donny Anderson, now a halfback with the Green Bay Packers, is expected to make some of the golf trips.

"THESE TRIPS are always one of the high points of the year for us," Jackson said. "They provide an excellent opportunity for us to get better

acquainted with fans throughout the area."

The first stops on the annual tour will be at Seminole and Seagraves Tuesday (June 13) and Brownfield on Thursday (June 15).

OTHER TOWNS on the schedule are Levelland, June 20; Ralls, June 22; Abernathy, June 27; Tahoka, June 29; Big Spring, July 5; Plainview, July 6; Post, July 11; Muleshoe, July 12; Midland, July 13; Amarillo, July 18; Wichita Falls, July 20; Slaton, July 24 and Hobbs, N.M., July 25.

## Intramural notes

Entry deadline for the first summer session's intramural program has been set for Friday at 5 p.m. All entries must be in the intramural office no later than this date.

Activities available to students during the summer sessions include tennis, golf, horseshoes, spaceball, table tennis, badminton, handball and paddleball. Entries may be made for either singles or

doubles competition in any of the activities.

The intramural gym will be open for student recreation Monday through Friday from 8 a.m. to 7 p.m. Equipment will be available to the students from 1 to 7 p.m.

The facilities are available to any registered student and equipment may be checked out with a driver's license or 66.

a registration fee slip. ID's for the long semesters will no be honored.

Edsel Buchanan, director of men's intramurals, reports that during the 1966-67 school year 65.5% of the male undergraduates participated in at least one intramural sport. This figure is an increase over the 58% participation in 1965-66.
