

Smith Appoints Supreme Court

By DON JONES
Toreador Staff Writer

Selection of a chief justice and five associate justices to the Texas Tech Supreme Court was announced Monday by Student Assn. President Carlyle Smith.

Serving as chief justice of the court will be Jerry Rogers, pre-law major from Vega.

Associate justices from the five undergraduate schools are Bill Riley, Engineering; Bobby Switzer, Business Administration; Fern Vestal, Arts & Sciences; Carolyn Vines, Home Economics; and Wendell Kent, Agriculture.

Under the new constitution, which was ratified by the Tech student body in a campus-wide election Wednesday, the court this year will have the opportunity to establish precedence in court procedure.

Rogers, the new chief justice, in commenting on the tasks the court will face during the first year under the new constitution, said, "We have an opportunity to originate legal procedure as a result of the ratification of the new constitution."

"This is unusual and unprecedented because under the old document the campus Supreme Court had no such rights."

Rogers said that he and his associates justices will meet sometime this week to work out court procedures for the current school year.

Rogers served on the committee that made the final draft of the new constitution. Other on the committee were Dr. J. W. Davis, government department head; Dean of Student Life James Allen; Ruth Cowart, government instructor; Carlyle Smith; and Assistant Dean of Women Dorothy Garner.

Bobby Switzer, Business Administration representative to the court, in commenting on his appointment to the high campus position, said, "I hope the court will be able to perform its functions properly and efficiently. The court has a vital role in student government at Tech, and the members are indebted to go all out to see that the constitution is obeyed and to see to it that all legal statutes are properly observed."

"The Supreme Court has a place in student government on the Tech campus, and it will be the duty of the new court appointees to see that it is recognized by the entire student body," Carolyn Vines, Home Economics representative to the court, commented.

Fern Vestal, Arts & Sciences representative, said, after being informed of her appointment, "I hope the members of the court will have the opportunity to use the court to good advantage, if for no other reason than to acquaint the student body of the presence of the court and its duty."

Bill Riley, Engineering representative, said, "We owe it to the students on the Tech campus to set up some definite procedure under which student government can properly function."

Wendell Kent, Aggie representative, expressed the hope that the court will be able to see that everyone is given a fair deal. "It is the duty of the court to see that a definite pattern will be set for student elections and to see to it that controversies which arise on the campus will be settled in a fair and impartial way."

An Editorial

The Raiders' performance on the gridiron Saturday night left a lot to be desired—it could be a long, long season.

We're not football players, coaches or professional alibis but we are, like thousands of others who crowded into Jones Stadium Saturday for the home opener, paying fans.

Because of this we feel entitled to an opinion.

Collegiate football is big business. Poor performances seldom ever entice the fans to flock to the stadium week after week. Tech, after years of slim gates, can't afford this much longer.

Everybody loves a winner, but everybody RESPECTS and ADMIRES a FIGHTER. If the talent on the opposing team is simply overpowering, it usually means that the team with GUTS may take a beating, but the spectators can see those GUTS from the stands.

They'll come back for a team like that.

There may have been some outstanding individual performances Saturday night against the Aggies, but they were overshadowed by bad overall shoddy play.

It was a bad show but it's in the record books now. Let's forget it; TCU lies ahead.

Techsans will support a fighter, win or lose. But when the team stops, so may the cheers.

LET'S GET A FROGGIE, RAIDERS!

—Editorial Staff

Tech Foundation Board Hears Reports By College Officials

By BOB TAYLOR
Toreador Managing Editor

Texas Tech's three vice presidents and the dean of admissions and registrar spoke Saturday at the fall meeting of the Texas Tech Foundation Board.

Attending the meeting were nearly forty Board members, college administrative officials and special guests.

The purpose of the Foundation, according to W. H. Butterfield, Tech's vice president for development, is "to supplement the support that Texas Tech receives through state appropriations and to make possible certain benefits to the college that the state cannot be expected to provide."

Major projects of the Foundation include the stadium expansion, the receipts for which now total \$829,383; the Institute of Science and Engineering, a program to provide funds to stimulate research in the past three years; the Library Building Fund, which will contribute \$250,000 "to supplement state funds in meeting the total cost of the Texas Tech Library"; and gifts and grants for scholarships totaling \$66,215 so far this year.

In his welcoming address, Dr. W. M. Pearce, Tech's academic vice president, reported that Dr. R. C. Goodwin, president of Texas Tech, is "out of the hospital and moving around. We hope that he will be back within the next four weeks."

Dr. Pearce expressed the administration's gratitude for the "interest, time and energy" which the Board members give to "make Texas Tech a better institution."

M. L. Pennington, vice president and controller of Texas Tech and treasurer of the Board, reported on Tech's budget and bills passed this year by the legislature concerning higher education.

Pennington said that this year's appropriation for Tech is the "best ever," but added that "we will have quite a problem next biennium when the University of Houston becomes a state-supported school." The legislature will have to appropriate from \$20 to \$22 million for this university in addition to any increases in the budgets of the other state schools.

In a comparison of the past few school years, Pennington said that faculty members have commented that last year's students were "more serious and did better academic work than ever before."

Butterfield reviewed the four major projects of the Foundation, commenting on each. He added that Tech's need for more funds for research is "obvious" since the state has given \$122,242 for all research at the college this year in comparison to the more than \$800,000 which the University of Texas receives.

"This is the penalty paid by a young college," Butterfield said. "Tech has grown so rapidly, and one of the last things to catch up will be state support for research."

Speaking on the quality of the student body and the courses taught at Tech, Dr. Floyd D. Boze, dean of admissions and registrar, said, "In order for Texas Tech to compete with other colleges, we have to have something they don't have or things which are just as good. A student won't go to a college unless he feels that it is academically sound."

Dr. Boze reported that Tech has several programs for improving the academic level of the college. All "sub-standard and remedial" courses have been done away with, an extensive program of tests for freshmen is carried on before registration and an honors program has been initiated which either gives an outstanding student credit for work done in high school or places him in a special section of the course in which he is proficient.

Young GOP's Pike Initiates Men Sunday Pick Leaders For '61-'62

The Young Republicans elected Kip Glasscock, Lubbock junior, to lead the club's activities for this year at a meeting last Wednesday.

Other officers chosen were Mike Pollard, Abilene sophomore, vice president; Joy Hamilton, Lubbock freshman, corresponding secretary; and Carole Warner, Lubbock freshman, secretary.

Activities planned for the year include an exhibition debate and several speeches in conjunction with the Lubbock County Republicans.

According to Glasscock, the purpose of the club is to provide a "good conservative organization for the conservatives and Republicans on the Tech campus."

Formal initiation for 12 pledges to Pi Kappa Alpha fraternity took place Sunday. New initiates are as follows: Bud Averett, Robert Browning, Horace Duncan, Jimmy Goddard, Gary Harrell, Jay Henderson, Mose Lindsay, Edwin Meyer, Bill Rachel, Bobby Stanton and Alan Sumner.

A picnic at Johnson's Ranch Sunday afternoon honored the new initiates.

Other Pike activities for last weekend included an open house before the football game and an after-game dance in the lodge.

PO 2-4600

Raider Round-up

PHI GAMMA NU

Phi Gamma Nu, honorary business sorority, will have a coke party at 5 p.m. today in the Anniversary Room of the Tech Union. The event is open to all interested girls who have a 1.5 grade average.

SPEECH TOURNAMENT

Texas Tech will have its annual speech tournament on Oct. 27 and 28. The Tech debaters will enter their first intercollegiate tournament in Edmon, Oklahoma, on Nov. 10 and 11.

AMERICAN CHEMICAL SOCIETY

Students interested in chemistry are invited to attend a meeting of the American Chemical Society at 7:30 tonight in the tower room of the Chemistry Bldg.

ACCOUNTING SOCIETY

James Teague, C.P.A. of Lubbock, will talk on careers in public accounting tonight at the meeting of the Accounting Society.

JOINT MEETING SET

There will be a joint meeting of Capa y Espada and Sigma Delta Pi at 7:15 p.m. today in the workroom of the Tech Union. A panel of South American foreign students will present the program. All interested students are invited to attend.

AMERICAN INSTITUTE OF ARCHITECTS

The American Institute of Architects will meet at 7:45 p.m. today in the Architecture Bldg. The program will be on "Architects in Training."

SPEECH PICNIC

Texas Tech's speech department will sponsor a picnic from 5 to 6:30 p.m. Thursday in the Theatre Work Shop. All students are invited to attend. The cost will be 75 cents per person. Those planning to attend should sign up in the office of the speech department by 5 p.m. Wednesday.

FRESHMAN COUNCIL

All members are to attend the first meeting of the Freshman Council set for 6:30 p.m. Wednesday in Rm. 264 of the Ad Bldg.

FOREIGN STUDENTS RECEPTION

The International Interest Committee will give a reception welcoming all foreign students at 7 p.m. Tuesday in the Union ballroom lounge. The theme will be American with the traditional hamburgers, potato chips and cokes being served. Music will fea-

ture Mitch Miller's album, "Sing Along." The mixer is open to all interested Tech students as well as foreign students.

SIGMA TAU DELTA

Sigma Tau Delta, honorary English fraternity, will meet at 7 p.m. Thursday in the Tech Union.

Ronald Schulz of the Tech speech department will speak on "Production of Dramatic Masterpieces."

TOWN GIRLS

Town Girls will meet Wednesday at noon in the Tech Union. Mrs. Rose Holub will be guest speaker. All those planning to attend must sign the list in the Union by 10 a.m. Wednesday.

RODEO ASSN.

A Rodeo Assn. banquet for members and their dates will be given at 6 p.m. Wednesday in the Tech Union Ballroom. Tickets, which are \$1.50 per person, will be available at the Union until noon Wednesday.

Hostess Signups Are Due Friday

Applications for President's Hostesses are due in the Dean of Women's office before 5 p.m. Friday.

Thirty-two girls represent Tech as official hostesses for President R. C. Goodwin and the administration. Girls applying for membership must be sophomores, juniors or seniors who have been at Tech for at least one year. A 1.00 grade average is required for all applicants.

ASME Elects Officers

The Tech Chapter of the American Society of Military Engineers elected officers for 1961-62 at its organizational meeting.

Bill Mills was elected president. Other officers are Travis Langford, vice president; Hugh Scott, secretary; Ned Burleson, treasurer; and Don Stacy, master-at-arms.

Capt. F. M. Pender was unanimously elected faculty sponsor. On the program committee will be James Langford and Jerry Knoll.

The non-profit organization composed of engineering students and ROTC cadets stresses better co-

operation and coordination between the military service and civilian engineers in order to increase the engineer potential of the United States for national security.

The Tech chapter, which holds a formal meeting on the fourth Wednesday and an informal meeting on the second Wednesday of each month, plans various excursions, projects and programs to insure a year of activity.

All persons interested in the Society are invited to attend the Oct. 25 meeting which will be held at 7:30 p.m. in the Army ROTC projection room.

EXCITING

The element of unknown in oil and gas production becomes less critical when measured against the reliability of Dowell service. Through research and field development, Dowell makes the fracturing and acidizing of oil and gas wells a more exacting science. Still there remains the air of excitement that will always be a part of oil recovery.

As an industry leader, Dowell must rely on the best from every man in the organization. To the man who excels in his field, Dowell has a great deal to offer. As a *mechanical engineer*, in equipment design. As a *petroleum engineer*, in well servicing techniques. As a *chemist*, in research and product development. As an *accountant or management man*, in corporate control. As a *sales representative*, in emphasizing to industry that the Dowell technique is best.

The challenge Dowell offers can provide an exciting future. For full information, write Employment Manager, Dowell, 1579 East 21, Tulsa 14, Oklahoma. Or, contact your school Placement Officer.

News and Views

Questions on the subject of changing the name of this college have been posed to me lately, and I imagine that they will increase in popularity as the year progresses. In the four areas concerned—students, ex-students, faculty and administration—it has been my observation that more than a majority in each of these fields favor a name change. I will personally have to disagree with anyone who doesn't—especially where the words "college" and "university" are concerned. There is no "tradition" attached to the word "college." Tech has reached university status; there is no reason why we should not advertise this fact.

The real problem, of course, lies not with the words "university" and "college", but with a total name that would prove satisfactory to everyone connected with it. Last year's Toreador staff submitted "Texas State U.", the Alumni Association suggested "Texas Tech U.", the faculty came up with "Texas University of Arts, Sciences and Technology". I am wholeheartedly against the latter, although I do believe that, if anyone, the faculty should have a strong say as to what the name should be. These people will be more associated and influenced for a longer time than any other group concerned except possibly the administration who, as I see it, rightly feel that it is out of their line to imitate any action on this program.

At the present, the faculty and ex-students of the several conferences on the subject have formed a joint committee in an attempt to solve their differences. Since the Texas Legislature does not meet until next year, there should be enough time for them to accomplish this. I certainly hope that it can be done before the close of this school year—allowing the following summer and part of the next fall term for lobbying and various other political maneuvers, which I know nothing about but understand they are necessary to get anything through our state government.

The time will come when the student opinion must be expressed. The Student Council is the logical body to do this, being the only one made up of elected representatives from the student body. In the past, on issues involving the entire school, expression of opinion on the particular question was voiced by a school-wide vote, such as the latest one on the Constitution. Due to the apparent apathy of Tech students on questions of this nature (observation during the past three years)—in the past election 1,000 votes or 10% of the student body could have ratified the new constitution.

I would not feel responsible to make the Council follow the direction of such a small percent of the student body in deciding upon a "student" choice for the name change. In other words, unless 75 or 80 percent of the student body voted on the question, the Council could choose any name they wished, as far as I am concerned, without a second thought to preference expressed in such an election.

Theoretically, the Council should be able to do this anyway, since you elected them and know what they think. Practically though, I realize that it doesn't work this way. However, I also realize that 10% of the student body doesn't always express the majority opinion.

Letters must be signed, but may be published without signatures in justifiable instances. The views of the TOREADOR are in no way to be construed as necessarily those of the administration.

Entered as second class matter at the Post Office in Lubbock, Texas, under the act of March 3, 1879.

The TOREADOR, official student newspaper of Texas Technological College, Lubbock, Texas, is regularly published each Tuesday, Thursday and Saturday

IT'S A HARD LIFE!

...Apathy?

A good majority of Texas Tech's student body is APATHETIC.

What else can be concluded when only 1,977 students vote in an election to:

1. Ratify or reject a new student constitution which will heavily influence all student activities on the campus.
2. Choose class officers on all levels.
3. Name student council representatives from three schools.
4. Elect freshman council officers.

This general "don't-give-a-damn" attitude blankets, in light of the election, over 8,000 Tech students.

What does this mean?

In an institution whose prime objective is to teach students how to think and to reason rationally, "young citizens of tomorrow" who will be making and shaping the destiny of our country are too busy socially or too lazy intellectually to express an opinion.

This lackadaisical atmosphere, while it may not be of great concern now, could easily create a crevice of apathy from which it will be hard to climb.

But when it comes to complaining or griping, these do-nothings at the polls seem to have the loudest voice.

Students may ask, "what can I, as an individual, do with my ideas?"

All that Karl Marx had in the beginning was an idea—one that has enslaved millions of people and threatens our American way of life.

Never underestimate what one man, one idea, or one vote can do.

—RALPH W. CARPENTER, JOHN PETTY

The "Hard Green" Man

Saturday Is Dad's Day

Dad's Day is coming up at Texas Tech Saturday. This is the day set aside to honor the men who furnish the "hard green" that enables most of us to attend college.

The Toreador hopes that every student on the campus will go out of their way to make the visiting dads welcome. Let's show them we appreciate the many good things they do for us.

If you haven't invited your dad yet, why not do so now? Let's have a great Dad's Day.

—Editor

Toreador Mail Call...

Editor:

The security patrol is always on the job to give any student a ticket for parking in the wrong place at the wrong time. This happens if the poor fellow did happen to pay \$10 (small sum to most students?) for a parking place and didn't arrive at 7:20 to find a parking place for his car so he could go to his 11 o'clock class. The security patrol having shown how industrious it is in this matter, could now perhaps show its efficiency in another field.

The road which goes from 6th street to the parking lots behind West Engineering and the library is a two lane road, period. It is a physical impossibility to have more lanes. No parking signs are scattered every few yards along the west side of this road, and yet every time our athletes practice or move on the field by this

road, it is lined with parked cars, usually with people in them, watching the athletes. This also happens except to a higher degree, when high schools use the field for meets.

Perhaps the security patrol could patrol this area and use such measures as (1) telling people to move, (2) giving tickets, and (3) towing cars away. Then perhaps one of the biggest, most annoying, and most useless messes on the Tech campus might be cleared up. Since no one has paid anything for these parking places, it seems that the patrol would be even more in their proper place to correct this situation. It would be awfully nice not to have to go through another year of frustration with this traffic mess.

Yours truly,
 Janie Ford

THOUGHT FOR TODAY — All political parties die at last of scavenging their own lies. —J.A.

General Osborne Visits Tech Army ROTC Unit

Deputy Commanding General of the Fourth US Army, Major General Ralph M. Osborne, will visit Tech's Army ROTC unit Wednesday.

General Osborne will arrive here at noon after visiting ROTC units at New Mexico University, Las Cruces and New Mexico Military Institute, Roswell.

According to Col. William M. Brown, Tech professor of military science, General Osborne will lunch with Dr. W. M. Pearce and

other Tech officials, inspect the Tyrian Rifles honor guard, visit military science classes and talk with senior cadet officers.

General Osborne holds a Bachelor of Science degree in mechanical engineering from Massachusetts Institute of Technology and is a graduate of the Ordnance School, Watertown Arsenal, Mass., the Air Artillery School, Fort Sill Okla., the Command and General Staff College, Fort Leavenworth, Kansas and the National War College, Washington, D.C.

His early tours of duty include service with the 1st Field Artillery Brigade in Maryland, the 11th Field Artillery Regiment in Hawaii and as an instructor with the Field Artillery School.

In July 1952, General Osborne served as artillery commander for the Third Infantry Division in Korea and later as the Army member of the UN Armistice Delegation.

After assignments in state-side Army commands, he went to Germany in 1958 for duty with NATO and in December 1959 became U.S. commander in Berlin.

He was promoted to brigadier general in July 1952 and to major general in December 1955. His decorations and awards include the Legion of Merit with two Oak Leaf Clusters and the Bronze Star. General Osborne was assigned Fourth Army deputy commander last June.

MAJ. GEN. OSBORNE

Institute Expects Crowd At Sessions

Approximately 150 persons are expected to attend a three-day tax institute Oct. 23-25 on the Tech campus.

Accountants and lawyers from Texas and New Mexico will speak on different phases of tax planning and taxation.

Four sessions will be conducted daily, each beginning at 10 a.m. in the Tech Union.

Union Begins Polling Interest In Ballroom Dancing Classes

The Tech Union today began a poll to determine whether student interest merits the formation of ballroom dancing classes.

Poll-forms are available at the concession stand, according to Karen Moore, program director.

If sufficient interest is shown, week-night classes will meet from 6:15 to 8:30—with a 15-minute

break between hours—five weeks for a total of 10 hours of instruction.

Both male and female instructors, professionally trained and experienced, will conduct all classes. Enrollment will be limited to assure each student individual attention.

Further information is available on the poll-form.

Tech Civil Engineers Receive Award For 'Best In Texas'

The "Best in Texas" award was won Saturday by the Tech Student chapter of the American Society of Civil Engineers for the third consecutive year.

The award was established three years ago and of the seven student chapters in Texas, the J. A. Murchough Student Chapter of Tech is the only chapter that has received the award.

Dr. W. M. Pearce, academic vice president, told the officers of the chapter "We all make a bit of history each day by our activities; and that made by the student chapter of the American Society of Civil Engineers is a source of pride to Tech."

The winning chapter receives a framed certificate and a plaque which is kept for the duration of the year.

The award is based on an overall evaluation of the activities of the chapter during the year including meetings addressed by practicing engineers, field trips to construction projects, presentation of technical papers at engineering meetings in Texas and New Mexico, preparation of an annual report and participation in the engineers show.

George A. Whetstone, advisor of the chapter, emphasized the importance of the activities which have led to repeated awards.

"They are direct preparation for the leadership on a wider scale which these men will be providing in a very few years. The award certainly brings the school to the attention of practicing engineers who attended the award ceremony in Austin," Whetstone said.

Straight Poop Etiquette Ain't What Some Think It Is

By CLAY NUNNALLY
Toreador Staff Writer

Approximately two weeks ago I did an article on the Push. (Library of Congress No. 5739763-1/2) I am happy to report that it met with overwhelming indifference.

Therefore, in response to absolutely no requests, I have been assigned to do a series of articles on college etiquette.

However, O Student, think not that this decision was arrived at without due deliberation and soul-searching thought. Perish the thought! In fact, the Toreador's star reporter Ellard Velpau Smurd (known affectionately in the Journalism Dept. as "Brand X") was sent out to take a survey on the advisability of such a series.

"Would you like to read a tremendously witty and mirth-filled series on college etiquette by clever Clay Nunnally?" was his question. And in ninety-nine

cases out of a hundred the answer was unhesitatingly, "Who's Clay Nunnally?" (These people are undoubtedly subversives and planted on the campus to undermine American youth. Watch out for them!)

But, I am happy to report, that when Ellard asked one average Techman this impartial question, the answer was, "Zounds, varlet! Methinks I wouldst indeed!" Unfortunately, however, before this interview could be pursued, the fellow unaccountably sprang upon Ellard with his broadsword, causing superficial lacerations about his wisdom teeth.

None the less, this answer was enough to spur me on to mediocrity. So, beginning this week, there will be helpful hints for all those in need of helpful hints.

While in college, there will be countless times when you will wish to take your girl to a fashionable restaurant for dinner. Therefore it is advisable—nay, essential—that you possess some of the rules of dining etiquette.

Here are some fundamentals which will guarantee success.

As you approach the table she will undoubtedly choose a chair and stand beside it. This, of course, means that she is well-bred and is waiting for you to sit first. So do it!

Probably the table will already be set. This usually includes napkin, silverware, water glasses and some decorative arrangement. Now the rule book says never touch the silver until the meal is served and this is true in most cases. But if you are fastidious and the utensils look a trifle dirty, feel free to pick up each piece, breath heavily on it, then rub it gingerly with your napkin. If it still looks dirty, wipe it with your shirt tail. Then if it still looks dirty, change with some

other table, or if there are no vacant tables, with your date.

If the place is crowded, it is possible that the waitress will overlook your presence. To get her attention is a ticklish situation calling for a great deal of aplomb and suavity. I suggest you use such diplomatic phrases as, "Hey you!" or "How 'bout a little service heah!" If, by chance, this fails to get her attention, beat maniacally upon the table with your fists. (If you are in an Italian restaurant, hurl breadsticks at her feet.)

Many times your girl will ask you to order for her, so here, at all costs, you must make a good showing. Study the menu carefully. (making price notations upon the tablecloth with your fountain pen). Then, in a sophisticated voice, order in the following manner, "We would like, hot from the grill, two eight ounce charcoal broiled U. S. Government Inspected Grade A steaks, served with a tossed salad, our choice of dressing, hot rolls and butter and a dessert. The price of which is two dollars and ninety-five cents apiece." Then, for the "coup de grace," add, "And we would like two glasses of ice tea which is ten cents extra." (If, at this point, your girl falls to the ground in uncontrollable admiration, pick her up gently with soothing cries of, "Now, Now.")

When the food is brought, it is quite in order to rub your hands together and to grunt excitedly. Naturally, I need not remind you to eat the meal with the left arm slung casually upon the table for balance.

When you have finished, drop a few slugs on the table for a tip (or an I.O.U.) and then go the cashier and pay the check. Be sure, though, to find out exactly how much her meal cost so that at the end of the month, when you send her a statement, there will be no embarrassing misunderstanding. Simple, is it not?

AFROTC Seniors Make Solo Flights

Three Tech seniors began solo flights in the Air Force ROTC Flying Instruction Program.

Making their first solo flights were T. L. Laney from Muleshoe, Oct. 8, eight and one-half hours; Jackie Wiles from Levelland, Oct. 6, nine hours and ten minutes; and Jerry Williams from Stamford, Oct. 8, nine hours.

They made flights in a Cessna 150.

Council Announces Poster Removal

Student election campaign posters must be removed from walls by Thursday, the Student Council announced Monday.

The removal rule, a standard for all campaigns, was deleted by mistake from this year's election regulations.

King, Raiders Feel Bad Over Loss

By CHARLES RICHARDS
Toreador Sports Editor

"We got whipped real bad." Those words summed up the feelings of J T King in the Texas Tech dressing room following Saturday night's 38-7 loss to Texas A&M.

"We just couldn't get anything moving," said King. "When we did something would happen."

It was a disappointing showing for the Red Raiders. Most of the players thought they played better against Texas last week than against the Aggies. Against the

Longhorns, Tech gave a good account of itself in the last half, but against A&M, the Raiders simply couldn't keep any kind of threat going.

"I don't know what it was," Tech quarterback Doug Cannon said. "We could run anything we wanted to; we didn't have any trouble at all moving the ball. It was just those little simple mistakes."

Penalties hurt Tech too. Red Raider violations kept A&M's first two touchdown drives alive, after the Tech defense had held.

On the other hand, the Aggies were not hurt by their penalties. A&M had 24 points on the scoreboard before it got its first penalty.

Tech was not able to pass as much as it wanted. Much of the game the Raiders didn't have the field position to throw. It was early in the fourth period before Tech completed its first pass.

"I don't think they have the nation's fifth best pass defense," Cannon said. "They're just not that good."

The sophomore quarterback continued, "They were putting on a pretty good rush—tougher than Texas—but it was the play of the ends and linebackers that hurt us. The ends were dropping back to cover on our flat passes and stopping those."

Tech players were hesitant to name any one standout for the

Aggies, but those giving opinions favored Jim Linnstaedter.

"They were a pretty good ball club as a whole," fullback Coolidge Hunt replied. "It's hard to single out anybody, but Linnstaedter looked pretty good, and those guards were tough."

"I don't believe I could name any one player," Cannon offered, "unless it was Linnstaedter. He got them out of trouble in key situations. We'd get them in a hole, and they'd break Linnstaedter."

Although the Aggies' 31-point margin over the Raiders was more than the Longhorn's edge—Texas beat Tech 42-14—no one was suggesting that A&M was better than Texas.

Too, the team effort was greater against Texas. The tackle play was impressive against A&M, but other positions suffered a drop

from sharp play against Texas and Mississippi State.

But the attitude of the players after the game indicated the Raiders are not dead yet.

"We wanted this one real bad. We really did," quarterback Johnny Lovelace said. "We're going to win one soon, I guarantee you."

Cincy Bows Again, 13-5, As Yanks Regain Title

CINCINNATI (AP)—The New York Yankees rocked the Cincinnati Reds Monday, 13-5, and won the 1961 World Series four games to one. It was the 19th world championship for the Yankees.

It was one of the most one-sided games in World Series history. As the Yankees blasted Joey Jay, the Reds starting hurler, out of the box in the first inning. Seven more Cincinnati pitchers trudged to the mound, making a series of eight for one team. On Oct. 5, 1956, the Yankees themselves used seven against the Dodgers.

John Blanchard, playing right field, homered for New York in the first inning with one on, and Hector Lopez walloped one out of the park for the Yankees with two aboard in the fourth. Lopez batted in five runs, one on a triple in the big first frame. Blanchard also hit a double and went 3-for-3, driving in two runs. Bill Skowron had two singles, and drove in three Yankee runs.

The Cincinnati Reds scored three in the third, and halved the Yankee lead, when Frank Robin-

son hit a home run with two on. After New York came up with five more tallies in the fourth and led 11-3, the Reds scored two in the bottom of the fifth as Wally Post homered with one on.

Jim Maloney, Ken Johnson, Bill Henry, Sherman Jones, Bob Purkey, Jim Brosnan and Ken Hunt followed Jay to the Cincinnati mound. Jay, who won the second and only Cincinnati game Thursday, 6-2, was the loser.

Bud Daley, who relieved Terry in the third inning, was the winning pitcher.

The Reds, who beat the Chicago White Sox in the 1919 series and Detroit in 1940, now have lost two of the fall classics—both to the Yankees. New York won the 1939 series from the Reds in four straight.

Three-quarter length, heavier brown, fine quality Mouton coat. Size 12-14 for sale — practically new. PO 2-7235.

Room-board. Private home — meals arranged. Twin beds. Near Tech and town. 211 Male, PO 5-2866.

Need small two bedroom kitchen, den combination house with built-in stove? 4603 30th St. SW 9-0271. \$80.00.

McNally Greets Large Squad

The largest swimming squad in the history of Texas Tech reported to Coach Jim McNally this week. The squad, 42 strong, attended workouts this week in preparation for the swimming meets ahead.

Returning lettermen are Jack Shipley, Glenn Shoup, Glenn Anderson, Gary Welch, Glaze Sacra, Rick Vawter, Jim Climer, Bret Bayne and Don Frank.

Last year's freshmen letter winners returning are Dick Haase, Cliff Shive, George Steele, Bill Spahn, Bob Smith, Dan Mabee, Karl Keith, Charles Bleil, Clark Edgecomb and Joe Cochran.

Twenty-three freshmen reporting were Ron Grim, Phil Simpkins, John Hunter, Terry Schmidt, Ed Sullivan, Lee Barnes, Bob Jewett, Lee Weatherly, Frosty Jones, Jim Ward, Tom Acord, Dennis Pilomette and Dixon Healy.

Also Bruce Bialock, Mike Horridge, Hugh McKnight, Don Kott, Roy Odum, Joe Gearheart, J. A. Jackson, Jim Johnson, Ken Weatherford and John King.

First meet of the year will pit the varsity against the freshmen on Dec. 1 in the Tech Natatorium.
