

Johnson due at meeting in Uruguay

PUNTA DEL ESTE, Uruguay (AP) —Latin-American chiefs began arriving for the hemisphere summit conference Monday under security arrangements that turned this South American sea resort into a virtual military fortress. President Johnson is due today.

URUGUAYAN WARSHIPS patrolled offshore. Anti-aircraft batteries nestled in strategic spots. Uruguayan soldiers and police guarded a three-square-mile security zone surrounding the chalet where Johnson will stay on the ocean-side. They patrolled on foot, horseback and in cars.

The conference, aimed at pumping new life into the Alliance for Progress and raising Latin American living standards, opens Wednesday in the gambling casino of the plush San Rafael hotel.

Secretary of State Dean Rusk, who arrived last week, and Latin American foreign ministers have been preparing the agenda for the summit meeting over the past few days.

DISCUSSIONS HAVE centered chiefly on increasing U.S. aid to Latin America, a Latin-American common market and the easing of restrictions on the flow of Latin-American goods into U.S. markets.

Latin Americans are asking the United States to permit them to purchase goods with U.S. aid money in countries other than the United States. One U.S. concession might be permission to use the money within a Latin-American common market.

In one security measure, U.S. officials asked that a huge wrought iron chandelier be removed from the ceiling over the circular conference table in the San Rafael Casino for fear that it might fall. Local authorities reluctantly complied.

A MARCH OF COMMUNIST youths to "repudiate" the summit conference in general and President Johnson in particular was continuing along its 70-mile route from Montevideo to Punta del Este. But 100 of the original 200 marchers have dropped out. The pace was being set by a sturdy young girl student striding along in a brightly colored shirt and dark slacks. The marchers have covered about 50 miles.

He preceded into Punta del Este by Prime Minister Eric E. Williams of Trinidad-Tobago, and Presidents Alfredo Stroessner of Paraguay, Jose Joaquin Trejos Fernandez of Costa Rica, Julio Cesar Mendez Montenegro of Guatemala and Joaquin Balaguer of the Dominican Republic.

THE OPENING SESSION Wednesday morning will be devoted to official greetings of the government chiefs and their delegations to President Oscar D. Gestido of Uruguay, the host. This will be followed by the first informal session, lunch and a second informal session in the afternoon.

His bill may move

Blanchard visits Tech board; medical bill debate postponed

State Sen. H. J. (Doc) Blanchard of Lubbock, in an informal appearance before the Tech Board of Directors Saturday told them he believes Gov. John Connally's tax program currently before the legislature is "in trouble."

BLANCHARD MADE THE RE-mark while discussing Senate recommendations for Tech appropriations for the 1968-69 biennium. He said \$28 million had been recommended, an increase of \$8 million over the last biennium. Tech had requested \$47.8 million.

"I'd like to see you get everything

Court to hear 'screening' suit

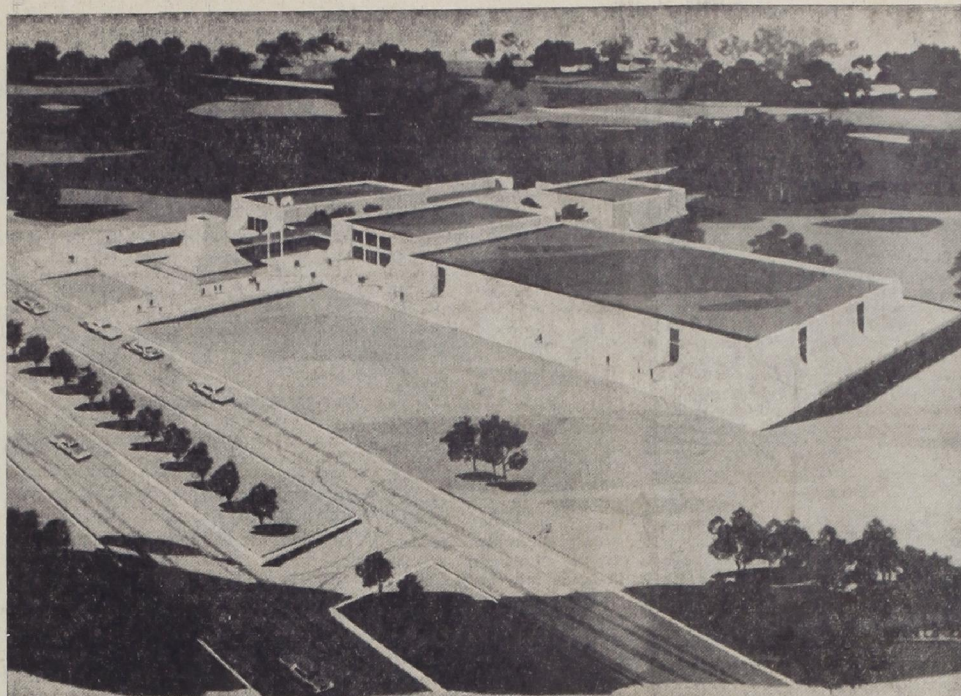

The Tech Supreme Court will hear arguments on a suit challenging the constitutionality of the cheerleader screening board tonight in the Ag Engineering Building.

THE INFORMAL HEARING WAS postponed due to the request of Robert Hoffman, counsel for the Tech Student Association, who said he needed time to prepare a defense.

The suit was filed by Randy Hilton, a campaign manager for a coed who made a recent unsuccessful bid for a cheerleader position.

Hilton said in a letter to Chief Justice Lonnie Dillard that a screening board for candidates should be authorized by a constitutional amendment, not a Senate bylaw.

THE HEARING AT 8 P.M. IS OPEN to the public.

WEST TEXAS MUSEUM COMPLEX—This is an architect's conception of the proposed \$6 million museum complex that received approval by the Tech Board of Directors

in their Saturday meeting. The museum will be built in a triangle formed by Indiana Ave., the Brownfield highway and 4th St.

Board approves Museum, sets up name committee

By DAVID SNYDER
Editor

The Texas Tech Board of Directors, meeting Saturday morning in a short but fast-moving session, voted to create a diversified committee to study the name-change question and report back to the board by the "latter part of May."

THE COMMITTEE, TO BE composed of representatives of the student body, faculty, ex-students and board, is expected to be announced either today or Wednesday by Board Chairman Roy Furr. He said the committee would be composed of either five or seven members.

In other action, the board approved the offering of a contract to an ousted government professor which could remove Tech from the American Association of University Professors "blacklist" and approved the exterior design concept for the \$3 million initial phase of the West Texas Museum.

The board also approved the design of a flag selected in a student body election Feb. 24 to become the "official flag" of the University.

DIRECTOR AL ALLISON OF Level-land pointed out that Tech "has not had a flag during the university's existence." He said Chi Rho fraternity had offered to pay for a flag pole in Memorial Circle for the new school flag. Chairman Furr described it as a "job very well done."

Director Herbert Allen of Houston, in proposing the name-change committee, said the issue had "rested awhile, and it might be appropriate to re-open it."

He said one of the main reasons for the name-change controversy of two years ago, in which no action was taken but emotion ran high, was that "everyone had their own committee." He said a combined committee to coordinate the study should alleviate this problem.

FOLLOWING THE MEETING Furr said the committee would be appointed with the intention of "covering all segments of college life."

He said that, in his opinion, public hearings on the question would be the proper approach to the issue, but that the "committee will be free to take whatever approach they feel is necessary." He said he hoped the committee would have its first meeting this week.

The museum complex, to be located within a triangle bounded by Indiana Avenue, Brownfield Highway and Fourth Street, will serve as the showcase for Tech's International Center for Arid and Semi-Arid Land Studies, in addition to reflecting area history.

THE COMPLEX WILL INCLUDE A central core unit, an agricultural-industrial gallery, a planetarium, sculpture court and art galleries. It will be financed through both public and private sources.

Also announced at the board meeting was the appointment of Loyd M. Lanotte, president and chief executive officer of T.I.M.E. Motor Freight, Inc., to spearhead a \$2 million fund-raising campaign for the museum. Currently serving as president of the Red Raider Club and vice president of the Chamber of Commerce, Lanotte will work with Dr. D. M. Wiggins and Harris F. Underwood, announced last week as co-chairmen of the museum's Development Council.

Exterior exhibits will include a West Texas ranch headquarters featuring types of buildings used by early settlers, a display of windmills from around the world, nomad house types and tracts featuring growing crops typical to arid and semi-arid regions of the world.

IN OTHER POINTS OF action, the board:

- Approved a request to ask for legislation to establish a 50-acre research park for organizations such as government agencies, industrial firms, foundations and associations.

- Passed a resolution endorsing pending state legislation to improve faculty fringe benefits in Texas' public colleges and universities.

No. 114

— Offers contract to ousted prof —

Tech board moves toward end AAUP 'blacklist'

Tech's Board of Directors moved Saturday toward removing itself from the "blacklist" of the American Association of University Professors by offering a contract to one of three professors ousted by the board almost ten years ago.

THE CURRENT BOARD voted unanimously to rehire Dr. Byron Abernethy as a full professor with tenure in the department of government beginning Sept. 1, subject to removal from the list of censure.

Board member C. A. (Buzz) Cash of Amarillo described the action as a "bitter pill to swallow," but moved adoption of the measure "if this will get the problem solved."

Board member Herbert Allen of Houston, who seconded the motion, added that "if this ammunition will serve to accomplish our purpose, let's do it."

DR. S. M. KENNEDY, vice president for academic affairs, is expected to take the proposal to the AAUP committee

on academic freedom and tenure at its April 25-26 meeting in Cleveland. The committee will make a recommendation to the entire association later in the week.

President Murray said following the board meeting that the action "permits us to go to the AAUP with our side of the bargain." He said this would not be contingent upon Abernethy's acceptance of the contract, but only upon it being offered.

ABERNETHY AND DR. HERBERT Greenberg were both ousted by the board after a four and one-half hour closed meeting on July 13, 1957. The job of Dr. Per Stensland, head of the department of adult education, was abolished at the same meeting.

The board gave no reasons for removal of the three and refused to grant them public hearings. The board was charged with being "politically motivated" in the incident, since all three were regarded as liberals and the board at that time was predominantly conservative in their political views.

Abernethy had made the keynote address at a gathering of liberal Democrats several months before his ouster, and was active in the previous state political campaign.

TECH OFFICIALS HAVE SAID THE censorship has hurt Tech in the recruitment of top faculty members and in securing federal and foundation grants.

Since time of the censure, Tech has adopted a tenure policy guaranteeing

Board to meet without talk of censor rule

The Lubbock Parks and Recreation Board, meeting tonight, apparently will not discuss rules governing the censorship of art objects.

THE CENSORSHIP RULES became a controversial subject when a piece of sculpture by a Tech student was removed from an Architecture and Allied Arts department display at the Lubbock Municipal Garden and Arts Center.

The exhibit was shown March 19-31, and the sculpture in question was later reinstated by the Parks and Recreation Board.

A. C. Hamilton, director of parks and recreation, said the discussion, though previously slated for tonight, was not put on the agenda because of more pending business.

"MY BOARD MEMBERS WERE mailed a list of rules," he said. "I do not anticipate any changes. For the moment, we're acting according to the old rules."

Nolan Barrick, head of Tech's Architecture and Allied Arts department, said Monday, "We're not concerned any further with the Parks and Recreation's business."

to faculty members that they cannot be fired without adequate cause which usually must be related to the classroom.

The board amended the policy Saturday to include a phrase which allows "full participation as citizens in the community." Other changes covered the reviewing of dismissals of faculty

Galbraith cites policy — no bombs, admit chinese

By KATIE O'NEILL
Editorial Assistant

Cessation of bombing in Viet Nam and possible admission of Red China to the United Nations are needed changes in American foreign policy said Dr. Kenneth Galbraith, Harvard economics professor, to an audience of approximately 1,500 in Lubbock Municipal Auditorium Saturday.

GALBRAITH, WHO WAS RECENT-ly elected national chairman of the Americans for Democratic Action and is a former ambassador to India, was eighth and last speaker in the Tech University Speaker Series.

He based his belief in the need of a cessation of bombing on the two facts that Ho Chi Minh has indicated that such a move might bring him to the conference table, and that Secretary of Defense Robert McNamara has said that the bombing has not accomplished its purpose, that of stopping Communist infiltration into South Vietnam.

Galbraith also said that a country under bombing attack develops a resistance to that kind of warfare, becoming defiant and determined to resist.

HE CALLED THE DECISION to bomb North Vietnam "a great political blunder," and said that sooner or later the United States would be forced to accept a settlement that would leave the Communists in control of a great part of North Vietnam.

A revamp of American foreign policy in the East is also in order, Galbraith said, and added that such a revision might include the admission of Red China to the United Nations.

The crumbling of the Communist mystique and, with it, the melting of the Cold War are changes in the world situation which American foreign policy has not been flexible enough to

accommodate, said Galbraith. He said that it is a basic tendency of bureaucracy to maintain the status quo, and that the foreign policy needed now is quite different from that of the Cold War.

CO-EXISTENCE IS THE CORE OF the policy needed now, Galbraith said, to deal with a "Communist bloc" which is now divided within itself by differences of opinion. The old idea of a unified conspiracy has been destroyed by recent strife between Russia and China, and the old policy of implacable hostility toward the Communist bloc has been outmoded.

"Stability in foreign policy is only

members and the time limits for the notification of dismissal.

THE RECOMMENDATION FOR offering the contract was made by Dr. Murray, speaking for Dr. Kennedy. Negotiations have reportedly been going on between Tech officials and AAUP officials in Washington, D.C. for the past several weeks.

Galbraith cites policy — no bombs, admit chinese

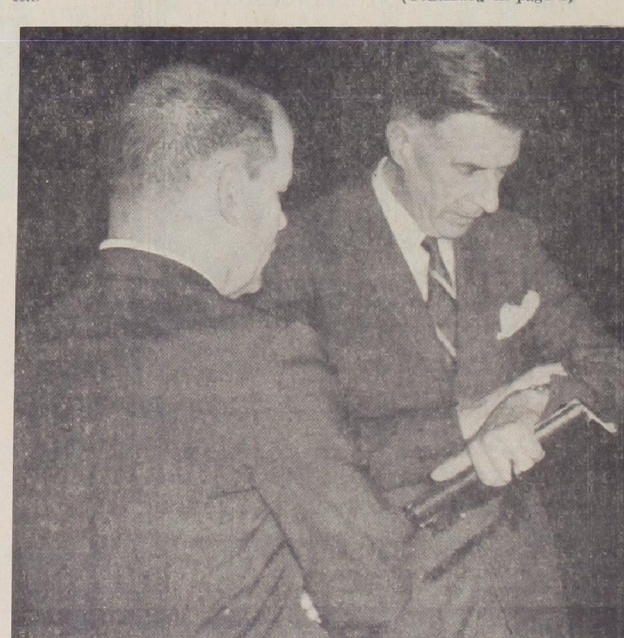

possible in a world which doesn't change," Galbraith said. "There is no reason for continuing the present U.S. policy except to maintain the status quo."

In referring to U.S. policy in Viet Nam, Galbraith said that country is paying the price for the United States' failure to adopt to reality.

"THE NATIONAL LIBERATION Front (Viet Cong) represents a strong similarity to the national thinking in parts of Vietnam. We must bring our Vietnam policy abreast of the current situation."

He said cessation of bombing should last "six months or so"—long enough for the "sincerity" of the move to go unquestioned. After that period, he said, negotiations would have to be renewed if negotiations had not begun.

"It's difficult to argue that the majority of people in the United States agree with the government's view," Galbraith said. "There's always been a certain contempt in the state department for American public opinion."

TIME CHECK—John Kenneth Galbraith checks the time Saturday before making his appearance as the last of this year's University Speakers Series guest lecturers. Galbraith spoke on changes he would like to see in American foreign policy.

First of series President's duties listed

EDITOR'S NOTE: The following article, first of a series of five, is published in cooperation with the Government Committee of the Student Senate, Dr. Bowen, chairman. They are intended to promote a better understanding of student government; other articles are written by remaining executive officers and the Chief Justice of the Supreme Court. All will be published before executive officer elections April 21.

By BILL BEUCK

various departments of the administration, the 170 university organizations, and the 14 faculty-student committees. Much of the President's time is spent in committee meetings and personal conferences.

The President is the official representative of the students and is called upon to greet visitors to our campus, speak to many various campus and community groups, act on seven faculty-student committees, and be the voice of the students in Southwest Conference affairs.

THERE ARE many problems involved in being President, because there is so much going on in campus affairs that it is almost impossible to keep up with the changes and new ideas. Also, there are times that the Executive and the Senate or the Supreme Court do not agree; so, it is the responsibility of the President to solve these problems.

I feel that the Executive Department needs to be expanded and improved by the addition of three people to aid in Student Affairs, Publicity, and Southwest Conference affairs. But I am also of the belief that the actions of the Senate, Supreme Court, and Executive this year have been in a good direction and that much has been accomplished.

'Egg throw' scheduled

Did you ever have the compulsion to throw an egg at someone in authority?

Tech students will have such an opportunity Wednesday at 6 p.m. in front of Sneed Hall.

SNEED HALL wing advisors will be the targets.

INTERVIEWS for:
Sales and Sales Management Training Program

This Program is designed to develop young college graduates for careers in life insurance sales and sales management. It provides an initial training period of 3 months (including 2 weeks at a Home Office School) before moving into full sales work.

Those trainees who are interested in and who are found qualified for management responsibility are assured of ample opportunity to move on to such work in either our field offices or in the Home Office after an initial period in sales.

Aggressive expansion plans provide unusual opportunities for those accepted.

X-RAY SERVICE — Dr. S. M. Kennedy, Tech vice president for academic affairs, registers for a chest X-ray at the Physical Plant Monday. The mobile unit of the West Texas Tuberculosis Association had X-rayed 1,000 persons late Monday as part of an eight-day campaign. It will remain on campus through Thursday. Kennedy was the first person X-rayed by the unit when it was placed in operation two years ago.

Board approves museum

(Continued from Page 1)
Authorized university Consulting Architect Howard Schmidt to coordinate the renovation of the snack bar in Tech Union and retained an interior designer and food consultant to work on the project.

Schmidt will also conduct a feasibility study concerning an addition to the building, the first step toward expansion.
Approved addition of the master of arts degree in journalism pending approval by the Coordinating Board, Texas College and University System.

Approved final plans for a \$4.6 million biology building and authorized advertising for bids to be considered at the June 3 meeting.

The faculty fringe-benefit legislation endorsed by the Board would establish an optional retirement or annuity program in lieu of the present retirement plan. Another measure calls for a constitutional amendment to remove the present \$8,400 ceiling on member contributions to the retirement system.

A third measure would authorize payment of appropriated funds for salaries for full-time faculty members for development, research or study leaves. The final bill would repeal statutes prohibiting the state from making financial contributions toward premiums on certain group insurance policies, including life and health insurance and disability coverage.
DR. MURRAY announced two grants to the university at the session. The American Association of Petroleum Geologists has awarded a \$11,500 grant to Tech Evaporite Institute, a division of ICASALS, Murray said.

The Robert A. Welch Foundation has awarded Tech \$139,350 in grants for chemistry research covering 10 research projects. Several years ago the Welch Foundation awarded the chemistry department a \$1 million research grant, largest in the history of the university.

ROTC frat pledges — An editorial — get early workout Complimentary words

By KAREN PORTER
Staff Writer

Sixteen new fraternity pledges are marching, running, jumping and drilling on the Tech campus this week. Dressed in green, they wear the conventional "duck bill" caps, and worry about looking "militarily slick" every day at 5:30 a.m.

They are the spring pledge class of Scabbard and Blade, national honorary military fraternity for college ROTC programs. They are working under a vigorous physical program, and learning the contents of a training manual for initiation into the society.

LOU BARBOUR, San Antonio junior and public information officer for the pledge class, describes Scabbard and Blade as a group furthering advanced ROTC studies in the U.S. military program.

"This spring the group was able to select 20 juniors and five seniors for pledge rushing," Barbour said. "During tapping out ceremonies, 16 cadets were chosen to undergo the two-week pledgeship."
"Last week we were concerned with getting to know our pledge brothers and learn-

ing the information in the manual," Barbour explained. "All of the men are enthusiastic, and there is a friendly atmosphere between actives and pledges when we're not at our early morning military formations. Then it is strictly business."

AT 5:30 EACH morning this week the pledges "fell in" into a five-man, three-line platoon. After undergoing inspection by the actives for polished boots and pressed uniforms, they launched into close-order drill, more than 60 push-ups and other exercises.

Scabbard and Blade primarily consists of Army members, although men in the Air Force and Navy programs may be asked to join. The society is a special one for the military which meets twice a month to plan various functions and discuss military science policy.

PLEDGE WEEK will end with a dinner at the Officers' Club at Reese AFB Friday night when the new members of Scabbard and Blade will relax from the week of early-risings and exercise and visit with their new friends and actives.

Saturday's Board of Directors session was a productive one, bringing to light two issues which for the most part have been guarded in silence for the past two years. We refer to the name-change and the AAUP (American Association of University Professors) censorship.

The Board moved to appoint a joint committee to begin work on the name-change question, indicating that it still hopes to recommend a change to the legislature during this session. The Board indicated it feels the appropriation bill is now the most important one before the legislature as far as Tech is concerned, so it could well wait until after approval of that bill to present its name-change recommendation.

A five-to-seven person coordinating committee composed of students, faculty, ex-students and Board members is a good approach to the potentially-hot issue, if it functions as is presently envisioned. Board members believe one centralized committee will create much less friction than the several committees that appeared two years ago, and that its members can work harmoniously together. We hope this is true, and that it is not an overly-idealistic approach.

The Board also unanimously approved the proffering of a contract to Dr. Byron Abernethy, one of three professors fired by the Board amid charges of "political motivations" nearly 10 years ago. One Board member described the action as a "bitter pill to swallow," but that it was "necessary." This attitude is markedly different from that of the Board in past years, and is to be commended. The action should go a long way, and possibly even could be the final move, toward removal of the censorship.

We hope the Board and administration will continue to make known its progress in both matters, and especially that the activities of the name-change committee will be open to the public. Meanwhile, a complimentary word is in order for Saturday's session.

Job interviews are set

Job interviews will be granted to students today as representatives from 25 companies meet on campus for Delta Sigma Pi's "Careers Conference."

The conference will begin at 10 a.m. when Lubbock Mayor W. D. Rogers Jr. speaks at a luncheon in the Tech Union Ballroom. Tickets for \$1.50 are on sale in the Union.

The luncheon will be followed by personal interviews in the Ballroom. The interviews will last from 1-5 p.m.

Bill Maupin, Delta Sigma Pi public relations chairman, said any student may talk to a company representative concerning job opportunities. He said most of the representatives are from companies in the Southwest.

"We have tried to get companies offering job opportunities in most fields," he said.

MA degree approved

Tech's Board of Directors Saturday approved establishment of a master of arts degree in journalism, pending approval of the action by the Coordinating Board, Texas Colleges and University System.

The Board also announced the hiring of Dr. Charles L. Allen, director of the department of journalism at Oklahoma State University, effective Sept. 1.

ALLEN WILL handle the graduate phase of Tech's journalism program. He has taught and held administrative positions at Northwestern, Rutgers, University of Illinois, and University of North Dakota.

The new Tech professor has had wide professional experience in positions ranging from publisher to printer on numerous publications. He has written 12 books and has contributed to Editor and

CHARLES L. ALLEN
Publisher, The Journalism Quarterly, National Publisher, Publisher's Auxiliary, and The Alpha Tau Omega Palm.

W. E. Garetz, journalism department head said, "Dr. Allen is a recognized authority in journalism education, and has had long and valuable experience in all aspects of the profession. We are delighted that he could join us."

University to establish campus research park

The Tech Board of Directors Saturday approved a recommendation by President Grover E. Murray which would establish a research park at the university.

The request will now be presented to the Texas Legislature, which must authorize the use of university property for the project. Tentative plans call for a 150-acre plot north of 4th Street and west of Quaker Avenue, adjacent to Loop 289.

MURRAY DESCRIBED a research park as a "gathering of research facilities of other separate organizations such as firms, government agencies, foundations and associations."

The benefits of the research park to the university and research unit are countless.

A research employe would be attracted to the facilities of the university research park and to those of the university, such as libraries, computers, and academic atmosphere.

THE RESEARCH employe

would also have the opportunity to associate with university faculty. Also, the university could provide adjunct professorships for research employes and thereby gain the services of noted specialists.

Through the research park, the university would receive many opportunities for part-time employment of graduate students.

Murray said Tech "already has the most costly ingredient of a research park, the land."

THE LAND would be divided into lots and leased to the research organization. Tech would retain the right of final approval of landscaping and building architecture.

The research organization would have the responsibility of building the structures, recruiting personnel, and providing the equipment, funds, and research projects.

Murray specified that the park would be limited to research work, barring manufacturing, social, political, religious, and fraternal uses.

MERIT AWARDS — M. L. Pennington, vice president for business affairs (right), presents D. I. Davis, custodian (left) and Dr. F. L. Mize, head of the management de-

Mize, Davis given certificates

Two Tech faculty members have been awarded certificates of merit for their "dedicated, honest, and faithful service," to the University.

DR. F. L. MIZE, head of the department of management, and D. I. Davis, assistant supervising custodian, were presented the awards by Marshall Pennington, vice president for business affairs, and Charles Libby, director of building operations at a small ceremony last week.

"Both of these men were

recognized for their work with the physical facilities, yet in different capacities," said Libby. "Davis retired last Friday, and Mize will retire next month. We wanted to honor these men before they left Tech."

DAVIS WAS ALSO presented with a gift and a check in recognition for his 11 years of service to Tech. He came to the college in 1957 and worked his way up to the staff position of second assistant supervising custodian.

"Davis checked the various buildings for need of repair and worked with the foremen in carrying out maintenance policy," Libby said. "He worked well in his position and added much to the physical facilities."

Mize, with 21 years of service, was singled out for his part in developing the management department as well as technical advice given to the plant facilities.

In 1950 Mize was instrumental in the creation of a management department separate from the then, department of economics and management.

"AT THAT TIME we had one instructor for the 42 majors. Today there are over 700 majors with 13 full-time and 14 teaching assistants planned for next fall," said Mize.

Over the years, he has received various certificates and awards from national organizations. Sigma Iota Epsilon honored him with a plaque for his contribution to the profession of management. This is the national honorary and professional management fraternity.

THE BUILDING OPERATIONS director, Libby, also recognized Mize for his advice and lectures given to the physical facilities. "The tapes of his lectures are still used for our management trainee and job arrangement," he said.

Both men plan to hang their foot-square, hand-lettered certificates in their homes and concentrate on the leisure time of retirement.

Animal husbandry department

Zinn named head

Dr. Dale W. Zinn has been named head of Tech's animal husbandry department, Dr. Gerald W. Thomas, dean of the School of Agriculture, announced Saturday.

Zinn has served as acting head of the department since June, 1966. His new appointment is effective June 1.

THE WEST VIRGINIA native holds two degrees from the University of West Virginia and has completed all requirements for the Ph.D. in animal husbandry at the University of Missouri.

"Dale is certainly one of the outstanding scientists in the meats industry," Thomas

said. "He has demonstrated his ability in teaching, research and administration. We feel fortunate in having him accept this important position because animal husbandry is one of our most important subject matter areas."

The university's animal husbandry department is the largest in the School of Agriculture and one of the larger departments in the nation. More than 320 undergraduates currently are enrolled at Tech.

Zinn, 37, is the author of more than 40 scientific and technical papers. He joined the Tech faculty in 1961 after serving as assistant professor of animal husbandry at New Mexico State University.

ZINN'S MEMBERSHIP in professional societies includes the American Meat Science Association, the American Society of Animal Science, the American Association for the Advancement of Science, the Society of Sigma Xi, American Institute of Biological Science, and the Southern Section of Food Technologists.

He is on the board of directors of the Lubbock Agricultural Club and St. John's Methodist Church.

AT TECH, he has coached the meats judging team and

Three Tech students to serve in missions

Three Tech students are among the 49 students from campuses all over the state selected for the 1967 Texas Baptist Student Summer Missions Program.

They are Ernie Cowger, Mike Watts, and Wanda Suchiu.

MISS SUCHIU, a Lubbock junior home economics major, will work on the Rio Grande Valley Project. Her work in the anti-poverty program will range from conducting Bible schools to holding health clinics in villages along the river.

Cowger, a senior sociology

major from Stamford, will work this summer with a team of young missionaries to establish Baptist Student Unions on campuses in Texas. Next year he will attend Frostberry College in Maryland on a \$2,000 fellowship grant and serve as the B.S.U. director there.

WATTS WILL WORK along with 11 other missionaries to build a church in a Wisconsin work camp. He is a junior from San Antonio.

The Summer Missions Program is financed entirely by student contributions. Twenty thousand dollars will be raised by the Texas Baptist students for this summer's program. The Tech Baptist students' goal is \$1,967.

The Texas student missionaries attended an orientation session this past weekend at Mt. Lebanon in Dallas.

THE PROGRAM is sending students to eight foreign countries and seven states this summer to work in vacation Bible schools, youth camps, retreats, work camps, and to do social work.

He is on the board of directors of the Lubbock Agricultural Club and St. John's Methodist Church.

AT TECH, he has coached the meats judging team and

DALE W. ZINN

has directed the meats industry program. He teaches grading and classification of meat animals and meat processing and merchandising.

Stage band places high

The Tech stage band placed high in the jazz competition at the Intermountain Jazz Festival in Salt Lake City during the weekend.

STAGE BAND director Joel Leach said although specific placings below the winner were not given, the Tech group easily placed in the top three.

The University of Nevada stage band won the competi-

tion and an all-expense paid trip to Miami Beach where it will compete in the national finals.

TECH was the only stage band chosen from Texas to attend the regional finals.

Tenor saxophonist Don Caldwell of the Tech band was mentioned as one of the outstanding soloists at the meet, in which seven bands participated.

130 attend retreat

Approximately 130 Tech student leaders left at noon Friday for the annual Board of Student Organizations (BSO) retreat at Bishop's Lodge in Santa Fe, N.M.

Dr. Joseph W. Hollis, a professor at Ball State University in Muncie, Ind., spoke at a Friday night banquet concerning leadership roles and the goals of group dynamics.

TECH STUDENTS spent the weekend in discussion groups, taking time off Saturday afternoon for a trip to Santa Fe. They returned to Tech Sunday at 9 a.m.

AWS President Genelyn Cannon said the discussion groups met informally and concentrated on getting to know each other.

"More emphasis was placed on having group leaders draw out others to talk than on the qualities of leadership as such," said Miss Cannon.

SUSAN CHILDS, San Antonio junior, said it wasn't until the retreat was over that she really understood all that Hollis had been trying to say.

Miss Childs said that they had all gone seeking specific answers to individual problems.

"But we didn't learn the specifics," she said. "We learned that we can get to know and understand ourselves only through a general yet thorough understanding of other people. That's the key to group dynamics."

IT LOOKS LIKE TROUBLE — Tom Sawyer (18) sees nothing but trouble ahead as a big defensive rush comes at him during the first scrimmage game of the Red Raiders spring training season. The Whites won the first game, dump-

ing the Reds 17-7. The Raiders will be in action again Saturday as the Reds and Whites will square off at 2 p.m. in Jones Stadium.

Tech baseballers hit a slump; drop three in a row to Lobos

By GARY TILORY
Sports Writer

ALBUQUERQUE — Possibly the only good thing the Texas Tech Red Raider baseball team got out of their 625 mile round trip this past weekend was some good Mexican food.

The Raiders ended their one game winning streak as they dropped three games to the University of New Mexico Lobos 5-3, 4-3, and 9-4.

THE RAIDERS now own a 4-13 record and have lost six of their last seven ball games. The Lobos are 16-10 and have won eight of their last nine games. The Lobos also hold a 9-3 series edge over the Raiders.

The Raiders had a chance to win the second game of a doubleheader Friday. Leading 2-1 going into the bottom of the sixth inning, a throwing error by shortstop John McIntyre allowed the Lobos to pick up three unearned runs

and steal the victory away from the Raiders.

ALL THINGS weren't on the dark side for the Raiders, Jim Montgomery had a solo homer in the third inning of the first game and a double in the second game. Also in the second game, McIntyre connected for a round tripper in the seventh inning, but the tally was one run short of tying the game.

In the third game Saturday, it was "bad day at black rock" as the Lobos pounded

out 11 hits, seven for extra bases. The Lobos got four triples, two in the first inning, and three doubles.

FOR THE RAIDERS, in the second game, Don Champion had a double and Ralph "small man" Cox hit a two-run homer in the eighth, pulling the Raiders to within two runs, 6-4, of the Lobos. But New Mexico added three more in the bottom half of the inning for the 9-4 margin of

victory. Not only did the Raiders lose the series but they lost the services of hard hitting left fielder Jerry Kolander. Kolander twisted his right knee in the first game Friday and will be out for one or two weeks.

IT WAS one of the Raider's more devastating weekend excursions as they collected only 18 hits while committing 11 errors.

SPORTS

Courtmen downed by Red Raider greenmen Bears, 4-2 host Longhorns today

The Baylor Bears made a clean sweep of the double's play to capture a 4-2 conference tennis win over the Tech Red Raiders Saturday.

The two teams had split 2-2 in the singles match play. But the Bears bounced back as Lloyd Carl and Bill Bane took Rudy Gutierrez and Mike Farris 6-8, 6-2, 8-6 to win the final doubles play.

IN THE singles match play, Mike Beene downed Carl 6-2, 6-4; Farris bested Bane 6-3, 6-4; John Phelps, Baylor, defeated Gutierrez 10-8, 3-6, 6-4; Chip Meyers, Baylor, whipped Pat Acton 3-6, 6-3, 8-6.

In the other doubles match, Phelps and Meyers defeated Beene and Murphy Yates 57, 6-4, 6-3.

THE LOSS gives the Raiders a 1-1 conference mark and a 6-6 for the season. The Bears stand 2-0 in conference play and 9-3 for the season.

The Raider's next match will be with Texas A&M here Saturday.

Hockey stars play tonight

Texas Tech's best will meet the Lubbock senior team in the intramural all-star ice hockey game today at 7:15 p.m. at Iceland Skating Rink.

Representing Tech's five intramural hockey teams will be: John Kiddler, Bill Wilson, Leo Lowery, Ray Carrell, John Morley, Steve Wells, Tim Veneciano, Mike Merrit, Don Shipman, Mike Glenn, Doug Foster, Dob Shepard and Mike Cavanaugh.

The Texas Tech golfers will be aiming to break the .500 mark today, but the going may be a little tough as they host the Southwest Conference favorite University of Texas at Austin in a dual conference match at Lubbock Country Club.

The Raiders are 1-1 in conference play, owning a 5-1 win over Rice and a 5½-½ loss to Texas A&M, for a 5½-6½ conference point total for the season.

Texas has won its only conference match of the young season, 3½-2½ over the University of Arkansas.

Coach Gene (Butch) Mitchell Jr. plans to use Robert McKinney, Jimmy Wilcoxson, Ronnie White and Jim Arnold in today's match with the Longhorns.

Coach George Hannons' Texas team is led by Mason Adkins, defending Southwest

Conference individual champion.

Last Spring, the 'Horns downed Tech 4½-1½ and finished third in the conference with 24-18 point record, just one away from champion Baylor.

The Raiders finished seventh in the conference play last season with 17½-24½.

Tee-off time for today's match is 10 a.m.

Raiders sign N.M. all-star

Mike Oaks, a 6-5 post man from Albuquerque Valley, New Mexico, was announced as Texas Tech's fourth basketball signee, by assistant Coach Charlie Lynch this past weekend.

Oaks was a two-time New Mexico all-stater and led his team to the runner-up spot in the state tournament. As a senior, he averaged 16 points per game.

STEAK FRY

The Catholic Student Center is sponsoring a steak fry Friday at Palo Duro Park. Tickets are \$1.25 per person, and transportation will leave the Catholic Student Center at 9 a.m., 10 a.m. and noon.

Yanks, Reds win openers

Bronx Bombers drop Washington by 6-0

WASHINGTON (AP) — The New York Yankees, showing signs of their famous past, exploded for seven runs in the third inning and right-hander Mel Stottlemyre pitched a two-hitter Monday as the Bronx Bombers crushed the Senators 8-0 in the 1967 American League opener before President Johnson.

Stottlemyre, a 20-game loser last year, allowed only an infield single by Cap Peterson before Fred Valentine led off the ninth with a ground single to right field.

BEFORE Valentine's hit, Stottlemyre also allowed only one ball out of the infield, a fly by Ken McMullen to Bill Robinson in right. The Yankee hurler struck out six and walked two.

The Yankees, who finished in the cellar last season, teed off early on Washington's starting pitcher, Pete Reichert, who was 14-15 during 1966.

TOM TRESH doubled down the third base line in the third and rookie Bill Robinson, acquired from Atlanta in a trade for Clete Boyer during the off-season, hit the first homer of the season some 380 feet into the left-center field Yankee bullpen.

Mickey Mantle, making his debut as a first baseman, singled to left, and Joe Pepitone, who exchanged places with Mantle in center, tripled to left field, scoring Mantle.

MANTLE, however, aggravated a leg muscle he injured March 22 and was taken out of the game.

Elston Howard scored Pepitone on a single to right, and Charlie Smith beat out a hit to third baseman McMullen.

AFTER Horace Clarke fled to center, John Kennedy, acquired from the Los Angeles Dodgers, doubled down the right field line, scoring Howard and Smith.

Stottlemyre singled off relief pitcher Darold Knowles to score Kennedy.

In the seventh inning, Elston Howard hit his first home run.

Philadelphia buys Francona

PHILADELPHIA (AP) — The Philadelphia Phillies without a regular first baseman since Bill White injured his foot during the winter, announced Monday that they have purchased first baseman Tito Francona from the St. Louis Cardinals.

The amount of money involved in the straight cash deal was not disclosed by the Phillies, who have been using former second baseman Tony Taylor at first base all spring.

Cincinnati Reds dump Dodgers on homeruns

CINCINNATI (AP) — Vada Pinson and Deron Johnson cracked first inning home runs and Dick Simpson followed with a pinch homer in the seventh to give the Cincinnati Reds a 6-1 victory over the Los Angeles Dodgers in the National League opener Monday.

Big Jim Maloney held the Dodgers to five hits over the first seven innings to earn the victory before a packed crowd of 28,422 in the traditional op-

ener at Crosley Field. After Maloney left for a pinch hitter, Ted Abernathy worked the last two innings.

PINSON and Johnson quickly jumped on Dodger starter Bob Miller for homers to give the Reds all they needed. Both blows ended up in the right-field bleachers.

Pinson picked on a 2-1 pitch, and one out later, Johnson blasted another Miller pitch into the stands. Miller, moved from the bullpen to take over the retired Sandy Koufax's spot in the starting rotation, gave up five home runs in all of 1966.

MILLER was taken out in the fifth inning for a pinch hitter, and his reliever, Ron Perronoski gave up the homer to Simpson in the seventh.

The Reds got to Miller for two more hits and another run in the second inning, with Maloney aiding his own cause. Catcher John Edwards singled, went to third on a single by Maloney and scored on Tommy Harper's fly ball to center.

Flag chasers play today

By ASSOCIATED PRESS

Baltimore and Pittsburgh start the job of living up to the pre-season pennant picks Tuesday as the big league teams complete their two-day opening program.

If the weatherman is kind from coast to coast, a total of about 245,000 will watch the Tuesday program of four day games and four night games.

HANK BAUER'S Orioles, who have been shouting, "We're No. 1" since they knocked off the Dodgers in four straight, will send Dave McNally, their World Series opener, against Jim Kaat, Minnesota's 25-game winner, in an afternoon game at Baltimore.

The Orioles have a set lineup, and the Twins' most important addition, pitcher Dean Chance, isn't slated to see action. About 40,000 are expected.

PITTSBURGH also will play

a day game in New York where the 1967 breed of Mets' fans are due to turn out 45,000 strong to see the latest addition of the marvelous ones.

Don Cardwell, an ex-Pirate who was critical of the management for not pitching him more often last year, gets a chance to get even. He will be opposed by Bob Veale, the Pirates' ace.

THE BUCS have a stand pat line-up plus Maury Wills, but the Mets will have rookie Don Bosch in center, ex-Card Jerry Buchek at second, Bud Harrelson at short, ex-Dodger Tommy Davis in left and outfielder Ron Swoboda on first.

The pitching battle of the opening schedule figures to be the night game at St. Louis where Juan Marichal, the San

Francisco Giants' 25-6 performer of last year, will take on Bob Gibson, who was 21-12 for the Cards.

THE CARDS will have Roger Maris in right field and Mike Shannon on third base in major moves. The Giants' only change will be Ken Henderson in right. About 35,000 fans will be on hand.
