

Freshmen oppose nonresident fee raise

By JAN HORN
Special Reporter

A bill to raise nonresident and foreign student tuition in state schools to a minimum of \$700 was approved by the Texas House and sent to the Senate Wednesday, according to UPI sources. The Freshman Council sponsored a petition urging the Texas State Legislature not to pass this proposed increase. Tables were set up in the University Center and in the dormitories. The present \$50 resident and \$200 nonresident fees were set by the legislature in 1957. The proposed bill would raise nonresident tuition 350 per cent.

THE FRESHMAN COUNCIL lists the following reasons for opposing this tuition increase:

1. Since many nonresident students will not be able to afford these increases, there will be a marked decrease in the university population of Texas.
2. Because of the decrease in college population, there will also be a decrease in income to the state. This deficit, however, will probably be balanced by raising other fees for resident students.
3. Local merchants and businessmen will suffer financially.
4. Since many nonresident students will not be able to return to Texas schools

due to the tuition increase, the universities and their surrounding communities will lose some of the cultural influences nonresident students bring with them.

Dr. Owen L. Caskey, associate vice president for academic affairs, said the tuition increase would not mean extra funds for the universities. "The money taken in from tuition and fees is subtracted from the appropriations. The state just makes up the difference between the amount of money taken in by the University and the amount of the appropriation."

Hollis Smith, comptroller, explained that if the tuition were raised, there would be more general revenue for other

state agencies. The demands of higher education would be less, and funds would be generated for other agencies such as welfare or highways.

"The question seems to be whether or not the taxpayers of Texas should educate nonresidents. This is a move to let the out-of-state student pay a more realistic cost," said Smith.

REP. HAROLD DAVIS, D-Austin, who introduced the measure, said it was necessary "to break even on instructional costs for those students who come from out of state".

More than 19,000 nonresident and foreign students who annually attend Texas colleges and universities, representing about seven per cent of the total student population, would be affected by the bill, according to UPI.

Robert Burnett, director of international student services, said, "If they are going to raise nonresident tuition, resident tuition should be raised proportionally. They would get a greater amount of revenue by raising resident tuition \$25 or \$30."

He said the university would run the

risk of stagnating the enrollment with only Texas students.

"You need an interchange of ideas among foreign, out-of-state and in-state students," said Burnett.

HE SAID THERE will probably be a drop in enrollment of international students in Texas if the measure passes. "If students had the choice of going to Tech or to Berkeley for the same price, they would probably choose Berkeley."

"Tuition is very low and could be raised," he said, "To raise it so abruptly, though, wouldn't be logical."

An amendment proposed by Rep. Tom Bass to except foreign students from the increase was tabled.

According to an AP story by Lee Jones, Rep. Jim Nugent, Kerrville, said, "How am I going to explain to my neighbors that we are giving the Russians a free education while charging this high tuition rate to students from our neighboring states."

A clause providing that "nonresident students who reside in states which charge fulltime Texas students more than \$700 per semester shall pay tuition

equal to the amount so charged" is included in the bill.

THEREFORE, IF a student comes from a state which charges Texas students \$750, he would have to pay \$750 to Texas universities.

According to a UPI story, Davis said the bill would raise an additional \$38 million for the state in the next biennium.

Non residents with more than 60 hours credit now attending a state institution would not be included in the increase.

According to the 1969 Texas College Coordinating Board figures, more than 19,000 nonresidents attend state junior and senior colleges, with New York students leading the way with 1,280.

Burnett said several foreign students would probably find it necessary to go to other schools if this bill passes.

Claire Coibon, wife of graduate student Jean Coibon, said the proposed increase was awful. "Jean must stay here to finish work on his master's. We both have assistantships, but if we had to pay everything, we couldn't stay here."

The Student Senate The Mind Of Tech

UD Photo by Mike Warden

Senate passes two resolutions; elects Hurst president pro tem

By JULIE McCABE
Special Reporter

The Student Senate passed a resolution Thursday night calling for each member of the Tech Board of Regents to be assigned a student aide to serve as a continuing direct contact between board members and students and to make known the students' view points.

The only other legislative action taken by the Senate was passage of a resolution condemning the proposed tuition increase for non residents.

The student aide resolution was authored and introduced by Rolf Wigand of the Graduate School. He explained that student representation on governing boards of colleges and universities is becoming a common practice throughout the Western world.

According to the resolution, the president of the Student Association would serve as aide to the chairman of the Board of Regents and the vice president as aide to the vice chairman of the Board.

The other seven aides would be appointed by the president of the Student Association with the advice and consent of the Senate from the Student Association business manager, student association secretary, supreme court justices or chairmen of the standing committees of the Student Senate.

By the resolution, the aids would serve as ad hoc members of the Board, attending all formal and informal meetings in a non-voting capacity. Provision was made, however, that the students would have a chance to be heard.

The resolution condemning the proposed increase in tuition rates for out-of-state students was authored by Senators Polly Kinnibrugh and Bill Scott.

It says the tuition increase would cause undue hardship to many students who, if the bill passes, will be forced to pay the higher rates or lose credits in transfer. It suggested the legislature could compensate for revenue due to this

action by corporate taxation, income or excise taxes or other methods more equitable than the proposed method.

The resolution charges that, "Legislature rationale for the passage of this bill is both naive and selfish." Senator Scott elaborated saying, "The primary consideration was to discourage outside agitators."

Senator Jim Crowder commented on some research he had done, showing that, "The majority of out-of-state students who graduate... stay in Texas and contribute to the economy."

Two amendments were added to the resolution, one noting that non resident students are economically beneficial because of the additional income they bring to Texas, and the other stating that the number of international students

may decrease significantly with the passage of the bill.

In other action taken by the Senate, Senator Rick Hurst was elected president pro tem, an office recently vacated by the resignation of Jim Boynton from the Senate. In a roll call vote, Hurst received 19 votes and Senator Dennis Graham received 17.

John Mann, Paul Horton and Bill Horton were sworn in as senators from, respectively, the Law School, the College of Business Administration and the College of Arts and Sciences.

The next scheduled Senate meeting is Feb. 18. However, Senate President Larry Meyers called a special meeting for Thursday. At that time, a revised version of the optional activities fee bill passed at the last Senate meeting will be considered.

SCUBA class refused pool use

By POLLY GEORGE
Staff Writer

Tech's SCUBA diving class has been refused use of the swimming pool unless it can meet certain qualifications.

To qualify for use of the pool the class must become a recognized university organization, or it must be taught by a Tech diving instructor.

Bob Bacon, instructor of the class, is not a member of the P.E. department. Bacon, who holds three national diving instruction certifications, receives no salary for his instruction.

Over 50 students attended Bacon's lecture Monday night. Many of these students, plus other interested students, drew up a petition Wednesday night at a meeting of the Tech Outing Club.

The diving class is planning to affiliate with the Outing Club in order to meet the qualifications required for use of the pool. The petition will be presented to the

Student Senate and the P.E. department as an expression of the class's dissatisfaction about not having access to storage facilities near the pool.

"It's a shame we have no diving instructor at Tech, despite all the interested students," said Bacon after his lecture Monday night. Forty-nine students have already signed up for the course, despite the great amount of time, energy and money the course requires.

Cost of the course is approximately \$75. Mask, snorkel, and fins total about \$40; rental of tanks is around \$20; pool fee is \$10; and the textbook is \$3.

When a student has completed the course and passed a three-hour written exam and a pool test, he can be certified for \$5. Three certifications are available, and a student can obtain all three if he wishes.

Students will spend about 40 hours in class and in the pool. Lectures will cover all areas of SCUBA diving including

photography, care and use of the equipment, diseases caused from diving, artificial resuscitation, both fresh and salt water techniques, and oil rig diving.

Before a student can go into the water, he must pass a test. The test, which will be given when a pool is obtained, consists of a timed 300 yard free-style, 100 yard warm body pull, 25 yard underwater with one breath, three minutes treading water without hands, 15 minutes treading with hands, and picking a 10 pound weight off the bottom of the pool.

"Anyone who can swim can pass this test," Bacon said.

Several trips are planned for the spring and summer semesters. Bacon hopes to take the divers to the Gulf Coast this spring and possibly Hawaii in the summer.

The lecture Monday night was based on the physics of diving, with regard to pressure and weight of water on the diver and his tank.

meet with the Board in informal sessions, according to Dr. Grover Murray, Tech President. The board will also consider;

- Proposals for state financing of the Medical School.
- The Astro turf problem at Jones Stadium.
- Authorizing a maximum of \$250,000 in expenditures for a Natural Science wing for the Museum.

— Possible expansion of the Psychology Building.

— The possibility of acquiring an additional 1,077.1 acres of land from the U.S. government for use at the Pantex research facility.

— A Dec. 18, 1970 acceptance date for the Architecture and Art Building.

All other Board members are expected to attend.

Regents meet lame duck

Selling policy viewed

The term "lame duck" will come to have meaning at Tech this afternoon when the Board of Regents convenes at 3:30 p.m. in their first meeting of 1971.

"Lame duck" is usually used to describe a legislature which continues in session after some members have been defeated at the polls, but before their successors have been inaugurated.

At Tech, the regents become "lame duck" because the terms of office of three of the members, Retha Martin, Roy Furr and Marshall Formby, ended last Sunday. The three men will continue to serve on the board in a "lame duck" capacity until their successors are named by Governor Preston Smith and approved by the Texas Senate.

This continued service after the expiration of a term is provided for in the Texas Constitution and in statute law.

Atop the list of items for consideration today are a new solicitations policy and the transfer of the department of economics from the College of Business Administration to the College of Arts and Sciences.

The new solicitations policy to be considered today is the proposed policy under which The Catalyst attempted to sell outside campus buildings. The proposed policy is expected to allow solicitations within 200 feet of the entrance to campus buildings.

In the Medical School area the Board is expected to decide on the size of campus for that new facility.

Outside of the regular board meeting, Student Association President Mike Anderson and several representatives of the association and the Athletic Council are expected to meet with Board's Academic Affairs Committee this morning to discuss the proposed optional fee system.

Also, U.S. Congressman George Mahon, chairman of the House Appropriations Committee, is scheduled to

Planned Parenthood welcomes Techsans

By JULIE McCABE
Special Reporter

Planned Parenthood sees a lot of Tech students, said Mrs. Gwyn Vail when she and Jim Roderick talked to members of the Ecological Task Force Tuesday night.

"They're perfectly welcome," she said. "We're glad to have them."

Roderick is the administrative assistant for the HEW grant for family planning and the director of Planned Parenthood. Mrs. Vail is a case worker for HEW Family Planning.

Roderick said one of the main functions of the Planned Parenthood Association is to distribute birth control information and refer people to doctors for various types of contraceptives and examinations.

He also said Planned Parenthood, because it is a government agency, cannot turn anyone away, regardless of economic status. In fact, he said, in the near future, they hope to be able to initiate an educational program aimed at affluent people. Last year alone, he said, there were over 450,000 unwanted pregnancies among affluent families.

Cindy O'Brian, chairman of the Eco

Task Force, referred to these people as the silent majority, knowing about sex and birth control, but not talking about it.

Roderick said another phase of the educational program would be to use a front door approach to the back door problem of sex education, by calling the course School Population Educational Programs.

Mrs. Vail's job includes working with girls aged 18 - 20. This includes Tech students and often times includes young girls' parents, since no prescriptions for medication can be given to a girl under 18 without parental consent.

She said she is very interested in working more closely with the university and the student health service. She said she thinks she can make them aware that birth control information is needed by showing them some of the figures from her files. Monday, she said, she saw seven Tech students for birth control pills and two seeking abortions.

Roderick said that, although they have facilities to see about 2,500 women a year and there are about 6,500 below the poverty level that need the services, they are going to wage a campaign to make themselves known in the community. The Committee on Clubs and Organizations will work to project the Planned Parenthood plan through these various agencies.

While Mrs. Vail said she never forces the two child family theory on anyone, Roderick said, "Planned Parenthood's national policy is to encourage only two children per family."

Planned Parenthood works with the Public Health Department and the Child Welfare Department. Since every woman gaining birth control devices from the clinic has to undergo an examination, including blood tests which are analyzed by the health department, often infections such as venereal disease are detected and treatment follows. If a girl comes to the clinic, is found to be pregnant, but does not plan to get married or have an abortion, Mrs. Vail can refer her to maternity homes, foster homes or the Child Welfare Department if she wishes to place the baby up for adoption.

Asked if she had any problem with Catholic women not wanting to take pills, Mrs. Vail said, "No. In fact I was talking to a priest the other day who said birth control pills are fine. They regulate a woman so rhythm is more effective."

Editorial

No dead issue

The other day, we made some nasty remarks about the Tech mind. We made those remarks because we felt that the Tech mind had managed to let the dorm issue die for the 139th time.

Well, we were wrong! The dorm issue hasn't died. The speak-out Wednesday proved that. What's dead is the Tech mind or at least 99.75 per cent of it. The other .25 per cent — 45 people — showed up for the speak out.

Other than concluding that the Tech student body doesn't give a damn about changing what is being done to them, we simply don't understand the Tech mind.

We must believe that that mind thinks change will be delivered one day in the campus mail.

We are to the point of hoping that the Tech mind will do only two things: (1) give thanks to the people who do care and who have worked and (2) go back home to its mother — mother apathy — before it hurts itself.

In fact, Tech mind, please go. Tech is ten years behind now. If you keep helping it will be 30 years behind 10 years from now.

More passing the buck

Couple of months ago I was complaining about the fact that a very few residents could create a water district—until I received the attached letter from the Legislative Budget Board (members of both houses of Texas Legislature). I had no idea one could actually PARK A TRAILER ON LAND, vote huge bonded indebtedness, then move off the land!

As you can see, LBB suggests that the Water Rights Commission should be more strict. More passing the buck.

Equal opportunity for all

Is there such a thing as EQUAL OPPORTUNITY FOR ALL, at Texas Tech? What about the rumors of the mass GREEK EXODUS away from participation and domination of campus elections?

Are they more than just rumors? And what is more important, will this new fad about quality being more significant than quantity really last?

What is the deal with all of these questions?

The deal is that I, for one person on this campus, am concerned with the students at Tech. I am wondering where the students, who now stand on the threshold of a more progressive and innovative era in Student Government, communications with the Administration, and services to the Student Body, will go next.

The purpose of this letter is to give the entire campus fair notice of the upcoming elections, both Executive and Student Senate, to be held on March 3 and March 10, respectively, and to affirm the ideas in the aforementioned questions.

There can, in the first place, be equality of opportunity in elections on campus, if you want to make things that way; that is, if you really want to get something done in the Senate and feel that you have some good ideas, get all of your complaining over now about not having a chance to win, so that during the election, you can express yourself on some sound campaign issues, and get some votes.

Furthermore, as far as the "Greek Exodus" is concerned, I, being a Greek, must say that much to the delight of all interested people, the days of cute little sorority pledges standing out on street corners passing out 473,000 handbills, and getting votes in exchange for their cute little smiles, are hopefully fading fast.

When you work with people who really care, of which there are a great many on this campus, you quickly learn to forget a person's social standing and reflect more on his desire to work for the betterment of others. You learn to become genuinely interested as there is so much to be done.

Start thinking now about running for an office; and you had best realize, that if the majority of the campus feels like I do, quality in campaigning will be much easier to spot this year than ever.

Bonnie Craddick
 Secretary,
 Student Association

Director replies to article

The undiscerning allusions to Texas Tech's international student program appearing in the article "The foreign student war at Tech", printed in Tuesday's edition, require immediate and factual clarification.

The article's irrelevancy to the University's international student program served only to confuse and misinform its readers, by implying that international students are indiscriminately admitted and furnished with unlimited financial support. Such insinuations are grossly inaccurate for the following reasons.

Each international student who applies for admission to the University must meet exceedingly-rigid academic requirements before being accepted. Above-average marks are essential and the equivalent of an "A" average is frequently required for admission.

Substantiating this is the fact that the accumulative grade-point average of international students who have completed one or more semesters at Tech, generally averages between one half and one point higher than the all-college average.

Scholarships available to international students which are administered by Texas Tech are limited to two. The Don Belding Fund, open only to advertising and marketing majors, has awarded partial scholarships to five individuals for the current academic year.

The Texas Good Neighbor Scholarship, providing for the exemption of out-of-state tuition, is offered to students from Latin American countries. Recipients of this grant number four for the 1970-71 year.

It is clear, therefore, that an insignificant number of international students are receiving scholarships from Texas Tech University, and that no one student has been given more than fractional support, usually in the form of tuition and - or fees.

Moreover, it is fair to point out that many international students contribute to the cost of their education through part-time employment during the school year, and as full-time employees throughout the summer vacation period.

The preceding serves not only to expose the ludicrous nature of the aforementioned article, but to underscore the University's real need to devote more effort toward creating a strengthened and more effective international student program.

Texas Tech University must accept its urgent responsibility to educate the maximum possible number of well-qualified students from abroad — not because the numbers of international students enrolled in competitive institutions far exceed ours, not because it may be politically and economically advantageous to the United States, but rather because the potential truly exists on the campus for making a genuine and noticeable contribution to world peace and development, through the effective utilization of our present curricula, faculty and staff, special institutes and programs, and physical facilities.

The achievement of such objectives will of course, require the detailed development and coordination of a long-range program, which would recognize the international dimension as an integral element in the University's overall educational philosophy.

A campus which is internationally-oriented will benefit all students.

Robert Burnett, Director
 International Student Services
 2400 44th Street, No. 210
 799-3100

Supports conference

Knowledgeable students and faculty have probably noticed an article entitled "Nordic Antics" on page 3 in the recent issue of the CATALYST which is highly critical of the upcoming World Affairs Conference on Scandanavia.

As a result of much criticism of this article, I think it needs pointing out that this article was not written as a criticism of the concept behind the Conference (which is to encourage internationalism as opposed to nationalism) but was written in the hope that it would inspire leaders of the Conference to offer the most in-depth study possible into the Scandanavian world instead of "skimming the surface" and presenting facts borrowed from the Oslo Chamber of Commerce.

The CATALYST wholeheartedly supports the World Affairs Conference with the hope that it will present stimulating knowledge for interested students.

Sad, isn't it

So what's so great about your reporter photographing a pile of brick in the vicinity of Home Economics?

A really great photograph would be one of a similar scene over near the Music Dept.

Sad, isn't it? Big Red, our ragamuffin stepchild, is a winner every time he represents Tech yet I doubt that "Coach Hemmle" or "Coach Killian" get salaries comparable to those of the athletic coaches and I guarantee you won't find any beautiful new buildings designed for our musicmakers.

Dear Students:

We the employees of Famous Brands Shoes wish to express our appreciation for the concern of the extinction of the alligator, sea turtle, and other species.

We agree that this slaughtering should stop immediately and we will help in every way possible. Famous Brands Shoes, 2149 50th, has no intentions of purchasing any type of skin shoe at the present or in the future. However, we also hope you will understand that we must sell the merchandise on hand.

Therefore, we ask for your patience in this matter, and thank you for your continued patronage.

Yours truly,

 Tommy Tucker, Manager

The Movie Scene

BY BILL KERNS

The producers of **THERE'S A GIRL IN MY SOUP** have gone to great lengths to stress the fact that the film stars the Academy Award-winning (deserving??) Goldie Hawn even the title sequence is dominated by a myriad of her photographs.

But let's give credit where credit is due: it is the able Peter Sellers who makes the movie worthwhile. The film is not a great comedy, but it is an enjoyable one—and it's made this way by Sellers and Sellers alone.

Last seen in "The Magic Christian," Peter Sellers carries over his madcap British role to a new character. He plays Robert Danvers, star of a television cooking program and established connoisseur of fine foods and wines.

However, he is also a very successful playboy during his off-camera hours—so taken with the concept of sex, in fact, that at one point his colleague asks him, "Can't you even look at a girl without getting all lathered up?"

Sellers develops his character to the fullest; every little detail from his charm and finesse to his "evil" little laugh to his obvious vanity are ably put across to the audience. And to illustrate his skill, he follows one of his old flames to her

wedding, getting in one last "remembrance" while the reception is going on downstairs.

On the other hand, Miss Hawn has once again been stereotyped (or is it, perhaps, the only role she can play?) as the "dumb blonde." She plays Marion, an amazingly crude, 19 year-old American who comes to grips with the drummer she's been living with, thus giving Sellers ample opportunity to pick her up on the rebound.

From here a romance of course ensues, but Miss Hawn shows nothing outstanding in the way of acting skill. She does have a great many funny lines—but had they been punched out on computer tape, the lines would have been just as funny; her delivery adds nothing.

Add to that the fact that her low cut costumes (or even her nude scene, for that matter) make her look anything but appealing and one has to wonder whether she was cast only for the boxoffice business her name would draw.

She is not the film's solitary fault, however. The film drags during the Riviera sequences. And a French bellboy's best wishes for "hap-piness" is also kind of gross. But these faults are made to seem trivial by Sellers' sterling performance.

The music score makes use of three vocals, the majority of

which are of the light, carefree genre. Photography is also nothing outstanding, though there are a few pleasing shots, an example being the couple's reflection in a painting's glass cover. But the sets are something else! One couldn't begin to comprehend Sellers' seduction-oriented apartment until he actually sees it on screen.

The wine cabinet and the push-button lights, music, and bed create a general atmosphere that ties in perfectly with the character of Robert Danvers. Why, even the bathroom is lined with mirrors.

"There's A Girl In My Soup" is not the brightest of the screen comedies that 1970 gave us, but it does have its own particular aura of success. Though the "girl" of the title appears to be only of the "fools" gold variety, the stirring performance of Peter Sellers makes the film well worth your time and effort.

"There's A Girl In My Soup" is currently playing at the Fox Twin No. 2. Rated R. Admission price: \$1.75

FILM FACTS: "There's A Girl In My Soup" Produced by M.K. Frankovich. Directed by Ray Boulting. Screenplay by Terence Frisby. Photography by Harry Waxman. Edited by Martin Charles. Music by Mike D'Abbo.

Raider Roundup

JUNIOR COUNCIL

Applications for Junior Council may be picked up in room 171 of the Ad Building. To be eligible, applicants must have 64 hours by the beginning of fall, 1971, and a 3.00 overall average. Applications are due by 5 p.m. Feb. 15.

LAVENTANA

The Life section of La Ventana announces the March 15 deadline for its photography contest. Entries should be turned in at room 102 of the Journalism Building. They should be in 11 x 14 envelopes addressed to the Life Editor, La Ventana. Selected prints will be featured in the gallery with credit.

APHIO

The second smoker for Alpha Phi Omega, national service fraternity, will be at 7 p.m. Monday in the Ballroom of the University Center.

CHESS CLUB

University Center Chess Club will meet at 10 a.m. Saturday in room 208 of the University Center. All students and faculty are invited.

UNION MOVIE

"Don Quixote de La Mancha" will be shown at 8 p.m. today in the Coronado Room of the University Center. The movie is sponsored by the International Interest Committee of the University Center.

NCAS

The NCAS will hold a meeting at 6 p.m. Tuesday in room 266 of the Business Administration Building.

UNIVERSITY PARISH

The University Parish will hold theology classes every Thursday at 7:30 p.m.

SCANDINAVIAN FAIR

The Scandinavian Fair will be held from 1-4 p.m. Feb. 5, 9 and 10 in the Anniversary Room of the University Center.

IEEE

The Institute of Electrical and Electronic Engineers meets at 7:30 p.m. Monday in the old architecture auditorium. The speaker is Dr. Thomas Trost, assistant professor electrical engineering, and his subject concerns "The Radiotelescope at Arecibo, Puerto Rico."

INNER EAR

The Inner Ear will sponsor T. J. Patterson, comedian speaking on "shooting from the hip"; Don Scott, folk singer, and a film entitled "The Magician" at 8 p.m. today. Also on Saturday at 8 p.m. Kathy Williams from the free speech committee, will speak. Included also are two folk singers, Susan Martin and Dave Garret, and a film called "Acceleration Homo Homini."

AG ECO ASSOCIATION

The Ag Eco Association meets at 8 p.m. Thursday in the Ag Auditorium.

SOCIAL WORK CLUB

The Social Work Club invites all interested people to come to a meeting at 7:30 p.m. today in the Ad. Building in room 272. Two speakers will be featured; they are T. J. Patterson and John Norwood.

MOVIE OF THE WEEK

This week's movie will be "A Man Called Horse" starring Richard Harris. Special showings today at 4 p.m. and 8 p.m. at 7:30 p.m. today in the Ad. Building in room 272. Saturday and at 3 p.m. and 7 p.m. Sunday. Admission will be 50 cents plus ID.

Rolls-Royce in bankruptcy

LONDON (AP) - Rolls-Royce crashed into bankruptcy Thursday.

The giant of Britain's aerospace industry, developed from its start as a maker of cars for millionaires, went into receivership and the government moved to nationalize most of the wreckage to safeguard the country's defenses and international commitments.

The crash was blamed on a commitment to build 600 engines for the Tristar jet projected by the Lockheed company in the United States. Development costs have soared and the Rolls expects to lose \$108 million in the deal.

Rolls-Royce employs 90,000 persons and is the West's third largest maker of airplane engines.

The minister of aviation, Frederick Corfield, told Parliament the government will begin urgent discussions with

U.S. officials and Lockheed on the Tristar contract. He made it clear that at this time the government itself is under no commitment to continue engine supplies for the plane.

The end of the 66-year old company as an independent force developed swiftly during the day. Rolls first asked the London Stock Market to suspend dealings in it shares, then announced to a stunned nation it was going into receivership.

Other shares on the market lost millions of dollars. Hardly one other company escaped unscathed as financial circles reacted in dismay to the collapse.

Los Indios Tabajaras

Brothers slate concert

Self taught musicians from Brazil will present a program of varied guitar music at 3 p.m. Sunday in the University Center for the university's Artists Course Series.

The Indian brothers Natalico and Antenor Lima known as Los Indios Tabajaras, will play tribal music, Latin American rhythms, popular songs and classics on twin guitars.

These recording artists are best known for their rendition of "Maria Elena." Some of their other albums include "The Many Splendored Guitars of Los

Indios Tabajaras," "In a Sentimental Mood," "Song of the Islands," "Casually Classic" and "Twin Guitars - In a Mood for Love."

Originally training themselves on a guitar they found in a forest as boys and continuing their study of music through the years the brothers are now known internationally from concert tours, recordings and television appearances.

The brothers come from a family of 30 children. They were the sons of a Tabajaras Indian chief, Miganga. After they

taught themselves to play the guitar they left their home in the equatorial rain forest of Northeastern Brazil and walked 3000 miles to Rio de Janeiro. They started playing before local audiences there.

Tickets are available at the University Center or may be purchased at the door. Tech students can receive a ticket upon presentation of ID's. Tickets are \$2.50 for the general public, \$1.50 for Tech personnel and their immediate families and for husbands and wives of Tech students.

Allied drive pushes up to Laos

SAIGON (AP) - A force of 20,000 Saigon troops, backed by 9,000 Americans, has pushed up to the Laotian border with scant opposition as part of a new allied drive against enemy forces.

Both Gen. Creighton W. Abrams and the White House left the world guessing whether the Saigon forces will cross the frontier. The U.S. command said a decision on further action was up to the White House, which in turn refused to project future movements.

The drive, shaping up into one of the biggest of the war, was made under cover of a news blackout which blanketed the northwest corner of South Vietnam for six days. This was lifted Thursday.

The offensive was part of a massive two-pronged sweep of nearly 50,000 allied troops advancing under an umbrella of American and Vietnamese bombers and helicopter gunships. To the south, the second push by close to 20,000 South Vietnamese troops has driven deeper into Cambodia. They also ran into minor opposition.

The Saigon military command denied that the South Vietnamese force massed in the nation's northwest corner had jumped off into Laos, despite invasion charges trumpeted in Communist capitals and elsewhere. Saigon refused, however, to say whether such a thrust would be made.

U.S. leaders insist no American ground forces will go into Laos in any case, but say unrestricted American air power would be available.

The Communist-led Pathet Lao insisted that U.S. and South Vietnamese troops had invaded southern Laos. Hanoi radio quoted them as calling on their forces to defend their homeland.

The statement, issued by the Pathet Lao Central Committee, charged that "U.S. imperialists and South Vietnamese puppet troops are taking a new and extremely serious military adventure by invading Laos on a large scale."

The aim of the push into eastern Cambodia is to prevent the North Vietnamese and Viet

Cong from returning to sanctuary bases from which they were driven by allied forces last May and June.

The northern offensive along a 75-mile strip of the Laotian frontier was aimed at smashing a reported new enemy buildup. It was also designed to plug the outlets of the Ho Chi Minh trail through which enemy men and materiel funnel into South Vietnam.

The 20,000 South Vietnamese troops deployed on the Laotian frontier were supported by about 9,000 Americans who moved into such key frontier bases as Khe Sanh and Lang Vei, both scenes of heavy fighting earlier in the war.

"There are no ARVN - Army of Republic of Vietnam-troops in Laos," said Saigon's chief military spokesman.

He said the South Vietnamese units closest to the Laotian frontier were deployed at Khe Sanh, where U.S. Army engineers reopened the airstrip unused since U.S. Marines abandoned the base in 1968.

Army engineers also opened Route 9 to the Laotian border Thursday and posted a sign about 600 feet from the frontier which read: "Warning, No U.S. personnel beyond this point."

U.S. officials said the northwest sector operation was undertaken to help insure the

safety of American forces being pulled out of Vietnam and leave the way secure for continued withdrawal.

President Nixon is expected to announce in April further withdrawals beyond the current program that will lower American troop strength to 284,000 by May 1. The total is 335,000 now.

Some observers also saw the push as an effort to keep the North Vietnamese from mounting dry season offensives, by blocking the Ho Chi Minh trail and thus preventing troop and supply buildups in South Vietnam and Cambodia.

Coupled with the South Vietnamese drive into the Cambodian sanctuaries area, the two offensives would, if successful, roll back the North Vietnamese forces.

The two-front campaign also reflects the continuing American effort to turn over fighting to the South Vietnamese.

Although U.S. officials have reported a North Vietnamese buildup in the northern sector, it has not been uncovered so far.

One arms cache was fired on by U.S. helicopter gunships. Pilots reported 44 secondary explosions afterward, but otherwise there has been little to confirm a buildup.

Egypt adds 30 days to truce

By THE ASSOCIATED PRESS

Egypt's president, Anwar Sadat, announced Thursday that his government will observe a 30-day extension of the Middle East cease-fire. But he demanded that Israel make a partial pullback of its forces from the Suez Canal during this period.

Sadat said that, if Israel accepted this condition, Egypt stood ready to open the Suez Canal to world shipping, Cairo radio reported.

Sadat's anxiously awaited announcement came a day before the expiration of the six-

month cease-fire at midnight Friday.

Israel already has agreed to extend the truce, and Jordan said it would follow Cairo's lead.

Sadat described his proposals as "a new Egyptian initiative." If accepted, he said, they would lead to "a real implementation" of the U.N. Security Council resolution of November, 1967, laying down the guidelines for peace between Israel and the Arabs.

The council resolution calls for Israeli withdrawal from all

Arab territory seized in the 1967 Middle East war, in return for Arab recognition of Israel's right to exist as a nation with secure and recognized boundaries and an Arab guarantee of Israeli shipping rights in the Suez Canal and the Strait of Tiran.

Sadat spelled out his proposals in a speech to the Egyptian National Assembly. It ended weeks of suspense over whether Egypt would resume hostilities along the canal.

Sadat termed his proposal a "practical experiment" on behalf of world peace in answer to appeals from U.N. Secretary-General U Thant and other leaders.

He said Egypt would extend the current truce until March 7 in hopes that U.N. mediator Gunnar V. Jarring can show "real progress" toward a peaceful settlement by that date. Sadat linked this with his proposal to reopen the Suez Canal to navigation.

The president said that in the period before March 7, there should be a "partial withdrawal" by Israeli forces from the canal's east bank, into Sinai as the "first stage of a timetable for complete evacuation."

Sadat then held out the prospect that Egypt would reopen the canal. He said, if the Israelis withdrew, "we are ready immediately to clear the canal and open it to navigation as soon as possible."

Hubbard new director of Nimitz Naval Museum

FREDERICKSBURG, Tex. (AP) - Douglas Hubbard has taken over his duties as director of the Fleet Adm. Chester W. Nimitz Naval Museum. Prior to coming here, Hubbard was deputy director for the National Park Service at Harper's Ferry Interpretive Center, W. Va.

He was also responsible for much of the park service work done in the visitors center at the LBJ State Park near Stonewall.

Commission appointed last year by Gov. Preston Smith to find means for additional funds for the museum.

One of the first physical projects will involve stabilizing some of the stone walls of the buildings, he said.

Hubbard also hopes to secure the four main collections of combat art of the Nimitz era from Time-Life, the Navy, Air Force, and Coast Guard to be displayed on a revolving basis.

Other future projects planned are a film with two sound tracks and preparation of an audiovisual center similar to that in the LBJ State Park.

Wrangler
THE WADDY BOOT

Styled over 100 years ago and recreated by Wrangler with nostalgia. A real champ for wear and good looks this rugged all leather stovetop boot features: dog ears with conchos and leather thongs attached, fully leather lined quarter and vamp, leather insoles and outsole, cowboy heel, broad toe. Antique Chestnut or Burgundy.

ALSO OTHER STYLES AVAILABLE SUCH AS REBEL SNOOT, RINGO-DOGGIE TOM JONES WOODSTOCK SKY MARSHALL & OTHERS.

OPEN 7 DAYS A WEEK TIL 10 PM

Sports Expo '71 to begin

Outdoor Sports Expo '71 opens today in Municipal Coliseum.

Featured in the exposition will be various types of outdoor sports equipment and supplies. Exhibits include boats, trailers, campers, self-contained

recreational vehicles, all-terrain vehicles, motor cycles, and trail bikes. Also, dune buggies, sports cars, ski equipment, scuba diving equipment, fishing gear, fire arms and camping equipment. Work began Thursday setting

up exhibits for the sports event. Holden feels 20-25,000 people will attend the show. Entertainment will include live SCUBA divers in a special water tank, a dry land ski school, fishing demonstrations, guard dogs, archery, and fire arms safety.

Of special interest will be the mid-engine sport car the Mangusta by Tomaso of Modena, Italy. The \$13,000 car is the only one of its type in the state and will be exhibited by Overseas Motors of Lubbock. In addition the Mangusta will display a 1971 Jaguar and Rolls Royce.

General admission to the show will be \$1.25, but 25 cent discount coupons are still available to students in the University Center.

Friday's show is from 5-11 p.m. with the Saturday and Sunday events slated for 10 a.m. to 11 p.m.

SPORTS EXPO '71

Lubbock's biggest outdoor sports show is scheduled to begin today and run through Sunday at the Lubbock Coliseum. Outdoor Sports Expo '71 will feature all types of recreational equipment and supplies, including boats, campers, trailers, motorcycles, trail bikes and dune buggies.

SUMMER JOBS: Full time employment for Male students. \$700 per month. Interviews 3:00, 7:00, 9:30 P.M. Roadway Inn, Rm. 233. Dr. Samuel.

British economist has influence on President Nixon

NEW YORK (AP) - In 1936 an English gentleman of foresight and influence, much concerned about the depression and some of the ineffectual attempts at curing it, commented in a book:

"... The ideas of economists and political philosophers, both when they are right and when they are wrong, are more powerful than is commonly understood."

Even when they are "defunct," he said, their influence continues, affecting the thinking even of "practical men who believe themselves to be quite exempt from an intellectual influences..."

The man was John Maynard Keynes, later to be made a lord. The book, "The General Theory of Employment, Interest and Money." He is the man with whom President Nixon, to the surprise of many, has identified himself.

Central to Keynesian thinking is a disbelief in the old classical maxim that the best economic conditions automatically resulted from letting the economy seek its own answer through supply and demand.

Keynes felt full employment demanded a more activist government. It could be achieved, he felt, only if the government and the central bank deliberately encouraged investment and maintained a cheap money policy and public investment during a recession. Right or wrong, and regardless that he has been "defunct" since 1946, Keynes is today perhaps the most influential economist in the Western World, his thoughts woven into the theories of other economists and, as he had suggested in 1936, influenced the minds of practical men.

WASHINGTON (AP)— The rose-colored door to the eight-room suite swings open, and there she stands, a gray-haired lady in a fringed mid-skirt, her arms outstretched in welcome. The essence of mod, like Auntie Mame comes to life. The same throaty laugh, the feigned naughtiness, the passion for secrets, the unshakable aplomb. All the similarities are there.

But this is Auntie Perle, not Mame, and she's in the flesh, not fiction. From the moment you see her, it's clear that at age 80, or thereabouts, Perle Mesta is still

kicking up her fashionably booted heels. The capital's famous "hostess with the mostest" still spends her days in relentless pursuit of a party, forever ready to celebrate anything at all. Except her own birthday.

She hasn't had a birthday in a myriad of Sundays. The date is Perle Mesta's best kept secret.

Even her best friends don't know if she's a shocking Aquarius or, maybe, a socially-minded Capricorn. The date is one of the few not listed in Who's Who in America. It isn't listed in

the county clerk's office in Sturgis, Mich., where she was born, nor with the Bureau of Vital Statistics in Oklahoma where her family moved three weeks after she was born.

But in newspaper clippings, cracking and yellowed with age, the year of her birth is listed as 1891. No month, no day.

"Now if I tell you I moved to Washington when I was 18, you'll ask me how long I've been here and then you'll figure out how old I am," said Mrs. Mesta in an interview. "Can't we skip over that part? What does it matter?"

Rubeola upsurge strikes Houston
HOUSTON, Tex. (AP)— Houston is undergoing an upsurge in rubeola or red measles, the director of the City's Health Department's communicable diseases section, said despite a vaccine which stops it.
But Dr. Robert MacLean said the recent action of the Houston School Board in making rubeola immunizations mandatory for entrance into classes next fall may go a long way toward eradicating the sometimes serious childhood illness.
"We have been seeing an upsurge in the number of cases of regular or red measles, which are not to be confused with rubella or German measles," he said.
"The action by the school board is an important step toward preventing the disease at least among school children and I hope we can encourage other preventive measures."
City Health Department clinics and mobile units will be stepping up efforts to encourage people in the poverty areas to take advantage of the free vaccines, not just for measles but all of the communicable diseases, he said.
"We hope to reach many more pre-schoolers than we have been. Also I would hope more school districts would follow the Houston system's direction in making the immunization a prerequisite," Dr. MacLane said.

Perle Mesta has been around long enough to qualify as an institution in this town, where hostesses tend to rise and fall with every change of administrations. Only a handful have staying power. Perle is one of them.

She earned her reputation as a party giver for the powerful under Harry Truman, learned to cook from Dwight Eisenhower, sold a hose to Lyndon Johnson, and swallowed her liberal politics long enough to belt the Democratic party and vote for Richard Nixon.

Leading a reporter into the spacious living room of her apartment in the Sheraton-Park Hotel, Mrs. Mesta opened the interview with a question of her own.

"Do you have a steady beau, dear?" asked the woman who once tried to interest John Kennedy in Margaret Truman. "I love matchmaking."

Mrs. Mesta, steering the conversation from one phase of her life to another, laced her anecdotes with frequent directives—"Now you can't print that," or "Here's a story you can have," and, in a stage whisper, "But I'm a liberal."

LT. CLEBE McCLARY
U.S. MARINE CORPS

VIET NAM WAR VETERAN TO SPEAK

Sunday Evening - 7 P.M.
During Student Night At First Baptist

A native of Florence, South Carolina, and a graduate of Clemson University, Clebe McClary volunteered for service in the United States Marine Corps. He was seriously wounded in Viet Nam and received the Silver Star and Bronze Star for bravery. He also received three Purple Hearts.

He is a member of the Teen Crusade Team and the testimony for Christ concerning his life and his war experiences was given in the Billy Graham Crusade in Anaheim, California.

He will give his dramatic and touching testimony during the evening worship service. You are invited to come and bring your friends.

Fashionscope says

Cowgirl attire popular in '71

Since western wear will be very popular this year, it is important to know some things about western clothes.

accents, are the denim slacks, ponchos, jeans, and bush jackets.

your own thing, it isn't what the majority of the people are doing.

The print of the fabric will be very important. For instance, stripes and prints both look very western; yet stripes are fashionable, while prints are not. Many of the new jeans for girls today are printed, but did you notice most of the prints are in stripes going down the legs, rather than an all over print. This will still give the striped effect.

The length of the jeans is very important also. They should be long enough to cover the ankle, but not so long that they drag. This looks very sloppy.

If you are a sworn cowgirl and you feel insulted and out of style when you read this; don't do

Dear Fashionscope, Are midis slowly or rapidly going out of style? Everyone I talk to hates them, including myself!

Dear Kathy, I think the midi is gaining acceptance, even though there is definitely a movement to abolish them. Because if you will notice there are more midis seen on campus now than there were four months ago.

Dear Fashionscope, Are midis slowly or rapidly going out of style? Everyone I talk to hates them, including myself!

Kathy Morgan

Fashion Questions? Write to Betsy Barnes, 121 Wall, Texas Tech, Lubbock.

Placement Service Interviews

MONDAY

THE BELL SYSTEM—Monday through Friday, February 15-19. Bachelors', Masters', or Doctors' Degrees: Acct., BusAd, BusEd, Eco., Fin., GenBus, Mgt., Mkt., ArchE, CE, EE, IE, ME, EngPhys, Math, Phys. The chief business of this organization is communications.

GULF STATES UTILITIES COMPANY—Monday, Feb. 15. Bachelors' Degrees: EE, ME. An investor-owned electric utility company which operates in Texas and Louisiana. They produce, sell and distribute power for industrial, commercial, and consumer use.

PACIFIC GAS AND ELECTRIC COMPANY—Monday, Feb. 15. Bachelors' or Masters' Degrees: CE, EE, ME. A public utility company which furnishes gas and electricity for consumer and industrial use.

PENNZOIL UNITED, INC.—Monday, Feb. 15. Bachelors' Degrees: EA&D, Math., Acct., ChE, ME. A natural resources company involved in discovery and exploitation of minerals, oil, and gas.

TUESDAY

CABOT CORPORATION—Tuesday, Feb. 16. Bachelors' Degrees: EE. Produce pigments, plastics, chemicals and specialized products for industry. Affiliates abroad.

Trinity River Basin wildlife sanctuary site

ARLINGTON, Tex. (AP)—Grasslands producing vast amounts of beef comprise almost half of the drainage area of the Trinity River basin and provide homes for a major part of the basin's wildlife population, says Clyde W. Graham, state conservationist for the Soil Conservation Service.

These grasslands, says Graham, form the watershed that yields most of the water used by cities, towns, industry and agriculture in the river basin.

But because of pressures from grazing and misuse, Graham said, much of Texas' grasslands have deteriorated steadily. As the choice forage plants have weakened and killed by overuse, they have been replaced with plants that provide less food for wildlife and livestock.

An SCS study in 1964 revealed that unwanted woody plants had infested 82 per cent of Texas grasslands. About 50 per cent are so densely infested that most moisture entering the soil is consumed by brush. In fact, about 138 million acre-feet of water—38 per cent of the state's average annual rainfall—is wasted each year by non-economic plants such as weeds and brush.

"It has been estimated that an all-out grassland restoration program in Texas would increase water yields in the Trinity watershed alone by 704,000 acre-feet per year," said Graham.

"On the other hand," he said, "Some wildlife enthusiasts fear that any attempt to restore grasslands will destroy much of the wildlife resources. Of special concern are song birds, game animals such as deer, and turkey, quail and dove."

But, "in fact, one of the worst enemies of wildlife is the person who insists that vast amounts of brush be left on depleted grasslands," Graham emphasized. "Instead of helping wildlife, this person is trying to sentence game to a tortuous death by starvation during adverse conditions."

CELANESE CORPORATION—Tuesday, Feb. 16. Bachelors' or Masters' Degrees: Chem., ChE, ME, TextE. An international petrochemical company associated with chemicals, fibers, coatings, and plastics.

CHICAGO BRIDGE & IRON COMPANY—Tuesday and Wednesday, Feb. 16 and 17. Bachelors' or Masters' Degrees: CE, ME, Arch. A steel plate constructing company with world-wide operations which include design, fabrication, and construction.

CONTINENTAL OIL COMPANY—Tuesday and Wednesday, February 16 and 17. Bachelors' or Masters' Degrees: Acct., Eco., Fin., Mgt., Math., EA&D, IE, PetE, BusEd, GenBus, Mkt., AgEngr, ChE, CE, EE, ME. Produce natural resources for energy, chemicals, and plant foods. Total energy base: Coal, chemicals, nuclear power, plant foods, and petroleum.

GENERAL MOTORS CORPORATION—Tuesday and Wednesday, Feb. 16 and 17. Bachelors' Degrees: ChE, EE, IE, ME, IndMgt. Automobile assembly plant.

SOUTHWESTERN LIFE INSURANCE COMPANY—Tuesday, Feb. 16. Bachelors' Degrees: Acct., BusAd, BusEd, Eco., Fin., GenBus, Mgt., Mkt., Other Majors (with business related subjects and if business is primary interest). Plans include: Life, health, group, annuity, retirement, employee benefit, and other services.

TEXAS POWER AND LIGHT COMPANY—Tuesday and Wednesday, Feb. 16 and 17. Bachelors' or Masters' Degrees: EE, ME, Acct., Eco., Fin., GenBus, Mgt., Mkt., HEEd, F&N. Produce and distribute electricity for consumer, industry and institutions.

WEDNESDAY

CITIES SERVICE OIL COMPANY—Wednesday, Feb. 17. Bachelors' or Masters' Degrees: CE, ChE, IE, ME, PetE. From exploration and production of gas and oil, through marketing of oils, gas, sulfur, and other chemicals.

Spirited crowd Celebrates with Three Dog Night

By Julie McCabe

With all the subtle inuendos in music recently, it was pretty generally accepted that the "number" in the Three Dog Night song "one" referred to a joint, a marijuana cigarette.

Chuck Negrón, singer with the group, said it's not so.

"There's no way," he said, "that it refers to drugs. Just listen to the words. It means just what it says, this guy's lonely because his chick has left."

Negrón also said, "Just about everything is being accepted in

music these days. Perry Como recently had a song on the charts and Barbra Streisand has a hit. As long as it's good, people are going for it."

Rick Harrison, the back-up man for the Three Dog Night when they performed in Municipal Coliseum Friday night, has similar ideas about the music trends. He said, "The trend is more toward lyrics. Like, through the whole psychedelic phase, when a guy was parking with his chick, grooving on the lights of the city, so to speak, the heavy music just didn't set the right mood." Harrison said he has just written a song for Richard Harris. "It's the type of song," he said, "that helps a guy get across his feelings. Say, he has all this feeling inside him and doesn't know how to convey it. Then the song comes on and he says, 'Here's how I feel. Now, listen to the words.'"

Negrón said they choose all their music to record and perform. "We just do things we like," he said. They get most of their songs from friends, such as Elton John and Laura Nyro. They also get a lot of unsolicited material, he said.

Harrison said he was one of the "original Greenwich Village gang." He performs what he calls "Goodtime music—songs people can remember or that were once their favorite songs."

He said the folk music is coming back, but more of the boy-meets-girl love song than the social message song.

Negrón said the Three Dog Night likes audiences of all ages, as long as they are responsive. "But sometimes," he said, "they are screaming and get so hyped up when we come out that we don't have a chance to get into the music too, but they should realize other people are listening."

Celebrate...Dance to the music

Tech faces SMU tonight

Captains lead swimming team
Tech swimming captains Jay Settle, left, and Hugh McDowell lead the Raiders into two meets on the road this weekend.

Miller Bonner

B-a-a-a

A beserk sheep could be no more wild nor woolly than the upcoming week of Southwest Conference basketball.

A taste of the frenzied crowds and physical contact of the players was illustrated to the Lubbock lookers Saturday night in the Coliseum.

The Baylor boys and Coach Gerald Myers' charges did get together a "little" under the boards (which is to be expected) but the savage action exerted itself to the free throw line and beyond. AS THE SWC roundball race enters the home stretch of the first round of play, teams and coaches alike are getting hungrier and hungrier for a win. Along with the teams will be the victory-thirst from the crowd, especially the home towners.

Texas Christian, the league leader with an unblemished 5-0 slate, will host the angered Bears from Baylor tomorrow night. The Waco wonders are knotted with SMU for the number three spot in the standings with a 3-2 record.

Chances are the Froggies will get beat at least once before traveling to the Hub to revisit the Big Handcuffing scene of last year. After Baylor, TCU meets Rice to end the first round of SWC play.

Rice, on the other hand, will roll out the welcome mat for the Red Raiders tomorrow as the Owls try to get back on the right track. Both the Owls and Texas have 2-3 SWC slates and, incidentally, both squads were picked to fare rather well in league competition before the season started.

THE HAPLESS Longhorns will revisit the site of their national football undoing tomorrow as Texas goes to Dallas to meet SMU and the conference's leading scorer in Gene Phillips.

Phillips is scoring at 28.2 clip per game for the season and his performance Tuesday night prompted the Mustang mentor, Bob Prewitt to comment on the uncanny free-throw accuracy display by the college basketball players.

The Pony hot dog scored 43 points against the Aggies and in doing so, hit 19 of 19 charity tosses.

Tech's Greg Lowery, however, is leading the conference in free throw percentage with an 86.1 norm. Phillips is number seven on the list with a 79.6 percentile.

Following Phillips in the scoring category is Baylor's William Chatmon with a 23.9 average. The biggest Bear will be out to restore against TCU some of the credit lost when Tech held him to 14 points. Chatmon and the number four man on the list, Eugene Kennedy of TCU, will spark quite a show for the Fort Worth crowds. Kennedy is hitting at a 21.3 pace while Tech's Gene Knolle is averaging 22.4 per game.

KENNEDY and Chatmon are also at the top of the rebounding charts. The Frog is grabbing at an average of 15.4 per game while Chatmon is clearing the boards at a rate of 13.2 per match. Lynn Howden and B.G. Brosterhaus of Texas plus the seven foot Steve Niles of A&M round out the top five conference rebounders.

Speaking of Aggies and the land of the losers, Shelby Metcalf will take his hordes to Arkansas to battle the Razorbacks for the league cellar.

The Ags are 1-4 for the campaign while the Hogs are yet to win with five outings under their belts.

From the way the bottom duo has been playing anything could happen. The SWC may not be the best brand of basketball in the land but it won't put you to sleep watching. But it sure beats counting sheep.

IF THERE WERE NO FOOD, NO WATER, AND "NO BLADE OF GRASS" WHAT WOULD YOU DO?

Tankers hit road; meet OSU Saturday

By LESLIE MOORHEAD Sports Writer

Tech's swimming team hit the road today in preparation for dual meets with SMU and Oklahoma State University. Coach Jim McNally's Tankers will splash with the Ponies tonight in Dallas at 7:30 and then head for Stillwater, where Tech will face the Cowboys 2 p.m. Saturday.

Picked to win the conference, SMU is undefeated so far this year and is ranked fifth nationally. The Mustangs under Coach Red Barr have taken the SWC crown the past 14 years in a row and are claiming the 1971 squad is better all-around.

Tech is coming off Saturday's twin wins over Texas and Denver. McNally was quite pleased with the effort against the favorite 'Horns. The double victories brought Tech's mark to 5-4 for the season.

UNDOUBTEDLY favored, SMU has eight All-America swimmers that will go against Tech. One of their top swimmers on the team is Jerry Heidenrich, a two-time All-American who is a class sprinter and butterfly. Heidenrich was a member of the U.S. Summer World Games and was high-point conference winner two years straight. Heidenrich holds three individual SWC records, 200 Individual Medley, 200 freestyle, and 100 free.

David Arthur, Jody Helman,

Steve Griffity, Paul Tietze, Larry Driver, Ronnie Mills, and Cal Look are included in that star-studded octet.

"We have stayed close to SMU the past two years we have met them up to the final medley relay," McNally commented. "They have a great team and we want to do the best we can. I'm glad we are facing them because it gives us incentive and competition that will help us later," McNally observed.

SATURDAY'S OSU confrontation pits a pair of look-alikes. Though the 'Pokes were beaten by Texas-at-Arlington, 62-49 Jan. 23 they have times that are comparable to Tech's.

Coach McNally said, "We are somewhat better than Oklahoma State, especially in the 200 backstroke, 1000 free, 100 free, and the 50 free. The Cowboys will contest us in the 200 IM, the 200 butterfly, 500 free, and the 200 breaststroke."

Tech will be strong in the one and three meter diving against both SMU and OSU. The 'pokes time against UTA was 3:20.12, comparably the same as ours. SMU's strength is in the sprints, back and breast-stroke. If any weakness, it would have to be in distance.

The Red Raiders' next meet will come Feb. 20 here against A&M at 2 p.m. Tech's Tankers will meet Eastern New Mexico in Lubbock Feb. 26 before the SWC meet rolls around March 4-6 in Austin.

Tech runners travel to Fort Worth meet

The Tech track team enters its first indoor meet of the year Friday and Saturday in the Fort Worth Coaches Invitational. The meet, an annual affair, will be held in the Tarrant County Convention Center in downtown Fort Worth.

A limited Raider squad of two relay teams will enter the two day affair, which will feature 12 colleges, including teams from the Southwest Conference and Big Eight. There will also be a school division, with all Tarrant County schools represented.

Tech will enter a mile relay team and a distance medley relay team in the meet. Running on the mile relay team will be Gary Kein, Sam Skinner, Zane Reeves and Ken McCabe. The distance medley team is composed of Dave Gnerre,

David Nelson, John Baldwin and Lance Harter. The two squads will have to qualify Friday night to run in the finals Saturday night.

The first meet the Raiders will enter as a complete team will be the Fort Worth Recreational outdoor meet on Feb. 27.

The indoor meet in Fort Worth is one of the top meets in the state under the roof. Such track standouts as Randy Matson will be in action, as well as the top college competitors in the Southwest and the area high schools.

Tech will enter a similar group of runners in the Houston indoor meet, held each year in the Astrodome. After that meet later this month, the Raiders will run every week until the Southwest Conference meet May 1 in College Station.

"THE FINEST IN THE SOUTHWEST"

Tech meets Rice Saturday on big SWC weekend

Bob Brewster

The battle of the bodies nears

All the excitement right now is over the SWC ball race, but Tuesday the attention will shift, at least for a short while, to the SWC recruiting race.

Football recruiting, that is, and around here the battle for the bodies will make the action on the hardwood look like a third grade picnic. Coaches around the loop have been scouring the talent crop in Texas high schools since, well, probably since last summer, and signing day is when they get it all together.

JIM CARLEN and his crew have had, according to some of those wonderful reliable sources, an extremely good recruiting season. In fact, there may be more boys that want to play football here than Tech has scholarships for. That, my friends, is a good situation.

It's also the first time in the history of our young school that the problem has arisen. Credit Master James with another job well done.

Anyway, Tuesday the results will pour in, and this corner would not be at all surprised to see Tech either at the top of the list, or at least alongside the perennial talent winner, Texas. Darrell Royal is evidently worried about the success of Tech's and other recruiting programs in the conference, or he would not have been negative about taking part in the poll on the state's top blue-chippers.

I HAVEN'T had the opportunity to talk with DKR since his 'Horns whipped the Reds last September, but even then he indicated a cause for concern over Tech's program in future warfare.

There are several happenstances in the past month that figure to hurt Royal and a few other coaches in the league when it comes time to sign on the dotted line. Royal's problem is the incident with Gary Keithley, Longhorn player who left the wings of St. Darrell because he couldn't play ball enough to suit him, with all the other talent around the Austin school.

The most recent surprise was the announcement of the four black players calling it quits at TCU, Jim Pittman's new home. It was reported that the players had been unhappy for some time, but it still will stifle any plans

Pittman had for signing black players Tuesday. It may be that Pittman did not plan to sign many black players, noting that he had none on his roster when his old Tulane team played Tech last fall.

Nevertheless, incidents like those tend to hurt a recruiting program, especially a new one like the one at TCU. Tech has had no sticky goings-on to have to explain to a recruit.

SATURDAY will be the final day for a horde of high school talent to visit Raiderland, escorted by Saddle Tramps and Raider Rustlers. In the bunch visiting this weekend are several top names, such as number one blue-chipper Joe Aboussie and super all-state linemen Jon Rhiddlehoover and Dedrick Terveen.

After Saturday the formal escorting will be over and the final decisions will have to be made by hundreds of high school athletes being courted by SWC schools.

Carlen will leave early Tuesday morning and fly from one signing spot to another as some of the bigger fish in the sea ink a Raider pre-enrollment voucher. Carlen's coaches will be spread out like peanut butter, signing boys they have been after for nearly a year. It should be history by 5 or 6 p.m. Tuesday, when all the conference schools will have a good idea of how effective their pitch was.

MOST LEAGUE coaches know by now, however, who they will sign and who they won't on Tuesday. Tech has six announced commitments, but it's a pretty good bet that quite a few lads have given a secret promise to the school of their choice that they will ink the line when the time comes.

After all, when you have seven or eight schools bidding for your services and treating you to service fit for a king, why ruin it all by announcing your intentions to attend a certain school? Just wouldn't make sense.

For Tech, the results of Tuesday's madness will indicate the future for Raider football fortunes. As mentioned earlier, it looks pretty good, so the future possibilities of a Tech dynasty in the SWC may look good, too.

Raider fans hope so, anyway.

Top soph

Ron Douglas, Raider sophomore shown here scoring a basket against Baylor, will start Saturday for Tech when the Reds meet Rice.

Raiders leave today

The Red Raider basketball squad will leave Lubbock Municipal Airport at 3:10 p.m. today for Saturday's tilt with Rice. Keith Ingram, president of Saddle Tramps, urged all students to see the team off, if possible.

The team will fly directly to Houston and spend Friday night there. Saturday the players will leave a few hours after the game and return to Lubbock at 9:50 p.m.

Next Tuesday the Raiders play SMU in Dallas, the only time all season Tech has back-to-back games scheduled on the road.

Raiders, Owls square off in Houston in televised tilt

By EDDY CLINTON
Sports Writer

The Raiders journey to Houston this weekend to try and stay in second place in the SWC basketball scramble at the expense of the Rice Owls in a regionally televised tilt beginning at 3:10 p.m.

It would seem that the Raiders would find a "soft touch", after playing the Aggies in College Station, and Baylor in the coliseum, but there is no such luck, according to Tech boss Gerald Myers.

"I'll tell you, Rice is a tough ballclub, said Myers. They are a big, strong, great shooting team. Not only do they have a pair of the finest guards in the conference and good team speed, but they are huge under the basket."

The Owls, last year's conference champions, are led by a pair of out of state guards, Gary Reist and Tom Myer.

Reist, a first team all-SWC choice last year, is popping the chords around the 19 point per game mark. This typifies Reist's consistency, because he averaged 19.9 points a game last year.

Reist is the man that the Owls look to for leadership and ballhandling. If the Owls can get a top performance from the Hamilton, Ohio native, they are a tough club to stop.

The second member of the great guard duo is Tom Myer. Myer, a second team all-SWC choice last year, is also canning close to 19 points per contest, about the same figure as he recorded last season.

Myer, a Camden, Louisiana native, is one of the more accurate shooters in the conference. Last season he averaged 51 per cent from the field although he shot the majority of his shots from the "home run" distance.

A third member of the Owl starters is Ted Medlady. The Dallas native is definitely one of the top forwards in the conference. Last season Melady led the conference champs in

rebouncing, while he was third in scoring with a 9.1 average.

At 6-6, Melady has the size to play against the big men, but at the same time possesses the speed and hustle to outmaneuver larger opponents.

Another starter for the Hooters is 6-10 Mark Wehrle. Although only a sophomore Wehrle has done a good job of scoring and rebounding for the Owls this season.

As a freshman, Wehrle averaged 22.5 points a contest and was all-SWC.

The fifth member of the Owls starting unit is Steve Emshoff, another sophomore from Ferguson, Missouri.

Emshoff has added extra weight to his 6-9 frame that enables him to hold the post position against the other big men in the conference.

Coach Myers has expressed happy feelings toward the play of his Raider postment in the last two encounters.

"It is really a boost to our club when Gene Kaberline and Ron Douglas can have good games, back to back," said Myers.

Once again the Raiders will be facing a taller team, so it is imperative for the front line of the Raiders, Larry Wood, Kaberline or Douglas, and Gene Knolle to play well on the offensive and defensive backboards.

Knolle enjoyed one of his finest games against Baylor Tuesday, and appears to have broken his scoring slump, as he canned 21 against the Bruins, to boost his season average to 22.2.

The guard position is in the good hands of Steve Williams, Greg Lowery and Steve Miller.

Williams, while directing a great floor game, scored his highest output of the season against the Bears, 20 points.

Williams' running mate, Greg Lowery, picked the Raiders up in tight situations Tuesday night, and finished the night as the game's leading scorer with 24 tallies, raising his season average to 18.8 points per game.

ESPAÑA

SPRING BREAK

EUROPE

SPECIAL

Available to Texas Tech students, faculty, staff, alumni and their immediate families - through Group Travel Associates of Chicago, Illinois.

- * ROUND TRIP JETLUBBOCK TO MALAGA, SPAIN, VIA D.C. 8 JET WITH COMPLIMENTARY MEALS AND BEVERAGE SERVICE.
- * SEVEN NIGHTS INTORREMOLINOS, SPAIN, THE MOST MODERN BEACH RESORT IN EUROPE.
