

TECH, TCU PLAY TONIGHT

by JOHN PETTY

Associate Sports Editor

Texas Tech's Red Raiders who have fallen into the habit of losing in their last five contests, travel to Ft. Worth tonight for a battle with another weak sister of the Southwest conference — Texas Christian.

Perhaps the only highlight of the game will be the action of two players — Tommy Meacham of the Horned Frogs and Del Ray Mounts of the Raiders.

Meacham has been the one bright spot in coach Buster Brannon's otherwise dismal season. TCU has won only two conference games while losing eight — one of them a 75-66 contest to the Raiders in Municipal Coliseum.

Mounts, a speedy sophomore from Perryton, has netted 180 points in conference play to lead the Techsans. His total is only one point shy of the lead — 181 points held jointly by Clyde Rhoden of Arkansas and Carroll Broussard of Texas A&M.

Coach Polk Robison expected to stick with his usual lineup for tonight's tilt — that of Mounts, Roger Hennig, James Wiley, Mac Percival and Gene Arrington.

Probable TCU starters are Meacham, Jerry Cobb, Bobby Tyler, Phil Reynolds and Jerry Warnell.

Tech goes into the game with a 3-7 record for the season and a hold on sixth place in the conference. A loss to the Froggies would push both teams into a tie for the spot now held by the Raiders.

Some thirty miles away from the TCU-Tech contest the big game of the week will be played in Dallas. Two of the teams that are tied for first place — Southern Methodist and Texas A&M — clash in a game that will may tell the outcome of the final conference standings. SMU beat the Aggies in College Station earlier in the season 66-64. A victory would put the Mustangs in an excellent position for at least a share of the title.

The other conference leader, Texas University, hosts the Bears from Baylor tonight in Austin.

The Red Raiders return home after tonight's game with TCU to prepare for a home game with the rugged Texas Aggies. In the only other meeting of the season, between the Aggies and the Raiders, the Farmers smashed Tech 89-59.

MY GOSH, WHAT A HOLE — Earth moving equipment, trucks and men are working overtime to get the gaping hole that was once Jones Stadium playing field in shape for the first game of the season when the Raiders meet West Texas State. The stadium moving project will be completed this week.

Arab Delegate Speaks Tonight In Union

Sami Hadawi, advisor to the United Nations, is visiting Texas Tech today.

HADAWI, a native of Jerusalem, Palestine, will lecture in several classes and will speak on "Arab World and Communism" tonight at 7:30 in the Union Workroom.

Hadawi, Arab land expert, is on an extended speaking tour of Kentucky, Louisiana and Texas. While

at Tech, he will attend classes in soil fertility and international politics and will compare Lubbock land and politics with those in Palestine and Jordan.

HE SPENT 30 years in the service of the Palestine government during which he spent 11 years as Chief of the Land Taxation Section of the Department of Land Settlement.

In 1948, following the withdraw-

al of the British mandate, he joined the service of the Jordan government. He resigned his post in 1952 to take the appointment of Land Specialist with the United Nations in New York.

IN 1955 Hadawi and Dr. Izzat Tannous, a fellow Palestine Arab refugee, established the Palestine Arab Refugee Office in New York. He is now serving the United Nations as Advisor of Palestine

Arab Refugee Affairs to the Permanent Mission of Yemen.

He was transferred to the Arab States Delegations Office as Chief of the Public Liaison Section in January, 1959.

Hadawi's vast professional experience has been augmented by his extensive travels in Palestine, Jordan, Lebanon, and the Syrian and Egyptian regions of the United Arab Republic and Europe.

Tech Graduate Goes Far In Work

(See Story, Page 5)

WARREN WINS

Best-Dressed Chosen

Marilyn Warren, sponsored by Kappa Alpha Theta, has been named best dressed woman on campus.

Second place went to Marilyn Carmack, sponsored by Horn Hall. Juathema Greeson, Zeta Tau Alpha, won third place.

Each coed wore a typical on-campus outfit, an off-campus sportswear outfit and a cocktail dress or formal.

CONTESTANTS were interviewed by judges and asked to comment on their clothes budget, what guided them in buying clothes, and on their basic color or basic dress.

Miss Warren is a senior elementary education major from Lub-

bock and president of Kappa Alpha Theta.

The contest is sponsored by Theta Sigma Phi, women's professional journalism fraternity.

PICTURES of Tech's best dressed coed will be sent to Glamour magazine for national competition in Glamour's contest. Winners will be announced in the August issue of Glamour.

Miss Warren told judges that she has been on a clothes budget since high school. Upon entering college, she revamped her wardrobe and has been adding to it since.

Her basic dress is red. "This may seem funny, but I can wear it seven different ways," she said. Miss Warren likes simple lines and dramatic colors.

HER ON-CAMPUS outfit was a navy and white houndstooth checked, light-weight wool skirt and blazer with a white cotton blouse.

She also modeled orange and mustard plaid wool capri pants with a mustard bulky cardigan. Her third appearance was in a black faille cocktail dress.

Miss Carmack said that she earns extra clothes money by working in Knapp Hall. Being on a clothes budget, she sews many of her own things.

WITH BROWN as her basic color she modeled first a slim-lined wool skirt and wesket with a black, brown and avocado plaid blouse. Her sports outfit was a camel cardigan sweater with a cotton blouse and camel bermudas.

White chiffon and lace over champagne taffeta was worn in Miss Carmack's last appearance.

Miss Greeson began her preparation for a college wardrobe in high school when she was placed on a clothes budget. Mix and match accessories are the way she achieves a flexible wardrobe.

MISS GREESON wore a gold plaid pleated wool skirt and jacket, olive green capri pants with a boat-necked overblouse and a silk cocktail dress of black and white.

Contestants were judged on ten different points including good figure and posture; clean, shining, well-kept hair; good grooming; a clear understanding of her fashion type and the way she managed her wardrobe and budget.

Other contestants were Diane Davis, Ethel Glasscock, Grace and Kathryn Flechtner, Karen O'Brien, Patsy Thompson, Paula Wilkerson, Pat Pate, Martha Kenley, and Beverly Jones.

JUDGES for the show were Willa Vaughn Tinsley, Home Economics School dean; Bill Childers, fashion coordinator for Dunlap's; and Loyce Copeland, sportswear buyer at Hemphill-Wellis.

BEST DRESSES SHOWN

... by Tech's Best Dressed Coed, Marilyn Warren.

Pitch Black Of Night Can't Dim Bridge View

The dark pitch black of night does not keep the speech department from its work.

Kerosene lanterns illuminated the stage Saturday night while cast members of "A View From the Bridge" rehearsed.

The lanterns, provided by an industrious stage manager, were necessary because of a temporary power shut-off in sections of the campus.

Characters playing major roles in the latest speech department

presentation are Eddie Carbone, Bob Nelms; Beatrice, his wife, Jo Fields; Catherine, his niece, Carolyn Calvert; Rudolpho, Bill Thornton; Marco, Tom Worstell; Alfieri, Lee Sullenger.

"A View From the Bridge" will be presented March 14-19.

Council Selects New Officers

Intrfraternity Council officers for the spring semester are Dick Toll of Sigma Chi, president; Pete Baker, Kappa Sigma, treasurer; and Glenn Woody, Sigma Alpha Epsilon, secretary.

Other members of the council for spring are Morris Scales, Delta Tau Delta; Bud Seward, Alpha Tau Omega; Dewey Bryant, Phi Delta Theta; Tom Cobb, Phi Gamma Delta; Kenny Cummings, Phi Kappa Psi; Larry Campbell, Pi Kappa Alpha; and Tommy Wilson, Sigma Nu.

Opportunities for Growth

...IN A GROWING COMPANY.

Capable young men and women have extra opportunity in a growing company serving a growing area. During the past twelve years, Texas Electric Service Company has increased its power generating capability to more than nine times that of 1947, has constructed more than 1100 miles of high voltage transmission lines and 2800 miles of distribution lines, along with related substation and other facilities, more than doubled the number of employees, and serves more than twice as many customers.

And the company is continuing to build its organization as it plans and constructs new electric transmission and distribution facilities to serve our rapidly developing area. New career opportunities are opening for qualified men and women.

Mr. George Hedrick and other representatives of Texas Electric Service Company will interview seniors.

Wednesday,
FEBRUARY, 24

Electrical and Mechanical Engineers

An appointment can be arranged through your Placement Office.

GEORGE HEDRICK, Texas Tech '48, is a distribution field engineer in Texas Electric Service Company's Fort Worth Division.

Retreat Features Case Studies

PORTRAIT OF ST. CLAIR REVEALED
... in new Industrial Engineering Building

John Anthony Brown, assistant to the president and former Dean of Men at Temple University, Philadelphia, Pa., will present a program of case studies on typical campus problems and their solutions on Tech's Board of Student Organization's annual retreat March 4-6.

Bob Honts, BSO president, said that the purpose of the retreat is "to compare the leadership problems of different campus organizations and to coordinate student-faculty relationships."

"THIS OPPORTUNITY to study with Mr. Brown will be a 'first' for student leaders in the Southwest."

Brown is a member of the American Management Institute, the American Political Science Association, and American College Public Relations Association.

He is listed in "Who's Who in the East," "Who's Who in Public Relations," "Who's Who in American Education," and is a member of Alpha Phi Omega, national service fraternity; and is national vice president of Alpha Chi Rho fraternity.

BROWN has had professional experience as political science instructor at Temple University, lecturer in the Woodrow Wilson School of Public and International

Affairs at Princeton University; associate director of Rittenhouse College, and as lecturer in the Cheltenham Adult Education School, Cheltenham, Pa.

James G. Allen, dean of student life, and Robert Hilliard, assistant to the dean of men, will attend the retreat in Cloudfcroft, N.M.

The retreat is limited to 80 persons, representing each of the campus organizations.

COST OF THE trip will be \$27.50, Honts said, and should be paid in Dean Allen's office.

Honts announced a meeting of the BSO March 1 at noon in the Tech Union ballroom to elect officers for next year.

Unveiling Highlights New Room

The unveiling of a portrait of O. A. St. Clair, former head of Texas Tech's industrial engineering department, highlighted the open house of the new industrial engineering quarters Sunday.

C. C. PERRYMAN, professor of engineering drawing, presided at the presentation in the O. A. St. Clair seminar room, which was dedicated during the ceremony.

A featured attraction of the open house was a demonstration of a closed circuit television system used for teaching engineering drawing, Tech's first equipment for teaching by TV. There are two lab rooms equipped for viewing, each room with four monitors and six speakers. This system will benefit 240 students.

THE NEW building has adequate facilities for 1120 students as compared to the 600 accommodated in the old building. The number of engineering drawing students has doubled in the last 10 years.

A new color scheme, better lighting, improved heating, and acoustical ceiling constitute some of the improvements in the new building.

Final Day Set For Applications

March 1 is the last day applications will be accepted for positions of editor and business manager for the Toreador and co-editors of La Ventana.

All applications must be made in letter form stating qualifications and previous experience and should be turned in to Phil Orman's office in Journalism 101.

Bell WOODCRAFT

SH 4-5245 3104 33rd

Dick Ernsdorff studies a microwave site-layout chart atop a mountain near Orting, in western Washington state. On assignments like this, he often carries \$25,000 worth of equipment with him.

Here, Dick checks line-of-sight with a distant repeater station by mirror-flashing and confirms reception by portable radio. Using this technique, reflections of the sun's rays can be seen as far as 50 miles.

He wears two kinds of work togs

For engineer Richard A. Ernsdorff, the "uniform of the day" changes frequently. A Monday might find him in a checkered wool shirt on a Washington or Idaho mountain top. Wednesday could be a collar-and-tie day.

Dick is a transmission engineer with the Pacific Telephone and Telegraph Company in Seattle, Washington. He joined the company in June, 1956, after getting his B.S.E.E. degree from Washington State University. "I wanted to work in Washington," he says, "with an established, growing company where I could find a variety of engineering opportunities and could use some imagination in my work."

Dick spent 2½ years in rotational, on-the-job training, doing power and equipment engineering and "learning the business." Since April, 1959, he has worked with microwave radio relay systems in the Washington-Idaho area.

When Dick breaks out his checkered shirt, he's headed for the mountains. He makes field studies involving micro-

wave systems and SAGE radars and trouble-shoots any problem that arises. He also engineers "radar remoting" facilities which provide a vital communications link between radar sites and Air Force Operations.

A current assignment is a new 11,000 mc radio route from central Washington into Canada, utilizing reflectors on mountains and repeaters (amplifiers) in valleys. It's a million-dollar-plus project.

"I don't know where an engineer could find more interesting work," says Dick.

* * *

You might also find an interesting, rewarding career with the Bell Telephone Companies. See the Bell interviewer when he visits your campus.

BELL TELEPHONE COMPANIES

Dick stops by the East Central Office building in Seattle to look at some microwave terminating equipment. It's involved in a 4000 megacycle radio relay system between Seattle and Portland, Oregon.

In the Engineering Lab in downtown Seattle, Dick calibrates and aligns transmitting and receiving equipment prior to making a path-loss test of microwave circuits between Orting and Seattle.

The Ghost Writer

Opportunists seem to exist in all professions; a certain letter was mailed to various Texas Tech students following the death in Silverton of the three Texas Techsians. We thought we might pass it on just for kicks.

Hi!

All of us have been sobered this past weekend due to the tragic deaths of the three fellows. As a pastor of one of the Baptist churches in Lubbock, I found that it disturbed me terribly.

Sunday night after the evening service, I was sitting watching television with a peanut butter sandwich in my hand when the thing hit me again. I came to the church and checked my list of Baptist students enrolled at Tech. Sure enough, one of the boys was listed as a Baptist; but, he had not joined a church, nor was he enrolled in any of the organizations of a local church. Man, did that prick my conscience!

Therefore, since I find that according to the Baptist Directory issued by the B.S.U. office, you have not joined a local church — I wanted to write you a note to express my interest in you and to invite you to attend our services, join our church, or to urge you to get in the middle of things at one of the other local churches.

Nothing would please me more than to know that you had found a church home here in Lubbock, and nothing would thrill me more than to be your Lubbock pastor!

This tragic incident can become a blessing if it will help you and help me to come to a new commitment of our lives to Christ. For me, it has already! What do you say?

Sincerely,
Bob Hearn

P.S. We have a yellow bus marked "Second Baptist Church" that leaves for our church every Sunday morning and every Sunday night. It is not fancy but it has plenty of personality, and so does the fellows and gals who ride it each Sunday. They would join me in saying, "Welcome aboard!"

This letter was received from Robert J. Hearn, pastor of the Second Baptist Church at Elgin Ave. and 54th St. and was sent to Baptist Students not affiliated with a church in Lubbock.

We shall refrain comment on this letter — we don't feel it deserves any. However, Tech students should be able to read certain meanings between the lines.

Serving Texas Tech Since 1925

A THOUGHT FOR TODAY—This world does not have an unlimited amount of space for an unlimited amount of people. The laws of nature have a statute of limitation. There are those who choose to ignore them for which all of us have to pay. —W.R.S.

Greco Appears Next Month

Congratulations to the Tech Union Board for its decision to contract Jose Greco for a March 6 appearance at the Lubbock Municipal Auditorium. The Sunday afternoon performance should prove quite a treat to Techsians as well as Lubbockites.

The signing of Greco was not done without some discussion — and mild opposition was given by a couple of members who pointed out that his presentation might be too "cultural" for Techsians. They pointed out that some "more popular" entertainment might be better.

The Tech Union Program Council looked into the matter and found that the popular Kingston Trio definitely was not available. Some which could have been contracted were the Billy May Orchestra (without Billy May), the Jan Garber Orchestra and Kai Winding and the Accidentals.

With these facts, the Union Board voted unanimously to accept Greco.

Actually, there were two other facts to consider before a decision could be made. First, should money be taken out of the special Board Fund in order to book the Greco company? Second, would a Sunday afternoon, the only open date in Greco's tour, be an advantageous time for the performance?

It was disclosed that the money from the special events fund must be used each year or be lost for Union events, and perhaps a Sunday afternoon would prove a highly satisfactory time for the production.

Since the group is on tour and will be coming through West Texas, it can be contracted for \$2,000 instead of its usual \$3,000 booking price.

Now, the important problem is just how Tech students will accept Greco and his group. Unless Techsians show some enthusiasm for attempts by the Union Program Council to bring top entertainment to Lubbock, the Council may decide upon attractions inferior in quality in order to save part of the special events money which would go into the building fund at the end of the year.

Special events of this sort are needed at Texas Tech, but they are brought here for the student and if the students don't show their appreciation, then who will?

DOROTHY BOWLES
Editorial Writer

Techsians Talk

Students Defend Haley, Blast 'Ghost Writer'

Editor:

Your bitter attack on J. Evetts Haley and American Mercury Magazine in Thursday's Toreador was the most disgusting editorial I have come across in my three years at Tech. Your criticism of Mr. Haley because of his conservative political views and his opposition to the continued increase of socialism in this country is completely unjustifiable.

First of all, your attack on American Mercury is ridiculous. S.M.U. owes the American people an explanation, and vehement criticism of American Mercury and J. Evetts Haley has not supplied this explanation. I have read the article in question, and it is carefully documented as to where the information was obtained. Instead of resorting to "mud-slinging," I believe that the officials at S.M.U. should at least attempt to correct this situation. Along with J. Evetts Haley, I think it is time for a "house-cleaning" at S.M.U.

As to your statement regarding possible advantages of communism, I doubt that very many Americans would support your plan to "think differently from the norm" if this thinking differently consists of supporting the people and ideas that have set out to destroy our way of life. If, in your opinion, a person has to be a communist sympathizer to be "different," then I think you are writing editorials in the wrong country. And if communism is not a clear and present danger from within as well as from without the United States, then our country has never faced a danger.

In closing I would like to say that one of the most tragic facts of American life is that there are all too few men like J. Evetts Haley. If all Americans would fight for their country as he does, then communism would not stand a chance.

Bill Beckham

Editor's Note: The preceding letter pertains to "The Spastic," Arthur Mayhew's weekly column for The Toreador.

Editor:

We feel, like most Tech students, that Tech has a fine newspaper for covering news items and articles of interest. We, however, are writ-

ing because of a certain column or two that seem mostly to be the expressed opinions of their creator. A certain P.J.N. seemed to enjoy writing his opinions last semester. This semester we have not seen his marks of identity on any columns, but a certain Ghost Writer sounds just like him.

We shall admit that we are not newspaper men and do not know much about column writing, but we as readers do know what readers do care about reading. We feel that columnists should write on subjects that have some basis, not just personal opinions and ideas. If a columnist wants to write on some subject, he ought to get some outside ideas from the public.

The certain P.J.N. who "stated that he was a drunkard" and wanted to go out, drink on Saturday night until he could fly and sleep on Sunday morning, has his choice of doing so. We, as the reader don't give a "hoot" about his social life and feel this is not the type of writing to be put before the student body or anyone else who might read The Toreador.

While reading the Avalanche-Journal we saw the attached clipping and immediately thought of our dear columnist, The Ghost Writer.

The Ghost Writer stated in his column Tuesday, Feb. 16, that he was irritated because he couldn't find any music on the radio on Sunday morning. He complains because religion uses only about four hours on the radio out of an entire week — and on the Lord's Day at that. Radio stations are not necessarily trying "to make everlasting friends of the public," they are merely trying to earn a living and are hired for "setting up microphones and other equipment in churches" which causes a lot of trouble.

It seems odd how most newspapers will not print letters written to the editor unless they are signed but yet they will print columns, excluding news stories, that are not signed.

The editors and staff may feel that people who talk back to a newspaper are "members of some sort of lunatic fringe," but we feel they are merely active citizens taking part in a democracy. Can you honestly say otherwise?

WORKS FOR DUPONT

Grad Sees World

by **RON CALHOUN**
Toreador News Editor

William T. George, who graduated from Texas Tech in 1942 with a BS degree in textile engineering, is living proof that his field can get you an exciting, plus a profitable job.

GEORGE, an account manager in Textile fibers for DuPont, visited his old alma mater Monday while on a current around-the-world business trip.

Actually he started at Tech in 1935 but did not graduate until 1942. "I had really intended to become a lawyer," George said, "but I had to work part time and needed to be in some field by which I could make a living while going to law school.

"**MY GOAL**, then was to make \$5,000 a year. Today I am making more than three times that much as a textile engineer," he said.

Today, George lives in Geneva, Switzerland, with his wife and five children. From Geneva he travels for DuPont to the different countries in the British Commonwealth, Ireland and the Philippines.

"**MY CURRENT** agenda took me from Geneva to Karachi, Pakistan, where I spent two days talking to company representatives. Actually we do not sell directly to the buyers but to companies which do the selling for us.

"From Pakistan I flew (by strata-jet) to Bangkok and then to Hong Kong where I spent four days. Then I flew to Manila and spent a week. From there I went to Australia where I spent one week in Sydney and ten days in Melbourne."

FROM AUSTRALIA, George flew to Sweetwater here in Texas where he has been visiting his father. He is originally from Roby near Sweetwater.

Drawing a parallel between some of the countries in which he has worked George compared Tex-

as to some of the areas he has seen in South Africa and Australia.

HE ALSO commented on the racial strife in South Africa. "The whites cannot last much longer there under present conditions. The blacks are practically slaves and the whites live in mortal fear. They bar their windows and keep huge dogs to guard their houses."

DuPont, according to George, is the world's largest producer of the five synthetic fibers — acetate, dacron, nylon, orlon and rayon.

"**THE PRODUCTION**, selling and marketing of these synthetics present unlimited opportunities for the future textile engineers," he said.

George discounted a common misconception that synthetic fiber production is hurting the cotton industry. "Actually a marriage of the fibers, such as cotton and dacron, makes a better cloth than either one by itself."

He will stay in Switzerland for approximately three years. After this time DuPont will turn the operation over to Swiss employees.

DUPONT ENGINEER AND TECH PROFESSOR DISCUSS TEXTILE POSSIBILITIES

William T. George (left) tells Prof. L. E. Parsons of travels

Machines Improve Textile Department

Improved spindle machines that turn out 12 million yards of yarn per week are some of the new additions to the textile engineering department.

Seminar Slated For Saturday

Harold O. "Bus" Carlton, Washington, D.C., will be principal speaker at a Driver Education Seminar slated 9 a.m. to 3 p.m. Saturday at Tech. Carlton is educational consultant for the American Automobile Ass'n.

The seminar for driver education teachers in South Plains public schools, will be in room 206, men's gym. Dr. John Cobb, Tech associate professor of health, physical education and recreation, is seminar coordinator. The latest ideas for driver education and testing devices will be discussed.

The equipment in Texas Tech's new textile engineering department is equal to any modern cotton mill in the United States today.

The weaving lab has four new machines, while the spinning lab has better arranged to increase production. The new spinning frames, with ball-bearing spindles, have increased production and improved the quality of yarn.

The new rooms have complete temperature and humidity control and can duplicate any atmospheric condition. The automatic control is left on 24 hours a day, seven days a week.

The building, with no windows, is completely fireproof.

Approximately one bale of cotton per day can be processed. The purpose of the mill is to demonstrate that Plains cotton can be utilized for all manufacturing purposes.

A Brooklyn College Professor has established a science in which almost everyone is an authority. He calls it the *Science of Thermodynamics* — the study of "the innate Cussedness of things." The laws of *Thermodynamics* are many and varied. Classic is this one. A spoon always sends grape fruit juice in one direction. And another, Light a Cigarette with your last match and the wind blows. Does this one sound familiar? Drop a pen with the cap off and it will land on its point.

We can't keep the Grapefruit Juice from squirting in your eye, but — we can do something about your pen point. If you have a damaged pen bring it by.

Dean Thomas Presides Over Ag Conference

An agribusiness conference will be held today at Howard County Junior College in Big Spring with Dr. Gerald Thomas, Texas Tech agriculture dean, presiding.

IN THE MORNING session, government programs and the livestock industry will be discussed by John G. McHaney, Texas A&M extension economist from College Station.

Earl Sargent of Wichita Falls, KWFT farm director, will speak on the importance of public rela-

tions and communication in agriculture.

JOE BELL, Colorado City Record publisher, will open the afternoon session with a talk on "The Importance of Agriculture to the Economy of Our Area." A look at the future of farm labor will be taken by Henry LeBlanc of the Texas Employment Commission, Austin. Dooley Dawson, vice-president of the Bank of the Southwest, Houston, will speak on the future of agribusiness in West Texas.

The conference will close with a panel discussion on agribusiness, moderated by Dean Thomas.

Lubbock Leads In Enrollment

Lubbock County again leads the fall enrollment of Texas Tech with 2,427 from the city and 2,545 from within the county, according to the Registrar's Office.

THE NEXT largest contributor is Dallas County, with 509; followed by Tarrant County (Fort Worth), 337; Harris County (Houston), 306; and Potter County (Amarillo), 208.

Other counties represented include: Midland, 166; Taylor (Abilene), 130; Hockley (Levelland), 119; and Wichita (Wichita Falls), 103.

Panel Throws Light On Iranian Life

A panel discussion on life in Iran will highlight a meeting of the Cosmopolitan Club at 7:30 p.m. today in the Recreation Hall.

Four students from Iran will make up the panel. They are Mehdi Vossoughi, junior engineering major from Tehran; Ali Akbar Afsharian, freshman engineering major from Shiraz; Ebrahim Ghara-coulchian, sophomore engineering major from Shiraz; and Hosian Kanimi.

The panel discussion will be supplemented with artifacts symbolizing the Iranian way of life. Trinkets and replicas from the Middle

Eastern country will also be displayed.

Discussion will center around political and religious ideologies with some comment being made on the current Arab-Jew disputes.

The Cosmopolitan Club is a Texas Tech organization for foreign and American students who are interested in life and customs abroad.

There will be no admission charged and the public, members and persons interested in Middle East-United States relations are invited to attend.

Even Virgil
is with the Winston beat

I Sing Of Arms And Like **FILTER-BLEND**, Man,

For if you dig a modern filter cigarette
It figures that it's what's up front that is the most
Like pure Flavorsville, orbit stuff, and all that jazz;
And only Winston swings with **FILTER-BLEND** up front,
A real gone combo of golden, rich tobaccos
Selected and processed like for filter smoking;
That's why, dear cats or even squares, it's understood

Winston tastes good like a cigarette should!

Dorms Keep Check On Male Students

A method for keeping closer tabs on the students in the men's dorms has been devised by the offices of the Dean of Men as a result of the recent tragedy at Silverton.

According to this plan the dorm counselor is required to check up on any student who has missed three consecutive meals. In addition, cards and boxes will be placed in dorm lobbies where students leaving on trips can voluntarily leave information about their destination with the dorm counselor.

Since "signing out" is not compulsory for male students, this is not a fool-proof method. Concerning the situation Dean of Men

Lewis Jones somberly stated, "It is almost impossible to keep check on every male student in college."

Periodic checks have been kept on the students in the past when meals have been skipped.

Mail Your Annual?

Students who will not be in Tech this fall, and would like their La Ventana mailed to them, are asked to leave their address and a mailing fee of \$1 in room 101 of the Journalism Building. The annuals will be distributed in September.

Big Weekend Of Sports Scheduled For Campus

If, after next week end, someone claims Texas Tech didn't have the busiest campus athletically speaking, he won't get any dispute from Red Raider officials. They'll probably be too weary to argue.

IN A SPACE Of 33 hours, beginning at 1 p.m. Friday, there will be three high school regional basketball tournaments involving 14 games, a varsity cage game, a freshman contest, a football coaching clinic, and an inter-squad grid exhibition.

Region One, Conference 3A, gets the high school action started at 2 p.m. Friday in the Coliseum as Brownwood plays Monahans, followed by Lamesa and Dumas. The

two losers meet Saturday at 2:30 p.m., the winners at 4 p.m.

COMPETITORS IN the Region 1A and 2A tournament Saturday will be survivors of this Tuesday night's bi-district play.

Conference 1A pairings pit the Sudan-Idalou bi-district winner vs. Plains-Slaton winner at 8 a.m., the Sunray-Lefors winner vs. the Junction-Marfa winner at 9:30 a.m., with the champion game set for 7:30 p.m.

IN CONFERENCE 2A, the Post-Seminole winner meets the Cisco-Granbury winner at 11 a.m., followed at 12:30 p.m. by the Dimmit-Abernathy winner and the Childress-Hamlin winner. Title

contest is at 9 p.m.

Texas Tech basketball teams take the floor Friday night. The freshmen meet the Wayland College frosh at 6 p.m., followed by the varsity against Texas A&M in a game that could make or break the Aggies' Southwest Conference title hopes.

Meanwhile, back at the new athletic office building, Hank Stram of the Dallas Texans and Warren Woodson of New Mexico State will be guest lecturers at a football clinic that starts at 1 p.m. Friday. Sessions will also be held Saturday, which will feature the intra-squad game at 2 p.m.

FACES IN THE CROWD—Dick Campbell, Bob Davis and Mike Humphrey, (L-R), starters on the Midland High School basketball team, watch the action in Saturday's contest between Texas U. and Texas Tech. Midland (29-0) meets El Paso Austin in Midland tonight to night for the bi-district championship. (Staff photo)

TCU Frog Nine First Tech Foe

The Texas Tech baseball season will get into full swing March 8 when the varsity squad meets Texas Christian at Fort Worth.

"Team work-outs began Feb. 15 with 22 men reporting to varsity practice," Coach Beattie Feathers announced. Joe Reaves, team second baseman, is in charge of daily drills.

According to the coach the probable starting line-up will be as follows: Elton Howard, catcher; Bruce Boyd, first base; Joe Reaves, second base; Tommy Prichard, third base. The outfield will consist of Ken Warren, left field; George Gibson, center field and Bill Dean, right field.

Pitching duties will be in the hands of Charles Flanagan, Woodrow Johnson, Zan Miles and Roger MacEvans. Del Ray Mounts, Tech basketball star, will also join the pitching staff after basketball season is completed.

FROM THE SIDELINES

by CHARLES RICHARDS

The 1959-60 Intramural basketball race at Texas Tech is quickly drawing to a close, but a glance at the next few games on the schedule gives an indication that the best is yet to come. Take the Fraternity League for example.

Kappa Sigma is leading the league with a 7-0 mark. Tonight they play Pi Kappa Alpha (5-1). Should the Pikes win here, and it certainly isn't out of the realm of possibility, three teams will have one loss on their record. Phi Gamma Delta (7-1) is idle tonight, but they meet the Pikes Thursday night. It looks like a tight race all the way.

★ ★ ★

The Dormitory A League finally has an undisputed leader. Gordon Hall (4-1) edged ahead of Sneed Hall last week while the latter was idle. Sneed (3-1) is the only team to defeat Gordon, doing so the first week of the season. The rest of the field is pretty well evenly matched. All have identical 2-2 records.

Over in the Independent No. 2 League, the Sports Club has just about nailed down the top spot with their unblemished record. The Trojans and the Church of Christ group still have a chance, but it looks like the sportsmen all the way.

★ ★ ★

Pairings for the All-College Championship tournament have been released. The two determined league winners, Dorm 8-B and the Chinese Bandits, will start the play. The fraternity winner will meet the dormitory champs in the other first round game, with the winner of the match going into the finals. The Independent League No. 2 champion will have a bye the first round, and meet the Independent No. 1-Dormitory B winner in the semi-finals. The date of the tourney hasn't been set yet.

★ ★ ★

Softballers still have another week in which to enter teams in the intramural league races. Dormitory and independent team managers are meeting in Men's Gym at 5 p.m. today to discuss their schedule and plans.

★ ★ ★

This issue marks my first attempt with this column. My primary purpose is to expound on intramurals although occasionally I may stray to other subjects. This column, although it is scheduled for publication once weekly, depends upon how you, the reader, like it. If you have any criticism, good or bad, drop a letter to the sports department; I'll appreciate your response.

Eaton's Corrasable Bond Featured At The Texas Tech College Bookstore

No telltale traces...

EATON'S CORRASABLE BOND Typewriter Paper

It's easy to flick off your mistakes on Eaton's Corrasable Bond. Make a pass with a pencil eraser and typing errors are gone—like magic—no error evidence left. Corrasable has an exceptional surface—erases without a trace. Once does it—there's no need to retype. Saves time; money, too. The perfect paper for perfection—erasable Corrasable.

Eaton's Corrasable Bond is available in light, medium, heavy weights and onion skin. In convenient 100-sheet packets and 500-sheet ream boxes. A Berkshire Typewriter Paper, backed by the famous Eaton name.

R ALPH'S RAMBLINGS

by
Ralph W.
Carpenter

The officiating at the basketball game Saturday night was rotten. Officials Bill Johnson and Odell Preston let the game get out of hand completely. You can't blame the Texas cagers; they couldn't help it if the officials had cork in their whistles.

Sure, the Raiders fouled too, but the officials wouldn't call a foul on them either. In fact, they didn't call too many fouls on anybody. It was a free-for-all from the word go. It is amazing that someone didn't receive a bad injury during the more heated battles.

Our Raiders weren't supposed to win—we realized that—but they didn't stand a chance against the officiating in a losing cause. No wonder the fans ranted and raved about the officiating—they had a right to.

We realize that someone will yell "sour grapes" at us for expressing our opinion about the officiating in a losing cause. However, if they were at the game they know what we are talking about here.

Dammit, we don't mind losing, but getting robbed is different.

—RWC—

Right now it looks like Texas has a great chance to win the SWC. They are a big team with plenty of shooting power and skill. Southern Methodist and A&M play tonight and the Longhorns will be alone in first place with one of them when it's over.

Since the two play in Dallas, we're going to pick the Mustangs to win over the Aggies tonight. Texas should have no trouble in whipping Baylor, especially at Austin.

Frankly, we hope the boys from Austin take the crown. You have to give a lot of credit to the team and their fine coach, Harold Bradley. If you remember, this same group of Longhorns rolled over and played dead last season. Bradley has done wonders this season.

Of course, his material hasn't been the worst in the Conference. Guys like Jay Arnette, Brenton Hughes, Jimmy Brown, Al Almazzo and Wayne Clark don't grow on trees. However, it takes a little of each—players and coaching—to win the big games.

—RWC—

Texas Tech's footballers romped through a spirited scrimmage game Saturday afternoon at the track field. The team looked good in spots and not so good in others. Of course there was no definite first or second team Saturday. All of the players got in on the action and seemed to enjoy it.

The running of Dan Gurley, Jim Williams and Virgil Wilson looked good to this writer. They moved the ball well and seemed to know where to go at the right time.

Several freshmen backs stood out, too. Guys like Coolidge Hunt, Johnny Lovelace, Jay Byrum and Larry Tipton may prove to be a shot in the arm for Raider football.

The Raider coaching staff did a good job in handling the large squad Saturday. They had some six teams in uniform and it wasn't easy to give every man an equal shot at action. They did it though—and well.

The good Lord willing, Tech may be on the way back into big time football.
