

Institutions Challenged

Tech Fans New Spirit For Exes

With racoon coats and flappers setting the theme, the spirit of Homecoming is spreading rapidly across the Tech campus.

The largest student body in the history of Tech—8,866 students—will be on hand to welcome the exes returning from all parts of Texas and the surrounding states.

Activities will begin today with freshman convocation at 7:30 p.m. in the Union Ballroom. The homecoming queen coronation and pep rally will commence at 7:30 p.m. Friday at Saddle Tramp Circle.

WITH 25 floats carrying out the "Roaring Twenties" theme, the annual parade will begin at 10:30 a.m. Saturday.

The parade floats will line up on Main St. between Avenue Q and L. It will move east to Texas Ave., south to Broadway and then west to the Tech campus. Floats will be parked in the Ad. Bldg. parking lot where a float representative will stand by for halftime instructions.

At 2 p.m., the exes and students will gather to watch the Red Raiders and Houston Cougars battle in Jones stadium, and then climaxing Tech's 30th annual homecoming, there will be a dance, featuring Buddy Morrow and his "Night Train" orchestra.

The exes will hold their dance in the National Guard Armory at the same time.

FEATURING two 12-foot figures of a "Roaring Twenties" coed and her date and lesser figures scattered about, the decorations at the student dance will carry out a Varsity Drag game theme at the coliseum.

This theme will call attention to Tech's earlier years, when the institution opened in 1925 with 914 students. The first graduating class, athletic teams, and many Tech traditions were products of the late twenties.

Rally to Reveal Queen's Name

The Homecoming Queen for Tech's 30th annual Homecoming will be announced at 7 p.m. Friday at the Southwest Conference Circle.

The queen, who was elected in Wednesday's election, but hasn't been announced, will be taken from a field of ten entrants.

THOSE vying for the honor are Gail Petersen, Shirley Stephens, Sandra Hendrix, Ellen Edwards, Delia Close, Ruth Sewell, Annette Rose, Janis Jones, Deana Ward and Jean Gilliland.

The queen will be presented at the halftime of the Tech-Houston football game Saturday afternoon at Jones Stadium. Kickoff time is 2 p.m.

At the pep rally the newly chosen Homecoming queen will light the bonfire.

On hand to lead the yells will be Tech's cheerleaders.

... Jeannie McMurry works on Weeks display

Cotton Maid Contest Extends Entry Deadline

The deadline for Maid of Cotton Contest entries has been extended, announced Bob Paul, Lubbock Chamber of Commerce. A definite deadline has not been set.

Preliminary judging for the contest will begin Nov. 23 at the Lubbock Country Club. It will be climaxed with the naming of the 10th Maid of Cotton in public ceremonies at the Municipal Auditorium Nov. 24.

JIMMY DORSEY'S Orchestra, under the direction of Lee Castle, will provide music for the Maid of Cotton Ball at the country club Nov. 23.

Fourteen entries have been received by Roy Forkner, chairman of the contestant committee.

Tech coeds entered are Pamela Hearn, Carolyn Symes, Shelley White, Julia Jones, Mary Lynn Peveito and Jane Adamson, all of Lubbock, and Enna McDaniel, Amarillo.

ENTRIES attending West Texas State College are Elizabeth Pearce, Abernathy; Patricia Dayley, Plainview; Nadyne Faulken-

Booster Tags To Lift Spirits

Two thousand Raider-red booster tags with "Tech Beat the Cougars" imprinted in bold black will be distributed by the Sportsmanship Committee of the Student Council.

They will be given out in each dorm and at the Tech Union Friday and Saturday.

berry, Seagraves; and Linda Sue Smith, Hereford.

From South Plains College in Levelland are Judy Hendrix and Nina Haven.

Cassandra Hood, Levelland, completes the entries received thus far.

Lecturer Discusses Churches, Colleges

by ELLEN VENABLE
Toreador Staff Writer

Dr. Elton Trueblood in his Tuesday and Wednesday Willson lectures said that colleges and churches of today could be the anti-erosion forces to uplift society, their responsibility being to set the standards of society.

Sale Starts For Tickets

Tickets for the annual La Ventana beauty contest, slated for the Lubbock Municipal Auditorium on Dec. 5, are on sale in the Journalism Bldg.

Seats may be purchased on Mondays, Wednesdays and Fridays in Journalism 206. On Tuesdays and Thursdays, the tickets may be bought in J-101. All tickets are 50 cents.

SPONSORED BY Sigma Delta Chi, national men's professional journalism fraternity, the contest will pick a successor to Janis Norris, Odessa junior, who won last year. The winner will be featured on the front of the 1960 La Ventana's "Mademoiselle" cover.

Also to be selected will be Miss Playmate, who will be given a fold-out page in the Playboy section of the annual.

The new queen and her court will be hosted by Sigma Delta Chi and La Ventana at Hondo Ski Lodge in New Mexico the Christmas holidays.

There is no limit to the amount of girls an organization may enter. A \$1 per entrant fee will be charged.

Dr. Trueblood's third Willson lecture drew approximately 1200 townspeople, faculty and students to the Lubbock Municipal Auditorium Wednesday.

The attendance has steadily increased since the first lecture of the series Monday when the audience was estimated at 800. Tuesday's audience numbered 1100 with the largest turnout of students coming Wednesday.

In Wednesday's lecture, "New Life in the Church," Dr. Trueblood said that the college and the church are "lifting societies" that combat the "erosion" in our lives.

See Pictures, page 5

"Interest in the church in all phases of life is the unique thing about American life," he said. "Too many attend public worship as mere observers."

THE ATTITUDE that the clergy is a professional occupation is debasing. It puts the people in the role of the consumer, buying a wedding . . . or Sunday school for the kids."

The greatest hope for the church is when it is seen as a penetration of society, when the average man sees that he himself is in the ministry of God, Dr. Trueblood concluded.

THE LECTURE TOPIC Tuesday was "New Life in the College." Dr. Trueblood declared that the college graduate must be more than one who has merely added up academic credits.

"College exists to help men and women know what is excellent, to raise the general standard of taste to be dissatisfied with the shoddy and to lift the level of hope," he said.

Trueblood noted that too many secondary school people confuse the philosophy of "equality of opportunity" in democracy with passing the mediocre and poor students along with the good ones.

"IF WE ARE to have a new life in the college, we must begin to recognize the differences in abilities," he declared. "You cannot have a real democracy unless you have a conscientious aristocracy where responsibility is given to the people we have the most reason to trust."

The noted philosophy professor led a question and answer period in Weeks Hall Tuesday night. Commenting on the discussion during the Wednesday lecture, Dr. Trueblood said the questions were "the most decisive and intelligent I have ever heard in a college community."

The last in his series of lectures, "New Life for the Individual" is to begin at 10 a.m. today.

TECH - HOUSTON (1959)

??

The Spastic

by
Arthur
Mayhew

While tripping to class this week, we were almost brained by a flying pod off one of those overgrown mesquite bushes called a Honey Locust tree (we Latins use the proper term, *Gleditsia triacanthos*). This was the second time one of those chlorophyll monsters has scared me.

Once before a light breeze rattled the beans in the pod, bringing forth a sound somewhat akin to a rattlesnake bent on striking. We felt rather foolish jumping up and down and beating one of those vicious brown pods, but we're a member of that clan that believes in acting first and asking questions later.

In retrospect, we might say that we have always been amazed each semester to see what landscaping jokes have been perpetuated on campus.

We watched with more than usual interest the workings at Weeks Hall last spring. It took a whole army of workmen a month to uproot trees, move them over a yard and plant honey-suckle bushes by the trainload. To us, the coup de grace was the brick extensions to the sidewalk in front of Weeks. We see little good in that because the lovers still stand in the flower beds.

Scanning the campus briefly, we do want to thank whoever is responsible for removing those purple, fuzzy weeds from around the parking lots at Drane and Horn.

We understand from a reliable source that they (the purple whatcha-ma-callits) were reaped late last week and will be milled and made into Grape Cake for the dorm menus in the near future. The hay fever sufferers also breathed a sigh of relief — literally — when the bushes went.

There are little clumps of jungle-like growths spread over the campus, especially near the President's Home. However the trees came in handy last spring as outposts for snipers and observers.

One of the bigger horticulture goofs has to do with the Blue Spruce trees spotted around campus. Several instructors trekked into the mountains and dug up the spruces. They planted them only to discover that the infamous West Texas wind breaks off the tops and leaves the trees malformed.

And, there is definitely someone (or a group of someones) who is handy with a common garden hoe. One of their tasks is to hoe back all the grass at least six feet on each side of the sidewalks, giving the appearance of bargain day at a barber college.

But, all is not bad. Also planted on the campus are crab-apple trees which produce colorful blossoms, a fragrant odor and tiny apples which can be made into jelly (—for the grape cake maybe?)

If one sorority had its way, we'd be up to our ears in pine trees, but luckily, Mother Nature manages to stifle their efforts usually.

Needless to say, we have been experimenting with plants also. We have one of the largest Venus Fly-Traps ever grown in captivity, and it continues to grow. We pay our roommate to feed it but we guess he got mad about the poor salary; I haven't seen him in a week — and my plant is grinning.

LITTLE MAN ON CAMPUS

"NAW, THAT ISN'T HIS LETTER SWEATER — THAT'S HIS GRADE AVERAGE."

TOREADOR

EDITOR Tom Schmidt
MANAGING EDITOR Arthur Mayhew
ISSUE EDITOR Jim Walsh

The Toreador, official student newspaper of Texas Technological College, Lubbock, Texas, is regularly published each Tuesday, Thursday, and Saturday morning during the two long terms, excepting holidays, by students of the College as an expression of campus news and student opinion only.

The Toreador is financed by a student services fee, advertising, and subscriptions. Letters to the editor and columns represent the views of their writers and not necessarily those of the Toreador. Letters must be signed, but may be published with initials in justifiable instances. The views of the Toreador are in no way to be construed as necessarily those of the administration.

Entered as second class matter at the Post Office in Lubbock, Texas, under the act of March 3, 1879.

TOREADOR

Serving Texas Tech Since 1925

A THOUGHT FOR TODAY — God created woman. And boredom did indeed cease from that moment — but many other things ceased.

—F. W. N.

Ugly Marks Show Immaturity

A justified complaint has come lately from building custodians about the large amount of writing on walls and classroom equipment on the campus.

Writing, of course, is a popular means of self expression. Early man first communicated this way on the sides of caves and later learned to preserve his ideas by etching and painting them on the walls of temples, religious monuments and the like.

When papyrus became the rage, its advantages were so obvious that the royal Egyptian artists and stone masons were soon out in the cold, or in the hot Sahara desert, depending on how you see it.

Lately, young students, not mature enough to go into the outside world so they were sent to college, have been trying to set back the walls and desks of Tech 2,000 years.

These modern day hieroglyphics range in content from personal names and home towns to outright filth.

These are not the marks of higher education students, but persons thinking they have come to a secondary high school.

Tech is visited by many out-of-towners each day. Some of them are dignitaries from other schools or legislatures, but most of them are relatives of Techsians. Nothing amazes these outsiders more than seeing the same juvenile vandalism they noticed in their little school back home appearing here in a large college.

One popular aspect of this problem is the little clan which enjoys keeping its mind in the gutter. It prides itself on thinking it is the only group with the knowledge there are two sexes and is hurrying to spread the news on desks, walls and even school event placards. They fail to realize that their off color garbage can be offensive to friends and parents visiting Tech as well as students themselves.

Also, it isn't easy for the men and women who have to do the cleaning up. Caustic ammonia is the only cleaner able to penetrate the porous classroom walls to remove ink. Expensive sanding and refinishing are needed to smooth out the indentations carved into desks. These same marks are murder to write on. Finally, all these expenses have to be shared by the students.

Expressing ourselves is a good and healthy thing, and nothing is more essential in maintaining a growing democratic culture. But when we waste our time abusing this privilege, we hurt others besides allowing ourselves to remain stagnant.

JIM WALSH
Toreador Issue Editor

Tolley Rebukes Alcoholic Beverages

Dear Editor:

I'm new here at Tech, but, find myself compelled to speak on the alcohol issue. Your columns and editorials are expressing ideals which are completely contrary to those which I hold about the drinking problem.

THE ONLY JUSTIFICATION that I see for one to drink is that of pleasurable sensation. And many of my drinking friends assure me that this is not their reason—they drink to be sociable.

On the other hand, scientists, doctors, clergymen, social workers, law enforcement officials, mental health authorities and insurance companies have all come to the overwhelming opinion that drinking of alcoholic beverages leads to immeasurable destruction annually. The facts are available to support the opinion. And I sincerely believe that most of us are aware of this.

So, what price shall we pay for "pleasure?" Who are the bootleggers' buddies? How do you justify civil law?

IT SEEMS TO ME that Prohibition is an opportunity for people to rid their community—or nation—of a very obvious scourge. But, prohibition requires sincere effort and cooperation. Those of us who feel that I do, believe that any decrease in the consumption of alcoholic beverages is a step toward "building of the Kingdom of God, here on Earth."

As long as alcoholic beverages are freely produced and marketed, we all are harmed by this destructiveness. Prohibition can be as effective as a vaccination is against any other scourge.

Sincerely,
Richard E. Tolley

Editor's Note: To answer your questions in paragraph four in the order asked: (1) \$8 per fifth in Lubbock, (2) the people who vote wet; buyers are merely victims of circumstances, and (3) in Texas, we don't justify civil law, we just try to live in spite of it.

Dear Editor:

Congratulations. Once again a staff writer has cast the nearly 9,000 individuals of the Tech student body into a singular mold, insulted and belittled the integrity and intelligence of the constituents, and escaped unharmed.

But no wonder, as the majority (or was it all?) of the students you "interviewed" were "liberal" education majors. The same type that wants to drop Technological from our name. And perhaps they would benefit by a name change, because then there is a possibility that some could get jobs on the snob appeal of the name of their alma mater.

Heaven knows they won't on their own intellect or ability. The following is an excerpt from one of my recent quizzes: "For the benefit of all possible investigating committees, I hereby swear that this quiz was not rigged _____."

Sincerely,
Arion Groves

Problem Solved

Said the prof to the student
With a most plaintive woe,
"I have a problem in class.
The grades are much too low."

"I do not know what to do,
I've taught all that I can.
Yet after each quiz I find
They've flunked it to a man."

Said the student to the prof
With a mischievous air,
"This burden is not so new,
Nor you the first to bear."

"If the problem is too hard,
Of its weight you'd be rid,
This solution I offer,
Just do what TV did."

—Robert Gross

Coat Hanger Make Co

A hunk of gelatin, a pie tin fastened to a light bulb with a rusty coat hanger...

The completed monstrosity is a 12-bulb set of strip lights to be used in "Blood Wedding" as a substitute for the original set which has been delayed...

THREE SEPARATE circuits are being assembled for the "Blood Wedding" two-lighting crew of Bill Leonard, and Vera Simpson, soprano.

The 12 lights will be attached to a 6 ft. 6 in. board insulated with tin and asbestos. Attached are 12 common household sockets which are divided into three separate circuits.

According to Leonard, the hangers are used to hold on tin, which, in turn, supports gelatin color frames.

"BLOOD WEDDING" TO FEATURE HOME-MADE LIGHTS
... due to delay in filling strip-light order.

Coat Hangers, Gelatin Make Colored Lights

A hunk of gelatin, a piece of tin fastened to a light bulb with a rusty coat hanger...

The completed monstrosity will be a 12-bulb set of strip lights to be used in "Blood Wedding," a substitute for the ordered set which has been delayed and will arrive sometime next week.

THREE SEPARATE circuit trips are being assembled by the "Blood Wedding" two-man lighting crew of Bill Leonard, junior, and Vera Simpson, sophomore.

The 12 lights will be attached to a 6 ft. 6 in. board insulated with tin and asbestos. Attached are 12 common household sockets which are divided into three separate circuits.

According to Leonard, the coat hangers are used to hold on the tin, which, in turn, supports the gelatin color frames.

LIGHTS WILL have alternate colors of blue, red and green, which by variation of intensity will produce any color.

"Blood Wedding" will be presented Monday through Saturday as a part of the Fine Arts Festival.

Tickets are \$1 or ID card and should be obtained in advance in the Speech Bldg.

Judging Scheduled

Judging of dormitory decorations will be Friday night after the pep rally. Judges were selected by the Men's Residence Council, Women's Inter-dorm Council and the Ex-Students Assn.

Two Students Have Taken LLT Parts

Two Tech students have taken parts in the Lubbock Little Theatre production, "The Desperate Hours."

Bill Leonard, Dallas junior, will portray Hank Griffin, and Bill Shannon, a freshman from Perryton, plays Mr. Patterson.

Joseph Hayes' successful Broadway play and highly praised motion picture will be presented at the LLT Playhouse stage Dec. 10-12.

The play tells the story of a family held imprisoned in their own house by a band of desperate men, and is based on an actual experience in California.

Concert Opens Fine Arts Festival Sunday

The Tech music department will open the week-long Fine Arts Festival Sunday when the Symphony Orchestra, Choir and Singers present a concert in the Municipal Auditorium at 3 p.m.

Selections to be presented include Schubert's Symphony No. 7 in C Major, the "Great" Symphony and the Schubert Mass in G. The speech department will pre-

sent "Blood Wedding," a play by Federico Garcia Lorca Monday through Saturday at 8:15 p.m. in the Speech Department Auditorium.

Ronald Schulz of the speech department will direct the 27-member cast. Jane Perry of the Tech Modern Dance Group will direct the dances.

A LECTURE on the life and works of the author of the play "Blood Wedding" will be given by

Dr. C. B. Qualia, professor of foreign languages at 4 p.m. Tuesday in the Union Ballroom.

Professor Erich A. Albrecht, Newcomb College, New Orleans, will give a lecture commemorating the 200th anniversary of the birth of Johann Friedrich Schiller at 7:30 p.m. Tuesday in the Union Ballroom. Schiller was a German author during the romantic period. On Wednesday the English fraternity, Sigma Tau Delta, will pre-

sent a panel discussion on "Beat Generation Literature." After the panel discusses the topic, there will be an open discussion. The discussion will be in the Tech Union Workroom at 4 p.m.

FRIDAY, the Tech Stage Band will present a jazz concert at 4 p.m. in the Union lounge. It will be directed by Keith McCarthy, instructor in the music department.

During the week of the festival

the applied arts department will have displays in the Architecture and Applied Arts Bldg.

As a climax to the festival, the music department and the women's physical education department will present "An Evening of Opera and Dance." It will be Friday and Saturday nights at 8 in Room 1 of the Music Bldg. The Tech Orchestra, under the direction of Paul Ellsworth, will also participate in the production.

Fijis Capture Lead In Speech Contest

Phi Gamma Delta scored 182 points to overcome Kappa Sigma's 174 in the second round of the Intramural Speech Program Monday.

Kappa Sigma was last year's sweepstakes winner and led the 1959 tournament in the first round with 78 points to Phi Gam's 75.

THIRD PLACE is held by Kappa Kappa Gamma, with 135 points, and Pre-Law is fourth with 128.

Others are Knapp Hall, 72; Alpha Chi Omega, 58; Phi Kappa Psi, 56; Phi Mu, 33; Kappa Alpha Theta, 31; and Air Force ROTC, 29.

Contestants compete in six

fields — radio speaking, Bible reading, poetry reading, extemporaneous speaking, persuasive speaking, after dinner speaking and public speech interpretation.

They are judged on a point system with ratings of superior, excellent, good, fair and poor.

TROPHIES WILL be awarded the organizations that accumulate the most points in each monthly contest and the over-all champions in each event.

A sweepstakes trophy will be given the organization with the most points accumulated through the year in all events.

There will be no duplication of trophies so that they may be distributed to more organizations, according to Vera Simpson, director.

MEMOS...

ALPHA PHI OMEGA

Officers for the spring semester will be elected by members of Alpha Phi Omega at 7:30 p.m. today in Chemistry 101.

PRE-MEDS

Pre-med and pre-dental students may register Monday and Tuesday for the annual Pre-med Day, set for Dec. 5. Registration will be in Chemistry C-5.

SKI CLUB

With a new ski area in mind, the Tech Ski Club will have its first meeting of the year at 6 p.m. Tuesday at the Rec Hall.

Topping the initial meeting will be a talk by a Swiss ski instructor, discussion of the between semester school skiing trip to Taos, N.M. and two movies on skiing.

Literary Panel Wonders About Beatniks' Message

What's your message, beatniks? This question will be one discussed by a panel on beatnik literature sponsored by Sigma Tau Delta, English honorary, at 4 p.m. Nov. 23 in Tech Union.

JOE NICHOLSON, senior English major, will moderate the panel on "Beat Generation Literature," as part of the Fine Arts Festival.

Members of Sigma Tau Delta on the panel are Mrs. Mary Sue Black, Marion Lynch and Wade Jennings.

Featured panelist is George Schwimmer, director of the Lubbock Little Theater.

OTHER QUESTIONS on tap include, "Where do the beatniks stand in regard to responsibility?" and "What are the chief characteristics of beatnik literature?"

Discussion will be mainly from a literary angle but there will be

specialized questions for the philosopher, artist and musician, such as "Why the beatnik devotion to progressive jazz?"

Panelists are using as a reference "The Beat Generation and the Angry Young Men," a collection of excerpts from major beat writers.

Pi Epsilon Tau Initiates Four

Four pledges have been initiated into Pi Epsilon Tau, honorary petroleum engineering fraternity.

They are Joy Brent, J. W. Mulloy, D. B. Wells and M. H. Laird. The new initiates were honored at a banquet Sunday.

BY TECH INSTRUCTOR

Puerto Rico Described

by ROBERT TAYLOR
Toreador Staff Writer

TRUEBLOOD DISCUSSES LECTURE ASPECTS WITH TECH STUDENTS . . . Charles Crocker, Amarillo sophomore and Carol Roundtree, Pampa sophomore with Dr. Elton Trueblood. (See story, page 1.)

Puerto Rico, Isle of Enchantment, came to life for Capa y Espada, Tech Spanish club, Tuesday night.

Mrs. Hope Oberhelman, Tech Spanish instructor, related her experiences on the island where she worked for the Presbyterian church for two years.

"Puerto Rico is a land of beauty and friendliness," Mrs. Oberhelman said. "When you have a Puerto Rican friend, you know he will always be your friend."

Many of the pictures and articles Mrs. Oberhelman displayed had been sent to her by her Puerto Rican "twin brother." She calls him this because they were born on the same day.

"THE COLORS in Puerto Rico are breath-taking. Flowers grow everywhere on the island," Mrs. Oberhelman said as she showed pictures to illustrate her point.

"The bright red, flamboyant trees are especially beautiful. They arch over the roads and make the island look very romantic."

Puerto Ricans eat many of the same things that Americans eat.

"They have some special dishes, though," Mrs. Oberhelman added. "They especially like 'pasteles,' which are dishes made of bananas, meat and raisins. They are shaped like tamales. They are shaped like tamales, tied with banana leaves, and boiled."

It was in Puerto Rico that Mrs. Oberhelman learned to like coffee.

"THEY HAVE a tincture of coffee there that is very strong," she explained. "I began by drinking a cup of hot milk with one drop of coffee. Now I drink a cup of hot coffee with one drop of milk."

Pointing to a map on the wall, Mrs. Oberhelman pointed out some of the geographical features of the island.

"Puerto Rico is a small island, only 110 miles from east to west and 36 from north to south. It seems especially tiny when compared to Texas, which is 773 miles from east to west and 801 from north to south.

"The capital, San Juan, has a population of 400,000. I spent my two years in Mayaguez, the third largest city."

AT ONE TIME Puerto Rico was almost completely an agricultural country, with sugar cane as the big product. Only about half of the island's 2,200,000 acres are suitable for cultivation, however, and there wasn't enough for the 2,300,000 Puerto Ricans to do.

"Operation Bootstrap" has begun to solve this problem. Over four hundred factories have been built.

"Puerto Ricans now have industries in their own country so that they will not have to leave the island to seek employment.

"They have been coming to the United States in large numbers searching for what they believe will be a 'paradise.' Since Puerto Ricans are citizens of the United States, there is no quota for their immigration.

"THEREFORE, they have crowded into metropolitan areas like New York City. Here the

young people sometimes are misguided and fight the injustices they feel have been done to them. When we read about the Puerto Ricans involved in New York's gang warfare, we need to realize that there are many more who are hard-working. It would help if they would come to areas that are not so crowded."

Teen-age Marriages Where are they sleeping tonight?

They just got married this morning. Where will they sleep tonight? It hadn't crossed their minds. What will they do for money? They hadn't thought of it. Are they in love? Oh yes. Violently. Passionately. What's in their future? Loneliness and tragedy. Who is to blame? YOU! No social problem in America today is more frightening than the rapid rise in teen marriages. No family is exempt from the bitter consequences. The current issue of McCall's tells why teen-agers marry, why their marriages fail, how to avoid premature marriages or save them when they become a reality. Now, today, read the incredible, documented facts in November McCall's. On sale at all newsstands.

Dairymen to View Milk Improvements

Ways of improving the quality and sale of milk products will be discussed at a two-day dairy industry short course at Texas Tech Monday and Tuesday.

Tech's dairy industry department, sponsoring the 11th annual short course, expects attendance of more than 100 persons from Texas, New Mexico, Oklahoma and Colorado. Dr. J. J. Willingham, dairy industry department head, announced.

ALL SESSIONS will be held in the auditorium of the Tech Agriculture Bldg.

Monday morning George M. Clarke of the Dairy Products Institute of Texas in Austin will speak on "Public Relations and our Dairy Industry". Also slated is

a discussion of "The Dairy Industry in Europe" by George Illes of the A. E. Illes Company, Dallas.

IN THE afternoon Dr. C. H. Scholle of Foremost Dairies in Dallas will tell some of the factors involved in producing quality milk. Guarding the flavor of milk and fluid milk sales will be discussed by Dr. V. H. Nielsen of Iowa State College, Ames, Ia., and Dr. W. M. Roberts of North Carolina State College in Raleigh, N.C.

Tuesday's agenda includes speeches on "Some Trends in department and "Pros and Cons of Milk Production" by Koy L. Neely of the Tech animal husbandry Ultra High Temperature Pasteurization" by Dr. Roberts.

Tech, Cougars Battle Here Saturday

by J. VERNON STEWART
Associate Sports Editor

The Homecoming clash Saturday will pit a team that started with a flash and dropped into a slump and one that started slowly, then came on fast in the last two games.

Tech and Houston will put identical 3-5 records on the line Saturday. Tech's wins came in the first three games of the season. The University of Houston has won its last two games. The other Cougar victory came in the third game of the season.

A GOOD reason for Houston's recent rise is return of quarterback Don Sessions to the lineup. The big sophomore passed 17 yards for one touchdown, ran for another and ran for a conversion to lead the Cougars past Wichita last week. Sessions connected on 11 of 19 passes for 112 yards.

Sessions missed most of the early season because of an injury.

In both the last two games, the Cougars have played on even terms with their opponents in the first half and completely dominated play in the second period.

Tech assistant coach Joe Moss, who scouted Houston, calls the Cougars "the best team in the nation with five losses."

THE COUGARS held the No. 1 one offensive team in the nation—North Texas—to seven points and dropped a 7-6 decision. That game was the one before the two-game streak began. North Texas was able to complete only two passes in the contest.

Ken Bolin, a small and speedy halfback, and powerful Charlie Rieves balance the Cougars' straight T attack. Houston also runs occasionally from a slot formation with the ends split and the fullback lining up between the split end and the tackle.

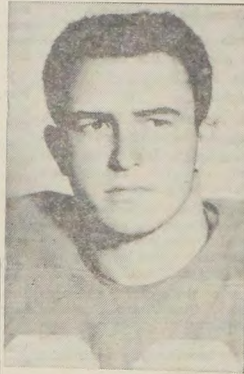

The Red Raider coaching staff

has made several changes in the probable starting lineup in an effort to break the Tech slump.

The moving of Jerry Selfridge, a standout tackle this season, to his former position at tight end will give two sophomore tackles their first chance as starters. Pat Holmes and Larry Mullins are the tackles moved to the first team.

JERE DON Mohon who has played sparingly since being hurt the Baylor game, has regained his starting left guard post. With tackle Mickie Barron of Childress still on the ailing list—a leg injury suffered last week—Ronnie Rice of Lefors will start at halfback. Tech's leading pass receiver sophomore Bake Turner, has returned to the starting split back position.

Other Red Raider starters will be split end Don Waygood, guard Freddie Weaver, center E. J. Holub, quarterback Ken Talkington, and fullback Dick Stafford of Temple.

Fijis Drop Phi Delt's; Hand Crown to SAE's

by BILL BLACKBURN
Intramurals Spotswriter

Phi Gamma Delta pulled the intramural upset of the year Wednesday, staggering Phi Delta Theta, a heavy favorite, 7-0.

Defense dominated the first half as neither team could muster a score. A key interception by Bert Pope for the Fiji's stopped the Phi's main scoring threat in the initial period.

THE SECOND half was well on its way when Fiji quarterback Tom Jenkins faded back to his own thirty, eluding a horde of grasping Phi's, and launched a tremendous pass to Joe Cornett. Two Phi's were all over him, but the pighide had Cornett's name on it as he snared it and raced over for the tally. David Bourland kicked, and the score stood, Fiji's 7-Phi's 0.

The Phi Delt's, led by the accurate arm of Pete Hudgins, started back up the field and were knocking on the door on the Fiji

five. Then Chris Blocker saved the day as he intercepted Hudgins' next effort and gave possession to the Phi Gams.

Bourland, Smith, Link and Warren helped the Fiji's grind back down mid-field until they had to punt. The Phi's couldn't get started, though, and the final verdict was 7-0, for the Fiji's.

SAE, BY VIRTUE of their 32-0 romp over the Sigma Chi's, took the fraternity championship.

Defending champs last year, this year's crew has dropped only one game and has won nine. They will play Baptist Student Union next Tuesday in the semi-finals of the all-college championships.

Dorm 6, dorm league champ, drew a bye, and will play the winner for the all-college crown.

BSU, undefeated this year, won the independent championship Tuesday in a 1-0 victory over the Roman Rushers.

Dorm 6 beat Bledsoe 1-0 Tuesday to gain the playoffs as the Dormitory representative. They have lost only one tilt this year.

Syracuse Tops College Ranks

(AP)—Top-ranked Syracuse, the leader in four principal statistical departments in major college football, stands a good chance of being the first team ever to sweep the national titles in all four.

NCAA Service Bureau statistics Wednesday revealed that the Syracuse defense performed so well in the second half against Penn State that its margin over runner-up Louisiana State in total defense and rushing defense is almost unbeatable.

The Orangemen also are well in front in total offense and first in scoring.

Penn State, which had rushed for 114 yards in the first half, was limited to minus 3 yards in the second. And the Orange yielded only 24 yards through the air.

Freshmen Schedule Annual Convocation

Freshmen will hold their annual candle lit "spirit" convocation today at 7:30 p.m. in the Tech Union Ballroom.

A candlelighting ceremony symbolizing freshman class spirit and unity, will be formed by freshman council members lighting candles placed around the room.

SPEAKING TO the class will be guest speaker, W. L. "Dub" Rogers, of the West Texas Television Network and president of the Lubbock Chamber of Commerce.

Jerry Parsons, freshman class president, will speak on the purposes of the Freshman Council. Bryan Adams, freshman class vice president, will give the response.

Freshman members of the football team as well as other freshmen athletes or holders of athletic scholarships will be introduced.

Also freshman cheerleaders and Freshman Council members will be presented.

Cattle Show Slated Dec. 5

Five classes of livestock will be open for entry in the Block and Bridle Club livestock show Dec. 5. Any Tech student is eligible to enter one animal in each of the five divisions and should sign up on the bulletin board across from Room 224 in the Ag Building.

The five divisions will be beef cattle, dairy cattle, swine, sheep and horses. Judging will be based on showmanship, training and grooming.

Banners will be awarded the grand champ and the reserve champ, with the grand champ also receiving a metal. The top five in each division will win ribbons, and each division champion will be awarded a gift certificate.

Question:
What kind of coat should a man get for all-around, all-weather wear on and off the campus?
