## Board Makes \$7,000 Available To Improve Health Services

Tech Board of Directors has approved a \$7,000 appropriation for the college infirmary and clinic, Dr. E. R. Rose, physician, has announced.

The money will be used to buy new equipment so that medical services to the students of Tech may be extended, according to Dr. Rose. Diathermy and physiotherapy equipment will be the first to be installed, Dr. Rose said.

As soon as the equipment becomes available the clinic will install a low-amperage X-ray machine, where minor bone injuries may be X-rayed, Dr. Rose said. This will cost the student a slight charge.

### Staff Enlarged

The hospital staff will be increased by one registered nurse and one part time registered nurse, which will bring the total registered nurses to 6-1-2, according to Dr. Rose. The nurses aides will not be increased, but remain at four, he stated.

Dr. Rose will be absent during July and August, during which time rooms for the new equipment will be enlarged and a dark room constructed. Dr. Rose stated that he is hired on a ten month basis, but that during his absence there will be five registered nurses and four nurses aides on the staff of the infirmary. A Lubbock physician will act as consultant for the clinic during July and August, and will visit and inspect it periodically, Dr. Rose said.

## 4-H To Practice Judging At Tech

J. W. Cowan, county agent of Mitchell county, will bring the Colorado City 4-H club boys to the Tech campus Saturday to practice livestock judging in preparation for the state contest Oct. 1 at College Station, according to R. C. Mowery, professor and head of the animal husbandry department, who will conduct the practice judging.

Chester "Jiggs" Jackson, basketball regular, is the father of a six pound daughter born last Tuesday morning.

## Singers To Offer Artists Course Operetta Here Tonight

"Cox and Box," a Sullivan operetta, the second in a series of summer artist courses, will be presented at 8:30 p. m. today on the Ad building green.

Gil Gallagher, bass-baritone, who sings the role of Cox, has a repertoire of 100 operatic roles. He has appeared in every production of the Chataqua Opera company during the past seven years. During the winter, Gallagher is principal singer at the famous Asti restaurant in New York.

Carl Nicholas, tenor, singing the part of Box, appeared with Gertrude Lawrence in "Lady in the Dark." He sang in the army production, "This is the Army" and also appeared in the movie version. More recently, he has been seen on Broadway in "Knickerbocker Holiday" and "DuBerry was a Lady."

"Cox and Box" is particularly timely even though it was written by Arthur Sullivan more than 80 years ago. It is the story of the housing shortage and of an avuncular landlord who rents a room

## Rigid Rules Set For Tech Annual

Rigid rules have been made by the Publications committee for future La Ventana editors, according to Prof. A. B. Strehli, chairman of the committee.

As the result of a recent meeting of the committee, the following rules now govern the year book editor: an advisory committee composed of students from publication group, will meet often with the editor to offer its support; the editor will meet each engraving deadline made for him, and if he fails twice to meet the deadline he shall automatically forfeit his office; the editor will submit plans for selecting Who's Who on the campus to the Publications committee for its approval. Failure to comply with the approved method shall warrant the immediate dismissal of the editor.

### Students Pay Postage

La Ventanas are being mailed to students who did not receive their annuals before leaving Tech after the spring semester. Prof. R. A. Mills, sponsor of the year book, stated. Students will have to pay the postage on their annuals this year, Mills said. Jack Thompson, next year's business manager, is in charge of the mailing.

About 1,700 of the 4,550 books have been received by students, and 4,500 La Ventanas have been sold, Mills announced. This number includes the books that have been bought on breakage deposits, while about 1,500 of the books are cash sales.

## Prexy Confers On College Budget

Dr. W. M. Whyburn, president of Tech, went to Austin Monday to work on the biennial budget for the college, it was announced from his office yesterday. Dr. Whyburn plans to return to the campus Saturday.

CHARLIE REYNOLDS

## Techsians Enter Olympic Trials

Charley Reynolds and Ed Clepper left Thursday morning for San Antonio to enter the A.A.U. Olympic trials tonight.

Charley, Border conference 100-yard dash champion for the last three years and 1947 220-yard dash champion, will enter the 100 and 200 meters dashes.

Clepper, high point man for the track team this year, will enter the high jump.

Places in the trials tonight will be invited to Milwaukee for Olympic finals.

Reynolds and Clepper are the first Olympic competitors from Tech since 1936 when John Case, a distance runner, and Marsh Farmer, one-armed hurdler, competed.

Case, after the close of the war in Europe, single-handed won a trackmeet for his company in France. He placed first in the half-mile, mile, two mile, five mile and third in the 440-yard races.

Cocher, Tapp Mooney, backfield coach, accompanied Reynolds and Clepper.

Walter Shlinkman, ex-Raider football star and Little All-American fullback in 1945, is in Lubbock working out for the coming football season. He will report to Green Bay Packers training camp Aug. 2.

## \$18,000 New Look Given Tech Gym

### Stadium To Get New Scoreboard

Plans have been made for the erection of a large and easily visible scoreboard at the new stadium.

Tech's board of directors at its last meeting authorized Morley Jennings, director of athletics, to purchase and install the equipment. At the same time the board rejected an offer from a Lubbock business firm to put up a scoreboard as a gift, and display advertising of the firm.

The scoreboard will have lights to show downs, yards to go, which team has the ball and the score. Operation will be from the new press box.

## German Thespians Will Present Play Monday, July 5

German Dramatic Art group of Tech will present "Die Kleinen Verwandten," or "The Insignificant Relatives," a German classical comedy by Ludwig Thoma, at 8:30 p. m. Monday, July 5, according to T. W. Alexander, instructor in foreign languages.

"Die Kleinen Verwandten" is the third in a series of plays presented by the dramatic group, a branch of Liederkrantz, Tech German language club, under the direction of Alexander.

Members of the cast are James Block, who plays Hassler; Gwendola Stinnett in the role of Ida; Robert Hays, who portrays Mama Hassler; Jack Wilson as Max Schmitt, the fiance; and Ray Collier and Thomas Brown play the black-sheep relatives.

The performance will be open to the public and no admission will be charged, Alexander said.

## Chemistry Staff Adds Two Doctors

Dr. Paul T. Jones and Dr. James Arthur Watson, jr., will be added to the staff of the chemistry department beginning with the fall term of 1948, according to Dr. R. C. Goodwin, head of the chemistry department.

Doctor Jones is from Hanover, Mass., and holds both a BA and MA from Baylor university and received his doctor's degree from Massachusetts Institute of Technology in 1930. He has been chief research chemist with the American Bemberg corporation for 13 years and was a member of the MIT staff as a chemistry instructor for five years. He will hold an associate professorship at Tech.

Doctor Watson is from Lexington, Ky., and will join the chemistry staff as an assistant professor of chemistry. He received his BA degree in chemistry from the University of Texas in 1940 and his doctor's degree from Louisiana State university in 1947. He has been employed as an instructor of chemistry at the University of Kentucky since 1947.

Aged Tech gym is getting an \$18,000 face-lifting this summer with money appropriated by the last legislature, according to W. T. Gaston, business manager. Gaston stated that \$20,000 was set aside by the legislature for gym improvements with \$1,750 spent last winter for roof repairs and the installation of a new floor in the coaches offices.

The R. H. Edler company has a \$15,313.70 contract for rebuilding, refinishing and repainting. Peoples Electric company has a wiring contract of \$1,615.00, Gaston said.

### Seats Replanned

All of the 230 seats around the basketball floor are being replanned and offices and dressing rooms are being rebuilt, stated Morley Jennings, director of athletics. Dormitory and storage rooms are being removed to provide a large dressing room for visiting teams. The size of office space, no longer needed since coaches moved into the new Clifford B. and Audrey Jones stadium, is being reduced to provide larger dressing rooms for physical education students. The basketball equipment room is also being enlarged.

### New Doors and Windows

Jennings said that new windows and new doors are being installed, and that the gym is to be rewired, with new and larger lights correctly placed.

The basketball floor will be refinished, new floors are to be placed in the dressing rooms used by women physical education students and the entire structure inside will be replanned.

The gym was built as a "temporary" structure in 1927. This is the first appropriation that has been given to Tech for improvement on the "temporary" building. According to Gaston, this appropriation will have no bearing on whether or not Tech will have a new gym in the future.

## Art Students Win Honor Mention

Three Tech architectural students, Granville Billingsley and Charles Kelly, both of Lubbock, and William C. Riley, Fort Worth, won mentions in the recent New York Beaux Arts Institute display. The problem prescribed by the institute for college students participation was a lookout station. Submitted drawings from over the nation by students of junior standing are rated at the institute annually.

### RECREATION CALENDAR

June 25, Friday—Artist course number, operetta, Cox and Box, 8:30 p. m., Ad building green.  
 June 29, Tuesday—Band concert.  
 June 30, Wednesday—Dance 8:30 p. m., Rec hall.  
 July 1, Thursday—Movie, "Dragonwyck," 9 p. m.  
 July 2, Friday—Artist course number, Fielder Trio, 8:30 p. m., Ad building green.  
 July 5, Monday—German Play 8:30 p. m., Ad-202.  
 July 6, Tuesday—Band concert.  
 July 7, Wednesday—Dance, 8:30 p. m., Rec hall.  
 July 8, Thursday—Movie, A Tree Grows in Brooklyn," 9 p. m., Ad building green.  
 July 9, Friday—Artist course number, Metropolitan Artists, 8:30 p. m., Ad building green.

## Off the Chest

Despite poor pictures, poor arrangement, poor editing, non-campus coverage, and the fact that \$150 extra was spent to correct errors and about \$600 extra was spent to get book out on time, don't you think we have a good La Ventana this year?

There is no hope in sight for those students now taking qualitative analysis (C-220) this summer, but "We are aware of the conditions, and plans are being made to improve the course next year." It took the department 24 years to become "aware" of a condition, where it only takes a C-220 student one class period.

Our hats off to the APO (Alpha Phi Omega), boy scout organization on the Tech campus, for the construction of signs and the building of the concrete bus-stop benches. It is good to see a club do something constructive FOR THE COLLEGE.

Tech's new stadium is a mess. When the ABC finished its four nights of rodeoing the thick mat of green grass, which once covered the field, could hardly be seen. There is no reason in the athletic council's action in permitting this Lubbock organization to practically ruin the new stadium. If it had to have horses and cattle running over it to get it in shape for football season, the rodeo association, a campus organization, should have been entitled to use it as such.

The ABC could have used the old stadium, which has not recovered, and will not recover until the grass is replanted, from last year's rodeos. I am sure the horses wouldn't mind running on the ground instead of grass.

## The Vicious Circle

By Olela Stewart

The Circle can't help wondering if it is any less painful to get a leg broken in the heat of summer than broken in the heat of winter, or if the potential accident rate is lowered in the warm months. There must be some such reason for the removal of the protectors of society from Tech campus.

During the entire winter the Lubbock police force was stationed at pertinent points for the purposes of safety and under their careful surveillance, not one Tech-man was seriously injured in a traffic accident on the campus. The courteous and efficient gentlemen of the law were liked and respected by the students and in general their suggestions for safety were followed and appreciated, but . . . for some reason, they are no longer with us.

It is understandable that the need for their assistance in traffic direction during smaller summer school enrollment is not as great, but the presence of at least one policeman during class hours might eliminate the tendency of wayward drivers to make counter-clockwise trips around the circle and to follow the clock ends of the one-way street arrows instead of the points. According to a private poll conducted by the Circle, seven out of eight traffic law breakers on Tech campus were not Techsians, but to wnspeople who apparently thought collegiate rules did not apply to them. If a city policeman were around to monetarily remind these off the campus "Triminals" that tickets and fines apply to them as well as the college students, a large part of the traffic hazard for Tech students would be removed.

One football game, one graduation exercise and FOUR RODEOS!!! Some record for a \$425,000 stadium.

In Dean Trent C. Root's resignation, Tech is losing one of its most able supporters. As a public speaker, organizer, administrator, and an all-around go-getter, his leaving will be felt in several places. Tech will have to hire two men to take his place.

This week the Circle received a bitter little notice concerning the manner in which summer school registration was conducted. The person who made the literary contribution seemed to think that since Tech has an L.B.M. machine, all forms, lines and worry for students should be eliminated, and he also commented unfavorably on those persons assisting in registration. The Circle will admit that some of the registrar's assistants were untrained and confused at the beginning, but W. P. Clement smoothed out the rough spots in the organization before the day had progressed very far. In the opinion of the Circle, one Mr. Clement is worth any added mechanical devices.

And if the anonymous writer of the letter (who, incidentally, has not attended a college before) thinks summer school is hard to get into, the Circle might add—"you should have been here in 1946-47!"

On a Tech enrollment card a student wrote after reading "Rank in class," the answer, "Yes!"

## Thompsons Present Samoa Coral Shells

A valuable collection of marine shells, gathered over a period of several years by Lt. and Mrs. R. W. Thompson of San Francisco, has been donated to Tech and will be placed on display in the biology department, Pres. W. M. Whyburn announced.

In a letter to Pres Whyburn, Mrs. Thompson said she sent the entire collection to the Smithsonian Institute about seven years ago asking that the duplicates be sent to Tech after complete classification.

ago asking that the duplicates be sent to Tech after complete classification.

She said a mass of corals collected during her residence in Samoa will be received at the college when the Institute finishes classification. The coral collector is considered extremely valuable since many of the reefs were partially or completely destroyed during World War II.

Instead of bewailing the fact that we can't have all that we want, many of us should be thankful we don't get all we deserve.

## YOUR ENTIRE WEEK'S WASH done automatically in 30 MINUTES

"LAUNDERETTE" is a new, completely automatic, self-service laundry center that washes, triple rinses and damp-dries up to 10 lbs. of laundry for only 25c, using the famous BENDIX automatic.

Put an end to washday drudgery! Come in and try this new, economical 30 MINUTE LAUNDERETTE service.

### IT'S AS SIMPLE AS 1-2-3.

- 1 Bring your laundry to "LAUNDERETTE" and place it in the BENDIX. Each BENDIX takes up to 10 lbs. You can use as many machines as you need and all at the same time.
- 2 Add soap, wait or shop while the BENDIX does your work automatically.
- 3 Take your laundry home in 30 MINUTES—cleansed, sweet, white, damp-dry.

Our trained attendant will give you personal attention and show you how to get all the "extras" in BENDIX performance.

Appointments also made at your convenience

W.H.H. - SHE'S JUST

Steers E In Tech

An average gain of 1.38 per head per day is shown report of the feeding test eight yearling grade steers sent in the agr. div. at Tech. The test was begun May 1, 1947, and a series of projects be the college Nov. 26, 1946.

The steers, which weighed average of 559.5 per head at the start of the test, weighed 642.5 pounds June 19, Stangel as project consisted of two 100 lb. rids with the steers being into two lots of four steers each. The first lot was placed on alfalfa May 1 to May 2, they were changed to a lot of alfalfa and perennial rye grass. Lot number two was put on perennial rye grass and grass during the first period. Stangel pointed the difference in gain caused by steers in lot of ing on pasture when the test began while the second

### Rumor Is Proved In Library Scene

Rumor that an engineer's first love is his slide rule has been proven. At least the following incident points to the fact.

A junior home economics student was working one night in the library and dropped a book end, said book end making a loud bang when it hit the floor. A veteran sophomore engineer had a date to see Nellie home and was studying at a nearby table.

A few minutes later, the co-ed was working by our hero's table and chanced to pick up his slide rule.

"You throw that slip stick around like you did that book and while ago and it's goodbye Nell," he warned.

"You mean you prefer a slide rule to me?" exclaimed poor Nell. He made no comment saying her question was "unfair." On the way home, however, he told her he had found the answer, and grinned broadly.

"Well, what is it?" she wanted to know.

"You won't like it. But, you see, I needed to know the analog of five and I was going to say that if you could give it to me I'd trade the slide rule for you."

### Mader Quits Tech For Kansas State

E. L. Mader, assistant professor of agronomy, has resigned to accept a position as associate professor of agronomy at Kansas State university where he will assume his duties in September. Dr. A. W. Young, professor and head

of the plant industry department announced.

Mader has been on leave of absence from Tech the past year to work on his doctor's degree at the University of Nebraska. Since coming to Tech in 1939, he has been active in tests on range grasses and in range improvement and has also conducted variety tests on small grains.

## Steers Gain Weight In Tech Aggie Test

An average gain of 1.38 pounds per head per day is shown in the report of the feeding test of the eight yearling grade steers carried out in the aggie division, announced Dean W. L. Stangel. The test, which was begun May 1, is one of a series of projects begun by the college Nov. 26, 1946.

The steers, which weighed an average of 559.5 per head when the test was begun, weighed 638.12 pounds June 19, Stangel said. The project consisted of two test periods with the steers being divided into two lots of four steers each. The first lot was placed on pasture of alfalfa May 1 to May 29 when they were changed to a pasture of alfalfa and perennial rye grass. Lot number two was put on alfalfa, perennial rye grass and brome grass during the first period and changed to alfalfa and brome grass the second, said Stangel.

Gains were much heavier during the second period, he said. In the first 19 day period lot one gained 21.25 pounds per head and lot two 3.25. In the second period lot one gained 64.25 pounds per head and lot two 46. Stangel pointed out that the difference in gains were caused by steers in lot one feeding on pasture when the experiment began while the second group

were taken from the dry feed lot into the pasture and therefore, did not eat as much as the steers already used to the grass.

This experiment will be followed by another feeding test with eight more calves in 1950, which will conclude the projects, said the dean. A bulletin published annually by the division will give the results of these experiments, he said.

### New Books Added To Reading Room

Many new books in the fiction and non-fiction field have recently been added to the recreational reading section located in the reserve room on the third floor of the library, states Pauline Bain, reader adviser.

A few of the current fiction selections are: *Great Mischief* by Josephine Pinckney; *No Trumpet Before Him*, by Nella Gardner White; *The Baby Lamb* by Jean Bailey, and *The Professor's Umbrella* by Mary Jane Ward.

Current non-fiction selections are: *Sun In Your Eyes*, by Oren Arnold; *U. S. Camera 1948*, and *The Meaning of Treason*, by Rebecca West.

## Track, Golf, Tennis, Fencing Letters Gets Council's Nod

Awarding of ten track, three golf, five tennis and four fencing letters to Tech athletes has been approved by the athletic council, Dean W. L. Stangel, chairman, announced.

Receiving track letters as recommended by Coach Maxey McKnight are: Costin Burkin, Hobbs, N. M., quarter-miler; Ed Clepper, Mobeetie, high point man on the squad, hurdler and jumper; James Crusier, Rockport, distance runner; Ernest Hawkins, Lamesa, quarter-miler; Edgar Hawkins, Lamesa, distance runner; James Mullins, Ackerley, sprinter; Seth Murphey, Levelland, sprinter; Charles Pinell, Andrews, hurdled, high jumper and pole vaulter; Charles Raynolds, Odessa, sprinter; and Joe Wilson, Claude, quarter-miler.

Tennis letters go to: Jack Broyles, Lamesa; Glen Ivy, Sweetwater; Carl Schmidt, Mexico City; Ed Scudday, Lubbock; and Joe Wheatley, Pittsburg, Calif.

Receiving golf letters are: E. C. Feagan, Hamlin; E. H. McKinney, Brownfield; and Jerry Stoltz, Hobbs, N. M.

Fencers awarded Double-T's are: Mark Smith, Richard Dickey, Sammy Self and Jack Carnell, all of Lubbock.

Numerals in track have been approved for: Harold Barber, Midland, distance runner; Wilburn Gray, Brackenridge, weight man; Ike Stuver, Yaleta, weight man; Ed Wilson, Lubbock, high jumper; Henry Briscoe, Devine, distance runner; and Morris Yakin, Mexico City, distance runner.

## Tech Annual Summer Band School Has Largest Attendance In History

Fourteenth annual Tech summer band school is the largest in the history of the school, and the faculty includes some of the finest musicians and music educators in the country, according to Joe L. Haddon, assistant director of the band school.

Approximately 165 pre-college and 35 college students, representing 15 towns, are enrolled for bands and instrumental music classes. Each student is required to play in one of four bands.

The concert band is made up of the college students and the more mature high school players. High school students make up the intermediate band, which participates in the concert programs with the concert band.

The junior band is made up of students of junior high school age. All students who are not in one of the above bands is required to play in the student band.

Dr. D. O. Wiley, director of the summer band school, started the school in the summer of 1934 and the school has grown to its present high standards and attendance. Wiley is director of the concert band and R. A. Dhosche, flute instructor, is assistant director. Haddon, instructor of baritone, is directing the intermediate band with N. G. Patrick, bassoon instructor, acting as assistant director. Fifteen other instructors are teaching various instruments of band.

Last Tuesday night the concert and intermediate band presented

the second concert in this summer series. At 8 p. m. each Tuesday night on the green, north of the band building, the two bands will play a concert.

## Innovations Used On Tech's Farms

Portable galvanized pipe for irrigation is being used by the plant industry department on Tech college farm, according to Dr. A. W. Young, head of the plant industry department. This is the first time such a method of transporting water from the irrigation well to the field has ever been used in this part of the country, he said.

In connection with the irrigation system being used, the department plans to experiment soon with liquid fertilizer, which is also a new thing in this part of the country, Young stated.

The love of liberty is the love of others; the love of power is the love of ourselves.—William Hazlitt.

## Stanolind Employs Eleven Graduates

Stanolind Oil and Gas company has recently hired the following 11 Tech graduates: D. R. Couch, (BBA 1948) production department at Andrews, Tex.; J. L. Garrett, (BS in Petroleum Engineering, 1948), production department in Lafayette, La.; Don Gillett, (BS in Mechanical Engineering, 1947),

production department at Odessa, Tex.; and Henry P. Jones, (BBA, 1948) in the production department, Lubbock, Tex.

B. C. Stringfellow, (BA, 1947), exploration department, Plainview, Tex.; R. L. Young, Jr., (BBA, 1948), production department, Lubbock, Tex.

E. D. McClendon, (BBA, 1948),

## LIBRARIAN TO TOUR

Miss Dorothy Young, assistant reference librarian, will take a months tour starting June 30. R. L. Moody, (BBA, 1947), J. W. Moore, (BBA, 1948), R. R. Tyler, (BS, 1948), and Jess W. Ray, (BBA, 1941), accounting department, general office, Tulsa, Okla.
