

Dr. Goodwin Takes Helm As College Year Begins

By RALPH W. CARPENTER
Toreador Editor

"This should be an interesting year for both the students and faculty of Texas Tech."

Those were the words of Dr. R. C. Goodwin as he prepared to lead Texas Tech into the 1960-61 academic year. Goodwin, who served as Acting President of Tech for one year, was named President of Tech at the Aug. 20 meeting of the Tech Board of Directors.

"We are in the midst of a great building program—we are about to enter into football competition in the Southwest Conference and a larger enrollment of students is expected," Goodwin remarked.

Dr. Goodwin went on to explain why he had decided to accept the Tech Presidency. (He had previously turned the job down.)

"I was led to believe that I had the full support of the student body, faculty and staff. I was assured by the Board of Directors that I would have their full support and I also felt that as long as the President's job remained unfilled, the feeling of uncertainty about the office would prevail—and this is no time for uncertainty for Texas Tech."

When asked about how he felt when the board announced in their meeting that he had been named President Goodwin remarked:

"I suppose you noticed, I smiled—then became serious."

Dr. Goodwin received a standing ovation from the Board of Directors and newsmen after he was named to the highest office at Texas Tech.

No Drastic Changes Set

The new Tech President does not plan any drastic changes for Texas Tech at the present time.

"In the future, it is not my aim to revolutionize Texas Tech—instead, I will analyze."

Dr. Goodwin said that he would conduct a self-evaluation study that would begin in Dallas this month at a meeting between college officials and the staff of the Southern Association of Colleges and Secondary Schools, an accrediting agency.

When asked about Tech's amazing growth over the past years, Goodwin smiled.

"I think a lot of it is brought about by students who go back home after attending Tech and spread the word about how fine a school it really is. This helps Tech grow in popularity and prestige."

Dr. Goodwin told the story of one girl from Houston who came to Tech because she was simply tired of going steady—it seems that she had heard that there were three boys to every girl at Texas Tech.

Dr. Goodwin does not intend to move into the President's home at Texas Tech.

"My wife and I have been living in our home since 1941 and we plan to remain there."

Planned To Be Lawyer

Did Dr. Goodwin plan to become a college administrator when he was in college?

"No, I actually wanted to become a lawyer—like most students I just took courses and gradually drifted into the teaching field. My first teaching job was in Grand Rapids, Michigan—Chemistry."

For relaxation Dr. Goodwin raises prize-winning flowers in his garden.

"I play my golf in my back yard."

The Tech President explained that since he had become President he hadn't had a lot of time to work with his flowers.

"I intend to take some time however and work with them; the gardening sure affords me some good exercise."

Dr. Goodwin has been on the Tech faculty since 1930 when he was named head of the chemistry department. He was dean of the Graduate School from 1938 to 1945 and in 1945 he was made dean of Arts and Sciences.

A native of Brownwood, he attended high school there where he participated in football, basketball and track. He received his B.A. degree from Howard Payne College in 1917 and his M.A. degree from the University of Texas in 1923. He earned his Ph.D. from Harvard in 1928.

NEW TEXAS TECH PRESIDENT
... Dr. R. C. Goodwin—the head man

From the President

To all students, both new and those returning, a sincere welcome. You are coming to a campus where everything is growing. The student body is larger than ever before. The physical facilities are being enlarged—some seven buildings now being under construction. The stadium has been enlarged and this will be the first year of competition in Southwest Conference football. Everything is growing, including the flowers on the campus, and the spirit of progress is in the air.

But growth has two aspects—quantity and quality. We would invite you to join with the faculty and staff of the College to make this not only the biggest but the best year that Tech has ever had. To secure this, we must continue to maintain our high morale. Without morale on the part of both students and faculty, there can be no excellence.

May I wish for each and all of you a year of satisfaction and achievement.

R. C. GOODWIN
President

BUYING SCHOOL TRIP TICKETS

... from Lee Pfluger, publicity chairman for the trip, are left to right, Kristi Martin, sophomore from Houston; Judy Wells, sophomore from Pampa; and Kay Fenelon, freshman from Baytown. Pfluger is a sophomore from Eden. The sign in the background was erected by Alpha Phi Omega, service fraternity.

The lines began forming Wednesday morning and Texas Tech's thirty-sixth year moved underway.

The vanguard of 9,000 expected students began swarming into campus residence halls Sunday, with about 2,500 freshmen converging on the Administration Bldg. green Monday morning to begin orientation sessions.

An annual tradition, the Freshman Convocation, captured the attention of most of the green-topped fish Wednesday night, as campus personalities welcomed the new students to Tech.

The 9,000 enrollment expected for the fall session would be the largest in Tech's history. If reached, the mark would probably retain for Tech the position of second largest state-supported institution of higher learning.

Thursday city churches will present their annual All-Church Night entertainment and services, Noon Saturday will mark the end of regular registration, with classes to begin Monday.

Saturday night the Red Raiders kick off the first official year for Texas Tech in the Southwest Athletic Conference with the grid battle with the West Texas State Buffaloes in the refurbished Jones Stadium.

For Longhorn Game

Sales Begin For Tickets To Austin

Plans for Texas Tech's traditional out-of-town trip — the only such trip among Southwest Conference schools — are moving into the final stages this week.

Twelve buses are presently scheduled to carry as many as 350 students to Austin October 1 for the Red Raider-Texas Longhorn football game.

With a September 22 deadline on ticket sales staring them in the faces, Student Council members received a briefing Tuesday morning on details of the trip. Council members will be wearing trip tags and selling tickets during the next eight days.

Each bus will carry 38 to 41 passengers and students will be assured of having a seat both ways. Tickets for bus and game are \$14.50.

Students going on the trip will not be excused from classes on October 1.

A booth for tickets began operation in the Tech Union this week and will continue until the September 22 deadline.

Present plans for the bus trip call for four buses to be used by the Tech Band, two buses by the Saddle Tramps and six buses by students.

The buses will leave Tech at 6:30 a.m. October 1. Lunch will be in Brownwood at about 11:45 a.m., with the buses to leave there about 12:45 and arrive in Austin about 4.

A police escort will be provided the caravan into Austin to the Stephen F. Austin Hotel on Congress. A pep rally will take place there immediately after arrival, with the hotel's balcony reserved for use in the rally.

The Driscoll Hotel, near the Austin Hotel, will be used as headquarters for the trip. Students will be on their own time from after the pep rally until the game itself starts.

The buses will be used to transport the students to and from the stadium.

Arrangements for the trip are being handled by Pete Baker, and Larry Campbell, Student Assn. vice president and business manager.

Students who buy the tickets for the trip must have their receipts when they pick up the trip packets the day buses leave. The packets will contain all the tickets for the trip and game.

Tech Social Sororities Pledge 297

Two hundred and ninety-seven girls were pledged to Tech's 11 national social sororities at the end of the fall Rush Week Saturday, with seven of the groups filling their quota of 30 girls.

Open rush will begin Sept. 19 and continue until Jan. 16, the Dean of Women's Office announced.

The sororities and their pledges include:

ALPHA CHI OMEGA

Susan Files Austin, Kilgore; Marilyn Young Beta, Austin; Shella Jolene Buel, Amarillo; Kay Bassard, Higgins; Sandra Lee Campbell, Dallas; Mary Louise Childress, Langview; Jodie Conway, Lubbock; Kathleen DeVore, Arlington; Shirley Claire Gilbert, Dallas; Pat Hamilton, Cleburne; Margaret Ann Head, Dallas; Cynthia Hewett, Houston; Mary Alice Hill, Ft. Worth; Lucinda Hunnicutt, Bellaire; Carlet Jan Knight, Arlington; Lauretta Lawrence, Vernon; Ruth Fraser Lehman, Dal-

las; Linda Gay Mauboules, Wimpie; Susan Maxon, Dallas; Gayle McMurphy, Houston; Diane Palmer, San Antonio; Alice Marie Smith, Houston; Sallie Sue Speer, Amarillo; Nancy Lee Stephens, Dallas; Charmie Stinson, Lubbock; Nancy J. Thomas, Austin.

SIGMA KAPPA

Cynthia Aycock, Colorado City; Sheri Brooks, Lubbock; Pamela Jane Buchanan, Dallas; Sandra Kay Cope, Grapevine; Cecil Crowder, Ft. Council Plans Rally Friday For Raiders

Raider spirit will make its first appearance Friday night at the Saddle Tramp Circle when Techsans stage their pep rally for Saturday's West Texas State game.

The student council sponsored rally will begin at 7:30. Tech's cheerleaders will start the program by leading students in four yells. The Tech band will then play.

The speaker for the rally will be Dewitt Weaver, Tech's head football coach.

Pi Beta Phi pledges will wind up the program with a skit.

After the bonfire and rally, Tech's football team will have a light workout under the lights at the stadium.

SAE's Offer 'Melon Bust

Sigma Alpha Epsilon will hold a campuswide watermelon bust and dance Saturday from 2 p.m. to 4 p.m. in the Administration Building parking lot, Cliff Thompson, SAE social chairman, announced today.

Music for the event will be provided by the Four Teens. Fresh watermelon will be served free of charge.

Thompson said that a Watermelon Queen will be selected from a group of girls representing Tech's sororities. Each sorority will nominate two girls from their pledge classes to vie for the title.

"This is our first year in the Conference; we've brought back lots of new yells and hope the upperclassmen take to them like the freshmen have," Bob Honts, head cheerleader, said Wednesday. "I've never seen spirit any better," Honts said.

"Spirit seems to be very high," Bobby Hutto, student council member and ex-cheerleader, reported, "Each dorm has been out nightly with the freshmen teaching them their yells."

The freshmen of the men's dorms will compete in yelling ability, Hutto said.

Tech's cheerleaders this year are Bob Honts, head cheerleader; Shirley Stephens; George Matson; Jim Isham; and Beth O'Quinn.

The Saddle Tramps will provide the wood for the bonfire and the sound truck for the speaker.

Students Can Get LV's in Rec Hall

Tech's yearbooks distribution began Tuesday and will continue until noon Saturday in the Rec hall.

Students may pick up their La Ventana from 8:30 a.m. until 11:45 a.m. and from 1 p.m. until 4:30 p.m. today and Friday. Distribution Saturday will be from 8:30 until noon. After Saturday La Ventanas may be obtained in Journalism 101.

To obtain another student's La Ventana, one must have that student's signed La Ventana receipt.

A Challenge

To The Students Of Texas Tech

FROM THE STUDENT ASSOCIATION

Texas Tech's student government is designed for one major purpose—to better serve the needs and interests of YOU, the student body.

There are many ways in which student government attempts to serve the student body. The orientation period in which freshmen are now taking part is one way. The student insurance plan which will be available to you during registration is another. The student council is sponsoring this year's Out of Town Trip to Austin on Sept. 30. Soon allocations will be made to various student organizations placing requests. A search is now underway to secure several national speakers to come on the campus and address the students. Definite work has been done and will continue to be done to improve student elections.

Again this year instructors on the campus will be able to "evaluate" themselves with the aid of the Teacher Evaluation forms. Students can look forward to another vacation this spring along with Tech's Spring Festival. Work has already begun on various student-faculty committees to give student needs fair representation. These are just a few of the benefits to you from an active student government.

However, the best way for you to benefit is to take part. If you, John Q. Student, will participate in student elections, the school trip, pep rallies and the cultural, spiritual and social activities sponsored by student government groups then you will be the one who profits most.

It took a long time and much hard work for Texas Tech to finally realize its dream of membership in the Southwest Athletic Conference. This is our first full-fledged year in the SWC. The structure upon which we are to build a truly representative foundation is taking shape every day on our campus. If we are to continue to build upon the traditions and spirit that has enabled Tech to come this far then we must all work together. Everyone's first loyalty lies with the college and in making it stronger and better. One way to do this is through enthusiastic support by all individuals in their respective organizations. We are only as strong as the weakest link in our chain of organizations and activities.

Student government doesn't always make the right decisions or the best ones. And without suggestions and criticisms sometimes nothing will be done to correct these situations. The small minority of students who voiced their complaints two years ago by means of mass demonstrations did nothing but everlasting harm and damage to themselves and Texas Tech. This is not the way to accomplish anything beneficial. That is why it is absolutely necessary for any student who is unhappy or dissatisfied to air his complaint with the proper people by proper means. The office of the student council is always open to students who have complaints or criticisms to make. Further, student council meetings are open to any interested party who may care to attend. It all boils down to the old saying that there is a right way and a wrong way to do everything.

May we encourage you, the past, present and future students of Texas Tech to help us in building a school of which you will be proud to be a part.

Student Association

FROM THE TOREADOR

This could be the best year in the history of Texas Tech.

Why is this so? Enrollment is expected this fall to top the 9,000 mark for the first time as Texas Tech starts its thirty-sixth year. An \$8 million building program is now well underway, including a \$2 million Library which will probably be the landmark of the campus for the next 50 years or more. National attention will be focused on Texas Tech to a degree never before experienced as the Red Raiders enter the Southwest Conference football wars. Entrance into the conference ends a long and bitter struggle for acceptance into what is perhaps the greatest football conference in the nation.

This year begins under the experienced hand of a new president—Dr. R. C. Goodwin. He is a man who is respected by students, faculty and administrators. The Toreador knows that he will always work in the best interests of the student body and Texas Tech. His tenure as acting president proved his ability to deal with the problems confronting a growing Texas Tech.

The Toreador hopes to play a part in making this the greatest year in Texas Tech history. The responsibility of The Toreador to the community of Texas Tech is the same as that of a professional newspaper to its community. We have one great responsibility—TO PRINT THE TRUTH. To do any less is a direct violation of the highest standards of journalistic endeavor. We do not intend to be a trouble-making publication. Integrity will be our motto and we will strive for truth.

The Toreador plans to cooperate with ALL recognized organizations on the Texas Tech campus to the extent we can do so within the standards of good journalism and physical limitations of the newspaper. We want the students of Texas Tech to feel welcome to visit our offices any time—any hour. We want the heads and members of all organizations on campus to get to know the editorial staff of The Toreador. The Toreador will maintain close contact with the student and administrative leaders of Texas Tech; when problems arise concerning college affairs, The Toreador editors will make every effort to see that the FACTS are presented to our readers.

We urge the student body to cooperate with the student leaders in every way possible. We hope the students will maintain the traditions that have made Texas Tech a great institution. This means attendance at all college functions such as pep rallies, athletic events, convocations and other campus-wide meetings and presentations.

The Toreador hopes the student body will enjoy this year to the fullest; we also hope that such enjoyment will not be at the expense of obtaining a good education.

The editorial staff of The Toreador joins with the executive officers of the Student Association in pledging our efforts to make this the greatest year in the history of Texas Tech.

May each of you join with us toward this end.

Raiders Battle Buffaloes

Injury Puts Gurley Out For Game

Texas Tech opens the season Saturday against West Texas State minus the services of No. 1 split back Dan Gurley, victim of an ankle injury in pre-season practice.

Gurley, 170 lb. senior, will definitely miss the West Texas game, according to Coach Don Sparks. Bake Turner, 170 lb. junior, will step into the split back position. Last season, Turner was Tech's leading pass receiver, leading punter, leading punt returner, and tied with Gurley for second place in scoring honors.

Other than Gurley's injury, Coach Sparks indicates the squad is in good physical condition, with no other severe injuries. He added that, overall, the squad reported for training in good shape, and has been improving nicely.

Gurley's speed and defensive ability will be missed in Saturday's game, along with that much more depth at split back, but Turner is a speed merchant himself. Fans remember several outstanding performances by Turner last season that earned him the title of "Tech's most exciting player."

There was no immediate indication of when Gurley will be back in the lineup.

DAN GURLEY
... misses Saturday tilt

BAKE TURNER
... fills Gurley's slot

WE NEED...

a sports-minded girl to work in the Toreador sports office, with filing and some correspondence. The pay is not very good (none), but the hours are very reasonable. (About three per week) Inquire at Room 207, Journalism Bldg.

FRED WEAVER AND JERE DON MOHON—probable starting guards for Tech's Saturday night duel with West Texas, talk over the situation. Both are seniors and two-year lettermen, and both enrolled with the first freshman class eligible to play Southwest Conference football.

QUICK - KICKS!

... and slow curves

by Billy Patton

Here is the kick-off for what we hope is going to be a fine year of successful Raider athletics, and an equally successful year of giving our readers the best in sports news, plus a little chatter on the side.

It's a big year, with the Raiders opening their first full-fledged Southwest Conference competition against Texas A&M Sept. 24 at College Station.

In a way, that game will be the end of years of dreaming, but it will really be just the beginning.

Some of the older students and most of the citizens of Lubbock will remember the jubilant demonstrations on May 12, 1956, when word was flashed to Lubbock from Fayetteville, Ark., that Tech had been voted to membership in the conference.

In an all-out display of spirit and support, almost the whole city... led by Tech students... turned out and celebrated with parades and demonstrations in the downtown streets.

That was the beginning. Golf, track, tennis, swimming and basketball competition began the following year, but football had to wait until schedule commitments had been fulfilled. Until now, this 1960 season.

Nobody is quite sure how much new conference competition is going to affect the brand of football that will be seen in the newly enlarged Jones Stadium. You can figure out a lot of football on paper, but there is no equivalent of desire that can be used in the formula, no mathematical quantity that can be applied to spirit and mixed with all the other facts and figures.

And the Big Red is not such a bad team on paper, even disregarding those "magical" qualities.

We have some predictions in mind, but we are saving them for a day or two until we can evaluate those mathematical unknowns a little better. We will predict a big year, win, lose or draw, and we also go right along with Coach DeWitt Weaver's usual comment on his 1960 ball club.

"We'll be an interesting team to watch."

Way, Way Out On A Limb...

It's a well known fact that everybody considers himself more or less an expert on football, and everybody has his own predictions about the games of the week.

This year, your editor, Ralph Carpenter, and yours truly, the sports editor, are entering into a friendly bit of competition to see just who is the expert. Each week, we will pick the winners in the Southwest Conference contests and others across the nation and keep a running tally on our successes and failures. At the end of the season, we will tabulate our scores and laugh derisively at each other over the mistakes we made.

Here's how things look to us this week:

Texas A&M vs. LSU	Carpenter	Patton
SMU vs. Missouri	LSU	LSU
TCU vs. Kansas	SMU	Missouri
Arkansas vs. Oklahoma St.	TCU	Kansas
Texas vs. Nebraska	Arkansas	Arkansas
Texas Tech vs. West Texas	Texas	Texas
Hardin-Simmons U. vs. Cincinnati	Tech	Tech
Houston vs. Mississippi	Cincinnati	H-SU
Georgia Tech vs. Kentucky	Mississippi	Mississippi
College of Pacific vs. Washington	Georgia Tech	Kentucky
	Washington	Washington

Old Rivalry Opens First SWC Chase

by BILLY PATTON
Toreador Sports Editor

Two of Texas football's arch rivals collide in the season opener in Jones Stadium Saturday night when Texas Tech and West Texas State meet for the kickoff of a season which marks a number of "firsts."

Saturday's game christens the newly enlarged Jones Stadium, marks the beginning of Tech's Southwest Conference competition, opens Tech's first season with a full-fledged All-American player, and will be the last time a 3-year letterman goes into Southwest Conference play seeking his fourth varsity numeral.

In addition, it will be Tech's first start against two former coaches at Tech, Joe Kerbel and Joe Moss. Kerbel is head coach at West Texas, with Moss as assistant. Both left Tech after the 1959 season to assume their new duties. John Roberts, an ex-Tech footballer, is also on the staff.

Tech's Jones Stadium almost doubled in capacity with the enlargement program in progress since last season. Now seating 41,500, the stadium is one of the finest in the Southwest. The only concern is over the condition of the turf, which still appears sparse in spots.

Season play means the beginning of Tech's first shot at the Southwest Conference crown, after an interim period of fulfilling schedule obligations after the 1956 vote admitting the Raiders to the race. Texas A&M will be Tech's first conference foe, on Sept. 24.

Big E. J. Holub, All-American center, remains in the lineup for Tech this year, and is almost a sure bet to duplicate his 1959 feat of earning first-team slots on both the NEA and Football Writers' All-America squads. Holub is a massive 6-4, 215 lb. senior, with plenty of speed built into his solid frame.

Holub's phenomenal successes in football have not changed his attitude toward the game, nor his teammates' attitude toward him. Quarterback Glen Amerson praises Holub highly.

"Holub," says Amerson, "can always get you the yard you need."

As for Holub himself, he doesn't believe in resting after a big year like the one he had in 1959.

"You've always got to look to the future," Holub said in a press interview. "You can't live on last year's action."

Students Sit In New SE Seat Sector

Tech students will be able to sit in the entire southeast end of the enlarged Jones Stadium, Jimmy Wilson, business manager for Tech's athletic office, said Wednesday.

Section 119, which is the section above the aisle with folding seats, is set aside as the card section. Starting just south of this section, with sections 20 and 120, is the student area.

Students may use as much of this southeast corner of the stadium as they need, except when there are sellout crowds, Wilson said. Then they may have to crowd together.

All students will enter through gate 4, located at the southeast corner of the stadium.

This year's night games will start at 7:30 p.m. Gates will be opened at 6:15 p.m. All day games will begin at 2 p.m.

In order to be admitted to Saturday night's game with West Texas State, students must present their official registration receipt stamped "paid" by the cashier. For all other home games students will present their I. D. cards.

Student companion tickets are a special service for married students or others who will want to come to the games with someone other than a Tech student. These tickets cost \$15 and are good for all varsity games and one freshman game. This is almost a 50 percent saving, according to Wilson. Students may buy these tickets at the athletic office by showing their registration receipts.

Don Waygood, senior end from Sundown, marks the end of an era with this season. Waygood will probably be the last Southwest Conference player to win four varsity letters.

It can't be done any more, with Conference regulations limiting a player to three varsity seasons, but Waygood earned a varsity letter in his freshman year at Tech, under Border Conference rules. Then after his sophomore year, Waygood left Tech for a two-year hitch in the Navy, returning last season to take over at split end.

Waygood enters this season with 12 years of football experience behind him. Beginning in the sixth grade, Waygood started through high school, then came to Tech in 1955 to start his college career. After two years of outstanding varsity ball, he played service ball with the Navy for two years before rejoining the Raiders.

As for the all-around ball club this season, the Raiders will stick to their multiple offense, including multiple wing, slot, single wing, double wing, and some split-T. The pro-type attack is flexible for either a running or passing game, each of which the Raiders plan to use freely.

Glen Amerson, shoe-filler for graduated Ken Talkington, provides the punch for a passing attack, backed by a sophomore standout, giant Johnny Lovelace. Lovelace is a 6-4, 212 pounder from Farwell who led the freshman team in passing, punting and total offense, and was second in total offense last year. Amerson led the varsity in total offense last year, and scored 12 points.

Tech's quarterbacks worked under the guiding hand of pro star Bobby Layne last spring to sharpen the passing game for the upcoming season. Layne is an off-season resident of Lubbock.

SAVE YOUR VOICE JACK, I'LL DO THE TALKING
... Johnson and Kennedy at the Lubbock Airport rally.

Hopefuls Receive Carpeted Welcome

Jack Kennedy and Lyndon Johnson received the red carpet-eyes of Texas welcome at the Lubbock Municipal Airport Monday.

Stopping for a 30-minute rally enroute to Fort Worth from El Paso, the Democratic presidential hopefuls were greeted by an estimated crowd of 10,000, including the Lubbock County Sheriff's Posse on horseback.

Each arriving in his own plane, the Senators were accompanied by Mrs. Johnson, Mrs. Peter Lawford, Sam Rayburn, Democratic committee vice chairman Margaret Price, attorney general Will Wilson, lieutenant governor Ben Ramsey, and numerous other state and party officials.

A press entourage landed from two airliners before Kennedy and Johnson arrived at about 12:30 p.m.

At a podium flanked by the United States and Texas flags and on a platform supported by bales of hay and cotton, Johnson said, "I think our country is in trouble."

He then charged, "We must look to the Democratic party if

we are to preserve our way of life."

Signs of Texans for Kennedy, Nix on Nixon, Baptists for Kennedy, JFK and LBJ, and Get Progress Back—Vote for Jack, waved as Senator Kennedy took the stand.

A few lone aspirants showed Republican colors by carrying I'm A-Fixing to Vote for Nixon banners.

Kennedy asked for the help and voice of the West Texas people and promised that "if we are elected we will make this country move again." He previously had said that the Republican party was standing still.

In the crowd of some cheerers, some merely interested spectators, a group of 50-60 Young Democrats extended their support for Kennedy and Johnson.

Bobby Brown, membership chairman of the Young Democrats, said that Tech students interested in working for the Democratic party could sign up in the Union lobby during registration. First meeting on campus for the group will be Tuesday night in the Ballroom.

GREETINGS

The Bookstore, owned and operated by Texas Technological College, has one purpose and that is to serve students and faculty of the college. The Store carries a wide range of merchandise needed and desired by students for any and all courses offered by the institution.

New Textbooks are sold at publishers list price and used books at 25 per cent off list price. Most other merchandise is sold at prices ranging from manufacturers list to as much as 25 per cent below list.

The Bookstore also stocks a full and complete range of general school supplies, specialized equipment for the various courses, Drug Sundries, Stationery and College Novelties. It also operates a Candy Bar and cold drinks dispensed in vending machines.

In addition to offering and selling articles of merchandise, the Bookstore renders various services to the student body, without charge.

CHECK CASHING

Personal checks will be cashed in reasonable amounts. Your Student Identification Card is the only identification required, and all checks will be accepted at the Bookstore Office during regular business hours.

WRAPPING FOR MAILING

The Bookstore realizes that many students have no method of wrapping and mailing packages and we will furnish paper, cartons, twine, labels, etc., absolutely free.

GIFT WRAPPING

Merchandise purchased from us will be gift wrapped at no charge and this service is maintained the year round.

REPAIR SERVICE

If you have an old leaky pen, defective part to a set of instruments or a slide rule, we can return to the factory for replacement or repair. The only charge is that made by the manufacturer.

SPECIAL ORDER SERVICE

We maintain a special catalog service for any kind of a book and various articles of merchandise not ordinarily stocked and can order such items as desired.

WHERE THE PROFITS GO

The College Bookstore originated the Student Union Building Fund by contributing the sum of \$150,000.00 from its reserve fund in 1950. Shortly thereafter the College sold \$250,000.00 in bonds and pledged Bookstore profits for the next ten years to pay off these bonds. Thus, the Bookstore, has contributed a sum of \$400,000.00 to the Student Union Building. Then, too, The Bookstore will be involved in the expansion of the Student Union Building and will contribute a substantial sum to give you more room for your pleasure and recreation.

So remember, when you buy your books and supplies from the Bookstore, you are providing recreation for yourself and 9,000 other Techsians.

Frosh Begin Race For Council Spots

A chance for participation in student government and class activities awaits Tech freshmen in the Freshman Council—an organization similar to high school student councils.

Any member of the current freshman class enrolled in at least 12 semester hours and who maintains at least a 1.00 grade average may run for the Freshman Council.

Thirty council positions are open—one representative from

each of the 11 residence halls housing freshmen, 11 from the students living in Lubbock, and eight representatives-at-large.

Students interested in running for the Freshman Council must take out a petition in the Student Council office by 5 p.m. today. Petitions must be returned to the Council office before noon at Sept. 21.

The elections will be held on Sept. 23 and Oct. 5. Election results will not be posted until all results are final.

Welcome

STUDENTS!

Dorm Officers Fulfill Vital Role On Campus

Student government of each residence hall plays a vital part in the campus life of each student residing in campus halls. Membership to the government is embodied into two associations, Women's Residence Council and Men's Residence Council.

The officers of each association, together with the elected governors or representatives of each wing, comprise the Executive Council of each hall. The Men's Residence Hall officers and their room numbers for 1960-'61 are:

Bledsoe: Charles Aycock, president, 224; Robert Sandidge, vice president, 336; Bobby Grant, secretary, 120; George Matson, food service representative, 349; Leslie Thompson, MRC representative, 334; Charles Crocker, treasurer, 336.

Gordon: Robert O'Neal, president, 214; James Lobb, secretary,

treasurer, 220; Dan Page, food service representative, 101.

Sneed: Gordon Reeves Brown, president, 309; Udo H. Specht, vice president, 352; Terry DeLaMorinere, treasurer, 310.

Men's No. 5: Bill Greaves, president, 202; James McClanahan, vice president, 402; Don Heath, secretary, 235; Hugh Campbell, MRC representative, 234.

Men's No. 6: To be elected in the fall.

Men's No. 7: Mike Turner, president, 323; Jimmy Brewer, vice president, 102; Mark Taylor, secretary-treasurer.

Men's No. 8: Neal Webster, president, 323; Gary Powers, vice president, 323; David Youngblood, secretary, 345; John Stone, treasurer, 316; Kenneth Caspari, MRC representative, 351.

The 1960-'61 Women's Residence Hall officers are:
Casa Linda: Darleen Heitkamp,

president; Darlene Lemons, business manager; Verna Ruth Liles, assistant business manager; Sandra Dowell, house director.

Drane Hall: Anne Weaver, president; Chlois Cawley, vice president; Cindy Richards, AWC representative; Bettye Aston, chaplain.

Doak Hall: Sue Mims, president; Nancy Harmon, vice president; Joan Dorris, AWS representative.

Knapp Hall: Kay Kagay, president; Anne Mason, vice president; Kay Fulgham, AWS representative.

Horn Hall: Evie Williams, president; Diann Davis, vice president; Glenda Johnson, AWS representative.

Weeks Hall: Ann Montgomery, president; Janet Johnson, vice president; Celeste Ullrich, AWS representative.

These officers lead their groups to success in the various programs planned regularly throughout the year.

College Plans Changes In Parking Lots, Fees

Students will see two major changes in the campus parking this year.

Students are being offered reserved parking spaces and parking fees are being sold on a nine-month basis.

Council Asks For Budgets

Presidents or sponsors of the following organizations need to contact Larry Campbell, student council business manager, as soon as possible concerning allocation budget requests: Engineers Society, Engineers Show, AIEE-IRE, ASME, Geology Club, Home Economics Open House, Rodeo Association, Crops Judging Team, Dairy Products Team, AH Judging Team Forensic Club, Dramatics Club, KTTC Radio, Sigma Tau Delta, Campus Religious Council, Delta Sigma Pi, Saddle Tramps, Tech Pre-Law Club, and Tech Symphony Orchestra.

All other organizations which are interested in requesting allocations should also contact Campbell in the Student Council office.

Traffic security chief Bill Daniels said that 333 reserved parking spaces will be sold at the beginning of registration on a first serve basis. These spaces may be purchased only by off campus students, including off campus freshmen.

A fee of \$30 will be charged for both the fall and spring semesters parking in the reserved lot. Other fees will be \$10 for the same period and \$6 for off campus freshmen.

Daniels explained that by paying parking fees for the nine month period, the student would not have to buy new permits for the spring semester. Refunds will be given students who attend only one semester.

If a student receives three violation tickets his driving and parking privileges will be revoked for a minimum of four school months.

UNION OFFERS SPAN OF ACTIVITIES

As some 9,000 Techsians start another college year at Texas Tech this week and campus activities move underway, among the programs competing for students' time and energies will be the span of activities offered by the Tech Union.

Starting off the 1960-61 year for the Union will be a jam session with the Four Teens, popular local singing group, at 4 p.m. Friday in the snack bar area.

On Monday sign-ups begin for the Union committees, which are open to any students interested in working with the programs offered by the Union. The committees are the major part of the Program Council, the student group which directs the activities portion of the Union.

Among the committees are three dance committees--for Friday Night Dance, record dances and western dances -- and two decoration committees, one for dances and one for the building itself.

An international interests committee works on projects such as political speakers and travel programs, while a special events group plans larger campus-wide events which the Union sponsors.

An arts and entertainment committee is concerned with the record lending library, jam sessions, exhibits and the inter-collegiate talent contests offered by the Union.

Bridge instruction and tournaments, as well as events such as the Frantic Fun Fair, are handled by the games and tournaments committee. A movies committee is responsible for scheduling the weekly movies presented in the ball-

room.

A hospitality group concerns itself with freshman orientation, greeting visitors, a yearly style show and awards banquet.

Students who sign up next week for a committee will be interviewed later and assigned to work with a particular committee in line with their interests.

Union activities will continue in September with square dances each Thursday, with the first set for 7-8:30 p.m., Sept. 22, in the Rec Hall.

On Sept. 23 a "Twelfth Man Dance" will be featured in the ballroom from 8:30 to 11:30 p.m. The first western dance offered by the Union this fall will be in October.

Movies will begin on Sept. 25-26 with "Say One For Me." Regular times for movies, which are free to students and shown in the ballroom, are each Sunday afternoon and Monday evenings.

One of the Union's special events for the year will be a program featuring the Brothers Four, a singing group who recorded the popular "Greenfields" album, in the Lubbock Municipal Auditorium on Sept. 30. Admission to the event will be \$1 per student.

The Brothers Four began singing about a year ago while students at the University of Washington and have since become popular with young music lovers, appearing on national television and recording with Columbia Records.

Another major event for the Union will be a concert by Carlos Montoya, a noted Spanish flamenco guitarist, on Dec. 1 in the ballroom. With admission

free to students, the program will feature Montoya with the Spanish flamenco music which originated with the gypsies of Spain.

Montoya, born in Madrid, is the only flamenco artist in the world who performs the music on the concert stage in solo recital.

Another guitarist program will present the folk singer who performed at Tech in the summer of 1959, William Clauson, later this year.

Also tentatively planned for the spring semester is a large jazz program of some type, although arrangements are not yet definite.

A major part of the fall activities on campus is the Fine Arts Festival, which the Union aids in coordinating. Planned for the week of Nov. 13-20, the festival includes an opera theater, a concert by the Tech Choral Symphony and a dramatic production by the Tech speech department, in addition to displays and exhibits.

The Homecoming Dance this year will feature dance music by the Kai Winding sextet. Les Elgart, formerly scheduled as the band, cancelled recently.

Heading the Program Council this year are six officers, including Dan Webster, senior from Dallas, president; Pat Porter, senior from Dallas, vice president; Anne McElheney, senior from Dallas, secretary; Mary Ann West, senior from Lubbock, treasurer; Don Roper, junior from Lubbock, personnel director; and Tony Whittington, sophomore from Amarillo, publicity director.

Miss Jane Gentry is Union program director, with respon-

sibility for directing the total Program Council activities.

COMEDY HITS ALSO PLANNED BERMAN, WARING TOP FALL SHOWS

The stage of Lubbock's Municipal Auditorium will glitter with the talent of some of show biz' top personalities this year.

Fred Waring, Shelley Berman, Elsa Lanchester and Joan Bennett are among the stars engaged presently by Civic Lubbock to perform at the Auditorium during the fall.

On Oct. 27 Elsa Lanchester will portray her typical role which ranges during the evening's entertainment over clown, mimic, dancer, pantomimist, singer, satirist and vaudevillian. Musical director for the performance here will be Ray Henderson.

Called America's most unique comic to appear on the American entertainment scene in a decade, Shelley Berman will present a two-hour show on Nov. 15 at the Auditorium.

Famed for his ability to take simple, everyday happenings and turn them into an evening's entertainment, Berman has become a favorite of collegians for his recordings of his nightclub acts.

The performances by Berman and Miss Lanchester will be their only appearances in West Texas this year.

The production "Stereo Festival" will be presented by Fred Waring and his company of singers and musicians on Nov. 7.

Waring has appeared twice before in the Auditorium, the last time in November, 1957.

The "Stereo Festival" carries with it an all-new-multi-channel high fidelity stereo sound

system which is said to surround the audience with sound as if the audience were on the stage itself.

Special sections for students attending the program have been set aside at reduced rates.

Civic Lubbock has said that requests for repeat performances of the Waring company were responsible for the return due to the popularity of his previous appearances here.

Two comedy productions have also been scheduled by Civic Lubbock for this year, including the road company of "Fiorello!" and the production of "The Pleasure of His Company."

Samuel Taylor's comedy, "The Pleasure of His Company" will star Joan Bennett in the leading role and will appear in a one night performance at the

Auditorium on Dec. 3.

Donald Cook, a versatile Broadway actor, will co-star with Miss Bennett. The production marks the sixth time that these two stars have been teamed for a stage production.

The play offers a glimpse into the lives of fashionable Nob Hill families in San Francisco. It tells of an artful tug-of-war between a once-married couple reunited, after fifteen years, on the eve of their daughter's wedding.

Miss Bennett will be remembered for her more than 70 movie roles, and in the last few years, she has appeared in the stage productions of "Bell, Book and Candle," "Janus," "Kind Sir," "Once More With Feeling," "Anniversary Waltz," and the musical, "Best Foot

Forward."

Walter Winchell termed the show New York's number one comedy hit during its 57 weeks on Broadway prior to its present cross-country tour.

Ticket prices have not yet been announced for the productions. Season tickets for Civic

Lubbock will go on sale in October.

ROTC Programs Put Stress On More Academic Courses

The Army and Air Force ROTC programs at Texas Tech are engaged in change-overs to revised curriculums as the 1960-61 school year begins.

A new Army ROTC program—which includes more academic work and less drill -- goes into effect in September, Col. James B. Carvey, professor of military science, has announced.

For freshmen enrolling in military science, there will be 30 fewer classroom hours in military subjects. These may be made up by substituting an academic course in any of four general areas, Carvey said.

The academic courses, in which a cadet may enroll and receive military science credit, must be in the general areas of effective communications, science comprehension, general psychology or political development and institutions.

There has also been a decrease of military science classroom hours in the junior and senior level Army ROTC courses. Ninety hours (45-hours each academic year) may be substituted with courses from the same general academic areas.

Some of the military classroom time has been gained by cutting drill from two hours to one hour each week.

Freshmen will meet military

science classes one hour a week plus a drill period. All other Army ROTC students will meet two military science classes a week plus a drill period.

More course work in math, languages, social and natural sciences and less in military subjects has been scheduled in the new Air Force ROTC program at Tech.

Lt. Col. George R. Hull, Tech professor of air science, said the new program enables AF-ROTC cadets to use the same courses to satisfy both academic degree and air science

requirements toward a reserve commission.

"The new program will be especially helpful to engineering students who have large course-loads yet want to earn an Air Force commission while at Tech," he added.

Specifically, six semester hours of college math, or physical and natural sciences, foreign language or government courses will be substituted for six air science subjects during the cadet's freshman and sophomore years.

New freshman cadets will only take two hours of drill a week and an academic course in one of the specified areas during the first semester. The second semester, they will attend air science lectures and a drill period.

Board Names Goodwin Prexy

By PRESTON MAYNARD
Toreador Managing Editor

In what is traditionally one of the most important meetings of the year concerning college affairs, the Texas Tech Board of Directors in its August 20 session named Dr. Robert Cabaniss Goodwin permanent president of Texas Tech.

The action came following an executive session of the Board, with Manuel DeBusk of Dallas moving that Dr. Goodwin be appointed full president. Dr. Goodwin has served as acting president since the resignation of Dr. E. N. Jones effective Sept. 1, 1959.

The Directors took two other actions of major importance in college affairs: okayed a base contract of \$708,686 to V & M Construction Co. of Lubbock for the Tech Union expansion and approved sale of \$300,000 in revenue bonds to aid in paying for the improvements to Jones Stadium.

Authorization was also given to architects for work to begin on preliminary plans and specifications for a half million dollar addition to the Science Building, expected to be completed in the fall of 1962, according to present plans.

Concerning the Tech Union expansion, the Board okayed the use of \$910,000 in bonds from the Housing and Home Finance Agency of the federal government to cover the construction costs.

The Board also heard a report on the status of the athletic budget, with officials expressing optimism that the budget would be in the black this year.

Discussion in the Board meeting also concerned the possible use of a student fee concerning the stadium. However, the discussion was limited to a theoretical use of such a fee and not to any proposal for specific use of the fee. No action was taken concerning it.

Director J. Evetts Haley of Canyon expressed strong opposition to any possible use of the fee.

(High-level college officials told The Toreador last week that any possibility of use of the fee, in their opinion, is extremely "remote." Use of the

fee, they said, would come only in a case where the college was in danger of defaulting the bonding agreements on the stadium, which they termed very unlikely.)

Also concerning the stadium, Vice President for Development William Butterfield reported that as of Aug. 20 there were \$103,073 in outstanding pledges on the seat options. He also said that \$37,400 in outstanding pledges were due Sept. 3.

An Aug. 18 report on the fi-

ancial status of the stadium expansion was also presented to the Directors. Basic estimated construction cost of the stadium expansion was placed at \$1,783,288.07. Additional costs include: Architect's fees, \$96,997.29; relocation of end zone seats, \$8,819.78; revision to fencing, \$1,506.40; turf, \$15,000, and contingencies, (concessions, air conditioning for athletic offices and press box), \$35,000.

Total construction costs were

estimated at \$1,940,611.54, with \$1,628,678.60 paid as of Aug. 18. Approximately \$311,932.94 in funds will be required for the final payments, due Sept. 10.

The \$300,000 in additional party bonds voted for the stadium will be used for the final payments. The bonds will mature in 1982, 1983 and 1984, with 4-3/4 per cent interest annually.

Concerning the expansion to the Tech Union, the base contract of \$708,686 may be sub-

ject to alterations for upgrading the new addition's interior finish and construction of a full basement under the ballroom portion of the addition.

(Information from college officials is that nothing definite is yet known concerning whether the HHFA will approve the upgrading of interior and basement. If so, the improvements will be added to the original contract in the form of change orders.)

Goodwin Tells Faculty, Staff Of Program For Year Ahead

By BOB TAYLOR

Nearly 400 members of Tech's faculty greeted their new president with a standing ovation when he was introduced to them at the first faculty meeting of the year Friday, Sept. 9. C. I. (Stony) Wall, chairman of Tech's Board of Directors, presided at the meeting and introduced Dr. R. C. Goodwin, who was named to the presidency Aug. 20 by the Board.

In his introduction Wall assured the faculty that Dr. Goodwin had the "100 per cent support" of the Board. He commented on the Board's selection of Dr. Goodwin and said that they had talked to men from other schools but that "there was one in our midst who was just as good as or better than any of the others."

Dr. Goodwin, who has been at Tech for 30 years, began his speech to the faculty by saying that he had been to so many faculty meetings that he could not think of anything new to say.

"Last year when I spoke to you at this time I had no idea that I would be back again, so I told you all I knew then."

Dr. Goodwin then gave the faculty his reasons for accepting the presidency.

"I was promised the full support of the Board and the faculty," he said, "but more than this I was afraid that the uncer-

tainty of an unfilled office would pervade the campus, and this is no time for uncertainty.

"Therefore, I followed the old motto that it is better to do something, even if it is wrong, than to do nothing."

He emphasized that he will make few changes right away. His only change so far, he said, was the decentralization of duties and responsibilities.

"I did this because I did not know how to do all the things I was supposed to," he commented.

His purpose will not be to revolutionize, he said, but rather to analyze. He is beginning a two-year self-evaluation study, and he asked for the help and co-operation of the entire faculty in this undertaking.

Since this is the year when the legislature meets, Dr. Goodwin told the faculty that they need to help convince the legislative committees of Tech's needs. He also stressed that since this is an election year, faculty members who are grateful for their freedom should set examples for the students.

"Every year we should strive to raise the academic standards of Tech," he continued, "but we should also recognize the difference in just 'pouring it on' and in challenging the students."

Dr. Goodwin then mentioned the importance of each faculty member's attitude toward his

function here. He said that each one should be concerned with the total welfare and progress of the college as a whole and not be bound by his specialty.

As he closed, Dr. Goodwin urged the faculty to make this a year of progress in every respect and promised to provide the conditions where this progress will be possible.

Before Dr. Goodwin spoke, Wall introduced those seated on the platform, who were Marshall Pennington, vice president and comptroller; James G. Allen, dean of student life; Dr. Floyd D. Boze, dean of admissions and registrar; Col. James B. Carvey, professor of military science; Warren P. Clement, assistant to the dean of admissions and registrar; Dr. William B. Gates, dean of the graduate school; Dr. George G. Heather, dean of business administration; Lewis N. Jones, dean of men; Dr. S. M. Kennedy, acting dean of arts and sciences; Dr. Florence L. Phillips, dean of women; Dr. Gerald Thomas, dean of agriculture; Dr. Willa Vaughn Tinsley, dean of home economics; and Lt. Col. George R. Hull, professor of air science.

Each of the deans then introduced their new faculty members, and Dr. Gates introduced those returning from leaves of absence and those who received advanced degrees since last year.

INDIANA GARDENS

New Buildings Dot Tech Landscape

What is probably the largest expansion in buildings in Texas Tech's history is now taking place on the college's 2,008 acres.

An eight million dollar building program is going into its most intensive phase with the opening of the 1960-61 school year.

Highlighting the expansion is a new Library to cost \$2,165,000, expected to be the central structure of the campus for probably the next half-century. The structure is planned for completion by September, 1961.

The contract for the building was let in June of this past summer. Excavation of the basement portion began recently at the site, located west of the present Tech Union and Music Bldg.

Under construction now are ten other structures, including the \$1 million plus expansion of Jones Stadium.

An important addition to the campus landscape will be the new addition to the Tech Union. The old Rec Hall was moved this summer to its present position southeast of the Union to provide space for the new addition.

The contract was let in the Aug. 20 meeting of the Board for the new addition at a base bid of \$708,686. Plans presently are for changes which will bring the total cost up to about \$900,000, including probably an upgrading of the interior finish of the new section and a basement under the ballroom.

Included in the new addition will be probably a cafeteria, ballroom, offices for the Student Council, and additional office and meeting space.

Expected to be completed by Oct. 1 is the new Women's Gym, located southwest of Knapp Hall.

The gym is to cost \$289,086.

At the north end of the engineering pavilion three structures are under construction, each expected to greatly expand the space for the college's School of Engineering. A \$338,504 addition to the Textile Engineering Bldg. was recently completed, providing space for facilities which include the textile engineering department's up-to-date pilot spinning plant.

Adopting an architectural style with Spanish embodiments, the Architecture-Computer Bldg., adjoining the north end of the West Engineering Bldg. will house the architecture department and a computer-data processing center.

The building is scheduled for completion Oct. 21 and will cost \$681,397.

Directly east of the Architecture-Computer Bldg. is the Mechanical Engineering Shops, which are to house the equipment now located in the north end of the East Engineering Bldg. The shop structure is to cost \$314,180 and is planned for completion by December 15.

The addition is planned for the future completion of a second story, with the entire addition adjoining the East Engineering Bldg. proper.

Northwest of the engineering buildings is a new Chemical Engineering-Nuclear Reactor Bldg., which will face the football practice field and Municipal Auditorium.

The building will cost \$324,895 and will be ready for occupancy about May 14, 1961.

A large structure to house the physical plant facilities and press is under construction west of the new men's dormitories, across Flint Avenue.

To cost \$522,444, the building will contain space for main-

NEW UNION EXPANSION WILL BE UNDER CONSTRUCTION SOON . . . Cafeteria, New Ballroom Will Be Contained In Addition

ance, grounds, security, warehouse and custodial services of the college, in addition to printing facilities. Completion date is April 1, 1961.

In the agricultural area of the campus, work is continuing on the Meats Lab, a \$217,263 structure to house facilities formerly provided in barracks, and an Agricultural Plant Sciences Bldg. costing \$379,818. The Meats Lab adjoins the Veterinary Science Bldg. on the west and is to be ready for use March 24, 1961.

The Agricultural Plant Sciences Bldg. will house the horticulture and park management departments and will cost \$379,818. Completion is scheduled for Jan. 1, 1961.

For additional space in horticulture and agronomy, several metal buildings costing \$24,509 are under construction at the corner of Indiana and Fourth St.

Now in the planning stage are four additional projects, including a \$525,000 addition on the

west side of the Science Bldg. Expected to be ready by Oct. 1, 1962, the preliminary plans and specifications were authorized by the Board of Directors in the Aug. 20 session.

A \$56,000 improvement to Speech facilities is also planned, along with \$85,000 in a new dairy plant, to include a milking parlor, feeding and maternity barns and a calf barn. Also planned is a \$58,228 addition to the animal and poultry facilities.

Present plans also call for the remodeling of the old Dairy Barn into a theatre for the Tech speech department.

An additional \$268,302 is presently budgeted for other facilities as part of the building program, all of which are not yet in the actual planning stages.

Recently completed is a new steam boiler plant costing \$232,798. The structure is adjacent to the old boiler plant north of the Textile Engineering Bldg.

The new boiler turns out 75,000 lbs. continuous steam

pressure, and can produce up to 80,000 lbs. for periods of two hours.

The entire building program at Tech is financed by the constitutional building amendment voted by the people of Texas in 1947 and amended in 1956. Funds are provided by the five cent ad valorem tax.

Buildings other than the stadium and Tech Union are paid for by these funds.

Board Ends Search With Appointment of Goodwin

(Continued from Page One)

Concerning the addition to the Science Bldg., several Board members requested that a statement of policy by the Board concerning architectural design and a photograph of the present Science Bldg. be transmitted to the architects.

A request by the athletic department for additional rooms on the third floor of West Hall for use by athletics was granted, but the Directors denied an accompanying request for an additional kitchen.

Directors accepted a grant from the Office of Vocational Rehabilitation in Washington for

\$60,764 for teaching and training in rehabilitation counseling for the year which began Sept. 1. The program has been in operation at Tech for several years.

Approval was also given for acceptance of \$86,000 for a summer institute for high school biology teachers, provided by the National Science Foundation of Washington.

The Board also voted to secure clearance with the Department of Defense for access to classified government information for all members of the Board, President Goodwin and other key personnel of the college.

Hi!

Let's Get Acquainted

FURRS SUPER MARKETS is a familiar name in these parts, maybe you've shopped with us in your hometown. We have many ways to serve you here in Lubbock, take a look:

SEVEN HUGE SUPER MARKETS loaded with everything you can imagine! We especially have grand General Merchandise Departments with famous name cosmetics, health and grooming aids, hosiery, and of course foods of every description as well as school supplies.

TWO BEAUTIFUL CAFETERIAS where dining is an enjoyable experience! The food is great, prices are low, the atmosphere is enchanting. Our Town & Country location, just north of the campus, is of Paris Vintage. Family Park location at 34th & Ave. H. takes you to old London. We invite you to enjoy a snack or bring that heavy date often.

FAMILY CENTER is located at 34th & Quaker. Here is a world of merchandise unlike anything anywhere! At lowest prices ever you'll be able to shop for photo equipment, sporting goods, phonograph supplies, radios, jewelry, appliances, clothing for men and women, hardware and many other items. Make a trip to Family Center first whenever you wish to buy anything.

Lubbock Provides Fun, Interests for Students

A few years after the Civil War when men were beginning to settle down to expansion of the western territory, cattlemen were moving their herds into the vast area now known as the South Plains of Texas.

The buffalo hunters were on the way out when these men and their families began to settle down on a permanent basis in the area that was to become the largest cotton producing center in the United States.

In the middle of this wonderful Lubbock now sits with a population of over 145,000 and lays claim to the title of the "cottonseed oil capital of the world." It is also the center of the most mechanized agricultural region in the world.

Lubbock was created in 1891 when two settlements, situated several miles apart, moved their towns together to where Lubbock now sprawls in the West Texas sun.

That same year the first courthouse was built, and in 1909, the year the first railroad (Santa Fe) arrived, Lubbock became an incorporated city. The small town had a population of only 1,938 in 1910, but the seed of growth had been planted; Lubbock was on its way.

In 1925 the Texas Legislature chose Lubbock as the site of Texas Technological College and the first ground for the college was broken that year.

In the past decade, the town has experienced a tremendous growth with the population more than doubling since 1950. Current figures show that Lubbock is due to make more giant strides in the future.

In the Atomic Age Lubbock provides recreational facilities for its permanent residents and students of Texas Tech. It also gets its share of the tourist trade. In fact, according to local motel owners, this was Lub-

bock's best year for the traveling trade.

Mackenzie Park, the "garden spot" of the South Plains, attracts a host of visitors each year, making it the most visited state park in the Lone Star State. The park has a swimming pool, picnic areas, baseball diamonds and a golf course.

There are nine city parks in Lubbock that cover 611 acres. The city has three public swimming pools.

Water skiers returning to Tech won't have to miss their favorite sport. Buffalo Lakes, situated southeast of Lubbock, provides the water for skiing. Boating, dancing, fishing, speed boat races and other facilities are featured at the lakes.

Lubbock points with pride to the town within its own city limits -- Prairie Dog Town -- as the only one of its kind in the United States. The "town" is located in Mackenzie Park and is filled with the little pint-sized "residents."

The animals furnish hours of relaxing entertainment for spectators who sometimes drive hundreds of miles to see them in action.

Other recreational programs are available to the students attending Tech. The Lubbock YMCA, Lubbock Service Organization, and the many religious groups which provide social as well as recreational activities are always eager to help the students at Tech.

The Lubbock area has a very mild climate that is mingled with a few rainstorms, sandstorms and sometimes several tornadoes.

These are not everyday occurrences, however, and, concerning the climate its high altitude (3,241 ft.) gives it cool summers while its southern location provides for a short winter.

Colonel Assumes Command Of Tech Air Force Unit

Lt. Col. George R. Hull has been assigned as professor of air science and head of the Air Force ROTC unit at Texas Tech.

A native of North Dakota, Hull comes to Tech from duty with the 5th Air Force headquarters in Tokyo, Japan. He succeeds Lt. Col. N. B. Wilkerson who has been assigned to Maxwell AFB, Ala.

During his three-year tour in Japan, Col. Hull was director of officer personnel. He has served in the Air Force 18 years.

He is a graduate of Minnesota State College where he

earned a B.A. degree in 1939. In 1949 he attended the University of Chicago where he received a master of business administration degree.

Hull enlisted in the Air Force in April 1942 and was commissioned that December. The following two years he served as a combat intelligence officer with the 61st Troop Carrier Group in England, Africa, Sicily, and France, and ended his wartime service in Brazil. In 1950 he attended the Air Tactical School at Tyndall AFB, Fla., and he recently completed the Academic Instructor School at Maxwell AFB.

1960 Annual Features Life on Tech Campus

Editors of the 1961 La Ventana are Pat Porter, senior journalism major from Dallas, and Ellen Venable, senior journalism major from Midland.

TRY TECH ADS TODAY . . .

. . . AND SELL IT TOMORROW!

A black and white book with gold lettering is making its appearance on the Texas Tech campus this week.

The 1960 La Ventana contains more than 10,000 pictures ranging from campus beauties to close-ups of action in last year's Red Raider football games, in addition to thousands of lines of type on activities, organizations and various sectors of college life.

Now in its thirty-sixth year of publication, the La Ventana this year is again based on the magazine format adopted for the first time in 1959 in the 1959 annual.

Editors of the 1960 yearbook were Marilyn (Gardner) Varde-man, a senior journalism major from Dallas, and Donna Christopher, a senior journalism major from Brownfield.

Distribution of the books began Tuesday morning and is continuing throughout this week in the old Rec Hall southeast of the Tech Union, between the hours of 8:30 a.m. and 4:30 p.m.

The cover of the book is white with black edging at the binding. The gold letters "La Ventana" are written across a gold seal of Texas Tech on the cover.

Color pictures are included on the covers of the Mademoiselle, Sports Illustrated and Life magazines. The Future and Tech's Hitchin' Post sections have color drawings as their covers. Art direction for the entire annual was provided by

Ray Tibbetts, Los Angeles commercial artist.

Among the highlights of the book are a two-page picture feature of Dr. R. C. Goodwin, now permanent president of Tech, pages of action pictures of football and basketball games in the Sports Illustrated section, two pages of pictures taken during a Board of Directors meeting last year and a story with pictures on the Dallas school trip.

Plan Provides Medical Care For Students

Student insurance will be offered to Techsians from a different company with a slightly higher rate and an optional term policy for the 1960-61 year.

The North American Company for Life and Health Insurance of Chicago will carry the student insurance this year.

Students must buy the insurance policy within 20 days after registration. The rate for 12 months is \$12.25 and for nine months \$10.25.

With the North American policy, claims of \$25 or less will not necessitate the completion of a claim form. Claims of more than \$25 will require the claim form, but only those over \$50 must be forwarded to the Chicago office.

The North American Company replaces the Pilot Life Insurance Company in handling Techsians' needs.

"Due to a high loss ratio, Pilot Life found they could not carry the student insurance policy without an increase in rates or a cut in the benefits of the policy," James G. Allen, dean of student life, explained.

The North American Company was chosen to serve Techsians because of its lower rates and superior surgical fee schedule.

William Holmes is Lubbock's representative for the North American Company, with offices in the Great Plains Bldg.

The Student Insurance Committee is composed of Dr. R. C. Goodwin, Tech president; M. L. Pennington, vice president; Dr. F. P. Kallna and Dr. E. R. Rose, Tech physicians; Pete Baker, Student Assn. vice president, and Bill Dean, Student Assn. president.

City Churches Host Incoming Students

Entering freshmen and other Tech students will be honored with the traditional All-Church Night parties tonight. Participating will be 13 local churches and four student centers.

"Music Around the World" will be the theme of the evening program at the Second Baptist Church, 5300 Elgin Avenue, beginning at 7:30 p.m. Southern themes will highlight activities at the College Avenue Baptist Church, 2420 10th, at 7:30 p.m., and First Baptist Church, 2201 Broadway, at 7 p.m.

The Presbyterian Student Center will sponsor a picnic at MacKenzie Park. Students planning to attend are to meet at 2412 13th at 4 p.m.

St. Elizabeth's Catholic Church will host a dance and social hour at 7:30 p.m. at Newman Hall, 2309 Main.

Fellowships will be given at the First Cumberland Presbyterian Church, 910 Avenue O, at 7:30 p.m., and the First Nazarene Church, 4570 Avenue Q, at

7:30 p.m.

Informal parties are planned by three church groups. The Christian Science organization will have its activities at 7 p.m. in the Anniversary Room of the Tech Union, while the 25th St. Baptist Church, 2436 25th St. will host students at the church, and the St. Johns Methodist Church will have activities in the Fellowship Garden at the sanctuary at College Avenue and 15th. Both groups will begin their programs at 7:30 p.m.

Open houses will be featured at the Lutheran Student Center, 1508 Avenue X, at 7 p.m., and the Christian Student Center, 2318 13th; Episcopal Student Center, 2407 16th; and Asbury Methodist Church, 2005 Avenue T, each beginning at 7:30 p.m.

Church of Christ Bible Chair, 2406 Broadway, and the First Methodist Church, Memorial Hall, 1411 Broadway, will provide programs beginning at 7:30 p.m. and 7:20 p.m. respectively. The Central Baptist Church,

BACK THE RAIDERS

1317 18th, will present a reception at 8 p.m.
The All-Church Night activities are a community and college effort to acquaint students with religious opportunities as a part of their school life.

Speech Activities Include Four Plays, Six Meets

By BOB TAYLOR
Toreador Editorial Staff

Four plays and six forensic meets are scheduled by Tech's speech department for this school year.

The first play, according to Ronald Schulz, associate professor of speech, will be "Ondine" by Jean Giraudoux, one of the foremost modern French playwrights. "Ondine" is a dramatization of the legend of the water sprite who loves a mortal and loses him when he is unfaithful to her.

"This production, which is set in the Middle Ages, will utilize colorful costumes and scenery and will provide many opportunities for the dramatic use of music, sound, and lighting effects," Schulz said.

"Ondine" will be a feature of the Fine Arts Festival and will open its run Nov. 14. Work on the play will begin immediately, with tryouts for cast and production positions starting September 19. There are roles for 17 men and 11 women. Schulz will direct this play, and Miss Shirley Cadle, speech instructor, will be in charge of design and technical direction.

"Tea and Sympathy" by Robert Anderson will be the department's second production. It will run from Jan. 26 through Feb. 1 and will be directed by Miss Cadle.

The third play will be Shakespeare's comedy, "The Merry

Wives of Windsor." Schulz will direct this play, which will be produced during the spring semester.

The department's final production will be Arnold Perl's "The World of Sholom Aleichem," a dramatization of three of the short stories of Sholom Aleichem. This play will be under the direction of advanced students in stage directing, supervised by Schulz and Miss Cadle.

Forensic activities at Tech will begin with the annual invitational forensic meet Oct. 28 and 29. This meet is open to all colleges in the area, according to Dr. P. Merville Larson, head of the speech department.

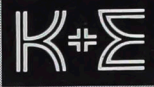

Tech speech students will then go to forensic meets at TCU Nov. 11 and 12, the University of Wichita Nov. 18 and 19, and the University of New Mexico Dec. 9 and 10.

Students from Tech will participate in the Golden Spread meet at Amarillo Jan. 6 and 7 and the national Delta Sigma Rho meet at the University of Colorado in April. There is a possibility that Tech will be represented at the Southern Speech Association meet in Miami in April.

Dr. Larson also said that this year Tech's radio station will operate on FM instead of through tunnels as before. The station will begin operating Sept. 19 if the equipment gets here in time.
