

# Spring Graduation Exercises Set for June 2

## Degrees for 827 People

Texas Tech's commencement exercises will be held June 2 at 8 p.m. in Jones Stadium.

A total of 827 will receive degrees from the five schools. There will be 55 Master's Degrees given; also one E.D.D. and one Ph.D.

The President's Reception is scheduled June 1 from 3:30 to 5 p.m. The Baccalaureate Sermon will be delivered at 8 p.m. the same day.

Reverend William Kenneth Pope will deliver the sermon. He is pastor of the First Methodist Church at Houston.

**THE COMMENCEMENT** address will be given by Dr. Arthur S. Adams, president of the American Council on Education.

Prior to accepting that position in 1951, he was president of the University of New Hampshire.

Dr. Adams was graduated from the U. S. Naval Academy. He later received a Master's degree in physics from the University of California.

At Colorado School of Mines he received a Doctor's Degree in physics and metallurgy. While there, he was assistant to the president.

He later went to Cornell University as assistant dean of engineering. He became Provost here.

Dr. Adams helped plan the Navy's wartime V-12 training program.

Dr. Pope is well known for his work in the Texas Conference of the Methodist Church. In 1956, he represented the Methodist Church at the Centennial Celebration in India.

## Nixon Goes Puerto Rico

CARACAS, Venezuela — Vice President Nixon ended his riot-ridden South American tour ahead of schedule and under heavy Venezuelan military protection late Wednesday.

He landed on U.S. soil at San Juan airport in mid-evening for an unscheduled overnight stop in Puerto Rico.

## Army Medals Awarded

Marvin B. Smith and James E. Steelman have been selected to receive the Society of American Military Engineers Gold Medal Award at the Army ROTC Day exercises at 4 p.m. today.

The award names Smith, a senior petroleum engineering major from Memphis, as the outstanding senior Army ROTC cadet and commissions him a reserve officer in the U. S. Army Corps of Engineers.

Steelman, a junior electrical engineering major from Plainview, is one of only 20 ROTC cadets among 250 Army ROTC units in the United States who receive the award as juniors. Those honored are selected from among 140,000 cadets enrolled in ROTC in the nation.

The award is based on academic and military standing and the individual's leadership record in both military science and on the campus.

Professor Robert L. Newell, assistant dean of engineering, will present the awards.

### Editorial

**DRASTIC ACTION** has been needed at Tech in regard to the cheating problem, and drastic action has been taken.

The cheating problem has been placed under the heading of "Academic Discipline," as separate from "Nonacademic Discipline."

All of the facts of the action taken are given in this issue of THE TOREADOR, and in this editorial a correlation will be made as to how the action affects both the faculty members and the students.

The first question that will come to my minds of many students will be, "Are we getting a 'fair shake?'"

In reality, not taking into consideration what prejudices a student might have against one or two instructors, or vice versa, the students as a whole are getting a fair shake.

The laws governing any community or nation are only required for a small minority of the population, and the same is true at Texas Tech.

However, in the past few years the cheating problem has been increasing, and unless some action was taken, this minority would have become a majority.

The placing of cheating under academic discipline places the full responsibility of discipline on the individual instructor, and after report is made on a student, it is effective.

Before the report is made out on a student accused of cheating, the instructor is required to notify the student, and then have consultation with him on the matter.

This will be the time the student will have to present his side of the case. If, after talking to the student, the instructor is sure that cheating has occurred, he will be required to register an 'F' in the course for that student. If the student gets two 'F's,' he will be suspended from school, the time of suspension being controlled by the severity of the offense.

The fact that the instructor has to send one report to his department head on each case will serve as a check to see that he does not become haphazard in these actions.

Through the mutual responsibility of students, faculty and administration, the policies and procedures set forth to provide disciplinary action on cheating will create wholesome atmosphere in which students will not think of cheating as a means to an end.

## Cheating Draws Blast

### Editor's Note:

The procedures and policies set forth in the two articles in this issue are in immediate effect, but there are still points of question. These questions will be studied further, and will appear in a booklet for students at registration time next year.

This article contains the official college regulations designed especially for the students at Texas Tech in order that they may clearly understand the policies and procedures now in effect in regard to cheating on examinations, themes, reports, etc.

### CHEATING DEFINED:

Dishonesty of any kind on examinations and quizzes and in written assignments; plagiarism; illegal possession of examinations; possessing crib notes during an examination or quiz, whether used or not; assisting others to cheat; alteration of grade records, and illegal entry or presence in an office are included in the definition of cheating.

**COMPLETE HONESTY** is required of the student in the presentation, as his own, of any and all phases of course work. This applies to ten minute quizzes as well as to final examinations and to daily written reports as well to term themes.

Cheating is cheating and will be treated as such. No degrees and shades of difference will be recognized.

### PROCEDURE FOR DISCIPLINE OF CHEATING VIOLATIONS:

The responsibility and authority for initiating discipline arising from violation of the rules against dishonesty during the progress of a course are vested in the instructor of that course.

**IF, IN THE** judgment of the instructor, cheating has occurred, the penalty assessed will be a grade of 'F' in the course. The instructor will notify the student of his decision before filing the report as indicated below.

In every such instance the instructor will prepare special re-

DISCIPLINE, Page 7 . . .

# Areas of Responsibility Advanced for Faculty

The following is a report on "Policies and Procedures for Handling Unethical Conduct on the Part of Students" at Tech which went into effect immediately after a special meeting of the faculty on May 12 in the Tech Union Ballroom.

**THIS REPORT** was drawn up by the Faculty Advisory Committee and the policy and procedure to the students will be effective for the final examinations of this semester.

This report deals not only with student's behavior, but also with the responsibility of the individual

instructor who might be dealing with any unethical situation which might arise.

### UNETHICAL CONDUCT:

**UNETHICAL CONDUCT** is a professional concept construed to mean the willful violation of trust and/or the willfully false representation of knowledge or skill. The intent of such willful action does not alter the fact of such action.

**UNETHICAL CONDUCT** commonly occurs as improperly obtained assistance on examinations or regular class assignments, as plagiarism, as alteration of rec-

ords, as unauthorized possession of examinations, as unauthorized entry into offices or laboratories or as possession of the means for entry thereto, or willfully contributing to the **UNETHICAL CONDUCT** of others.

### AREAS OF RESPONSIBILITY:

It is the responsibility of the student at all times to abstain from **UNETHICAL CONDUCT**, to avoid the appearance of **UNETHICAL CONDUCT**, and to guard against assisting others to engage in **UNETHICAL CONDUCT**.

It is the responsibility of the

RESPONSIBILITY, Page 7 . . .

# Resolutions Adopted

Resolutions adopted yesterday by the Student Publications Committee are expected to lessen the chances for omitting organizations in the 1959 LA VENTANA, according to retiring student chairman, Wick Alexander, and Billy Ellis, '59 VENTANA editor-elect.

Already approved by the committee was a provision for raising the price per page for organizations to \$50, and placing a limit of two pages for any one organization.

**THE COMMITTEE** followed up its action of requesting that contracts be signed between each organization and LA VENTANA, by approving the contract in draft form.

First of all, organizations wishing space in the 1959 yearbook

are required to sign a page contract no later than Oct. 15.

At the time of signing, each organization will also designate one of its members as "LA VENTANA representative," to be responsible to LA VENTANA for information and pictures for their organization.

**THIS REPRESENTATIVE** will be in charge of arranging for his organization's pictures in cooperation with LA VENTANA. If group pictures are desired, the representative shall be responsible for informing his organization where and when the picture shall be made.

The representative is also responsible for seeing that the members are correctly identified and that LA VENTANA is supplied with information about the organization. LA VENTANA, Page 5 . . .

**Pikes Receive  
Two Plaques**

Outstanding member and pledge were chosen at a recent meeting of Epsilon Gamma Chapter of Pi Kappa Alpha.

Bennett Corley, graduate accounting major from Lamesa was chosen outstanding member by the Pike Pledge Class. Wesley Masters, sophomore agronomy major from Hale Center, was awarded the best pledge plaque by the members.

Bennett has held numerous official positions in the Saddle Tramps and the Tech Accounting Society, including president and vice president.

Wesley is a member of the Aggie Club, Agronomy Club, Rodeo Association, Texas Tech Future Farmers of America, Wesley Foundation, Bledsoe Hall Dormitory Association. He served as the secretary of Pi Kappa Alpha pledge class for the spring semester, 1958, and participated in the following committees: Program, Chapter Project, and Community Project.

**IKE WANTS TO VOTE**

Eisenhower says he hopes to get to Gettysburg, Pa., next Tuesday to vote in the state primary. He is a legal resident of Pennsylvania.

**Mortor Board Elects  
Peggy Miller President**

Peggy Miller, junior secondary education major from Shreveport, La., was chosen president of Mortor Board for 1958-59.

Other officers elected were vice president, Janet Vines, junior home economics education major from Albany; secretary, Libby Balzer, junior applied arts major from Houston; treasurer, Carol Cummings, junior math major from Wichita Falls.

Historian, Sandra Dudley, junior applied arts major from Lubbock; projects chairman, Peggy Malinak, senior English major from Temple, and chapter editor, Karen Noteware, junior home economics education major from Dallas.

Chapter advisors are Mrs. E. N. Jones, Miss Sue Carlock, English

instructor, and Miss Jacqueline Sterner, assistant dean of women. Mortor Board is an honorary senior women's fraternity.

**Aggies Have  
Odd Final**

An unusual final exam of selling an actual client a landscape design concluded a seven-week problem of the horticulture 3311 class.

**RICHARD THORNTON** of San Saba won first place selling a model to Harold Humphries, 3306 24th St. Milton Caraway of DeLeon was second place winner.

Donnie Johnson and Bill Potter, both of Lubbock were the two top winners in the landscape design for the home of Mr. and Mrs. W. S. Moss, 4514 17th St.

Thornton, Johnson and Potter will receive a cash award of \$50 and Caraway will receive \$25.

**EACH STUDENT** had 12 minutes to sell their models to the clients who came to the Aggie Engineering Building Monday and Tuesday nights.

The problem consisted of several phases. First the student interviewed all members of the client's family, then determined the client's wishes. After doing this, he designed a yard and submitted the problem which included a scale model of the yard, working drawings, specifications, and a colored presentation plan.

**KAM Meets**

There will be a meeting at 5 p.m. today of anyone who is interested in Kappa Alpha Mu. It will be held in the reading room of the Journalism Building. This is a photojournalism fraternity.

**BIG CLEAN TASTE OF TOP-TOBACCO**

**Delts Send  
Five to Pitt**

Tech's Epsilon Delta Chapter of Delta Tau Delta will send five representatives to the Delt Centennial Karnea in Pittsburg, Penn., in August.

Delegates from Tech are Bob James, official delegate from Fort Worth; Morris Scales, alternate of Lubbock and Norris Green, alternate of Houston. Gerald Dabbs, Southland, is the chapter alumni delegate and Paul Ragland of Lubbock is the alumni alternate.

The Karnea will last for five days, Aug. 19-23, and plans are being made to accommodate the hundreds of Delts expected to attend. The Delts have set many attendance records at their previous conventions, and this meeting should shatter past records.

The fraternity was founded in 1858 at Bethany College, Virginia. Tech's chapter is the eighty-seventh chapter of Delta Tau Delta, which has chapters throughout the United States and in Canada.

## For What It's Worth

# The Parting Shot

It's been a year. And it's all finished. The last TOREADOR has rolled off the press.

We can't say we are sad. And certainly we can't say we are happy.

It has been a great experience. We feel we have accomplished much. But there is much yet to be accomplished. This we leave as a legacy and responsibility to next year's TOREADOR editor, Ben McCarty and his staff.

☆

No "Thirty" column would be complete without thanks to the many people whose work and cooperation make such a thing as THE TOREADOR possible.

### FIRST THE STAFF

The time put in, the late hours often running into the "late" morning hours seeing the paper onto the press, mark a special tribute to managing editor Billy Ellis and copy editors James Hamm, Mary Alice Atchison and Tommy Schmidt. News editor Ben McCarty had the sometimes "awful" responsibility of filling eight pages with the news of Texas Tech.

And to the three times a week that blank "dummy" pages faced Campus editor Carolyn Mimms and sports editor Bill Dean, we say thanks for their work.

Without the sacrifice and dedication of students such as these, where would Texas Tech be?

### THEN THE PROFESSORS

TOREADOR adviser W. E. Garets deserves special thanks for the time, energy and worry he spent in the interests of THE TOREADOR — much of this dealing with administrative problems that we students can't accurately comprehend.

For tireless effort and interest in the paper shown by instructor and business adviser Bill Whitted, we express special gratitude.

Never before in the history of THE TOREADOR has it been left in such capable hands as it is being left this year. Many of this year's staff will be back next year. Editor Ben McCarty will more than fill the shoes we are leaving him. Managing editor James Hamm will see to it that THE TOREADOR comes out technically a newspaper any institution can be proud of.

### FINALLY THE STUDENTS

To you we owe the deepest debt of gratitude, for without you and your cooperation there would be no TOREADOR. Our deepest appreciation for your patience this year, the first of what we hope is the beginning of a new era for THE TOREADOR.

☆

And speaking of the "new era" of THE TOREADOR. It began last spring under the editorship of Wayne James. His work and vision laid the groundwork. He budged the rock; it is now beginning its long roll down hill.

Due to the material advantage afforded by the matriculation fee, we have been able to furnish you with many new things — early morning delivery, Associated Press wire service, special editions.

Due to a reorganization of the editorial staff and the help of reporting and editing labs, this year's paper has improved in every respect. This was reflected in the First Class rating THE TOREADOR received this year.

Underlying all things is the intangible — morale. The attitude of the staff this year has been great.

But for the "new era" to continue, all these have to continue. The fee or an equivalent is fairly well established. We feel it has proven its worth — both for the Student Council and for THE TOREADOR.

As to the additional \$7 of the fee, it is good or it is a necessary evil according to one's viewpoint. But it has its advantages such as free attendance to athletic contests. The question is the compulsory

# Red Rover

This is the first time "Red Rover" has appeared, but assurance can be made that it won't be the last. From here on out Rover is going to be a sort of watchdog for the campus.

Red Rover intends to be fair and report things as he sees them. Since Rover hasn't been around long, his first column will not be of any great length.

Congratulations are in order to all faculty members for surviving the year. They have taken quite a bit of abuse, and have, in turn, dealt quite a bit of misery to the students via screwball quizzes, embarrassment in classrooms etc. This is to be expected, so Red thinks "survival" is the most fitting word.

Now to the student body. It's Red's opinion that the students have fared this year just about as well as they have in the past.

Of course, there are still constant statements that Tech is getting harder every semester, that chemistry is impossible to pass the first time around and that those in Business Administration have it made.

These stereotyped quotes linger from year to year, but Red says that progress is really being made at Tech. He didn't elaborate.

clause. But did this explain the exceptionally high spirit in athletics this year?)

And for the "new era" to continue, the staff of the paper must be maintained. There is little doubt on this point. Also, and by the most important, the morale must stay high. This is up to the editor. It is his greatest responsibility. There are no doubts here, at least for the immediate future.

☆

Last year editor James left us a list of problems in his "Thirty" column. Some of them have been solved. Some haven't. Some never will be.

We have already left McCarty the responsibilities on the paper. We will mention some "extras" for his consideration next year.

The administration at Tech is doing a 16-hour, 6-day week job. There are many things not perfect. Certain things will arise. It is the editor's job to take a positive stand on each of these things based on his convictions to do what is in the best interests of Tech.

The shadow over all is the \$3.50 per semester charge for the Security Patrol. There are arguments pro and con on the necessity of such a force.

We have been disappointed in its necessity. It is an economic failure. The \$7 yearly charge doesn't furnish the money needed to keep the Patrol up, doesn't meet expenses. And the Security Patrol is in need of new cars, for one thing, the money for which will probably have to come from Special funds — robbing Peter to pay Paul.

A student staff could hand out tickets. This has failed in the past. We would like to see it re-evaluated and, if possible, reorganized. With proper supervision and with proper responsibility and indoctrination, such a staff should be able to do a sufficient job.

The committee setup at Tech sometimes smells of being a farce. The purpose of an administrative committee should be, ideally to arrive at the decisions demanded of it on its own reasoning and work, not on the "suggestions" made to it from farther up the line of command.

Campus planning is traveling, apparently, a straight line. However, it should be watched on such matters as destroying the Broadway entrance.

☆

There are several thousand other wise words we could say. We won't.

We will simply hand over THE TOREADOR to the keeping of future journalists, and other students, at Tech. It has been a job. But the returns have been more than worth the work.

C. J. Wren

# Thinking Back

—Billy Ellis

Now it comes time to stop for a moment, reminisce over your year's work, see if you've accomplished anything worth reminiscing over, and give out thanks where thanks is due.

In the first place, we want to congratulate editor C. J. Wren on guiding THE TOREADOR to a first-class rating by the Associated Collegiate Press for the fall semester. We also want to thank him for getting us started, and for carrying about three-fourths of the managing editor's job until we finally caught the hang of it.

★

Other thanks are due News Editor Ben McCarty (next year's editor), copy editors James Hamm, Mary Alice Atchison and Tommy Schmidt, campus editor Carolyn Mimms and sports editor Bill Dean. They have been wonderful "crew" and have been fine kids to work with.

A great deal of credit goes to Bill Whitted, whose freshman reporting class and editing labs certainly made our operations much smoother, especially the second semester. Thanks also to Mrs. Louise Allen and department head Wallace Garets, who, along with their classes, contributed immensely.

Then, last, but not least, we'd like to compliment the people at

Tech Press, who under manager Bengé Daniel have been nice folks to work with in printing the TOREADOR, and have been more than lenient to have taken some of the things we've thrown at them this year.

It has been a privilege to have had a hand in Tech's first "morning" newspaper, and although the late hours sometimes almost baffled us, it was worth it to see Techians get a newspaper that was timely and newsworthy.

We've seen a lot of progress on THE TOREADOR this year, what with the use of Associated Press material, the renovating of its type face and makeup, and the increased number of pages printed over last year.

★

As far as we're concerned, THE TOREADOR will be in fine shape next year, under McCarty and Co., and should continue to move upward. If Mr. Hamm, who succeeds us as managing editor, is good at profiting by his predecessor's mistakes, he should make a killing, as we bequeath him our office and move across the hall to see what we can do to LA VENTANA.

## ★ wet wash ★

... wetherington

This is the last of "wet wash". This is what the first column of the series back on Sept. 21 promised you would eventually come. You have been very patient and tolerant in awaiting this memorable date. So have I.

There is much I could say now that it's ended about "wet wash" and the response it has brought and the commentaries and issues it has raised, but sleeping dogs are better left alone, and this old dog is just beginning to yawn.

It has been a gratifying year.

Back in the dark ages when I was approached by the editor and asked to write for THE TOREADOR, I had visions of sugar plums the summer long. I am pleased that he gave me license to write whatever happened to pop out of the bag, and appreciate his tolerance (often stretched considerably) and openmindedness.

Wren has accomplished a tedious, often disagreeable, mission with flying banners of success. For the dead-end streets and washed-out bridges I have at times led him to, I apologize. All editors pay a price. Hail, Caesar!

At any rate, the deed is done — the moving finger, having writ, moves on, to paraphrase an old friend. There will doubtless be some "rough dry" to finish cleaning the grease stains "wet wash" forgot; to patch the frayed collars and sew on the innumerable mission buttons. The lad has my condolences. Along with the "30-dash" on this final bit of copy go others on a B.A., a couple of gold Air Force bars, and on a short, tedious, but happy bachelorhood. The B.A. was all I came here for; the others are bonuses for good behavior. So you never can tell, I've found.

From here on the highway divides into more writing, more school, and more Air Force (some people never give up), with an occasional rest-stop for Brahms, beer, and pretzels — not in that order.

And that's about it. The next bus to Euphoria is at ten.

# Dr. Hemmle Honored At Choir Banquet

With decorations carrying out a theme of "Music Man", seen by the choir while in New York, the Tech Choir banquet was held Monday night in the ballroom of the Caprock Hotel.

Mrs. R. C. Goodwin, Vice President and Mrs. Ernst G. Giesecke and members of the music faculty.

Dr. Hemmle said, "Perhaps the

work on the Fellowship can be realized in the development of such a program." He will serve as professor of music and head of the music department next year.

Let Reeves record this highlight in your life so that it will live forever.

**Reeves Photography**

1719 Broadway

PO 5-7731

Albums and scores from the musical lined the walls and table decorations featured a conductor's hand holding a baton and spring flowers.

Deniese Magness gave the invocation, Ray Moore, president of the choir, gave the welcome and recognized guests.

Graduating seniors were recognized by Bob Key, choir vice president.

Bobby Boyd narrated a show of colored slides from the choir's New York trip, Martha Mack and Von Prahl showed the slides.

Special honors were awarded by Johnny Gilbert. Three presentations were made to Dr. Gene Hemmle who directed the choir last month in its appearance on the "Ed Sullivan Show."

The first presentation was a scrapbook made by the choir and based on the "Music Man" theme. It included pictures, programs and stories on all the chorus Dr. Hemmle has directed.

He also received a hi-fi photograph in a French provincial cabinet and a recording of the choir's last performance off the "Peaceable Kingdom" by Randall Thompson at the Lubbock Little Theater.

Dr. Hemmle closed the program with a word of appreciation to the choir.

Special guests at the banquet included Mrs. E. N. Jones who was presented a silver serving dish with the inscription, "In appreciation from the Texas Tech Choir." Mrs. Jones accompanied the choir to New York as a chaperone.

Other guests were Dean and Mrs. James G. Allen, Dean and

## ... La Ventana Resolutions

zation for use in the yearbook. **THE COMMITTEE** felt that the contracts, and the organization representative to LA VENTANA would prevent any misunderstanding which might arise, and prove beneficial to both parties in assembling the organizations section.

The price increase is due mainly to the fact that LA VENTANA will be a fall delivery book, but the increased coverage offsets the rate increase.

The 1959 La Ventana, which will comprise the whole year's activities, will be delivered Sept., 1959.

## ... Idealist

... benett

Gerald Clod knitted his receding browline fretfully. He sat hunched before his typewriter, poised to pound out his column for the final edition of the school paper.

But his brain was like a lemon which had been squeezed into too many cups of tea. His thoughts were as incoherent as a freshman English theme.

"I could attack the administration," Clod thought. He winched and shook his head, remembering the stoic calm with which the administration had weathered his previous blasts.

Clod's eyes rolled upward. On the wall to the right of his desk was a picture of Bridget Bardot. Autographed. He couldn't read it because he'd only had first year French.

On the wall to the left of his desk was a copy of William Ernest Henley's "Invictus," in luminous letters. He tried to read it but his attention wandered.

Somewhere a cheerful laugh bubbled out, mounted through his window and tickled his left ear drum. Clod rushed to the casement to peer outside.

Outside two bulbous policemen were gleefully pinning a parking ticket on a 1928 model car parked in a faculty zone. It belonged to a poor student struggling to work his way through.

"I'll bet he has to drop out before he can pay that one," chuckled one policeman. "At least he'll miss a meal or two," giggled the other, and belched. Clod chuckled too as he returned to his seat.

"I could attack yesterday's editorial by Scissorbill," he mused. "No, the campus editorial page already sounds like it has schizophrenia. Anyway, he's right; students should have the privilege of grazing goats and other pets on the campus."

Outside the phone rang. The click of dice against the other side of the wall annoyed him. The first fly of the summer buzzed in at the window. He wondered if the library had bound copies of MAD.

"Something must be did about the long coffee lines in the SUB . . ." His fingers flew over the keyboard like Oscar Levant's at a Gershwin recital.

Clod did not hear the ominous whoosh outside his window. Neither did he notice when the three strange creatures with sponge-like heads, and eyes in the tips of their big toes stepped into the room.

The spongiest, obviously their leader, leveled a peculiar device at the laboring columnist and there was a blinding flash of light. Clod leaped from his chair, one pitiful hand clutching at the picture of Bardot.

The other two creatures ran forward to pick up his senseless corpse as it sank to the floor. They disappeared out the window with their prize and another whoosh would have been heard if there had been anyone to hear it.

An old lady reported seeing a flying saucer that day but the Air Force and newspapers laughed at her.

# Faculty Responsibility Given

faculty to establish an instructional environment unfavorable to **UNETHICAL CONDUCT** by advising their classes of their position in the prosecution of **UNETHICAL CONDUCT**, by establishing clearly the "ground rules" of conduct in their courses, and by using reasonable precautions to deny access to class records or examinations to anyone who is not entitled to such information.

It is the responsibility of the administration to prevent overcrowded classroom conditions, and to provide office space and building security so that excessive occupancy and unauthorized entry into staff offices are reduced to a minimum.

## AREAS OF RESPONSIBILITY FOR DISCIPLINE.

In application of student discipline, faculty responsibility lies in those areas where the academic standards of the college are the principal matters affected; whereas, the administrative arm of the

college has prime responsibility where the moral, economics, and/or physical welfare of the college student community is the principal issue.

Areas of faculty responsibility for student discipline are **UNETHICAL CONDUCT** in a course and **UNAUTHORIZED PRESENCE** in a faculty member's office.

Areas of administrative responsibility for student discipline are campus parking violations, building security and property violations, violation of civil statutes (subsequent to action by local civil authority), violations of dormitory rules and regulations and student immorality.

Questionable areas of responsibility could be resolved by the President of Texas Tech upon written request for clarification of an area of responsibility.

## PROCEDURE FOR DISCIPLINE OF STUDENTS IN ACADEMIC

### AREAS:

The responsibility and the authority for initiating discipline arising because of incidents of **UNETHICAL CONDUCT** during the progress of a course are vested in the instructor of that course.

To deal with discipline problems in an effective, orderly and consistent manner, the following actions are mandatory.

If in the opinion of the instructor **UNETHICAL CONDUCT** occurs the minimum penalty assessed will be an 'F' in the course.

In every instance, the instructor will prepare report forms in quadruplicate, describing the incident and carrying notice that the grade of 'F' has been given. These reports will be for the registrar, the instructor's department head and the student's academic dean.

The instructor will send these three copies to the registrar and retain a copy for himself.

The student has the privilege

of making a **WRITTEN DECLARATION** on his (the student's) behalf. Copies of this **DECLARATION**, which is not to be construed as an appeal but for information only, will be filed with the instructor's department head and the student's academic dean.

A second offense of **UNETHICAL CONDUCT** reported will result in a minimum penalty of suspension from Tech. In the sense employed here, an "OFFENSE" refers to separate and distinct occurrences of **UNETHICAL CONDUCT** in the same course as in different courses, and covering the entire period of the enrollment of the student at Tech.

These are the policies and procedures set forth to deal with the academic side of the discipline problem. The nonacademic procedure will continue as it presently is until a new policy is made.

### BUYS HORSES

KANSAS CITY (AP)—Pinehurst Stables, Houston, has purchased R. Q. Sutherland's nationally-known herd of quarter horses. The 55 animals include Paul A.

a 10-year-old stallion that once sold for \$30,000. The herd price was not disclosed. Edgar Brown III, representing Pinehurst, said the horses will be trucked to Houston.

## La Ventanas Left

Approximately 1000 students have not picked up their **LA-VENTANAS**. It would be great-up appreciated if those students would go by the Journalism Building and pick up their annuals.

## ... Discipline

port forms in quadruplicate, indicating the nature of the cheating and carrying notice that a grade of 'F' has been given.

**THE INSTRUCTOR** will retain one copy and send three copies to the Registrar. The registrar will place one copy in a special file and will forward one copy to the student's academic dean and the other to the instructor's department head.

The student has the privilege of making a written declaration on his (the student's) behalf. Copies of this declaration, which is not to be construed as an appeal but for information only, will be filed with the instructor's department head, with the student's academic dean and with the Registrar.

A **SECOND** reported offense of cheating will result in a grade of 'F' and also in suspension. In the sense employed here, an "OFFENSE" refers to separate and distinct occurrences of cheating in the same course or in different courses, and covering the entire period of the enrollment of the student at Texas Tech.

"The rules and regulations are intended to be simple, clear and definite. They protect the honest student against unfair competition for grades and emphasize to the relatively few students who need it, that Texas Tech will not recognize course credit which is dishonestly earned," states Pres. E. N. Jones.

## Outlook

by BILL DEAN

Texas Tech has just completed its first spring sports year as a full fledged member of the South-west Conference.

And what kind of a year has it been?

Well sir, not bad for a start. As a whole the Raiders have fared well in spring sports.

Basketball started it off and Coach Polk Robison's boys definitely left their mark on the rest of the conference finishing in a tie for third.

**IT WAS THE** most upside down, unpredictable race in conference history with as many as six teams being in definite contention at various times.

The Raiders, like most others, were tough at home and woefully lacking on the road. Their finish could have been higher but for a start it was great.

This basketball season also ushered in the area of 10,000 plus crowds at the Coliseum and a general public awakening and enthusiasm for the cage sport.

**THE TENNIS TEAM**, under George Philbrick, completed their season last weekend in Dallas winding up in second place.

David Kent, Bill Edd Gowan and especially Bob Macy all turned in fine performances this year and proved to the rest of the conference that Tech is certainly not weak in this so-called "minor" sport.

Another "minor" sport did right well for itself this spring—the golf team. John Paul Cain, John Farquhar, Don Kaplan and Robert Rogers shot their way to fourth place in the conference. They also wound up their season last weekend.

**LED BY FRANK** Griffin Tech's fencing team racked up a second place in the unofficial conference tourney — unofficial because the SWC does not recognize fencing in its spring sport program.

The swimmers under Raymond Kirellis failed to penetrate the conference very much but at least they had a new swimming pool to operate in.

Track had several approaches—good and bad. The freshmen were good — the varsity bad. Seriously both teams were handicapped by bad weather early this spring

and also lost several performers via different routes all of which led to a disappointing last for the varsity and a promising third for the freshmen in the SWC meet.

But they were well coached!

**BASEBALL IS ANOTHER** story which we have saved for last.

The freshmen showed good promise with a 5-3 record. Hurler Bill Curry should be one of the finest in Tech history in years to come while a strong infield crew should make things tough for everyone next spring.

The varsity! — never before has a team with so much given so little. Everything just went sour. First of all last year's regular left and right fielders and first baseman were ineligible. But still there was plenty of talent left on this ball club.

The year was most disappointing. Good hitters did not hit. Good infielders made tons of errors. Smart ballplayers acted like sandloters.

**THERE IS A LOT** of talk about giving up baseball. Well, maybe we should. After all no one seems to care one way or the other.

When you put together a group of ballplayers such as the baseball team has and do as little as they have it might be the time to throw it in.

**HOWEVER**, and naturally I'm prejudiced, I don't exactly see it this way.

First of all if Texas Tech is going to operate a baseball program why not get some organization and really do a good job rather than have such an un-coordinated, poorly handled, pitiful mess such as exists at present.

It can be done. This I firmly believe. The Raiders, despite it all, did play some decent ball in spurts this spring.

**GIVE IT UP** if you want to but I say give it a chance first. And baseball certainly hasn't been given a chance here. The talent is there and the will is there.

Baseball is our national past-time. More athletes play professional baseball than any other major professional sport and receive more money.

At many schools it is given a high and respected place in the athletic program. Why not at Texas Tech? Your witness.

## Rushers, Phi Delts Top Meet

The Roman Rushers, an independent track team, ran away with the all campus Intramural Track Meet which was finished Tuesday on a make shift track in front of the Lubbock Coliseum.

The Rushers garnered 47 points in winning the team championship. Phi Delta Theta took second place honors totaling 30 points and Sigma Alpha Epsilon won third place with 24 points.

The meet was originally scheduled for last Saturday but bad weather prevented the event and it was rescheduled for Monday. The meet had to be moved from the Tech track to the improvised track and the running events were finished Tuesday.

**IN THE INDIVIDUAL** competition, Roman Rushers captured the first three places. Tony Deatherage and Bruce Stark tied for first and second places with 10 points each. Gerald Hardage, another Rusher, placed third with 7½ points. The Phi Delt's Gene Handley won fourth place with 7 points.

John Parks won the 100 yard dash in 10.8 followed by Bob Kinney, 10.9; Don Hunt, 11.0 and Gene Handley, 11.1.

In the 220 yard dash, Bruce Stark won with a 23.3. In second place was Bill McCauley with 23.4 followed by Sid Simmons, 23.5

### IKE DISLIKES FORCE

Eisenhower says he deprecates the use of federal troops anywhere to enforce court orders. He made that remark when asked whether he might follow the same course he did in Little Rock, Ark., if there should be violence in other states over school integration as there was in that case.

and a tie between Gene Handley and Jack Lallement for fourth place at 24.0.

In the 440 yard dash, the winner was Tony Deatherage followed by Gerald Hardage, Gerald Seeman and Randall Clark. The winning time was an unofficial 70 seconds.

The 880 yard run was won by Esslinger followed by Mike Crookshank, Butch Baynes and Wayne Esslinger.

The 440 yard relay was won by a team of Deatherage, Rains, Hardage and Thompson and the mile relay was won by Hardage and Deatherage.
