

## Public criticism, low pay noted

# Tech cops have trouble, too

DAVE BURKET  
Feature Editor

According to Tech Traffic Security Officer Dennis Wallace, policemen are used to criticism by the public. "People don't see the good things an officer does....but, that's part of the job."

Traffic Security has come under heavy criticism this year, seemingly even more so than in recent years. Strict enforcement of parking rules and alleged mistreatment by officers has aroused the ire of Tech students, raising questions concerning both the policies and the methods of Traffic Security.

Bill Daniels, Chief of Traffic Security, is aware of the criticism and the problems. "The police are going through a period of change. We brought trouble on ourselves because we didn't adapt to new

developments as fast as we should have."

DANIELS, A PAST PRESIDENT of the National Association of College and University Traffic and Security Directors, oversees a force of 39 men. He said Tech's police department is the best on any college campus.

"We run this department like a business," Daniels rapped. "We are public servants, and we're doing what we're supposed to do."

Some students have a different view. Several report harassment and rude treatment. A man arrested on charges of lewdness in the Administration Building restroom complains of entrapment, saying that the officer passed a suggestive note to him. And many students protest the policy of towing away illegally parked cars.

"We wouldn't put up with an officer

mistreating a student," said Daniels. A patrolman, Charles Barnett, affirms fair treatment is the key to success. "I try to talk to students like I want them to talk to me. I explain to everybody what's going on."

ONE STUDENT recently complained that Officer Barnett frisked both him and his date when the girl was unable to produce identification. Barnett refuted the charge, saying that the man never even got out of the car. Still, rude treatment or harassment by the traffic security is reported, even though misunderstanding is often at fault.

Last Friday Sgt. J. T. Bogard, head of the night shift, caught a couple parked on campus after the 1 a.m. curfew. The dorm counselor told him to bring the girl to the dorm, even though she claimed to be legally

checked out. "I couldn't do anything else when the dorm counselor said to bring her in," Bogard said, "but if she was legally out Traffic Security has made an enemy."

Much of the friction between students and Traffic Security stems from the wide difference in education and background. A high school diploma or equivalent is required of all patrolmen, but the gap between these men and college students is frequently a wide one.

"WORKING ON CAMPUS is the most difficult police job I've ever had," Daniels said. "We're dealing with educated people, young people who will out-think us if we're not careful. We have to use psychology in handling people, and we have to make quick decisions. Often these are not the right decisions."

## Today

By The Associated Press

### Demos want total withdrawal

WASHINGTON—Democratic party policy makers declared Monday that all U.S. forces should be withdrawn from Vietnam within 18 months, and urged President Nixon to appoint immediately a new top-level peace negotiator.

The Democratic Policy Council adopted a statement drafted by a panel headed by W. Averell Harriman, once the U.S. negotiator at the Paris peace talks.

The action came as the policy council put together what amounted to an interim Democratic platform. Former Vice President Hubert H. Humphrey, the council chairman, said the declaration on Vietnam and on an array of other issues provides "a pretty good review of the state of the nation as we see it now."

There were proposals from more dovish Democrats that the party council demand complete withdrawal this year. On the other hand, such men as Rep. Jim Wright of Texas requested that the statement drop any troop withdrawal deadline.

But in the end it was the position taken by Harriman which the council upheld.

### Hijacker surrenders

MADRID—A man surrendered to U.S. military authorities in Spain Monday, identifying himself as the hijacker of a DC8 airliner diverted to Cuba on a Chicago-Miami flight nearly two years ago.

He gave his name as Lawrence Malhou Rhodes and said he hijacked a Delta Airlines plane at gunpoint Feb. 21, 1968.

Records showed the FBI filed a complaint in Miami on Feb. 22, 1968, charging Lawrence M. Rhodes Jr., 28, of Welch, W. Va., with hijacking the jetliner and kidnapping the 108 aboard.

Rhodes was being sought at that time on a federal warrant accusing him of unlawful flight to avoid prosecution in a \$12,000 payroll robbery. The warrant said a gunman kidnaped the payroll clerk of the Amherst Coal Co., in Logan County, W. Va., on Dec. 18, 1967, and held the clerk and his family until he was given money.

U.S. Embassy officials in Madrid said Rhodes presented himself to American authorities at the joint U.S.-Spanish air base in Zaragoza. American sources said, if he is the same Rhodes named in the FBI complaints, U.S. authorities would ask Spain for extradition.

### Post Office spreads service

WASHINGTON — The Post Office Department announced Monday that starting Feb. 16 it will make home delivery service available to about 1.2 million families who have not qualified for it before.

Postmaster General Winton M. Blount said the new order covers about 4 million individuals who live more than a quarter mile from 18,700 post offices too small to qualify for city delivery services.

"Because these persons don't live at least half a mile away from their post offices, they have not qualified in the past for rural delivery service," Blount said. "And, because they happen to live near one of the offices that does not have a city delivery service, they have lost out there too."

Blount's statement said that to get the new service it is only necessary that a majority of those living in the area ask their postmaster for it.

In separate statements both Texas' senators, Democrat Ralph Yarborough and Republican John Tower, said 77,866 Texas families are eligible for expanded rural mail delivery under the new program.

### Riot trial nears end

CHICAGO—Judge Julius J. Hoffman denied Monday a defense motion to direct the jury to acquit seven men charged with conspiracy to incite rioting at the time of the 1968 Democratic National Convention.

The motion was made soon after the defense rested its case in the five-month-old trial.

The judge also ruled that prosecution and defense lawyers will be allowed seven hours each for their final arguments, which will begin Tuesday. The government indicated the opening segment of its closing arguments would take up most of Tuesday's session.

It was expected that the U.S. District Court jury of 10 women and 2 men would get the case sometime Thursday. The jurors have been sequestered in a hotel since Sept. 30. The trial began Sept. 24.

Thomas A. Foran, the U.S. district attorney, suggested that each side be allowed 10 hours to summarize the testimony of 190 witnesses and 20,000 pages of trial transcript.

### Surplus bill on borrowing

WASHINGTON—President Nixon's projected budget surplus is built on borrowing and will disappear, a high congressional critic said Monday as the administration kept predicting a curb on inflation.

Rep. George H. Mahon, D-Tex., chairman of the House Appropriations Committee, while downgrading the importance of what he called the razor-thin \$1.3 billion surplus, nevertheless pledged his committee will do all possible to stay within Nixon's \$200.8 billion spending estimate for the year beginning July 1.

In defense of the budget, Secretary of the Treasury David M. Kennedy contended "there are definite indications that the policy of restraint is taking hold."

"I recognize that the results up to now—in terms of price changes—will not satisfy any of you in this room," Kennedy told the Appropriations Committee in written testimony.

## Thompson says speech area to be moved to front of Union

By MIKE HOGAN  
Staff Writer

The Free Speech Area behind the Union will be moved to the front of the Union for Wednesday's discussion on "Free Speech and Censorship" according to Jay Thompson, student association president.

"We will move to the front of the Union, however we will not use amplifiers," Thompson said.

Thompson and Arthur Yarish, chairman of the Free Speech Committee, have been working together to try to get the administration to change its policy.

THE POLICY NOW designates the area behind the Union as the Free Speech Area.

Thompson talked to Dr. William H. Duvall, assistant dean of student life, about the changing of the Free Speech Area, however, Duvall said it was out of his hands.

Thompson said the discussion set for Wednesday at 12:20 p.m. would be held in front of the Union anyway.

Thompson said he would try to talk to Dr. Murray today in an attempt to get the policy changed.

"I would like to applaud the Senate for recognizing the need for its creation (Free Speech Area), said Yarish. It is unfortunate that

on a university campus the student senate would have to make a special move to provide for free speech in a community that should be devoted to that principle," he said.

THOMPSON SAID ONE of the reasons the Free Speech Area would be moved to the front of the Union was to stimulate interest for the elections on March 4.

Yarish said that the Free Speech Committee would attempt to have

a podium for the upcoming candidates for election. "We would like to have a place where candidates can meet and have discussions," Yarish said.

Yarish said, "the purpose of the Free Speech Committee was to attempt to bring all issues pertaining to the campus and the interests of the students into the open for free discussion and also to arouse the interest of the students in these areas."

ACCORDING TO YARISH and Thompson, there will be a discussion every Wednesday at 12:20 p.m.

Tomorrow's discussion will be headed by the members of the Free Speech Committee.

Yarish said future discussions would be headed by guest speakers and by professors on the subject they wanted to speak on. "We hope to make an open forum for almost any subject," said Yarish.

## Foreign affairs specialists to speak to students on policies

A team of foreign affairs specialists from the U.S. State Department will conduct a day-long series of lectures and seminars Wednesday for Tech and Lubbock High School students.

Talks conducted by the team are designed to bring together members of the respective communities with Washington officials so that ideas and information can be exchanged concerning present foreign policies and programs.

The team is led by Ambassador Clare Timberlake, presently

assigned to the Bureau of Public Affairs. Timberlake will conclude the series with a public discussion in the Coronado Room of the Union on "Who Makes and Executes U.S. Foreign Policy?"

OTHER TEAM MEMBERS will include Frederick W. Flott of the Bureau of East Asian and Pacific Affairs, John B. Thompson, office of Soviet Union Affairs, William Hallman of the Bureau of Near Eastern and South Asian Affairs and Mrs. Mary Ann Parsons, Bureau of Public Affairs.

Sponsoring organizations for the event are the Ideas and Issues Committee of the Union, the International Relations Committee of the Lubbock Chamber of Commerce, ICASALS, the Lubbock League of Women Voters, Delta Phi Epsilon and Phi Nu Epsilon. The team has been scheduled for the following:

8:30 A.M. TIMBERLAKE will speak to the government class of Professor Tamkoc on "Who Makes and Executes U.S. Foreign Policy?"

8:50 to 9:50 a.m. Flott will speak at Lubbock High School on "East Asia: Progress."

9:30 a.m. Timberlake will speak to the history class of Professor Hayes on "Myths and Realities in Latin America."

10:30 a.m. Timberlake, Thompson and Hallman will attend

a coffee sponsored by Faculty and Graduate Students in Government.

10:30 a.m. Flott will speak to a government class of Professor Wright on "Current Goals of U.S. Foreign Policy in East Asia."

11:30 a.m. Timberlake will speak to the combined government and history classes of Professors Kyre and Hull on "Is Disarmament Possible?"

Hallman will speak to the combined government classes of Professors Burnett and Pearson on "The Arab-Israeli Dispute: America's Interest." Also there will be luncheon for Mrs. Parsons, Flott and Thompson at 11:30 a.m.

12:30 p.m. There will be luncheon for Timberlake and Hallman. Flott will speak to the history class of Professor Newcomb on "Current Goals of U.S. Foreign Policy in East Asia." Thompson will speak to the government class of Professor Burnett on "Dissent Within the Soviet Union."

1:30 p.m. Thompson will speak to the economics class of Professor Troun on "The Soviet Influence on European Security." Hallman and Flott to the combined government classes of Professor Wright and Beard on "Current Goals of U.S. Foreign Policy in East Asia" and "The Arab-Israeli Dispute: America's Interests."

2:30 p.m. Timberlake will speak to the combined government classes of Professors Pearson and Smith on "Myths & Realities in Latin America." Hallman will speak to government class of Professor Mack on "Soviet Inroads in the Middle East." Flott will speak to the history class of Professor Harper on "Current Goals of U.S. Foreign Policy." Mrs. Parsons will speak at Lubbock High School.

3:30 p.m. to 4:45 p.m. Timberlake, Flott, Hallman, Thompson and Mrs. Parsons will attend a coffee in the Coronado Room of the Union. The coffee will be open to anyone wishing to attend.

7:30 p.m. Timberlake will address an open meeting in the Coronado Room of the Union on "Who Makes and Executes U.S. Foreign Policy?"

## Second rock festival to come to Lubbock

By JERRY TEAGUE  
Staff Writer

Texas International Pop Festival, version two, is a follow up to the 1969 Lewisville version and a baptism of hard music — in Lubbock County.

The Lubbock version will feature Three Dog Hight, the Chambers Brothers — and evangelist Billy Graham.

The festival is tentatively planned for the Easter weekend, the final three days in March, designed to precede a five year generation of rock festivals in Lubbock.

Led Zeppelin, the Who, Joe Cocker, Ten Years After, Jethro Tull, the Jeff Beck Group, Fleetwood Mac, the Flock, Grand Funk Railway, King Crimson and Blood, Sweat and Tears are currently scheduled to play.

Robert Gamble, of Atlantis Productions, said the festival is planned in co-operation with the Southwest Festival Corporation who sponsored the Texas International Pop Festival in Lewisville last summer.

Gamble said land has been secured in the canyon running between Lubbock and Slaton, providing camping facilities for an estimated 72,000 people. The land is available for the next five years, according to Gamble, setting the stage for a series of festivals.

"It's beautiful (the site)," said Gamble, "there is excellent traffic dispersal, adequate and sanitary camping facilities, and there is a stream running through the center of the canyon."

The festival is currently planned for the last three days in March, but may be

cancelled until the first of May according to Gamble. The pre-Easter date conflicts with a festival scheduled for the same time in Illinois.

The music will continue for three days, Thursday, Friday and Saturday. Easter morning Graham will deliver a religious sermon.

Pinkerton men have been hired by Atlantis Productions to keep peace during the festival.

Tickets can be purchased in the near future for \$13.50 for all three days (and Graham's service), otherwise daily tickets will be sold for five dollars.

## Computer services still having money troubles

The Tech computer center is still having financial troubles because certain funds have failed to materialize, said Dr. George S. Innis, director of computer services.

These funds were supposed to come from a number of sources, the Medical School, the Textile Research Center and certain agricultural projects, he said.

Since it is presumed that these sources would eventually use the computer center their budgets contain funds to help support this service, said Innis.

The computer service may or may not get the money from these sources because at the present there is a question whether or not these funds are specifically for the

center, said Dr. Monty E. Davenport, associate vice president of research and special programs.

When appropriations are made by the state legislature they are categorized and this money can be used only for specific purposes, he said.

Davenport said there needs to be a plan for funding the computer center in one large package. "My office is working on such a plan which should be ready in about two weeks," he said.

The ultimate decision as to whether the plan will be used will be made by the central administration, said Davenport.

# Editorial Confusion and hope

I'm black and you're white. What do I want more than anything else—to feel like I'm really a part of this society. I don't like walking into your classrooms and being noted as the colored guy or the Negro or the black guy that sits on the second row.

I don't really want you to speak to me when you're walking across campus. I know that if you say anything it's just because I'm black. You normally don't talk to the white kids you don't know, so don't talk to me either.

AS A MATTER OF FACT, I'd just as soon you wouldn't pay that much attention to me at all. Why do you have to be so aware of my presence? When I talk to a white girl, why do you always stare so much?

Don't you know that racism means more than just being openly prejudiced? It includes what you think and what you feel when you come into contact with me. Don't you know that I can see it in your eyes when you pat me on the back just because I'm black?

What are you going to do to solve the problem? I admit that I'm rather confused about the whole thing. You know—we're all caught up in this thing of black pride and black is beautiful. Don't let any of my fellow blacks find out, but now that I think about it, I really do appreciate you're going out of your way to be friendly—just so you don't overdo it.

And another thing, I don't understand why all of my people sit in their little corner of the Union. Sure, we're having a pretty good time, but how can we ever expect to get to know other students that way?

YOU KNOW, looking ahead, I think inter-marriage will be the final answer—or maybe the final indication—of America's race problems being solved. Sure, black is beautiful. But so is brown and yellow—and maybe even white. When the nation really can see this, racial inter-marriage won't be a big thing anymore.

That's probably the real hang-up in school integration right now, all these white parents are afraid their kids might someday want to marry the black kids they would be going to school with. Maybe our generations will be different.

## About letters

Letters to the editor of The University Daily should be sent to Editor, The University Daily, Journalism Building, Texas Tech University, Lubbock, Texas 79409.

Letters should be typed double space on a 65-character line. The editor reserves the right to edit for length. Letters will be published as often as space permits.

All letters must have sender's name and address in order to be considered for publication.

However, the sender may request that his name be withheld from print. In that event, the name will be withheld from publication.

## THE UNIVERSITY DAILY

Opinions expressed in The University Daily are those of the editor or of the writer of the article and are not necessarily those of the college administration or the Board of Regents.

The University Daily, a student newspaper at Texas Tech University at Lubbock, Texas is published by Student Publications, Journalism Building, Texas Tech University, Lubbock, Texas 79409. The University Daily is published daily except Saturday and Sunday during the long terms, September through May, and weekly (every Friday) during the summer session, June through August, except during review and examination periods and school vacations.

The University Daily is a member of Associated Collegiate Press, Southwestern Journalism Congress and National Council of College Publications Advisors.

# Letters To The Editor Deserve what you get

Students today are always voicing their discontent about boring courses, dull professors or the general education that our university affords us. They feel sure they would be better educated if Texas Tech would just listen to their demands.

Well, I'm sure this will come as a complete surprise to some students but this past week Texas Tech was the host for the Third Annual World Affairs Conference. The title of the conference was Australia, A Modern Happening, a topic in which most of us are not knowledgeable. This would have been the golden opportunity for most of us, as mature students, to further our education. Of course, the difficulty being that as mature students we would have had to have taken the time and effort to go to the Student Union and listen to some of the most noted statesmen, educators, diplomats and businessmen, all expert in their fields, talk on a subject that is rapidly taking prominence in the world.

We are quick to criticize the education we receive but we are slow to take the initiative in utilizing those opportunities afforded us. At the last major address there were only 40 students

present—some of those were visiting from other universities, taking part in the conference.

What is even more pathetic is the fact that our apathy is not limited to this particular event but can be seen in almost every aspect of university life. Our university has a speaker series which brings many diverse authorities to our campus to speak on subjects from consumer protection to Southeast Asian affairs. These guest speakers give their lectures to only 100-200 students (Ralph Nader was the exception).

I know the favorite pastime of most students is to complain, whether it be about dorm regulations, parking, or the education they receive, but after seeing the small per cent of students who took the time to enhance their minds outside of class, I'm inclined to believe you deserve exactly what you get. You don't want a better education or university—you just want something to gripe about, so you can listen to yourselves talk.

Karen Johnson  
Secretary,  
The Student Association

## Dear Valentine

Last year you honored my request in Vietnam from a lonely G.I. to his sweetheart in Texas Tech for Valentines Day. And for this, I am grateful. Today, I have a similar request, having just returned to the world—would it be possible for you to include a follow-up message from the same lonely G.I., now civilian, to his Valentine as follows:  
Dear Lynne,

I'm glad you stayed the same ol' way feeling as I do today... And even though you may not be mine you still are my number one Valentine!

Love, Nick  
Thanking you, I am, and happy Valentines Day to you and your staff.

Mr. Nicholas R. Pecore  
(now civilian)

## Complains about A-J solicitation

It states in the Bulletin of Texas Tech University, Vol. XLVI, No. 1, Oct. 1969, that: "No solicitation of students ... by the random distribution of advertising ... handbills ... is permitted ... in residence halls. Selling, peddling, or making an offer to sell any type of tangible or intangible item is also strictly prohibited ... in ... residence halls."

This provision has been violated, and this letter is a formal protest of this violation.

On the afternoon of 6 February, 1970, between the hours of 2:30 and 5:30, an unknown person, or persons, placed in my door an advertisement for subscription, not renewal to the Lubbock Avalanche-Journal. I do not now, have ever, or will ever subscribe to this paper, and I consider this

advertisement an infringement upon the rights guaranteed to me in the Code of Student Affairs and Rules and Regulations 1969-70.

As a matriculated student residing in a residence hall of Texas Tech University, I demand either a written explanation of the factors permitting this incident or some form of action taken against the Lubbock Avalanche-Journal, immediately. I await your reply.

(The writer sent copies of this letter to Dr. Owen L. Caskey, Dean Lewis Jones, Dr. Grover E. Murray, The University Daily, and a senator from Wells Hall.)

Jason B. Tollett  
103 Wells

## Kerr cites power struggle

(I.P.)—The struggle for power in American higher education today is marked by the politics of confrontation on the campus.

Dr. Clark Kerr, in the fourth of his five Patten Foundation lectures, told an Indiana University audience that "Quiet persuasion about interests has given way to public confrontation over principles." This, he added, has brought many actors to the stage to denounce each other—students, faculty, administrators, trustees, and politicians in the surrounding community.

What has brought about this loss of consensus on campus? Dr. Kerr made these comments:

"The division on campus is due, in part, to a divided society. Functions of the university have become more complex and have brought conflict which has made governance of the university more difficult.

"As more public money is spent on higher education, society has demanded more control over the campus. Federal and state governments have their say in governance of the campus, and some local neighborhoods claim a right to participate in the

operation of the campus." Dr. Kerr described the traditional approach to governance of American colleges and universities and said this system is being challenged. He suggested that governance of the campus be related to functions. He listed these ways in which governance of the campus can be improved:

**FUNCTIONS SHOULD** be clarified to assure that only the compatible and useful are retained.

Advisory councils should be established, with membership drawn from important segments of the entire community.

Introduce students into decision-making bodies where the students have interest and competence.

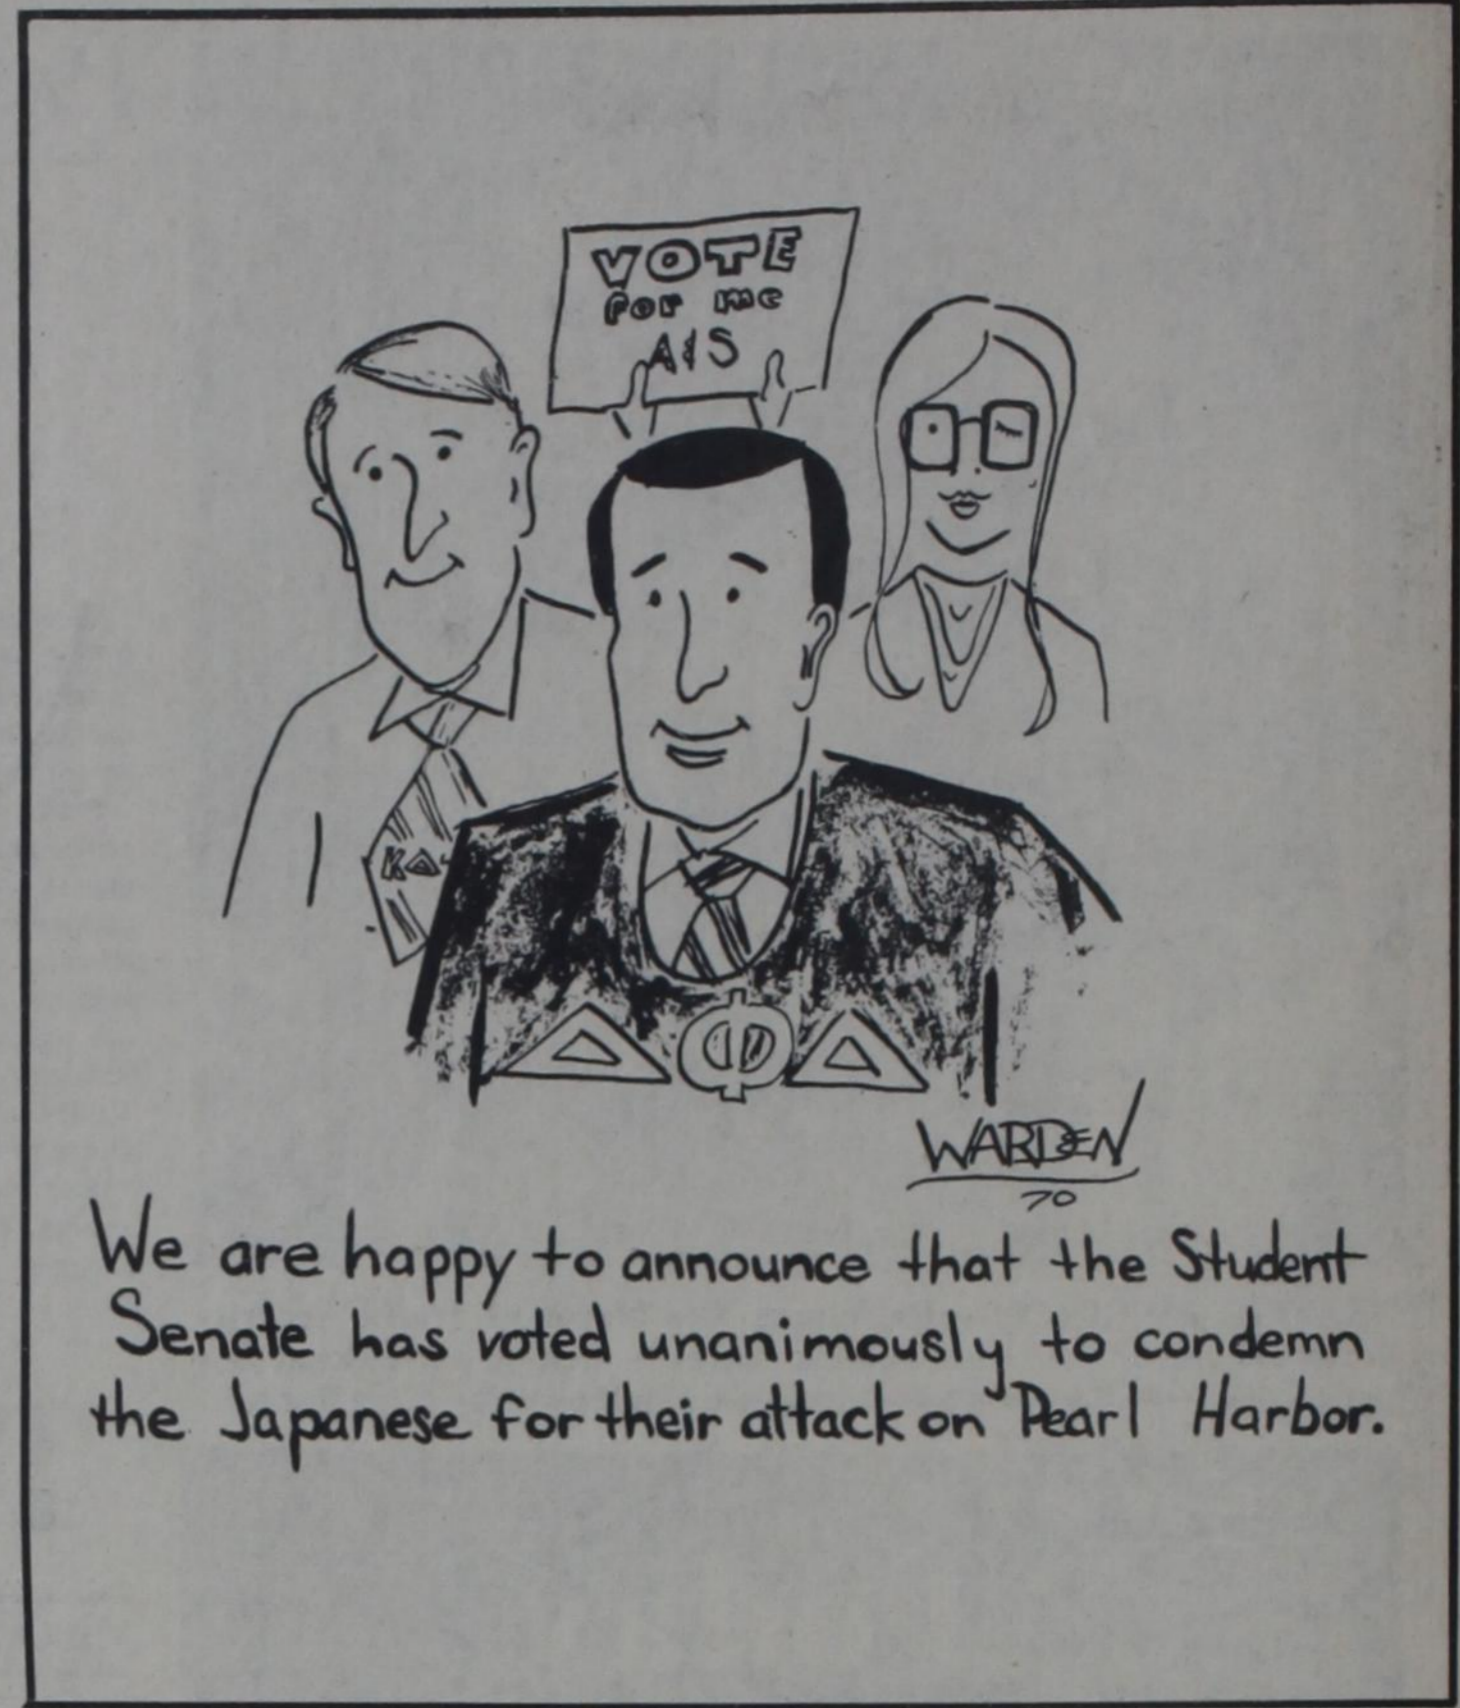

Strengthen student governments to provide an effective mechanism for representing the majority of students.

Retain corporate political neutrality on political issues, and faculty appointments.

Acceptance, where they have substantial support, of "staff associations" in the British

pattern, with a limited range of interests in salaries and conditions, without reducing the authority of academic senates.

Dr. Kerr also thinks the authority of the college president should be retained.

We are happy to announce that the Student Senate has voted unanimously to condemn the Japanese for their attack on Pearl Harbor.

## Astronauts may need women for space psyche

SAN ANTONIO (AP)—Woman may share man's exploration of the planets, a space doctor said Monday. But there'll have to be extensive tests to assure she doesn't create more problems than she solves.

Dr. Charles Berry, director of medical operations at the Manned Spacecraft Center and chief doctor for the astronauts, said "I think it would definitely be more comfortable if we took women along" on long duration flights, such as a two-year mission to Mars.

"It's a more comfortable way of life and one that's more normal," he said. But he said much study must be made to prove there is more psychological value in having women along than in going without them.

"How are you going to work it

out? That's the big problem. I doubt seriously that we'll get to the place in our country that we'll try to match up people," he said. "But then again, you don't want to have just one woman among a lot of men. You may create a problem then."

Berry said there is no definite plan at this time to include women on any future flights but

that it probably will be a source of study.

He said at this time he thinks it would be favorable from a psychological standpoint to have a coeducational crew. But he pointed out that the psychology of long term isolation in space flight is still one of the biggest questions facing man in planning planetary exploration.

## Lottery challenged

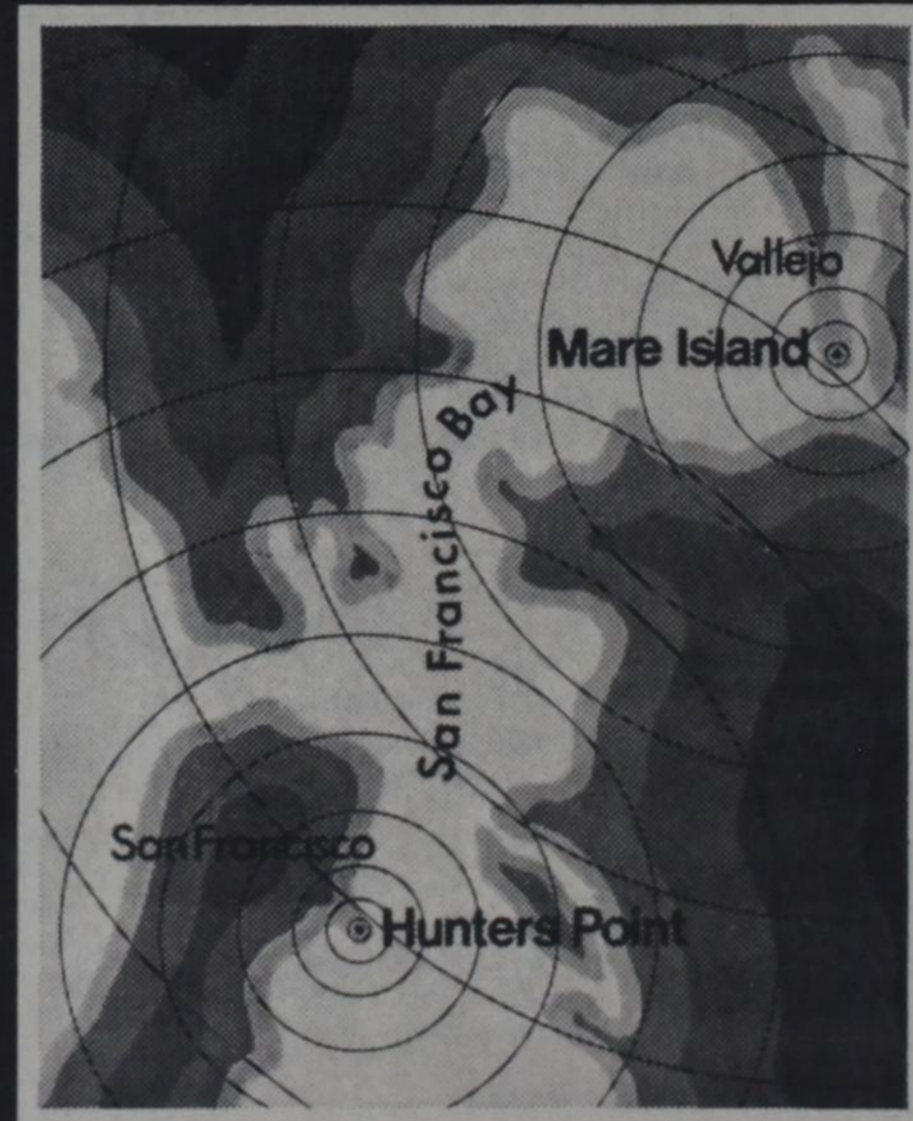

(CPS)—A suit has been filed in the U.S. District Court in Madison, Wisconsin, seeking to overturn the draft lottery held last December claiming it was not random.

District Court Judge James Doyle declined to issue a restraining order as was sought

by the group filing suit. However, he also declined to dismiss the suit as was requested by government attorneys, saying that he sees a discrepancy between the supposedly random selection ordered by the President and the actual result of the drawing.

## Valentine Contest Rules

Students may vote once a day at each merchant's for any of the contestants.

To vote, clip the entire ad of the girl you wish to vote for and deposit it in the voting box of any participating merchant.

Every ballot must have the voter's name and telephone number on the front.

One ballot will be drawn from all ballots cast, and the voter whose name is on this ballot will win \$20.

The girl with the most votes will be Tech's Valentine of 1970.

Voting will stop at noon on Thursday, February 12.

The Tech Valentine and the winning voter will be announced in Friday's University Daily.

Decision of the judges is final.

## Tech police need money

# Cops have trouble, too

(Continued from Page 1)  
 Traffic Security officers are poorly paid, even by police standards. Starting salary for patrolmen is \$395 a month and ranges to \$505, which is approximately the monthly earnings of a rookie Lubbock policeman.

"Maybe the public doesn't understand this," Daniels told a visitor. "\$450 a month men are making important decisions for the University. They don't always make the best decisions. A man needs a year of experience before he can do a really good job. They come and go rapidly here, and the pay is the reason."

THAT LACK of experience is sometimes all too obvious. After riding with Wallace and Officer Morris Neely one evening, the difference between a rookie and a veteran was apparent.

Both men have similar educational backgrounds, and both have affable, courteous demeanors. Wallace has been with Traffic Security 3½ years and has 350 classroom hours of police training. Neely has been a patrolman five months and has had no formal police training during that time.

Wallace is easy going in his

dealings with the public. "I don't try to catch people on the hairline offenses," he said. "That depends too much on judgement. In police work you can't always go exactly by the book."

Neely, on the other hand, is eager to enforce all laws strictly. He thinks of police work in terms of dealing with the law rather than dealing with people. "We're here to see that people obey the laws," he said.

"There is no substitute for on the job experience," Chief Daniels explained, "but our men do need classroom training." The Texas Commission on Law Enforcement Officer Standards and Education demands all peace officers be certified by completing 140 hours of classroom work in police techniques and law with a year of employment. Traffic Security is no exception.

helping the department's public relations.

"The Traffic Committee and the executive vice-president decide the restricted parking areas here," Daniels said. "My superiors in the administration dictate strict enforcement. In fact there has been a little pressure on us. If tickets don't keep people from parking in a restricted area we have the right to tow any car that is in violation."

DANIELS is also concerned with the bad publicity resulting from the mass arrests for lewdness in the Administration Building restrooms. "When you arrest as many people as we did, you are bound to get some bad reactions," he declared.

The methods used to attract and arrest homosexuals have been widely questioned. Daniels denies people were enticed into breaking the law. "We had many complaints about that place," he said emphatically. "It was a filthy, dirty place! We had to do something."

Daniels said his men just stood around waiting to be approached. One of the subjects claims a note was passed to him by the officer, and another asserts that the officer made verbal advances.

THE METHODS used by Traffic Security of course, vary with the training, experience, and personalities of the officers, but the key to improvement of the department is more money to attract high caliber men.

"We brought trouble on ourselves by not being professional enough," Daniels explained. "The Supreme Court has made law enforcement more difficult, and this is good. It's making better policemen out of us by making us think instead of hitting somebody over the head."

"We've started improving our educational program," Daniels said. "Traffic Security is just beginning to professionalize itself. If you paid a man a decent wage so he didn't have to worry about his bills, he could be a better officer."

As Daniels said, the public is demanding a better police force. Tech's department is not as good as it could be but it certainly is not as bad as some critics claim. The laws are being enforced, and the police are getting blamed for it, but they're doing their job. Professionalism is stressed but so is fair treatment. Even more than money, what is needed now is more understanding and patience from both students and Traffic Security.

## Prof impressed at Tech growth

Growth in size from 6,000 students in 1953 to near 20,000 students in 1970 is what has impressed me the most during the years I have been away from Tech, said Dr. Harry Parker, associate professor of chemical engineering.

In 1953 he received his bachelor's degree from Tech and since that time he has received his master's and doctoral degrees from Northwestern University in Evanston, Ill.

Parker, who joined the Tech faculty at the start of the spring semester, then was the recipient in 1955-56 of a National Science Foundation fellowship to continue his studies.

"I decided to return to Tech because I enjoyed the teaching experience and I enjoyed the academic life," said Parker.

Parker is the innovator of more than 60 patents relating to the process of recovering petroleum. He is also a member of the American Institute of Chemical Engineers, the National Society of Professional Engineers and the

Oklahoma Society of Professional Engineers.

Parker is replacing his past professor, Jules A. Renard, professor of chemical engineering. Renard will be retiring soon.

"I am now teaching a course in fluid flow distillation, but I was especially hired to teach the courses of plant design and economics," Parker said.

"I plan to do research in Rheology of Non-Newtonian Fluids," said Parker.

According to Parker the research most recently focused on the use of very high molecular weight water soluble polymers to improve water flooding processes for the secondary recovery of petroleum.

## Horn Hall's peddle flowers for valentines

Freshmen representatives from Horn Hall will be selling carnations and red roses today and Wednesday for Valentines Day.

"We will be selling in the Union all day both days," Sara Pfeiffer of Horn said.

The carnations will be sold singly for \$1, one-half dozen for \$4 and a dozen for \$8. The roses will be sold for \$1.25 for one, \$6 for half dozen and \$12 for a dozen.

"We will deliver the flowers ourselves so those that buy them don't have to worry about that," Miss Pfeiffer said.

"THE PUBLIC is demanding that we improve the police, and this certificate is the first step," Daniels said. "Half of our men have the basic certificate. Still, 140 hours isn't very much. Even a beauty operator or a barber needs much more."

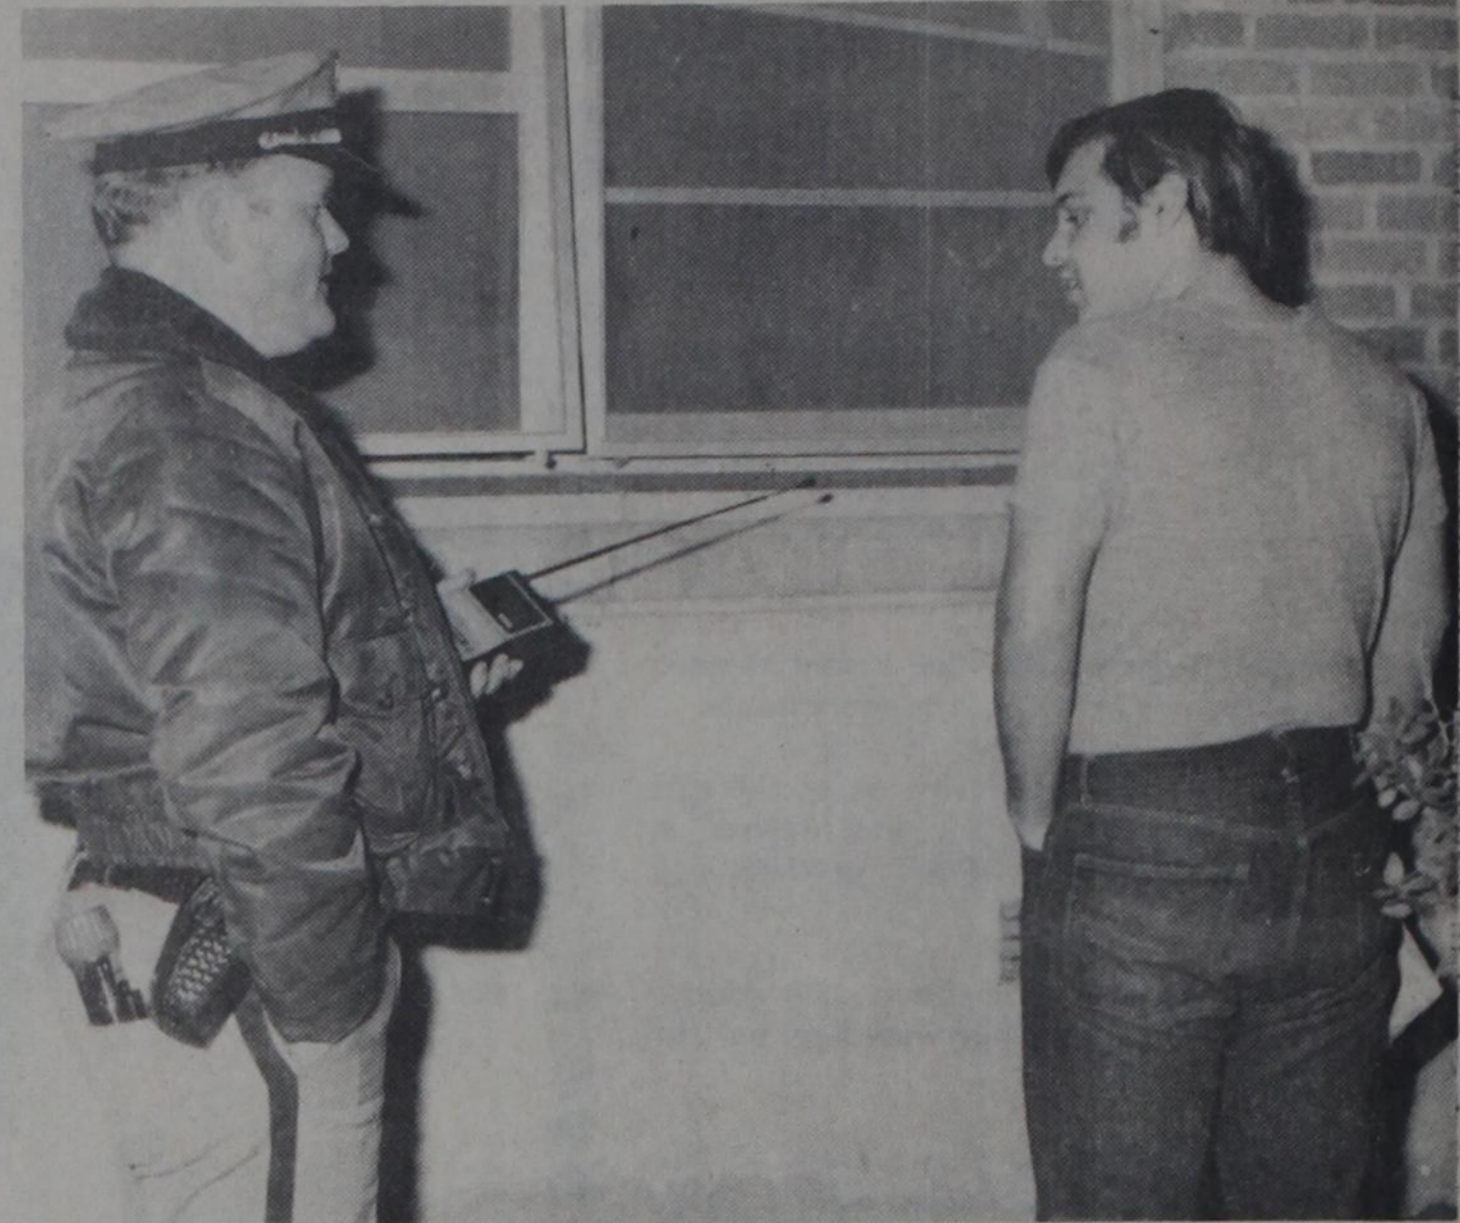

Several of the Tech officers have extensive classroom training, but some have none. "Every policeman needs to go to school and keep going back," said Sgt. J. D. Fortner, head of the evening shift. "Law enforcement is a changing field. We need to keep up with it."

Fortner has been with Traffic Security three years, and worked for the Lubbock police for two years before that. He is an intelligent, articulate modern policeman. "Police work demands a much higher caliber person than it used to," he asserts. "Soon a college education will be the rule for policemen."

Chief Daniels agrees. "We need men with college experience, but how can we hire any one with much college for the salary the state pays? The public is going to demand that we have a better department, and to get it we're going to have to spend more money."

THE PUBLIC is complaining about Traffic Security right now, and the force realizes it. "Public relations is our most important job," Daniels claims. "People don't really understand the police officer's job."

Traffic Security is the target of outraged complaints by students whose cars are ticketed or towed away with seemingly increasing frequency. This certainly is not

CHECKING UP — Patrolman Wes Meyer, Traffic Security, interrogates a prowler suspect. The Tech student was found outside Stangel Hall at 2:30 a.m. Friday night. Patrolman Meyer found the student was passing hot dogs through a window to coeds inside. (Staff photo by Dave Burket)

## Seminars and speakers to emphasize Ad Week

Media role in advertising will be emphasized during the Feb. 12-19 Advertising Recognition Week in Lubbock with speakers representing radio, television, newspaper and magazine advertising.

Highlighting Advertising Recognition Week will be the sixth annual World of Advertising Seminar, Feb. 19. Its theme will be "Advertising '70—Good News in Media."

Speakers for the seminar include: Elving N. Anderson, advertising director of the Detroit Free Press; Ronald L. Sack, former executive with the American Broadcasting System and now vice president of Houston station KXYZ; Robert Lukas, advertising director of the Ladies Home Journal; and Roy Danish, director of the Television Information Office.

Registration for the seminar will begin at 8:15 a.m. and lectures at 9:15 a.m. Each of the speakers will participate in an open forum to start at 1:30 p.m. All sessions will be held in the Coronado Room of the Tech Union.

Featured speaker at the Silver Medal Award Dinner climaxing the day's events is Roy Danish. A graduate of the Harvard Graduate School of Business Administration, Danish was associated with the Mutual Broadcasting System for 10 years. He is a trustee of the National Academy of Television Arts and Sciences, a director of the International Radio and Television Society, a vice president of the International Radio and Television Foundation, president of the Broadcast Pioneers, and serves on the Men's Committee of The Lighthouse.

The dinner will begin at 7 p.m. in the Ballroom of the Tech Union. The Lubbock Advertising Club will present its highest award for outstanding contributions to advertising to a

Lubbock resident at the dinner. Sponsors for Advertising Recognition Week are the Tech chapters of Alpha Delta Sigma, men's advertising fraternity; Gamma Alpha Chi, women's advertising fraternity; the Advertising Club of Lubbock; the Lubbock Chapter of American

Women in Radio and Television, and the Better Business Bureau of Lubbock.

Co-chairman for the event are Tom Coughlin, ADX; Carol Storbeck, GAX; Ray Poindexter, Lubbock Ad Club; Lou Keay, AWRT, and Tom Watson of the Better Business Bureau.

## DuPont gives \$2,500 science research grant

A departmental science and engineering grant of \$2,500 for the Mechanical Engineering Department was announced Feb. 6.

DEPARTMENT Chairman L. J. Powers said the grant has been made by E. I. Du Pont de Nemours and Co. of Wilmington, Del., as one of 148 academic grants made in support of teaching and research in the physical sciences.

The Du Pont grant allows flexibility for the recipient's decision as to use of the grant, and Powers said his department would use the funds to support research by gifted young members of the faculty.

POWERS SAID, "This support allows the newer faculty members an opportunity to begin research careers that are so important in keeping the classroom work at the forefront of knowledge." Recipients of the support will be announced later, Powers added.

# Movie satirizes society

By CASEY CHARNES  
Fine Arts Editor

What we have in "Bob & Carol & Ted & Alice" is an honest attempt at a failure to communicate. This four-character comedy, at the Continental Cinema, is a deadpan social satire that treats the very newest of today and makes it hilarious.

"B&C&T&A" is the product of Paul Mazursky and Larry Taylor, Hollywood's best comedy team who have come to the screen by way of a shelfful of Emmys for the "Dick Van Dyke Show."

Here, they take today's extraordinary ordinary and make everyday funny by turning it, arch-seriously, into tomorrow.

NATALIE WOOD and Robert Culp, Elliott Gould and Dyan Cannon, in what could even be movie stars' self-parody, are the beautiful four.

Wood and Culp take the California hills in search of an Esalen-type Institute, where mineral baths and marathon purges of the psyche erase a decade's worth of suburbanity from over-30s.

Coming home from this weekend of sensitivity awareness, they drag Gould and Cannon, their best friends, into a stylish new game.

The result is a mess. They confuse put-downs with honesty ... "If you don't care about that dress, you're on your way to not

caring about all of humanity." If they're not laughing or crying, they're not feeling. They push their life styles into everybody's business and make it funny.

They are the swinging marrieds who live in houses decorated in early Southern California... the bell-bottomed, love-beaded, baby-blue Cadillac set that thinks it has discovered a whole new social system, the after-five Acapulco-Golders who buck the system ever so quietly.

"S'byootiful." Husband has an affair, and then confesses all. "S'marvelous." Wife does

"ditto." "S'wonderful." Then it's group orgy time in Las Vegas.

LIKE ABBIE Hoffman says, "Revolution for the hell of it." This menagerie a quatre mumbles "cop-out" all the way through.

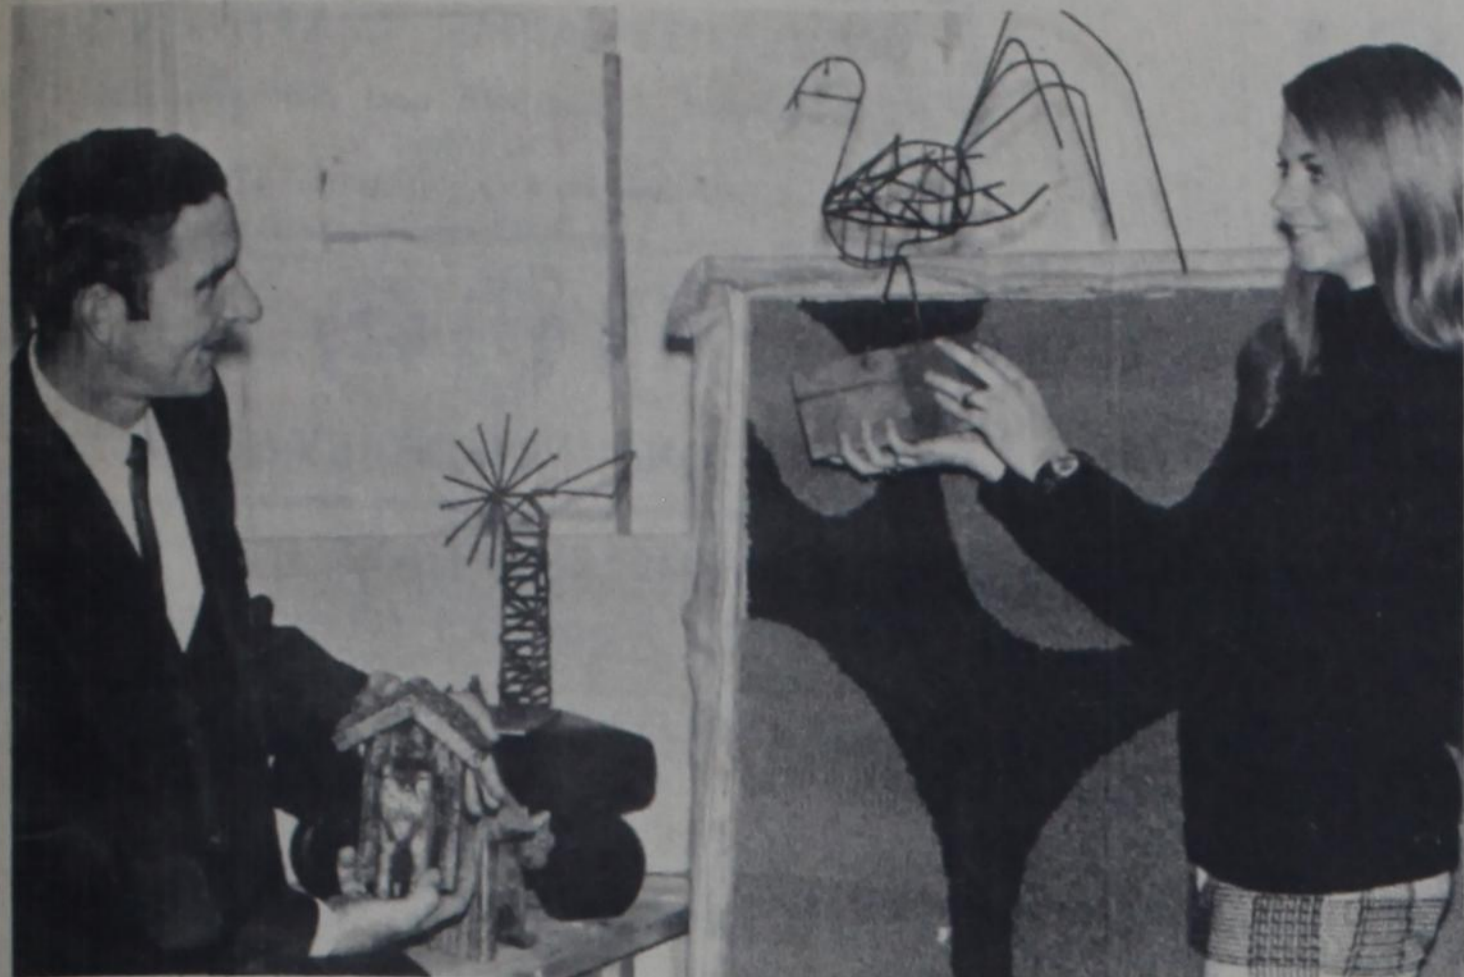

And yet the ending is the biggest "cop-out" of all. Or so you think.

Bob, et al, hit the sack together, and you're thinking, "But that's so wrong." Even if you're a liberated thinker, this orgy business doesn't work unless there's love involved.

You're thinking that Mazursky and Taylor have tacked on one

hell of a plastic ending, and the whole thing is very unsatisfactory. It's been funny, very funny, throughout the movie, even if you keep muttering, "I just couldn't do that." And all of a sudden you have this real "bummer" ending.

And then all of a sudden you don't. Honesty prevails. Not a word is spoken, yet there's everybody with his clothes on, and there's Jackie DeShannon warbling "What the World Needs Now." The film's honesty and message, beyond the satire, are wrapped up into a single song that's there for you to listen to and feel. Please do. Or try?

**NEW DIRECTION** — Donna Love, San Antonio junior is enrolled in recreation under a newly revamped Tech curriculum designed to prepare more recreational directors for an ever-increasing demand. Her two fields of

special interest are sports and art. Studying with art instructor John Queen, Miss Love tried her hand at welded and lost wax sculpture, rug design and construction, woodwork and upholstery.

## New 'Tech Law Review' available as student aid

The new "Texas Tech Law Reviews," with articles written by the upper members of the law student population, is now available for the first time since the organization of the new Law School in 1967.

According to Richard Maxwell, editor of the semi-annual publication, "The Texas Tech Law Review" is a scholarly work involving extensive reserve by 19

students of the Law School.

"In addition, a number of professors, judges and attorneys-at-law make comments in the Review with such titles as 'Symposium: The New Law School,' 'The Right of Confrontation: What Next?' and 'The Three Responsibilities of Legal Education,'" said Maxwell.

Maxwell said the purpose of the Review is to aid the student in his

"legal education."

"Each article written by the student," said Maxwell, "questions or asserts different points of the law that are of special interest to him. This process encourages the student of law to understand a number of decisions, think his way through them and come up with his own conclusions."

## Placement Service

**ARMCO STEEL CORPORATION**  
Feb. 16 and 17. Bachelors' Degrees: CE, EE, IE, ME, Acct., Math. A diversified company. Major products include a variety of special purpose steels and special metals, pre-engineered buildings, plastic pipes. Both foreign and domestic operations.

**CELANESE CORPORATION**  
Feb. 16. Bachelors', Masters', or Doctors' Degrees: Chem, CE, ME, Textile, Acct. An international petrochemical company associated with chemicals, fibers, coatings, and plastics.

**DEPARTMENT OF HOUSING URBAN DEVELOPMENT**  
Feb. 16. Bachelors' or Masters' Degrees: AgEco, Arch., CE, Acct., Eco, Fin., Mgt., PubAd., Engl., Geog., Govt., Host., Psych., Soc., Spanish. A Federal Government Department administer programs in Housing and Urban Development.

**FIRST NATIONAL BANK IN DALLAS**  
Feb. 16 and 17. Bachelors' or Masters' Degrees: Acct., Eco., Fin., Mgt. A commercial bank.

**PEAT, MARWICK, MITCHELL & COMPANY**  
Feb. 16. Bachelors', Masters', Doctors' Degrees: Acct., IE, Law. International firm of CPAs.

**PENNZOIL UNITED, INC.**  
Feb. 16. Math, Acct., CE, EE, IE, ME, PetE., AgEngr., Geol., Eco., Fin., Mgt.

**ROHM AND HAAS COMPANY**  
Feb. 16. Bachelors' or Masters' Degrees: ME, CE, Bot., Ento., AgSci., Crops, Soils, Hort. Research and production of chemicals utilized by various industries.

**SHELL COMPANIES**  
Feb. 17 and 18. Bachelors' Degrees: Acct., Eco., Fin., Mgt.; Bachelors' and Masters' Degrees: Acct., Eco., Fin., Mgt., Mkt., Ret., Advt., Engl., Govt., Hist., Psych. Find and recover oil and natural gas. Distribute gas and move oil to refineries and chemical plants. Research and development.

**ARMY MEDICAL DEPARTMENT**  
Feb. 17. Bachelors', Masters', or Doctors' Degrees: Ento., Microbiol., ClinPsych., CE, ChE. Direct commission for assignment to medical units in stateside and overseas hospitals.

**U.S. ARMY MATERIEL COMMAND**  
Feb. 17. Bachelors', Masters', or Doctors'

**HUMBLE OIL & REFINING COMPANY**  
Feb. 17 and 18. Bachelors', Masters', Doctors' Degrees: ChE, CE, EE, IE, ME, PetE., EngrPhys. Basic business of the affiliated companies: Research, engineering, production, transportation, and refining of oil and gas, production of chemicals, and finally marketing of the product.

**INTERNATIONAL VOLUNTARY SERVICES**  
Feb. 17. AgEco., Crops, RangeMgt., Soils. IVS is a non-profit operation, governed by a board of directors which sends young people overseas to work in development projects. The organization receives technical guidance and support from the U.S. Agency for International Development and the United Nations.

**AMERICAN CAN COMPANY**  
Feb. 18. EE, IE, ME, IndMgt. Manufacture and marketing of packaging used in industry.

**CITIES SERVICE GAS COMPANY**  
Feb. 18. Bachelors' Degrees: CE, EE, IE, ME. Mining of sulphur, potash, gold, silver and copper.

**ERNST & ERNST**  
Feb. 18 and 19. Bachelors', Masters', or Doctors' Degrees: Acct., Law, IE. A national certified public accounting firm which provides management consulting.

**JOHNS-MANVILLE PRODUCTS CORPORATION**  
Feb. 18 and 19. Bachelors' Degrees: IE, IndMgt., Mgt., Eco. Mine the minerals, manufacture and market materials used in construction, in water distribution systems, and furnish raw materials to industrial users.

**OILWELL DIVISION OF UNITED STATES STEEL CORPORATION AND UNITED STATES STEEL**  
Feb. 18 and 19. Bachelors' Degrees: Acct., Fin., ME, PetE., ChE, CE, EE. Design, Manufacture, and Marketing of special oil field and other industrial equipment.

**RURAL ELECTRIFICATION ADMINISTRATION**  
Feb. 17. Bachelors' or Masters' Degrees: EE. The Rural Electric Administration is a lending agency which provides technical and financial advice and assistance to the management of rural electric and rural telephone associations.

**SKELLY OIL COMPANY**  
Feb. 18. Bachelors' or Masters' Degrees: ChE, ME, CE, PetE., Acct., Eco., Fin. Exploration, production, transmission, processing, refining, and marketing of oil and gas. Production and marketing of petrochemicals and wood products. Production and sale of uranium. Exploration for sulphur.

**TEXAS EASTMAN COMPANY**  
Feb. 18. Bachelors', Masters' Degrees: ChE, EE, ME, Acct., IndMgt. Texas Eastman produces plastics and chemicals not only for the photographic industry, but for numerous processing industries.

**YELLOW FREIGHT SYSTEM, INC.**  
Feb. 18. Eco., Mkt., Mgt., IndMgt. Nationwide motor freight carrier.

## Tech senior given award

Tech accounting student Lary C. Snodgrass, Perryton senior, was presented a \$500 Haskins & Sells Foundation award for excellence in accounting Thursday.

THE PRESENTATION was made by Claude Scott of Fort Worth, representing the accounting firm of Haskins & Sells, supporters of the foundation.

The ceremony was part of the program for the meeting of Beta Alpha Psi, honorary accounting fraternity at Tech.

Snodgrass, 2408 Auburn, is the son of Mr. and Mrs. Ray Snodgrass of Perryton. He has an overall

grade point average of 3.63, with an average of 3.80 in accounting.

SNODGRASS is a 1967 graduate of Perryton High School, where he played football and participated in track, the senior play, Future Teachers of America, and intramural basketball.

He is program vice president for Beta Alpha Psi, has been on the dean's list, received a four-point certificate, and was honored at a Tech recognition service.

Snodgrass said he plans either to accept a job with a certified public accounting firm or continue as a graduate student upon completion of his undergraduate studies in August 1970.

**JERRY TURNER (34) goes up for two in last Saturday's contest against the University of Texas Longhorns. The Raiders won the tilt with Texas 81-69. The Raiders face league-leading TCU tonight at 8 p.m. here in Lubbock. (Staff photo by Mike McMahan)**

# Raiders take on TCU

Ever since the loss to Baylor, the Tech basketball team has been forced to win to stay in contention in the conference race. Tonight the story is the same but the plot thickens.

The Raiders host the league leading TCU Horned Frogs at 8 p.m. in what could be the turning point in the loop chase.

The Frogs come into the game with a 6-1 SWC mark and a six game winning streak, including an 81-73 win over Tech at Fort Worth.

In fact, since the opening conference loss to SMU, TCU has had little trouble in disposing of its loop foes. Besides Tech's loss, the Horned Frogs have pounded league favorite Baylor 82-68 and Texas 90-71.

**TECH, LIKEWISE**, has looked impressive in its last two contests, knocking off Texas A&M 84-66 and Texas 81-69 to stand 4-3 in the league race, two games off the pace set by the Froggies.

A Raider loss would virtually eliminate any chance the Techs might have of derauling the TCU express, putting them three games out of first with only six remaining.

A Tech win, on the other hand, could throw the loop into a three way tie with Rice and Baylor joining the Froggies at the top and the Raiders only one game out.

**BAYLOR AND THE OWLS** will both be favored in their games

against Arkansas and SMU respectively.

The Horned Frogs are paced by their 6-8 center Doug Boyd in both the scoring and rebounding departments. The California senior is rapidly closing in on the Southwest Conference record for rebounds in a single season.

Boyd is averaging 20 rebounds per contest in league play, well ahead of the single season mark set by SMU's Gene Elmore in 1964.

Boyd has already tied a SWC single game record when he grabbed off 27 caroms against Baylor.

**IN SCORING** Boyd has averaged 17.4 points for the season but is hitting a 20 point clip in league play.

Joining Boyd in the Frog lineup will be guard Jeff Harp, 6-2, guard Rick Wittenbraker, 6-2, forward Ricky Hall, 6-3 and forward Norm Wintermeyer, 6-5.

Harp is TCU's candidate for sophomore of the year honors. He is averaging 12 points and 8.3 rebounds per game but Frog Head Coach Johnny Swaim says Harp's strongest asset is his hustle.

Heading the Raider quintet throughout the season has been 6-4 forward Gene Knolle. Knolle leads the club with a 17.4 season average and has pulled down about nine rebounds a game.

**GUARD GREG LOWERY** has come alive in conference play, after a disappointing pre-league average, and is hitting 13.4 points per contest. The 6-2 soph teams

with junior guard Steve Williams in the backcourt to give the Raiders one of the quickest duos in the loop.

Rounding out the starting five are 6-3 center Jerry Turner and 6-5 forward Steve Hardin.

Turner is usually relegated to the job of guarding the opposing team's top scorer and has done an outstanding job thus far this season.

Turner held the trio of SMU's Gene Phillips, Baylor's William Chatmon and A&M Mike Heitmann, three of the top scorers in the conference to a total of 30 points.

Boyd will undoubtedly be Turner's man to guard in tonight's contest, but he will be giving away five inches to the Frog star.

## Coaches to recruit high school talent

Tech football coaches will be scattered all over the state today in an attempt to sign top high school gridders to letters of intent.

The letters of intent are agreements by schoolboy athletes to accept an athletic scholarship from a particular school; under this program major conferences agree to honor each others' letters of intent.

Even though Raider coaches got a late start in the recruiting battle, due to the change over in the coaching staff, Tech is expected to nab some of the top players in the state.

A poll taken by the Dallas Times Herald said Tech could sign as many as four of the 20 blue-chip prospects in Texas.

The University of Texas, just off a national championship season, is expected to come away with the most blue-chippers. The poll said that Texas is leading, or strongly in the picture, in races for a dozen blue-chip signatures.

Major selling points expected to induce high school gridders to Raiderland include the installation of synthetic turf to be ready for next season and the new

dining hall facilities being erected on the campus behind the Wiggins Complex.

Raider mentor Jim Carlen, who took over the head coaching reigns from J T King, is optimistic about Tech's recruiting outlook.

"I am satisfied with the number of commitments we have and I think we will get some more," Carlen said.

Carlen has stated that he expects to sign 35 prospects to letters of intent, ten more than he had previously planned to sign.

Jimmy Carmichael, quarterback of AAA state champion Brownwood, was the only player named as a blue chipper by all eight SWC coaches.

According to the Dallas Times Herald poll Tech has the inside track on signing Carmichael but indications are that the blue-chipper will wait until after basketball season before signing with any college.

Other gridders supposedly leaning toward Tech include Joe Barnes, quarterback at Big Lake, Reagan County; Steve Cumley, Houston Lee end, and Cole Fraley, Borger halfback.

## UCLA Bruins remain on top

(AP) The UCLA Bruins, college basketball's only unbeaten team, remained No. 1 in The Associated Press' weekly rankings Monday while Florida State edged into the Top 10 for the first time this season.

The Bruins made Washington their 17th straight victim, beating the Huskies Saturday night 66-56. The Seminoles moving up to ninth from the 12th spot added a pair of victories over Kent State and Dayton last week for an 18-2 season mark.

UCLA captured 27 first place ballots and a total of 540 points from sportscasters and sports writers around the nation and runnerup South Carolina drew the other first place vote and 476 points.

The first six spots remained unchanged from last week with Kentucky, St. Bonaventure, North Carolina State and New Mexico State following the 17-1 Gamecocks.

Jacksonville, running up three victories for a 17-1 mark — its only loss was to Florida State — moved up one spot to No. 7 while Pennsylvania, 19-1, moved up two places to eighth and North Carolina, 14-4 losing 88-85 to Wake Forest Saturday slipped three places to 10th.

## Tech swimming team faces Texas Christian

The Tech swimming team will face TCU in a surprise meet today after the Raiders came close to defeating defending Southwest Conference champion SMU last Saturday.

Only yesterday did the team learn that the TCU tankers will be flying down with the Frog basketball squad to participate in a meet. The original meet was scheduled for this Friday but the meet has been rescheduled for 4 p.m. this afternoon.

Head Raider coach McNally announced yesterday that he would give some of his swimmers a rest in the TCU meet after the squad did so well against SMU.

The Tech Tankers finished the Mustang meet with their 13 best times of the season. The meet went down to the final event in the 400 yard freestyle relay as the Mustangs lead the Raiders 56-50. The event was worth seven points which would have given Tech a one point victory. As it turned out SMU won and gave them a 63-50 victory.

Coach McNally was so pleased with the Raiders performance that he gave them their first day off since Christmas. McNally said, "We were very happy to do so well against the Mustangs. Other than Michigan who was the first team to beat SMU in 72 meets, we gave them their best meet of the year. When you play the best team around it brings the best out in you."

Tech also finished one-two in the 200 yard butterfly, the first time Tech has finished one-two against the Mustangs since McNally became coach in 1962.

Chris Schacht, the Raiders' ace diver, continued to go undefeated this season as he placed first in both the one and three meter dives. This means that every diver will now be going after Chris," added McNally.

In other events Rick Fox and Rick Self got second and third respectively in the 100 yard freestyle. Jay Settle and Robert Anderson finished two-three in the 200 yard freestyle.

John Glennan and Mike Moffit got a second and fourth place in 500 yard freestyle.

Jim Cole registered the first win for the Raiders when he captured a first in the 200 yard

## Tech Picadors battle with Abilene CC tonight

The Tech Picadors will face Abilene Christian College tonight at 5:45 preceding the varsity game with TCU in Lubbock Municipal Coliseum.

It will be the tenth contest for the freshmen who so far this season have compiled a 3-6 record. It will be the second meeting between the two schools as the first contest was held in Abilene with the Picadors coming out on top by one point, 75-74.

Center Gene Kaberline, and guards Everett Taylor and John Parker have been the powerhouses for the Picos so far this season as they lead the rest of the team in statistics.

Kaberline remains to be the top scorer for the team with an average of 17 points a game. He is also the team's leading rebounder with 10.1 a game. His percentage from the field has been a tough 49.1.

John Parker, half of the Parker-Taylor team from Ohio County in Kentucky, is the second leading scorer for the team with an average of 16 points a game. Parker leads the team in free throw shots with a percentage of 82.4.

Everett Taylor, the

individual medley. Ed Nester got a third in the same event.

It was Settle and Self again in the 500 yard freestyle and they finished three-four respectively. Bill Schrader could manage only a fourth in Tech's worst event of the day in the 200 yard breaststroke.

In the diving events Schacht took the first spot and Clay McCurdy finished third in both events.

## Boxing entries deadline today

The Tech Intramural Department will again sponsor boxing competition Wednesday, Thursday, and Friday, in cooperation with the West Texas Golden Gloves.

Entries for the event are due today; all entries will receive a free physical exam Wednesday to fulfill Golden Gloves requirements.

Competition will be divided into team and individual participation.

quarterback of the club, is a close third in total points as he has averaged 15 a game. He also has averaged six rebounds a game. His field percentage is close to Kaberline's as he has hit a warm 48.3.

Kaberline, Parker, and Taylor will probably start tonight along with forward Steve Smith, and forward Robbie Knight.

Other Picadors who will most likely see action are forward Eddie Combs, center Tom Malone, and guard Charles Williamson.

Competition will be divided into team and individual participation.
