

## Petitions Taken For Sun Princess

Petitions for Sun Princess are being taken at the Student council office now, says Jim McGraw, Student association vice-president.

Candidates for princess must have 100 names on a petition turned in to the council office, Ad 161, by 5 p.m. Oct. 15. The only petitioner to date is Jenni Scott, sophomore from Wellington.

Candidates must be at least 17 before Jan. 1 and not older than 21.

The Sun Princess will be housed in one of El Paso's leading hotels at the Sun carnival's expense. She will be expected to furnish her own wardrobe and expenses to and from El Paso.

The Sun Princess must attend all carnival functions and events. The carnival association will furnish escorts for princesses. Local sponsors will provide separate floats for each girl.

### Tramps to Explain Stunts

Saddle Tramps will appear at the pep rally to be held at 7 p.m. Friday in the gymnasium to explain procedure for the card stunts which will be performed in Jones stadium Saturday during half-time activities of the Tech-Texas Western game, according to Peggy Karnes, head girl cheerleader.

## Band Returns From State Fair

Three bus loads of Tech band members returned to Lubbock early Monday morning after a full week-end in Dallas.

The band led the cheering for the visiting Georgia team at the football game between Georgia Tech and S.M.U., in addition to playing during the game and putting on a half-time show.

A concert was given in front of the Hall of State at 1 p.m. Sunday. The program included several march selections, Mississippi Suite by Grofe, Petite Suite by Tschaiovsky, Phantom Regiment by Leroy Anderson and selections from the Ballet Music from Faust by Gounod.

Immediately following the concert, the band appeared at a professional football game between the Dallas Texans and the San Francisco 49ers. The band left at the half to start the return trip to Lubbock.

A total of 105 band members made the trip. They were accompanied by Dr. and Mrs. O. O. Wiley, Mr. and Mrs. Joe L. Haddon, Mr. and Mrs. H. A. Anderson, Aubrey L. Shouse and Leon Harris.

Mr. Shouse, publicity director of the college, went to Dallas to set up Tech's exhibit at the fair. Mr. Harris, ex-Techian, wrote the script and acted as master of ceremonies for the half-time activities of the Georgia Tech-S.M.U. game. Mr. Anderson, a woodwind instructor, is a former member of the Tech band. Professors Wiley and Haddon are members of Tech's music faculty.

# Balloting Follows Convocation

## New Directories Selling on Campus

New student directories, larger than in former years, came off the Tech press Monday.

The association of Women Students began selling the directories in all dormitories Monday night. W. C. Cole manager, announces that they will go on sale in the Bookstore Wednesday.

Sponsored by the Bookstore since the war, directories this year will be promoted by AWS, who will receive 5 cents from each directory sold. The selling price is 50 cents.

Included in the directory, in addition to the names of all students and faculty members, is the home town, local address, telephone number classification, and division.

## 'Doc' Arrives Too Late; Poor Little Dog Is Dead!

The quiet routine of the Agriculture building was shattered Monday with the unannounced entrance of a small dog. The animal ran in and out of offices having fits. Excited secretaries screamed, "Mad dog!" Someone phoned Dr. F. G. Harbaugh, college veterinarian.

When the "Doc" arrived with three able assistants, he found the dog had been locked in a closet in the plant industry office. Cautiously he opened the closet door a bit and peeked in.

The poor dog was dead. Just plain scared to death perhaps.

## KTTC Staff Member Elected President At Collegiate Broadcasting Convention

Odis Echols Jr., Lubbock music major and representative of Station KTTC to the Southern Collegiate Broadcasting system's convention in Houston, was elected president of the system Saturday.

SCBS is an organization of stations and radio units of area colleges. It works to create closer relationships between collegiate groups and between those groups and the radio industry.

### Honor for Tech

Echols, who was accompanied to Houston by Cody Barnett, feels that his election is a personal honor and an honor for Tech's KTTC, which has been recognized by the system only one year.

Plans drafted at the two-day convention call for each member station to record on tape once a month a 30-minute program which will be circulated throughout the system. Echols hopes to record the forthcoming speech of Dwight D. Eisenhower in Lubbock for re-broadcast on other stations of SCBS.

### SCBS Members

Other member schools of SCBS are: University of Houston, host to this year's convention; Howard Payne College; Louisiana Polytechnical institute; Oklahoma A & M; Texas State College for Women; Texas Christian university; Southern Methodist university; which conceived the idea for the collegiate radio system; Baylor university; Hardin-Simmons university;

Ablene Christian college; Tulsa university; Mary Hardin-Baylor; Texas Western college; North

## Rec Hall Jobs Still Open Announces Jess Parrish

Openings are still available for student work on Recreation hall entertainment, games, and social committees, announces Chairman Jess Parrish.

The movie committee, composed of the following members, Joe Hastings, Thelmaeane Hutchins, Leonard Gaston, Dale Cox, Levoul Baxley, John Doughtie and Jerry Davis, is now complete. New members of the entertainment committee are Jim Daniels and Pat Harkleroad.

Texas State college; University of Arkansas.

Odis Echols

## British Consul To Visit the Campus

J. Thyne Henderson, British consul general at Houston, will visit the campus tomorrow, announces J. Roy Wells, assistant to the president.

Mr. Henderson, who is on tour throughout the Southwest, will address a joint meeting of seven or eight government and history classes at 9 a.m. in Aggie Memorial auditorium.

"The Value of Britain as an Ally" will be the topic of the consular general's address. Henderson is also scheduled to speak at a Rotary Club luncheon at noon of the same day.

This is not the first trip Mr. Henderson has made to Lubbock. He visited here two years ago. Next stop on his present tour will be Clovis, N.M., on Thursday.

The Tech library contains 90,936 catalogued volumes, 19,915 periodicals, and 264,199 documents and maintains a staff of 11 professionally trained librarians and 13 sub-professionals.

Class elections are scheduled to follow Tech's annual fall convocation at 10 a.m. tomorrow in the gymnasium, says Harold Brannan, Student association president.

An address by Dr. E. N. Jones, Tech president, will highlight the morning meeting. Brannan will introduce Student council members after Pres. Jones speaks.

## MICC Officers Elected Sunday

Officers elected for Men's Interclub council in Sunday afternoon's meeting are Bob Price, Centaur, president; and Charles Akey, Silver Key, secretary-treasurer.

Plans for intramural sports were discussed. Plans concerning selection of nationals were approved.

Presidents of the clubs within MICC are: Troy Powell, Adelphi; Price; Bill Bales, College Club; Larry Bedford, Kemas; Marvin Jones, Los Camaradas; Akey; Pete Morris, Socii; and Rex Zachary, Wrangler.

Representatives from the various clubs to MICC are: Bob Lovelace, Centaur; Scott Poage, College Club; Bob Anthony, Kemas; Crozier Gowan, Los Camaradas; J. C. Chambers, Silver Key.

Wranglers, Adelphi and Socii representatives have not been chosen.

## If You Want to Go To Denton, Then ...

"Coupons for the official out-of-town bus trip to Denton, Nov. 8, have been trickling into the Student council office," says Jim McGraw, student association vice-president.

"We have received seven applications for the bus trip so far," the vice-president says. "We must have at least 20 applications for reservations before a bus can be chartered."

The coupon is re-printed on page 3 in this issue of THE TOREADOR. Students who are interested in making the trip should clip it out and send it to Student council office, Ad161.

The council also says that the committee working on student car washing facilities on the campus reports that no progress has been made in that direction. Lack of an appropriate place with drainage is the factor stopping the project.

McGraw announced that Traffic court, which was scheduled for tonight, will be held at 6:45 p.m. Thursday night in Ad19.

## Two Meetings of Saddle Tramps Scheduled For Next Thursday

Next regular meeting of the Saddle Tramps will be held at 5 p.m. Thursday in Room G of the Chemistry building. Old members only will meet at this time to discuss plans for new members, according to President Bill Bales.

A special meeting will be held in the Green Room at 8 p.m. the same day to initiate new members. A program will follow the initiation.

Tech was established by an act of the thirty eighth Legislature of Texas, passed in 1923. The first buildings were erected and opened to students on September 30, 1925.

The Tech chorus will sing Tschaikowski's "How Blessed Are They" under the direction of Dr. Gene Hemmle. Several numbers will be played by the Tech band under the direction of "Prof" D. O. Wiley. Dr. A. W. Young, sponsor of Student religious council, will give the invocation.

### Class Meetings

Brannan will explain where classes are to go for their meetings. Freshmen will remain in the Gym, under direction of Brannan; sophomores will go to the Aggie auditorium with Benny Brukner; James Dent will meet with the juniors in Room 101 in the Chemistry building and seniors will meet with Jim McGraw to elect officers in the Engineering auditorium.

Requirements for class officers are that they must have maintained a 1.00 average in school work the previous semester. (Not including freshmen.) They must not be holding any other major campus office. Previous campus residence is not required.

### Students on Platform

Student and campus leaders who will sit on the speakers platform include Student council members; M. L. Pennington, comptroller and vice-president; J. Roy Wells, assistant to the president; W. P. Clement, registrar; W. T. Gaston, college business manager; Col. Ollen Turner, professor of air science and tactics; Lt. Col. Humphrey Green, professor of military science and tactics.

Tomorrow's meeting will be the first time that Tech's new president has addressed the student body as a whole. It will also be the first time that new students have met student leaders.

## Contest Opens For Yearbook Beauties

Tech coeds who wish to compete for places as 1953 *La Ventana* beauties must have applications in *La Ventana* office, J205, by 5 p.m. Friday Oct. 17, says Bert Goodyear, editor. Any student or group of students may enter candidates.

A letter of application with the Tech address and the written consent of the girl should be sent to the office. Students entered in the contest should have a 1-point average.

Three Lubbock residents will be judges in the first elimination at 2:30 p.m. Sunday, Oct. 19, in the Recreation hall. Girls will wear heels, hose and dressy dresses, but no formals. The field will be narrowed to 30 or less at that time.

Final judging will be at 2:30 p.m., Sunday, Oct. 26, in the Rec hall. Out-of-town judges will be present. No judging will be made by photographs.

"Ed . . . Oh, Ed!"

**Modern Dance Group Will Present Winter Program**

A modern dance group began preparation Monday night for a music and dance production to be presented by the Tech music department and the Tech physical education department Feb. 12 and 13, in the Lubbock Senior High school auditorium.

Miss Dorothy Hoyle, physical education instructor, will direct dance activities. Dr. Gene Hemmle, head of the music department and Miss Mary Jeanne Van Appledom and Herbert Colvin music instructors, will direct the musical portion of the program.

**'53 Cotton Maid To Receive Car**

The prize which the 1953 Maid of Cotton receives will definitely not be made of cotton.

First among the winner's prizes, which will be awarded after final judging Dec. 30 in Memphis, Tenn., is a 1953 Ford convertible. The car will be given the fifteenth Maid as a symbol of the bond between the automotive and cotton industries. The car-builders are the boll-growers' best customers, consuming around 750,000 bales annually.

Entries are now being accepted for the contest. Deadline is Dec. 1. Any girl born in a cotton-producing state is eligible, is she is also at least five feet, five inches tall and has never been married.

Entry blanks may be obtained from the national Cotton council, P. O. box 18, Memphis, Tenn.

**THE DU PONT DIGEST**

**Power Work for M.E.'s**

Varied needs of 71 Du Pont plants pose a host of original power problems

Heart of Du Pont's manufacturing program is the power plant. To make some 1,200 products and product lines the Company operates 71 plants.

Most require steam and electric generation, water supply and treatment, heat exchangers, piping systems and related services. The designing of these power plants, their erection and operation are all in the hands of engineers, the great majority being mechanical engineers.

But this is not the most interesting thing about power work here. What challenges the highest skills of the engineer at Du Pont is the wealth of original problems constantly arising. Power requirements vary enormously, not only from plant to plant but from time to time.

Process operating pressures may range from over 15,000 psi. to 2 mm of mercury, electrical requirements

This powerhouse for a nylon plant at Martinsville, Va., was designed by Dr. Pont engineers. It houses two 135,000 lb./hr. boilers and two 7,500 KW extraction turbine generators.

from as low as 7,000 to higher than 1 million KWH/day, and temperatures from -360° to over 3,500°F.

Here are examples of recent "off-the-beaten-path" power problems.

1. A plant using natural gas as its basic fuel produces a waste oil of variable hydrocarbon composition and a waste gas with only 110 Btu/cu. ft. Du Pont M.E.'s designed burners, fans, boilers and combustion controls to permit use of all three fuels for generating steam.

2. At another plant 20,000 gpm of cooling water were to be drawn from a nearby river. Since the water level fluctuated 40 feet between normal and flood stages, it was necessary to evaluate several plans for pump-house constructions against cooling towers. The engineers installed a unique pump house whose submerged vertical pumps operate even when the structure is entirely under water.

Aside from design and construction, Du Pont mechanical engineers concern themselves with such related subjects as economic evaluations, equipment selection, heat balances, load calculations, waste heat boilers.

For example, where various process temperatures from 300° to 600°F. were required, Dowtherm was selected as the supply medium at the rate of 35 million Btu/hr. The engineers installed a central system for primary supply because it calculated to be more economical than separately located vaporizers.

On the operational side, M.E.'s supervise the supply of power and services. They establish performance standards and analyze equipment for result, cost and maintenance.

Edward W. Garrison (right) M.S. in M.E., California Tech '47, and Byron R. Brown (center), B.S. in M.E., New Hampshire '49, supervise adjustment of furnace conditions in a study of power-plant efficiency.

Whether viewed from the design and construction side or the operational side, the diversity of Du Pont's manufacture offers a wealth of opportunities in power work for the mechanical engineer.

OPPORTUNITIES for men and women with many types of technical training are discussed fully in "The Du Pont Company and the College Graduate." For a copy, write 2521 Nemours, Wilmington, Del.

### Commercial Art Instructor To Direct Art Guild Series

John McKaughan, Tech commercial art instructor, will direct the South Plains Art Guild series of fall classes, states a Tech Museum official.

Mr. McKaughan, who was exhibit chairman for the art guild and who is currently planning the guild's November show, says the classes will open to all persons interested in learning art, whether they are beginners or advanced art students.

The classes will be held Tuesday and Thursday mornings and Tuesday and Wednesday nights in the Butler Gallery, 323 Avenue H.

Mr. McKaughan has a bachelor's degree in commercial art from Tech, and spent a year in New York working toward an M.A. in fine arts and Industrial design at Columbia university. He also studied with Doug Kingman of the School of Painting and Sculpture, and has studied with Louis Bouche.

### Twelve Pledges Accepted At Delta Sigma Pi Smoker

Twelve students were accepted for pledgeship by the Beta Upsilon chapter of Delta Sigma Pi at a smoker Thursday night.

They are: Jerry House, Theodore Wotton, Bill Harpole, John Haralson, Arthur Wancaster, Max Brooks, George Hargrove, William Hoelscher, Eddie Goetze, Gregory Keys, Milton Fortson, and Max Garrett.

The honorary business fraternity started the term's social activities with a "get acquainted picnic" last week in McKenzie state park. The professional and social activities of the organization are designed to develop knowledge, leadership and fraternization among members.

Tech Petroleum Engineer Group, Pi Epsilon Tau, Names Pledges

Pi Epsilon Tau has named four new pledges, Vice-president L. D. Stults announced today. Those selected are: Donald Moore, Richard Lawson, Edward Barfield and Thomas Scott.

To become a member of this national fraternity a petroleum engineering student must have a grade-point average of 1.5 and a 2-point average in his major.

Tech's chapter has 11 active members.

The infirmary sick list Monday included the following: Alfred R. Lawrence, Loving, N.M.; Mary Joyce Snapp-Guymon, Okla.; Winnie L. Sims, Eunice, N.M.; Ellis W. Huddleston, Knapp; Jose C. Delgado, Amarillo.

### Raider Reception Set For Sunday

A football reception sponsored by the Association of Women Students will be held from 2 to 4 p.m. in the lounge of the Recreation hall, according to Pat Haws, AWS reporter.

Purpose of the reception, to which every student is invited, is to acquaint everyone with the 1952 Raider football players.

Committee heads working on the reception are Nancy Herrington, invitation; Nina Spearman, refreshment; Harriet Henderson, centerpiece; Pat Haws, publicity; Mary Jo Craig, receiving line; Pat Townsend, serving. Marvel Gibner will act as hostess.

### Music Sorority Invites Women Majors, Minors to Social Meeting

Mu Phi Epsilon, national professional music sorority, will meet at 7 p.m. tonight in the Music library, says LaVeta Steinert, historian.

Women majors and minors in music are eligible for membership in Mu Phi. The meeting tonight will introduce transfer and freshman women to the Tech Epsilon Phi chapter. Members will present a short program.

### English Workshop To Meet Saturday

Three Tech faculty members are taking part in the program of the District IV English Workshop conference, a division of the Texas State Teachers association, which meets at Lubbock Senior High school Saturday. "The Teaching of Grammar and Composition at the Elementary, Secondary and College Levels" will be the general topic of the meeting.

Horace C. Hartsell, assistant professor of education, will speak on "Audio-Visual Aids in the Teaching of Grammar and Composition." Mrs. Grace Wellborn, instructor in English, will give a progress report on the preparation of the English teacher, Harold N. White, assistant professor of English will be program chairman.

Principal speaker at the workshop will be Dr. E. Bagby Atwood, University of Texas. Dr. Atwood, a well-known author on present-day English as well as a teacher and scholar, since 1946 has served on the advisory committee of the present-day English group of the Modern Language Association of America.

### Zachary Named President Of Wranglers Social Club

Rex Zachary was named president of Wranglers, men's social club, in a recent election of officers.

Others elected were: Ernest Locke, vice-president; M. D. Stevens, recording secretary; Bill Bruce, corresponding secretary; Eddie Goetze, treasurer; Don Grossman, sergeant-at-arms; Dwayne Sparks, pledge trainer; Dave Thomas, special representative; Dave Faucett, historian-reporter.

### "Represents education that continues,"

says **GEORGE GALLUP**

Founder of the American Institute of Public Opinion, formerly Professor, Pulitzer School of Journalism, Columbia U.

"A serious weakness of the American educational system is the missing link between what we are taught in school and what we learn after leaving school. The Reader's Digest represents education that continues. It arouses and satisfies keen interest in the vital issues of the day and in varied fields of lasting knowledge."

Look at the wide range of subjects in any issue—The Reader's Digest is designed for the well-rounded individual who cultivates interests far wider than the confines of any particular field.

From the wealth of material that is published each month, the editors select those outstanding articles no thoughtful person would want to miss. Each article is condensed to present the essentials clearly, yet preserve the full content and flavor of the original.

The Reader's Digest offers a continuing liberal education for millions of men and women with alert, open minds.

\* \* \*

In October, Reader's Digest, you'll be interested in *Cobalt 60*—how an effect of A-bomb research is being used to fight cancer; *Watch Out for the Weather*—how its changes affect your physical and mental behavior; *29-page book condensation: Windows for the Crown Prince*—an American woman's president-shattering experience as tutor to Japan's future Emperor.

### Caffeine Caper . . .

Coffeehouse keepers along College avenue are reported to be laying in extra supplies of the Brazilian bean and firing up the urns.

Why? A school-wide convocation is scheduled for Wednesday morning.

Over the years such meetings and Religious Emphasis weeks have become the time for mass migrations away from the campus toward the drugstores and cafes on the opposite shore.

If later in the term you feel inclined to damn class officers for incompetence and/or laziness, recall that you traded your vote for a cup of coffee.

shelton

### Apology Accepted . . .

Reprinted from the Lubbock Evening Journal, October 2:

"The Texas Tech football squad, traveling in two special Pullmans, left Lubbock via Santa Fe shortly before 9 a. m. today en route to Stockton, Calif., and a Saturday night game with College of Pacific but there were no cheers ringing in their ears.

As the train pulled out, only two well wishers were left standing on the platform. They were John Oldham and L. O. White, father of Tech End Dean White. Some of the players had been brought to the station by relatives, who left earlier.

There were no students to bid the Raiders goodbye, no waving downtown boosters in evidence."

An apology for this story was run in the Friday morning Lubbock paper stating that the writer didn't know that a pep rally had been held the preceding Tuesday and that many students were in classes when the team left.

He should have checked the Rec hall.

bryan

### Your Slip Is Showing . . .

Pink traffic slips given out between the beginning of school and October 3 total 586. This is an average of 34 per day.

## TECHnicalities

by Ralph Shelton, Toreador Associate Editor

**Grim Fairy Tale or The Princess and the Peasants:**  
Once upon a time there was a lovely land of red-tile roofs and erratic water sprays, of well-fertilized grass and air-borne sand.

Living in this land was a race of happy peasants. They were uncomplex folk, happy in the knowledge that they could dance and drink delightful beverages and be lulled to sleep by the talk of men specially-educated for that purpose. They could also pay homage to Venus, the goddess of physical beauty.

They could do these wonderful things uninvited by the dry procedures of government.

Such procedures were handled for the peasants by a sort of parliament known as the Monday Evening Motion and Head-Nodding society. It was a group which, by virtue of election to the society, was entitled to have such qualities as mature judgment, good taste and foresight. Yes, those qualities were reserved for the members of the MEMHNS, who accordingly worshipped Minerva, goddess of Wisdom.

Now it seems that a neighboring land held each year a festival in honor of the Sun, and invited other lands to send beautiful maidens to serve as part of the decor.

And so the peasants of the land of red-tile roofs, etc., true to their goddess Venus, each year selected their best-decorated maiden and shipped her off to adorn the Sun's festival. They then returned to their dancing, etc., content in knowing that their tribute to Old

Sol would be as picturesque as any other.

But it came to pass that Minerva and Venus had a little falling-out, and so the goddess of all things wise and mature and extra-physical demanded that the MEMHNS honor her also in the selection of the maiden.

And so the parliament informed the peasantry that, in the future, they might suggest maids for the honor, but that the final choice would be made by the MEMHNS, after consulting Minerva. (Minerva, be it understood, had never cared a tinker's dam for peasants and vice-versa.)

And so, in the end, the maidens which the land of red-roofs, etc., sent to the Sun's festival were less decorative but much better at table manners and European political theory.

And the peasantry, who cared only a little and who also were afraid to affront Minerva's chosen ones, lived on happily, but separated from the MEMHNS by a deep chasm.

The above fable implies only one side of the question of the election of the Sun Princess. Plans have been made for the Student council to present its views and reasons on the controversy in a forthcoming column. Watch for it—then make up your mind on the issue.

We quote from the Sul Ross "Skyline":

Alpine is the home of Sul Ross State College. It is a beautiful city

"It says, 'Ask a silly question; get a silly answer!'"

## Under the Breezeway

by Shirley Johnson, Toreador Editor

Campus situation came to our attention quite suddenly the other day . . . although we had realized it before, it hadn't hit quite so close.

Our Library is closed on Sunday. This means that students who have reports to finish, theses to work on, or reference to complete must finish by 5 p.m. Saturday. It is not open at all on Sunday.

Of course, books on reserve may be checked over the weekend on Saturday afternoon. If your work is tied up with old issues of papers or found in files of government documents, you have to wait until Monday morning at 8 to get back into the Library.

There are doubtless many reasons why the Library couldn't stay open all day Sunday. Not enough money to pay a complete staff to stay over there, when relatively few students would be around in one reason, perhaps. The fact that comparatively few scholars would be there would be another factor holding back the administration.

However, those few have much work to be done. Many have labs and lectures scheduled at such times that they never have more than an hour during the day and three at night to study. We do not advocate keeping the building open all day on Sunday. We realize that there would be obstacles that could not be surmounted in such a plan.

We do, however, advocate opening the Library for perhaps four hours or so Sunday afternoon; from 1 to 5, maybe, or 2 to 6. These few hours would aid in

of more than five thousand people . . . It is healthful, clean and wholesome. Its citizens are loyal friends and backers of the College. A salubrious climate makes Alpine a delightful place in which to work and play and live . . . The most harmonious relations exist between the College and the city of Alpine."

(It sounds like heaven, but does one have to wait until dead to go there?)

Rumor, one of our most reliable sources, has it that the year's La Ventana beauties will be pictured in the annual in bathing suits instead of in from-the-neck-up portraits. This is likely to spell doom for some of Tech's perennial beauties, but what a break for the well-stacked losers of previous years—and for the men.

clearing out the mass of hysterical people proclaiming, "But the Library closed Saturday before I could do it before, it hadn't hit quite so close."

We welcome any letters from student and/or faculty about this situation, and our views upon it.

Note to the downtown paper: In the paper Thursday afternoon, we noticed a combination of headlines over one story which was somewhat misleading.

Above the story about the South Plains fair appeared these two headlines:

Annual Rabbit Shows Begins College Students to be Honored Friday

It is our sincere hope that you like the cartooning done by our new staff cartoonist. One of his originals appears on the page, and another is to be found on page 2.

We also hope you enjoy reading the series on campus leaders. It is on page 6 entitled, appropriately enough, "Wheels."

Dr. Dysart E. Holcomb, dean of engineering, will attend a meeting of the Southern Regional Education board in Houston Sunday through Tuesday. They will discuss ways that the colleges can cooperate with the board in petroleum science.

There is nothing so stupid as an educated man, if you get off the thing that he was educated in.

—Will Rogers

The following comes from another issue of the South Dakota State college sheet:

"John Young worked in Milwaukee this summer. It all began when he took a guided tour of that city. Said the guide, 'We are now passing the largest brewery in the world.'"

Said John, 'I'm not!'"

### Future Teachers To Meet

Campus Future Teachers 1-8 holdin' All students interested in teaching are invited to attend a meeting of Future Teachers of America . . . p.m. Thursday in LLI says Helen Rae Slagle, club reporter.

Descriptions of school systems in Central America and Saudi Arabia will be given by students.

## File 13

Hobo Day, observed at South Dakota State college, carries with it some traditional rules which we southern-type lovers of femininity and daintiness find revolting:

Not only may the coeds be summoned before a kangaroo court for failing to wear the required green cap and pigtail, but this year one girl was indicted before the court on reports that she had shaved her legs during the no-shaving period, which apparently is for both men and women.

Quoted from the "Daily Lariat" of Baylor university:

"An 'Eisenhower for President' club will be organized for Baylor students today . . . All those interested are invited and you don't have to be a Republican to join the group," stated George Cowden."

From "Tech Tips," a booklet issued to prospective freshman girls:

We Frown Upon—women who break one date for another; girls who won't go unless he has a car; smokers who don't follow the rules . . . also, a gal doesn't have to smoke (or drink) in order to fit into the group; public display of affection, a really charming girl need not resort to "courting" in order to hold her date."

How to attract the reader's attention or "They'll hate us for this; but by Gosh, they'll read it"—headline in the "Daily Texan" from the University of Texas: "Bodies Bared Tonight."

Turned out to be an announcement for an astronomy session.

### Filler from the TCU "Skiff."

Students in '1875 were allowed to write letters only to their parents unless they had special consent of the University president to do otherwise.

We have been requested to explain the name of this column. File 13 is a round metal receptacle which sits on the floor near the editor's desk in the office, and which the janitor empties every morning. When there are no suitable letters to the editor for the "Backtalk" column, we hurriedly salvage these before the janitor does his duty. And here they are.

# First Phases of Mural Finished in Museum

The first of four coats of plaster for the Peter Hurd rotunda mural in Tech museum was completed Monday, one step in the process of preparing the painting surface for execution of the fresco.

Men worked all day Monday applying the mortar, a mixture of marble dust and plaster. The mortar was applied over the hollow tile walls of the rotunda after the tiles were cleaned with a weak solution of hydrochloric acid, washed with hot water, then sprayed, and rinsed with cold water.

During the spraying, the wall was examined for non-absorbent tile, which as removed and replaced with absorbent material. Then the walls were given a water-proofing coat to prevent air bubbles bursting under the brush, or gypsum eating through plaster to the fresco.

### Constantly Moistened

The second coat, which will be applied sometime this week, is called the "brown coat." This contains less marble dust than the first layer of plaster and is given a slightly smoother finish than the initial coat. This layer is constantly moistened with a fine spray of water, with pauses to allow the moisture to seep into the wall.

After the "brown coat" has

been finished smooth, a sand finish is placed over it. This is done by wetting the plaster and rubbing a board over the wet surface with a firm pressure and circular movements.

The plaster coat must be tested for solidity after it has dried. This is done by tapping the surface with the wooden end of a pencil. A hollow sound betrays the presence of loose plaster, which must be removed and fresh plaster put in.

### Old Walls Were Thicker

Successful thickness for fresco painting should not measure under 1 1/4 inches in depth. The old Renaissance masters' fresco walls often measured not less than 3 inches in thickness and some as much as 4 inches deep, according to authorities.

The final coat on which the fresco is painted, the "intonaco" is sometimes called the "painting coat." This mortar coat is very smooth, giving the wall a good painting surface.

Mr. Hurd, who has done four frescoes, will begin actual work on the mural sometime this month.

# Speech Production Will Tour Plains

Eight performances of "Comedy of Errors," the fall production of the speech department, are scheduled in seven South Plains towns when the company goes on tour Nov. 17.

Those towns scheduled for performances are Wellington, Nov. 17; Borger, Nov. 18; Amarillo, Nov. 19; Sundown, Nov. 20; Seminole, a matinee and a night show, Nov. 21; Anton, Nov. 24 and Rails, Nov. 25.

The production will be presented to Tech audiences Nov. 10-15 in the Speech building studio theatre. Advance ticket sales have not opened.

# Two Tech Officials To Go to Alabama

President E. N. Jones and Col. Ollen Turner will represent Tech at a meeting of 175 college presidents, vice-presidents, and deans in one of two Air Force ROTC orientation conferences in Montgomery, Ala., Oct. 22.

The president and professor of air science and tactics will fly to the meeting, which will be held at the Air university, Maxwell Air Force base.

College officials and Air Force ROTC professors attending will represent school throughout the United States, Hawaii and Puerto Rico.

This is the first year that the air university has assumed respon-

sibility for administration of the AF ROTC program. The university also has varied educational research missions which now serve all air force commands and about 200,000 students in many parts of the world.

# IMPORTANT ANNOUNCEMENT

## Wesbrook Named New Track Coach

Landon Wesbrook, former middle distance runner and track star at the University of Oklahoma, has been named trainer and track coach for the Red Raiders.

Following graduation from OU in 1949, he served as athletic director for the armed forces in Europe for three months. He then resigned and accepted teaching positions at Oklahoma City University and OU, along with being assistant track coach for the Sooners in 1949 and 1950.

The native Oklahoman was hired just in time to make the trip to California with the Raiders.

## Los Cams Honor New Members With Fall Dinner at Caprock Hotel

Los Camaradas, men's social club, honored new members with a dinner Sunday night at the Caprock hotel.

New members named were Jack Dyer, Gary Johnson, John Myers, J. B. Morrison, Alan Olson and Milton West.

## Capt. John H. Baumgardner Elected Arnold Co-Sponsor

Capt. John H. Baumgardner, assistant professor of air science and tactics, was elected co-sponsor of the Arnold Air society in a club meeting Thursday night.

Capt. Baumgardner is a former assistant professor of animal husbandry at Tech. He was called back into the Air Force and was assigned to the Tech Air Force ROTC unit this term, replacing his brother, Maj. Haynes Baumgardner, in work with the flight operations option.

## Dr. Doyle Jackson Will Speak on 'Faith in Our Schools' at Whiteface

Dr. Doyle D. Jackson, education professor, will speak at a meeting of the Whiteface Parent-Teacher association at 7:30 p.m. Monday.

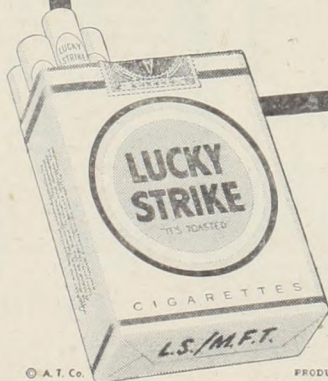

"Faith in Our Schools" will be the theme of the speech. The meeting will be held in the auditorium of the new elementary school at Whiteface.

COLLEGE STUDENTS PREFER LUCKIES  
IN NATION-WIDE SURVEY!

Nation-wide survey based on actual student interviews in 80 leading colleges reveals more smokers prefer Luckies than any other cigarette -- and by a wide margin. No. 1 reason given -- Luckies' better taste. Survey also shows Lucky Strike gained far more smokers in these colleges than the nation's two other principal brands combined.

### STUDENTS!

Hurry! Hurry! Hurry! Mail your Lucky Strike jingles. We pay \$25 for every one we use. Send as many jingles as you like to: Happy-Go-Lucky, P.O. Box 67, New York 46, N.Y.

# McGraw Invites Techsians To Tell Council of Problems

The following story about Jim McGraw, SC vice-president, is second in a series on campus leaders being run by THE TOREADOR. These stories are being written so Techsians may learn more about the students who are important as originators and leaders of campus activities this year. In each issue of the paper, the story and picture will be placed on page 6, under the heading "Wheels." We hope you will find them interesting and informative.

"When you write this story I think that you had better change the head to something other than 'wheels.' I don't think that I quite rate such a title," was how Jim McGraw, student association vice-president, opened this interview. This may give a hint to the type character that he possesses.

Jim, senior philosophy major from Midland, is a friendly, well-liked fellow with a ready smile and a "Howdy" for everyone he meets. His job as Student Association "Veep" requires a great deal of the above qualities plus a lot of time, interest and hard work.

**Help Student Body**  
"Of course I believe that the council's main objective is to help the student body, but many times the students don't let us, the ones who can do most to help them, know what they want and need," McGraw says.

"I suggest that they come by and talk to us about any problem they might have. If the students will let us know what is wrong, we can try to remedy it. We are always open for criticism and want it. Personal criticism is the only way that the representative group at Tech can continue to grow."

The council office is open 2-5 p.m. Monday through Friday along "Allen's Alley" or, to freshmen newcomers, Ad161.

## Entries Now Open In Mural Football

Entries are now open for teams that want to play intramural football this year. About 30 teams are expected to enter the program which begins play Monday, October 13.

A different system has been worked out where all three leagues, dorm, independent and MICC will be playing at the same time. Last year MICC didn't start until the other two leagues had finished play. A single round robin will be played in all leagues, and league winners will compete for the college championship.

Student Head of Publication

Among the many duties of vice-president, McGraw lists the most unusual as being chairman of the Publications committee. It is unusual in that students have so much to do with how money is allotted to student publications. It is the duty of this committee to find the best materials for Tech students.

Student council vice-president is also a member of the Rec hall committee. This committee, composed of the vice-president, business manager, president and secretary of the council and Toreador editor, help administrative officials determine Rec hall policies. "Students may attend any committee or student council meeting," McGraw emphasizes.

McGraw is an active member of Wesley players, Wesley foundation and Saddle tramps. He is president of Alpha Chi, honorary scholastic society for junior and senior students. Last year he served as A&S representative on the student council and associate justice on the traffic court. He was also selected for "Who's Who in American Colleges and universities" and for "Who's Who on Tech Campus."

## New ROTC Head Reports for Duty

Tech's new professor of military science and tactics, Lt. Col. Hampton Green, arrived on the campus Friday and met with Maj. Richard Brown, acting PMS&T.

He will assume actual command sometime this week when he returns from an orientation session in Austin. Lt. Col. Green was due to arrive in Lubbock Sept. 15 but was delayed due to the death of his father on Sept. 7.

The new ROTC leader joined the Army 11 years ago; shortly before Pearl Harbor, for what he intended to be a year's active duty. Still in the service, the colonel has spent two years with the engineering regiment working on the Alcan Highway, been stationed at Ft. Leavenworth, Kan., been an inspector for the Chief of Engineers, Washington, D. C., spent two years on active duty in the European Theater of Operations during World War II, and been an advisor to Engineer General of the Philippine Islands.

He has received a presidential citation and two battle stars for service in Europe, and other decorations earned for his work in the Philippines.

The 45-year-old colonel is a graduate of Alabama Polytechnic University at Auburn, and a native of Pensacola, Fla. Green was a three-year letterman at Alabama Poly and was graduated in 1930 with a bachelor of science in engineering.

## New Infantry ROTC Instructor Reports for Tech Duty Friday

Sgt. Raoul A. Landry reported Friday for duty on the Tech campus where he will serve as infantry instructor for Army ROTC units.

Landry, 39, was born in Lafayette, La., and graduated an infantry instructor in Houston high schools.

The sergeant was injured in Oct. 1950 in an accident in Korea, where he was stationed with military police. He also was stationed in Japan on occupational duty.

Tech students have access to 42 scholarships, offered by various groups and organizations. Fifteen awards, made by clubs and organizations, are given annually.

## Tramps Request Aid in Card Stunts

Saddle Tramps, men's pep organization, urge everyone to sit in section O at the football game Saturday, says Orville Summey, tramp member.

If possible, everyone in section O should wear a white shirt or blouse. If this is done, the card stunts will be much clearer and easier to see, Summey says.

This will be the last time that two-color stunts will be used at games. Four more colors are expected to be here by Friday. Due to uncertainty of delivery and to the amount of extra work involved, the new colors will not be used until the Baylor game Oct. 18. At that time the six-color stunts will appear for the first time. The stunts will be coordinated to Tech band formations.

Freshmen are reminded that they must sit in section O at the game. The freshman White Shirt organization will make its appearance as a group.

"The new six-color stunts mark another step toward more student spirit," Summey says. "In their only showing this year the stunts looked very good. With the new colors, more and better stunts should appear. If students cooperate, we can really make Tech spirit known everywhere."

## New Staff Member Added to AROTC

A veteran bombardier has been added to the Air Force ROTC staff at Tech. He is Capt. Francis J. Richter, who assumed duties as assistant professor of air science and tactics this term.

Capt. Richter, who has been on active duty with the Air Force since 1942, flew 56 missions as a squadron bombardier in the South West Pacific area during World War II.

The new staff member's home is Sanford, Fla., and he holds a degree from the University of Florida.

Capt. Richter came to Tech from Lackland Air Force base, San Antonio. His primary duties here are with the freshmen cadets in the course, "World Political Geography".

# Tigers Claw Red Raiders In Hot, Humid 42-21 Battle

Finally breaking under a 25-pound weight disadvantage and the hot, humid California weather, the Red Raiders bowed Saturday to the COP Tigers 42-21, after displaying three quarters of both defensive and offensive football prowess.

The Techsans matched COP touchdown for touchdown in the first half, and took the lead 21-14 in the initial seconds of the third quarter. In the final 15 minutes of the game, however, the San Joaquin valley climate took its toll and the Tigers tallied three times to assure themselves a hard-earned victory.

Rick Spinks, sophomore fullback, showed himself worthy of the all-state honors he won in high school by scoring two of Tech's three touchdowns as well as playing an excellent offensive game the entire time. Jim Turner, all-conference halfback, marked up the final Tech tally.

College of the Pacific opened the barrage of touchdowns set off by both teams, by marching 78 yards in 12 plays to score. One of two recovered fumbles by End Vic Spooner set up the ball on the Tech 46, but after a nice 15-yard run by Don "Sleetex" Lewis, the Raiders suffered a loss and Spinks was forced to punt on fourth down. The ball was fumbled by the Tigers on the return, and Spooner made his second recovery of the game to set up the initial Tech touchdown.

COP's Roy Ottosen passed to Halfback Phil Flock to put the Tigers ahead again, but the triumph was brief, for only nine plays later the Raiders had marched 57 yards to tie up the ball game.

### Meeting Set

Managers of teams entered in intramural football are to attend a meeting at 5 p.m. tomorrow in the gym.

Tomorrow is the deadline for entries. Play will begin Sunday for MCCC and Monday for dorm and independent leagues.

final half of the game. Tech took the ball 46 yards on nine plays to hold the lead for the first time. Jack "Mr. Automatic" Kirkpatrick completed his third conversion of the game, and his tenth out of 11 attempted conversions this season, to place the score at 21-14.

The fourth quarter, however, saw the Tigers take advantage of being on their home field and bolstered by the running of Tom McCormick and the passing of Ottosen, scored three touchdowns to set the final score at 42-21.

## SPORTALK

By Bob Lovelace

Tech's Red Raiders returned home for the second consecutive week on the short end of the score.

This time, however, it was a different story. The Techsans made an impressive showing out on the Pacific coast even if they didn't win. The game was much closer than the score indicates, although the Tigers opened up in the fourth quarter and won going away.

There were two definite factors in the defeat. One was the intense heat that they had to cope with. The weather has been fairly cool in Lubbock and they weren't expecting such a hot night.

Another factor was that the Tigers outweighed the Raiders about 25 pounds to the man. They finally wore the Techsans out and went on from there.

The game was quite a thriller compared to the Rice game. We matched their touchdowns until the half and even went ahead in

the third quarter. But they matched ours and three more after that.

We'll have to give some credit to COP however. Roy Ottosen's passing and Tom McCormick's running were a thorn in the side of the Raiders all night.

Rick Spinks scored two of the Raider touchdowns with Jim Turner getting the other. Jack Kirkpatrick added three extra points to give him 10 out of 11 for the season.

It was a sad day all over the Southwest. The Southwest conference had one of its worst inter-sectional days in history.

Notre Dame upset the University of Texas, 14 to 3 in Austin. Kentucky took a squeaker from the Texas Aggies, 10 to 7. Georgia Tech pounded SMU in the Cotton Bowl, 20 to 7, and LSU pulled a big upset in handing Rice a 27 to 7 pasting.

The only conference member to win out in non-conference play

was Baylor. The Bruins knocked off highly-rated Washington State, 31 to 7. TCU started the conference slate by besting Arkansas, 13 to 7.

In the Border conference, Temple State defeated San Jose State, 21 to 14; Texas Western took a high scoring victory from Hawaii, 42 to 26; Harding-Simmons blasted Trinity, 33 to 7 and the New Mexico Agies lost to New Mexico, 23 to 0.

### TENNIS TO START

Entries are now open for intramural tennis singles, says George Philbrick, director.

All students are eligible to enter except those trying out for varsity teams. Entries will close Monday and play will start the following Thursday.

## Effects Of Fluorides In Water On Cattle Studied At Tech By Three Tennesseans

Three Tennesseans were on the campus Monday examining cattle from Tech farms to determine the effect fluorides, found in the water of this area, have on livestock. The visitors were Dr. Howard Hill, Maryville, and Dr. R. E. Bauch, Knoxville, veterinarians, and Dr. R. A. Kramer, Knoxville lawyer.

Dr. Kramer is an attorney for the Aluminum Company of America. He explained that fumes from smelting plants sometimes contain fluorides which settle on nearby vegetation which may be eaten by cattle. Some livestock owners have complained that cattle suffer ill effects from the fluorides.

Fluorides in the drinking water cause a dark brown stain on teeth of animals raised here, Kramer explained. The stain is also found on the teeth of many children reared here, but no really harmful effects have been discovered either in humans or livestock.

In the case of dairy cows inspected here, the heaviest producers often show the darkest teeth stains. This is because they drink more water and consequently get more fluorides than do light producers, according to Kramer.

He said that cattle examined here show no ill effects from drinking water containing small amounts of fluorides, although enough of the substance can prove harmful.

## String Choir Open To Area Students

The Tech department of music in co-operation with the string teachers of Lubbock public schools is organizing a string choir, with the first rehearsal set for Tuesday Oct. 14, says Dr. Gene Hemmle, head of the music department.

"It is believed that this organization will foster further development of the public school string program and initiate a string section for the Lubbock Symphony orchestra," continues Dr. Hemmle. He says there is a need for violins, violas, and cellos and urges any student interested in playing in the group, which will meet once weekly, to attend the first rehearsal in Room 1 of the Music building.

Joe Haddon, assistant music professor, and Robert Dean, music instructor, will serve as co-chairmen of the newly formed organization.

DOLORES KETCHERSID, August 1952 journalism graduate, is now employed by the Snyder Daily News. Miss Ketchersid was president of Kappa Alpha Mu, national honorary fraternity for photography, while at Tech.

## TRY OUR Fountain TREATS

After that date or afternoon of shopping, why not drop by the CLOVERLAKE and try some of our delicious fountain treats. We specialize in:

- Milk Shakes
- Malts
- Sundays
- Ice Cream
- Sodas

and many others. And don't forget, we also have fine food if you want something more than fountain service.

Similar to iodine, fluorine, is an element of the halogen group. It is not found in the free state, but combines with other chemicals, to form fluorides and other compounds.

### Wife of Chairman of Board Undergoes Major Surgery

Mrs. Charles C. Thompson, wife of the chairman of the Tech Board of Directors, underwent major surgery last week at the Shannon hospital in San Angelo. Mr. Thompson is a Colorado City banker and rancher.

The president of Tech receives a salary of \$16,500 a year, which boils down to \$6 an hour. This sum includes traveling expenses.

A. J. BISHOP, Tech graduate, has recently been elected to the Texas House of Representatives.

In case the college infirmary is filled to capacity the college is not under obligation to provide students with hospital service elsewhere. It does not assume the responsibility for the continued medical care of students suffering from chronic diseases and advises that such students make arrangements to be under the supervision of a private physician as soon as they arrive in Lubbock.
