

Student Council Asks Holiday Change

Eighteen Year Olds Register Thursday

THE SIXTH registration for the draft will be held during the month of December, information from the State Selective Service headquarters revealed. This will include all boys who have reached the age of eighteen since the last registration on June 30 of this year.

No definite instruction has been received by officials of this college in regard to the registration. Enrollees will begin to register on December 11. This enrollment of the ten-age men of the country is in accordance with the President's proclamation for the sixth registration.

The Proclamation of the President establishes the dates for the Sixth Registration as follows: "The registration of male citizens of the United States and other male persons, who shall have attained the eighteenth anniversary of the day of their birth during the periods indicated below, shall take place in the United States and the Territories of Alaska and Hawaii, and Puerto Rico, between the hours of 9:00 a.m. and 5:00 p.m. on the days hereinafter designated for their registration as follows:

- (a) Those who were born on or after July 1, 1924, but not after August 31, 1924, shall be registered on any day during the week commencing Friday, December 11, and ending Thursday, December 17, 1942;
(b) Those who were born on or after September 1, 1924, but not after October 31, 1924, shall be registered on any day during the week commencing Friday, December 18, 1942, and ending Thursday, December 17, 1942;
(c) Those who were born on or after November 1, 1924, but not after December 31, 1924, shall be registered on any day during the period commencing Saturday, December 26, 1942, and ending Thursday, December 31, 1942;
(d) During the continuance of the present war, those who were born on or after January 1, 1925, shall be registered on the day they attain the eighteenth anniversary of the day of their birth; provided, that if such anniversary falls on Sunday or a legal holiday, their registration shall take place on the day following that is not a Sunday or a legal holiday.

Plans are under way to register during December approximately 28,000 young Texans born between July 1, 1924 and December 31, 1924, inclusive. General J. Watt Page, State Selective Service Director, announced. He said: "Local boards will conduct the registration with the assistance of volunteer registrars in officially designated places in their particular areas, and will record substantially the same information on registration cards, which will be gray in color, as was required in the first five registrations. "While anyone who is unavoidably away from home on the dates designated for his registration may register at the registration place most convenient, all registrants are urged to make every effort to register with their own local boards to avoid possible confusion in the future. Any person who must register away from home is urged to register at his home address so that his registration card may be forwarded promptly to his own local board.

General Page pointed out that one place of residence may choose which one he wants recorded as his place of residence, but, in making his choice, he designates the local board which will always have jurisdiction over him.

Two Ex-Students Are Accepted By Navy As Cadets

Homer Alan Nelson, and Robert Edward Moore, both ex-Tech students, will be selected for training as Naval Aviation Cadets, and will be ordered to active duty soon. Nelson is the son of Mrs. Margaret Nelson of Lubbock, and graduated from high school here in 1939. Since that time he has been attending Texas Tech.

Moore, the son of Mr. and Mrs. C. E. Moore of Alamo, N. M., graduated from Alamo High School in 1942. He lettered in basketball, football and track while in high school. He was a member of the band for two and also secretary of his graduating class.

Nelson is not registered in school at the present time. Moore is a freshman and is majoring in chemical engineering. When ordered to active duty, these two will report to the U. S. Navy Pre-Flight School, University of Georgia, at Athens. There the boys will undergo three months of physical conditioning, instruction in naval essentials, military drill, and ground school subjects. After completing this course, they will be sent to one of the Navy's numerous reserve bases for primary flight training.

Foreign Studies Are Invited To Christmas Party

All foreign born students attending Tech are invited to the Christmas party being given by the Foreign Language club at 7:30 p.m. Tuesday, December 8 at Seaman hall.

Students from German, French, Spanish and Portuguese classes will tell the story of Christmas as observed in those countries. Then the group will sing Christmas carols in their original language, one of which is Holy Night, which originated in Germany. Following group singing, Virginia Belle Gamble, Douglas Hardy and Monda Hamilton will play special musical numbers.

The party will end with the traditional breaking of the pinata, which is a large bag filled with candy, nuts and fruit suspended from the ceiling. The object of this old Mexican game is to blindfold the player and give him a long stick, with which he tries to strike the bag down. Other players pull the bag out of his reach for it is suspended by pulley. This continues until the bag is struck and all fruit, candy and nuts fall to the floor which results in a mad scramble for the food.

Hogg Foundation Representative To Be Tech Speaker

Dr. Herbert E. Chamberlain, consultant psychiatrist and chief of the Division of Child Welfare Services of the California State Department of Social Welfare, will be on the Tech campus Dec. 11 to address students on "Mental Health in Time of War" and "Keeping Safe in Time of Crisis." Dr. Chamberlain is presented by the Hogg Foundation of the University of Texas.

Dr. Chamberlain is a former teacher in the Universities of Chicago, Minnesota, and Smith college. He was formerly a director of the Minneapolis Child Guidance clinic, Delegate of the United States to the Sixth and Seventh Pan-American conference on child welfare, executive committee member to the White House conference on children in a democracy and consultant to the United States Children's Bureau in Washington.

At present, he consults with interested in the health and social well being of children, helps local communities improve conditions affecting child development, teaches communities how to get in touch with experts when problem cases arise.

He has made frequent lecture appearances in Texas under the sponsorship of Elmer Scott of the Civic Federation of Dallas.

Hawley To Speak At Forum Sunday

Miss Elizabeth Hawley, assistant professor of applied arts at Tech, will speak on wrapping Christmas presents at a Fireside Forum tomorrow afternoon, 2:30 in the playroom of Women's Dormitory No. 2.

Mrs. Hawley is to discuss appropriate wrappings for gifts to men in the service, and will point out changes that must be made in package decorations this year because of wartime priorities.

The Fireside Forum is sponsored by Forum, an honorary organization composed of outstanding junior and senior girls. Frances Gary is Forum president.

18 Year Age Minimum— Lower Classmen Eligible For Commission As Meteorologist

MEN WITH high school diplomas or the equivalent, or college freshmen and sophomores are now eligible for training leading to a commission as meteorological officers in the Army Air Forces," Dr. H. L. Kent, administrative assistant and director of Army and Navy Reserve at Tech, said recently. Those eligible for training must have completed the high school studies, and trigonometry, analytic geometry and college algebra. He must be a citizen of the United States, between the ages of 18 and 30 years and meet the physical standards of the army officers reserve corps.

Spencer A. Wells Commissioned In Army As Captain

Tech Chairman Will Report For Duty In Eighth Corps Area

Spencer A. Wells, member of the board of directors of Texas Technological college since 1936 and present chairman of the board, has been commissioned as captain in the United States Army.

SPENCER A. WELLS

Wells has been ordered to report for duty Sunday to the Eighth Service Command at Dallas. He has been re-commissioned in the infantry and will be stationed at Dallas temporarily, after which he probably will be ordered to a post or field elsewhere.

In the first World War, Wells was promoted to captain shortly after Armistice. He went to officers training camp May 11, 1917 and was granted a second lieutenant's commission, going overseas in October, 1917. He served in all the major battles of the war for which he received two promotions. The last being to captaincy. He returned to the United States in the spring of 1919, after six months with the Army of Occupation in Germany.

He is former president of the Lubbock Chamber of Commerce, and has been a director in the West Texas Chamber of Commerce 11 years. He now serves as president of Hemphill Wells company.

Souvenir Programs Will Be Given Girls At Dinner

Souvenir programs will be given girls at the annual formal dinner in Dorm I Thursday, December 17, 7 p.m. Leslie Fox is chairman of the program committee. Music will be furnished by a record player.

Stainbrook's Article On Paleontology Published

An article written by Merrill A. Stainbrook, professor of geology at Texas Tech, has been published recently in pamphlet form. The article, which was printed in the September 1942 issue of the Journal of Paleontology, is titled "Brachiopoda of the Cedar Valley Beds of Iowa—Inarticulata, Rhynchonellacea and Rostrospiracea."

Stainbrook is working also for a post war college degree. Other advantages of this training is the salary of \$50 a month received during preliminary training, plus \$235 a day for rations and quarters. During the following period of training in the army air corps, the student receives a salary of \$75 a month.

These courses divide the students into three groups according to classification in school. High school graduates with aptitude and background may complete the preliminary courses in twelve months which will be equivalent to freshman and sophomore years in college and is offered as basic training for ground duty in the Army Air Corps.

Freshmen and Sophomores who complete the pre-meteorological training which is equivalent to the regular second year courses in college math and science. This training period will last for six months for this group. Then they are qualified to receive advanced training which will enable them to become commissioned officers in the Air Forces. In all, the training time is approximately fourteen or fifteen months, counting the eight months of training.

Aggie Division To Experiment In Calf Feeding

An experiment designated "Growing Stocker Calves Under South Plains Farm Conditions" will be initiated on the Tech campus December 7.

The experiment will be conducted by the animal husbandry department in cooperation with the division of range animal husbandry at College Station.

The object is to determine the comparative value of sumac sorghum fodder, sunnec sorghum and native grass pasture when these are partially supplemented. Sixty-six choice to fancy grade Hereford steer calves will be divided into three lots of 22 calves each. Two herds will be fed in the dry lot. Each calf will receive South Plains roughage daily, supplemented with one pound of alfalfa and one pound of cotton seed meal.

The third will have access to native grass pasture and is to receive the same supplement. The experiment will continue for approximately one year and will be divided into two definite stocking periods, which are winter and early spring, and late spring, summer, and early fall. Plans have been made to place these calves in fattening pens at the expiration of the stocking period. They will remain until sufficient finish has been obtained to produce good to choice fat yearling steers.

The calves to be used in the experiment are from the Spade ranch Elwood Farms, located west of Lubbock.

Eleanor Cotton Named Associate Yearbook Editor

Appointments of Eleanor Cotton as associate editor of La Ventura and Jimmy Bragg and Charles Brady as photographers for the yearbook were approved by the Student Publications committee at its regular meeting Tuesday evening.

The committee also assisted in working out plans for selection of an assistant business manager for the Towardor, authorizing R. Leon Hughes, business manager, to interview applicants and to recommend an appointee as soon as possible.

Cotton is a sophomore journalism student from Dalhart and has been aiding Kara Hunsucker, editor, in her duties for the past few weeks. Bragg is a junior liberal arts and sciences major from Lubbock and Brady, also a junior liberal arts student, is from Pueblo, Colo.

Six Year Vacation Ended; Machines Return To Work

At the same old job again after six years vacation, are three machines in the Textile building. A comb, silver lapper, and ribbon lapper have stood silent until this week when George Conway of Whitinsville, Mass., started working on them, and now they promise to hum while they work.

Conway is an employee of Whitins Machine works, Whitinsville, Mass. He came to Tech from the southern part of Mexico where he has installed some machinery similar to that he is repairing here.

The machines are used for long stapled cotton and will be put to work immediately on making combed yarn.

Advanced meteorology training is given under the auspices of the University Meteorological Committee at five institutions over the United States. They are: University of Chicago, University of California, California Institute of Technology and the New York University. Pre-meteorological training courses will be given at selected institutions in all parts of the country. There are still a few openings left for properly qualified students who wish to enter directly into the professional meteorological courses.

If students are interested in this branch of the service, immediate application for the course should be filed with the University Meteorological Committee in care of the University of Chicago.

Council Also Calls For Show Director

PLANS WERE made to ask the Administrative Council to change the dates of the Christmas holidays, following a regular meeting of the Student Council Thursday afternoon. Also a call was made for a director for the Varsity show.

A letter is being mailed to the Administrative Council requesting that they place the two days held over from Thanksgiving holidays at the beginning of the Christmas vacation rather than at the end. Under this plan, the students would be dismissed from classes on Dec. 19 and would return on Jan. 4, it was stated by P. B. Shannon, Council president.

Pearl Harbor To Be Remembered In Gym Monday

War Films And Talk By Major Swick Will Feature The Program

TECH will take part in the nation-wide observance of "Pearl Harbor Day" with a special program in the gymnasium, Monday at 8 p.m.

The purpose of the program is honoring those who have sacrificed their lives, the dedication of our own lives, and the maintenance of the American ideals and way of life.

Several campus and civic organizations have combined their efforts to present a recognition worthy of December 7, first anniversary of the war.

The invocation will be by Chaplain Jeff D. Welch, Allen Post, American Legion. Welch is also chaplain of the Texas Defense Guard, 39th Battalion. Major Chas. H. Swick, head of the military science and tactics department, will address the group on the present-day war and its needs.

The ROTC band will furnish music for the program. Five marches, "Klaxon," "New Colonial," "Salutation," "Men of Ohio" and "Semper Fidelis" will be played before the film is shown, and the band will close the program by playing the National Anthem.

The war films scheduled to be shown in chemistry 101 will be taken to the gym by the filming department of the college. Exact titles of these motion pictures have not been announced.

Students, faculty, citizens, and military personnel of the community are extended an invitation to the program. Arrangements are being made by the college chapter of Society of American Military Engineers, under the direction of Cadet Major Norman Igo, president.

Petroglyphs Are Now On Display In Tech Museum

The meaning behind the petroglyphs found in the Southwest is left entirely to the person who views them. Such an example of ancient art is on exhibit in the West Texas Museum on Tech campus.

A thirty-six hundred pound rock approximately nine by five feet with petroglyphs on it was found on the Madera ranch in the Guadalupe mountains some 40 miles north of Van Horn.

Contrary to popular belief, these pictures had nothing to do with buried treasure as the Indians had no precious metals; nor were they a form of "lost writing." In some instances they may have referred to some exploit, but it is probable they were intelligible only to the band that made them. Probably other bands of the same tribe would understand them.

It is difficult to place these pictures in a definite age, however, it is believed some of them were made by the earliest Indians, as a pastime or hobby to decorate their caves.

Glee Club To Sing Sunday At First Methodist Church

Kappa Kappa Psi Glee club directed by Woodyard McDowell, will sing at First Methodist church Sunday morning. "Souls of the Righteous" is the anthem to be sung by the Glee club as a special number. The new Glee club made its initial appearance at the Sunday morning service of Saint John's Methodist church. This is the second appearance of the club.

Christmas Greetings Are Received From Ex-Student

"Christmas greetings from the Middle East" were received this week by the College Bookstore from Lt. Clinton Kirkpatrick, ex-student. When Kirkpatrick entered Tech in 1940 he paid his fees in pennies collected while in high school. He was a junior journalism student when he withdrew to enter the air corps. He got his wings from Luke Field, Arizona, in May 1942. Now he is in active duty with the air forces in Africa.

A Picture Contest

RARELY in the history of Tech student publications, has one publication criticized the policies of another. As a rule *The Toreador* keeps out of La Ventana affairs, and vice versa, but an issue has developed which forces *The Toreador* to voice an opinion which is in disfavor with recent announcements by the yearbook staff.

A few weeks ago, La Ventana officials announced a contest open to student photographers. Students were to submit candid snapshots and the staff was supposed to judge these snapshots and pay monetary prizes to the high three entrants. The prizes amounted to \$15.

However, since the contest was announced, there have been very few entries, and yearbook officials announce that unless more interest is shown and more snapshots are entered, that there will be no contest, and no prizes. It is the opinion of *The Toreador*, and a majority of the students consulted, that once the contest was announced that the yearbook was obligated to fulfill its promise, regardless of the number of photographs submitted.

The contest was originated to alleviate a shortage of candid photographs. With the yearbook's engraving deadline set at Christmas, staff photographers could not take enough pictures to insure the book's completeness. Thus, the officials thought that with the student help they could put out an annual just as superior as those of the past, despite the wartime speed necessary to insure the printing.

Undoubtedly a good plan, its failing has been with the members of the yearbook staff. They have not advertised their plan sufficiently to gain good results. The only manner the students have had to learn of this contest is through *The Toreador*. Although several announcements have been made in the columns of this paper, the contest still has not produced favorable results. With a small advertising campaign, such a plan should produce many excellent photographs.

Deadline for entries was set at December 19, which leaves exactly two weeks for Tech students to submit their pictures for the contest. With the announcement that prizes may not be paid, it is doubtful that any of the campus amateurs will go out of their way in any manner to secure a possible prize winner.

But disregarding all other aspects, there is a moral issue involved. This issue alone should coerce yearbook officials to pay the promised prizes, whether one photograph or one hundred were submitted. They have promised a \$7.50 prize for the best photograph, and the student entering the best photograph is entitled to that prize.

Students should have confidence in their student publications; backing out of a promise is no way to secure this confidence. They obligated themselves to the amateur photographers when they announced the contest, and the only way they can pay this obligation is by awarding the prizes once promised.

Prohibition Again

WITH national prohibition again a current popular question on the Texas Tech campus *The Toreador* feels just in outlining a few arguments that have come up in recent developments.

With both the wets and drays agreeing that a perfect state can exist in neither unlimited sales of alcoholic beverage or with an attempted eradication of all sales, the question in debate is which of the two is the greater evil.

The drays maintain that strict enforcement of prohibition laws will minimize the drinking and definitely improve the cultural and physical status of the American people. The wets argue that prohibition would only tend to influence the return of speakeasies, gambling, gangsters, and other characteristics of the recent prohibition age.

Agreeing that should soldiers be allowed to vote in the prohibition question, one of the leading campus drays maintains that the soldiers' vote is not to be relied upon. Maintaining that given the chance, the American soldier would vote, "... themselves ineligible for the draft too. They might even vote to kick the sergeant in the pants."

Evidently our reader does not believe in popular elections. Perhaps he believes that we should have a convocation of Protestant ministers, and let them decide on the nation's policies, elect our Congressmen and perform all other functions of state.

Breaking down the argument that the liquor industries have a great part in paying tax burden of this wartime nation he quotes Gladstone, "Do not speak to me about revenue from strong drink. Give me a people who do not squander their substance on strong drink and I will find an easy way to raise the necessary revenue."

Unfortunately, however, we have neither the people who will not squander their money on strong drink, nor do we have Gladstone to find the easy way to raise the revenue, if we did have such people.

To further strengthen his article, one of the very few prohibitionists on the campus quotes an inscription on the Ad building, "Righteousness exalteth a nation, but sin is a reproach to any people." Herein hangs the question of just what is sin.

We maintain that as long as a person does not transgress on the rights of others, he is not sinning. Of course we realize that often there are those who consume more than their portion of this "damnable body deteriorator" transgress on the rights of others. But its elimination can not be brought about through attempted prohibition.

Too many products are on sale that can not be taken off whereby a person can make himself obnoxious. The eradication of bonded whiskies would eliminate a considerable portion of them, but would it be worth it?

According to our conception of freedom (the freedom to do anything that does not endanger the freedom of others) pro-

Pre-Flight Base Gets Six Former Tech Students

Twelve Months Of Training Required To Become Officer

Six former Texas Tech students have recently enrolled in the U. S. Navy Pre-Flight School at Athens, Ga. Thomas Jeff Wilson, Boniface Frank Rapstine, J. B. White, Tom Harris Houston, Fred Ray Beard, and Emmet Douglas Anderson.

White received his B.B.A. degree in 1941. He majored in arts and science. Rapstine, who graduated in 1942, was an agricultural economics student, and a member of Alpha Chi honorary fraternity. Anderson and Wilson were members of the engineering society.

Successful completion of the work here will send the Cadets to one of the Navy's primary flight centers, then on to advanced instruction and finally an operational base. The entire pilot training period covers 12 months.

The four new Pre-Flight Schools are the Navy's answer to the need for physically-toughened, conditioned airmen to whip the Axis. In addition to the southern school, located on the University of Georgia campus, others have been established at the University of North Carolina, East Carolina University of Iowa, Mid-West, and St. Mary's College in California, West.

When the Pre-Flight School at Athens reaches its full strength, it will include nearly 1900 cadets, 200 officers and instructors and 125 enlisted personnel.

The Pre-Flight School course includes military and academic programs as well as physical training. Included are infantry drill and military tactics, seamanship, navigation, ordinance, first aid and signals. Academic work will consist of mathematics, physics and an intensive study in nomenclature and recognition of both allied and enemy planes and warships. Another course covers essentials of Naval Service which will indoctrinate cadets with the traditions of the Service and American Naval and Military history.

To produce a body-hardened, alert prospective aviator, the Pre-Flight Schools have installed a physical training program rated the most strenuous and complete ever undertaken by any college or organization in this country. In a nine-sports program, the cadet will learn teamwork, coordination and timing of football; experience the strain, body contact and individual courage of boxing and wrestling; attain the speed and involuntary accuracy of basketball, soccer and tumbling; become proficient in sustained swimming under abnormal conditions; toughen himself with cross-country hikes and hard, manual labor. Supervised mass calisthenics is a part of the daily routine.

Patterned after the U. S. Naval Academy as far as possible, the school will produce likely flying officers who know how to give commands as well as receive and execute orders. Strict discipline is in force with each platoon under an experienced officer.

In addition to taking over certain facilities of the University of Georgia, the Navy has added considerable equipment to create a complete pre-flight school. Among these are medical, dental and supply departments. There is a Navy Chaplain assigned to the station.

The cadets are quartered in modern dormitories on the University of Georgia campus. A carefully-supervised diet supplies an abundance of calories for the strenuous program.

Through the cadet's education, the Navy aims to bring to full bloom the inherent love of country and ideals of freedom and democracy, as well as complete mental talents. Through physical conditioning, the Navy goal is a fledgling candidate with the stamina, courage and will to win that will "Keep 'Em Flying."

Draft Releases To Be Required For Volunteers

Selective Service registrants desiring to enlist in the Navy, Marine Corps or Coast Guard must first obtain a statement from their local board certifying that they are "not now classified in Class II-A, II-B, or III-B, nor entitled to such classification by reason of being a necessary man engaged in dairy, livestock or poultry farm production," according to a memorandum issued today by the State Director of Selective Service to all local boards.

Lt. Commander J. P. Crowder, Navy Liaison Officer for the Texas Selective Service System, pointed out that heretofore a registrant desiring to enlist in the Navy did not need a release from his local board to do so if he was classified as I-A, or was an officer candidate or aviation cadet.

"He is now required to obtain a release from his local board, but must furnish the statement of classification which certifies that he is not a necessary man engaged in dairy, livestock or poultry farm production," Commander Crowder stated.

It is noted in the State Director's memorandum that the Army requires a release from the local board stating that the registrant has not been ordered for induction and will not be so ordered within one week, while the Navy requires only the statement of classification.

Quoting further from the directive: "As long as voluntary enlistment

In The Editor's Mail

Editor, *The Toreador* Texas Tech Dear Editor:

A paradox exists at Tech! While the faculty finds Tech students friendly and responsive in class and on the campus, these same students at a dance completely ignore them as chaperones.

Many faculty members express surprise and disappointment, at this "let-alone" policy of their young guests, for whom they gladly act as hosts. As chaperone to a recent campus dance, I went because I like students and because I wanted to share in their good time. Evidently the students elected me sponsor because of a mutual good feeling. But at the dance no signs of friendship were evident. For three hours I sat alone on a dusty bench without even a support for my back. No student among the hundreds there brought me a chair; no one thought of offering me a coke; only a handful bothered even to stop and even say hello; just one boy of the lot introduced his date to me. I was puzzled that students left me so entirely alone.

This is only a typical example of how Tech students forget their chaperones. Faculty members are prone to think, that soon only by courtesy and consideration from the students will chaperones be induced to continue this service, which they have gladly given heretofore.

Therefore, students, at the next dance, go up to your chaperones and say hello. Knowing that they have devoted an evening to, see to it that you have a good time, see to it that they have a good time too. All they want is an expression that you as guests appreciate their coming and are glad to have them around; in other words,

is permitted by the Armed Forces, it is of utmost importance that board members and particularly board clerks of the Selective Service System, give impartial and correct information to registrants who may inquire regarding their right to enlist and there should be no hesitancy in issuing the statement required by the Naval Recruiting Service, provided the registrant is entitled thereto, since the Navy, Marine Corps and Coast Guard can enlist a registrant at any time prior to induction without clearance from the local board except as required hereinabove."

Just show the evidence of the stimulating friendship that faculty members feel exists between Tech students and themselves.

If your parents or an older friend were chaperones, you would not "leave them alone" for the evening but would see to it that they left with a pleasant feeling toward you and your thoughtful classmates; do as much for your friends of the faculty, who are baffled by the actions of students of whom they are genuinely fond.

Sincerely, L.E.M. (Editor's note: Conditions as they are, *The Toreador* takes it upon itself to apologize for this oversight on the part of the students. We believe as you do, that sponsors of the classes and the chaperones of the dances are chosen because of the existing intimate feeling between the instructors and the students they sponsor. It is undoubtedly a pure oversight and a lack of etiquette. We believe that once this is called to the attention of the student body, that the situation will be remedied. Thanks a lot for your letter.

New Mexico University To Publish Pamphlet

LAS VEGAS, N. M.—(ACP)—Publication of an English translation of the book-length poem, "The Towers of Manhattan," scheduled for this month by the University of New Mexico Press, will bring fruition to months of work for two New Mexico Highlands university professors.

They are Alfredo Ortiz-Vargas, noted South American author and journalist, now a visiting professor of Spanish at Highlands, and Dr. Quincy Guy Burris, head of the university's English department.

In liquid, rhythmic verse Senator Ortiz-Vargas presents his impressions of the United States as interpreted through New York city, and his vision of the future of the western world. Dr. Burris has succeeded in translating the poem into English without loss of either beauty or grace. The Spanish original already has been published.

Publication of the English version is sponsored by the committee on inter-American affairs, headed by Nelson Rockefeller.

A Year Of War

MONDAY marks the first anniversary of World War II. Still fresh in the minds of Tech students is the eventful Sunday, when the news of a sneak attack on Pearl Harbor by Japanese forces came just in time to interrupt all digestive facilities and leave draft age students with anything but a "smug sense of complacency."

For days that mounted into weeks and for weeks that lasted into months, Americans were decisively defeated in every battle. A handful of Marines on Wake Island challenged the immortality of the Alamo in withstanding attacks by Japanese forces long after they knew of an ultimate defeat, although they were outnumbered more than ten to one.

Singapore fell, and with it Japanese and German people were convinced of a short and victorious crusade. Adding to their confidence was the fall of the Solomons, Midway, and every other point in the mid-Pacific.

But, contrary to Axis plans, these defeats did not dishearten the American people, their morale was never shaken. In fact their attitude toward the war distressed governmental officials in just the opposite manner Axis propagandists had hoped. Americans continued to believe that this was the first round of battle, that soon our forces would rally and drive the Rising Sun to setting.

Through this sense of complacency, an all out war effort has not yet been made. There is still much power in American reserve, and plans for obtaining same are well started.

The United Nations have started a new offensive and the once invincible Rommel is challenging the speed of Mussolini in retreating. The tide of battle is definitely on the turn. In one year from the time we were literally caught "with our pants down," we have recovered sufficiently to gain the initiative from the enemy.

With the progress duplicated in 1943, it is entirely possible that World War II will never celebrate an active second anniversary. But for this progress to be duplicated in 1943, we as Americans must BEGIN to make sacrifices.

Yes, we say that we must BEGIN to sacrifice. For in no way have the people of this area felt the war effort except through real sacrifices made by friends and relatives in the combat zones.

Oh, we have given up the second cup of coffee and we haven't had the sugar that is desired by the would-be diabetics. We even sacrificed our Sunday afternoon drive last Monday when we signed for gas rationing. Some of us have invested in defense bonds, but we knew at the time that we were going to get that money back and if we had needed it for anything else we would have put it there.

But not once, has one single American on this continent sacrificed even a portion of the sacrifices required every day of the people of the conquered nation. Not once have we seen Japanese troops or Gestapo police march into town, line the citizens and after mercilessly taunting them, shoot them down like dogs.

Not once have Axis planes flown over this continent, bombing our homes, schools and churches. Not once have the people of this country faced starvation, but people in war torn Europe and of Pacific islands have been under these conditions for some time now.

When we hollered because we couldn't get new tires, people of France winced as their countrymen were disemboweled before their very eyes. When we griped about taxes, these same people plead with Gestapo agents to leave them just one crust of bread.

Let us fervently hope that we will never experience these atrocities of the inhuman race, but at the same time let us remember that the quicker we sacrifice the unessentials, the quicker these people can be restored to a decent manner of life.

On this first anniversary of the most brutal war of all time, let us give thanks to the powers that be for the continuation of the American way of life, and at the same time let us resolve to help in every way possible, to win this war and to also win the peace after this war.

PROHIBITION

hibition is as unAmerican as Hitler. For although it is true that we can never reach the stage of perfection in educating the populace to stop when they have had enough, we do believe that a more desirable status can exist through punishing these people than through punishing the whole of the American people.

Since it is agreed that a perfect state can exist in neither instance, it is a choice of the lesser of two evils. We believe that if the efforts of the WCTU were directed at the chronic drinkers rather than everyone who takes a drink, that a more nearly perfect state would exist than does now. And we believe a more perfect state exists now than in the trial period of prohibition.

May we have more letters?

Basketball Season To Begin Here On December Fifteenth

Lubbock Flying School Is First Raider Cage Foe

Cowboys, Buffaloes And New Mexico Are To Play Here Also

Basketball season for the Texas Tech Red Raiders will officially get underway Tuesday night, December 15, when the 1942-43 edition of basketballers meet the Lubbock Army Flying School in the Tech gymnasium.

Coach Polk Robison, beginning his first year at Tech, expects to put a strong five on the floor to face the sharp shooting Flyers.

The squad this year totals some forty-three men, and among these are many returning veterans. Some of the experienced men are George Allen, Garland Head, Buck Rogers, Lawrence McCulloch, and Norman "Frosty" Cox.

Some big games have already been scheduled for the home courts, and many more will be placed on the list at a later date. The first home game after the contest with the Flyers, rather the first scheduled at present, will be the Hardin-Simmons Cowboys on January 11 and 12. On February 3 and 4, the New Mexico Lobos will visit Lubbock for games. The highly touted, and nationally famous West Texas State Buffaloes will be the opponents of the Raiders on the nights of February 12 and 13. These teams are all members of the Border Conference, and will give fans some idea of Tech's chances in the conference race. These games, however, will have no bearing on the title, but this issue will be decided in Albuquerque with the annual Border Conference round-robin tournament. This tournament will be held from February 17 and will continue through February 20. It will be a double elimination affair.

Games with other schools, including Southern Methodist, Texas Christian, and Texas University may be played but nothing definite has been done. Morley Jennings, athletic director, reports that he is making efforts to secure games with these schools, but has received no answers as yet.

Morley Jennings, athletic director, has announced that there will be a season faculty ticket sale for all the home basketball games. These tickets will go on sale to faculty members on Monday morning, December 14, and will sell for 0.10. They will be good for all the home games. These faculty tickets will be on sale at the athletic office in the Tech gymnasium. Jennings urges that all faculty members purchase their season tickets on Monday, December 14, if at all possible.

The schedule of the Raiders, though incomplete, appears today like this:

- December 15—Texas Tech vs. L-AFS at Lubbock
- January 8-9—Texas Tech vs. New Mexico at Albuquerque
- January 11-12—Texas Tech vs. Hardin-Simmons at Lubbock
- January 15-16—Texas Tech vs. West Texas at Canyon
- February 3-4—Texas Tech vs. New Mexico at Lubbock
- February 12-13—Texas Tech vs. West Texas State at Lubbock
- February 17-18—Texas Tech vs. Hardin-Simmons at Abilene

Schlinkman And Callahan Lead Tech Statistics

Season statistics on individual players released by Bill Parker, Tech publicity director, show that Walter Schlinkman, powerful full-back of the Raiders, led the team in yards gained. Schlinkman carried the ball 145 times, gained 606 yards, lost 36 yards, giving him a total of 570 yards gained for the season.

Don Austin, Dick Standefer, and J. R. Callahan were close together in yards gained, but neither of them came close to equalling Schlinkman's standard. Austin, the nearest man to Schlinkman carried 88 times for a total of 264 yards.

Standefer was next with 238 yards run up to his credit, with Callahan just behind him with 228. No other men came close to equalling these statistics.

In the passing department, J. R. Callahan, halfback, led the field with thirty-eight passes attempted, eleven completed, and two intercepted, for a total gain of 106 yards. Standefer, nearest man to Callahan, threw passes to net a gain of 87 yards.

The complete totals are shown below:

Player	Times Carried	Net Gain
Schlinkman, Fb	146	570
Austin, Rhb	88	264
Standefer, Lhb	69	238
Callahan, Lhb	106	228

PE Directors To Austin For Meet

Meeting Is Relative To Civilian Health

Mrs. Johnnie G. Langford, head of the women's department of physical education, and Morley Jennings, athletic director and head of the department of men's physical education, will leave today for Austin where they will attend a physical fitness meeting on the campus of the University of Texas through Thursday.

The meeting, held in connection with the physical fitness program of health and emergency service of civilian defense under the Federal Security Administration in Washington, will be held to acquaint physical education directors with the physical education program as used in the Army, Navy, and industrial plants, and attendants are expected to teach the points they learn in their departments in order to better prepare students for the Service and industrial work. Mrs. Langford stated.

Between 20 and 25 delegates from each state in the Eighth Service command of the Army—Texas, Arkansas, Louisiana, Oklahoma, and New Mexico—are expected to attend. They will represent State Departments of Education, State Teachers colleges, State universities, city school systems, and other organizations connected with the physical fitness program.

Dr. D. K. Brace of Texas university will have charge of the program, which will include a joint meeting of men and women delegates, and will conduct the men's division of applied study. Miss Anna Hiss of Austin will have charge of the women's division and will act as sub-chairman of the meeting.

Miss Dorothy La Salle of Washington, D. C., head of the national women's division of the program has announced that she will attend.

The program is assigned to the national headquarters of the Federal Security Administration and operates through the U. S. Office of Education and Division of Defense Health and Welfare service. The state program is under the direction of the state Federal Security Administration and state department of education. A state program of Victory Physical Fitness clubs is already in operation. It is assigned to the University Interscholastic league and is carried out by that department under the direction of R. J. Kidd and Roy Bedichek, state heads. Recently 90 clubs were in operation in Texas including 3453 school students.

Texas' Defense, Georgia Offense, Best In Nation

Hardin-Simmons Is Leader In Offensive Rushing Department

Dominating the football world this year, offensively and defensively, the Texas University Longhorns and the Georgia University Bulldogs were named as the top teams in these divisions.

Last year the Longhorns emerged with a scoring record of 338 points to place them in that division. This year, the Texans reversed their tactics, and placed first in total defensive play. The Austinites yielded an average of 117.3 yards per game to end the season at the top of the division. Their record fell far short of the all-time low set by Santa Clara's 1937 Bronco team, when the Californians yielded but 69.9 yards per game.

The University of Georgia Bulldogs, paced by Frankie Sinkowich, the nation's number one back, set a new offensive record by beating the Colorado Buffs' 1937 record of 375.4 yards per game. This record was set by the Colorado team when they had the services of the great Whizzer White. Sinkowich and company topped this record with a total offensive record of 429.5 yards gained in each game.

In offensive rushing the Hardin-Simmons Cowboys were the best. The powerful Abilene eleven averaged 307.4 yards per game, but failed to beat Colorado's record of 310 yards in each game, set in 1937.

Boston College, upset last week by Holy Cross, led the nation in defending its goal line against opponents' rushing attacks. The Boston eleven yielded but 48.5 yards per game on the ground. This was a good bit short of beating Santa Clara's 1937 mark of 25.3 yards yielded per game.

In the passing department Tulsa's mighty Golden Hurricane led the nation with a total of 238.9 yards in each game. Tulsa, only undefeated-untied major eleven in the nation this year, set a new record in this department, far surpassing the 1940 record of the Big Red team of Cornell, which gained 186 yards in each contest.

Undefeated H-S Cowboys To Play In Sun Bowl January 1

Hardin-Simmons' colorful, undefeated Cowboys will meet the Second Army Air Force's also undefeated team in the Sun Bowl game in El Paso New Year's Day, it was announced by the Hardin-Simmons Athletic council Tuesday, as it accepted the Festival committee's bid to participate in the January 1 clash.

The HS-U council also announced that it would be under new tutelage, as it granted Warren Woodson, Cowboy coach, who gave the Cowboys one clear-cut Border conference championship and a tie for another in as many years with the Abileneans, leave of absence to enter the U. S. Navy as a lieutenant (senior grade).

Woodson was given orders to report immediately to the North Carolina pre-flight school at Chapel Hill, N. C. The Cowboys will be under the direction of Clark Jarnagin, former assistant coach who has been promoted to the head coaching position, as they prepare for the Sun Bowl clash.

Cowboy athletic council members announced Wednesday that they were trying to secure the services of Bulldog Turner, former Little All-American and one of the greatest centers of Hardin-Simmons history who is now playing professional football with the Chicago Bears, to assist Jarnagin in his chores in connection with the Bowl

battle. Turner has another game to play with the Bears against the Washington Redskins for the professional championship Dec. 13, and no reply had been received this week.

The service team has a record practically as impressive as that of the Cowboys, being undefeated and having held Washington State to a 6-6 tie. The Staters are in the thick of the fight for the Pacific coast championship and the honor of playing host in the Rose Bowl.

The Cowboys hold eight victories, two of them over Southwest conference aggregations Southern Methodist and Baylor, and had their perfect record marred only by a scoreless tie in Lubbock with the Red Raiders.

Although OPA officials in Washington have discouraged long-distance travel to Bowl games, and Sun Bowl officials frown upon lengthened travel, the annual classic, played in the picturesque saucer nestled between sunny El Paso mountains, is expected to draw around 15,000 spectators.

Chairman W. L. Stangel of the Tech athletic committee announced

ed before the conference decision was reached that Tech would not participate this year if asked, but the game will hold considerable Tech interest as the Raiders are the only spoilers of HS-U's record.

Military Ball And Kemas Dance Highlight Weekend

Honorary Cadet Sponsors Named At Formal Prom

Stephenson, Baker
Blundell, Wilkinson
To Lead The Cadets

FOUR girls presented at the Military ball as Honorary Cadet Sponsors were Mary Ann Stephenson, Honorary Cadet Colonel, Patsy Lou Baker, Honorary Cadet Major, First Battalion, Jerry Blundell, Honorary Cadet Major, Second Battalion, and Jacquelyn Wilkinson, Honorary Cadet Captain Band.

The Honorary Cadet Sponsors are selected by military students from a group nominated by them also, and are presented at the ball according to their rank which is determined by the number of votes received by each. The Military ball is sponsored by the Society of American Military Engineers. This is the seventh annual ball.

All the girls nominated were lined up in a semi-circle and those selected were announced by Hugh Rowland. As each girl's name was called she stepped forward into a spotlight where she was given a bouquet of red carnations tied with red and black ribbons and a warrant designating her rank presented by the ROTC Cadet of equal rank. Mary Ann Stephenson was presented by Cadet Col. Sibley Neal, Patsy Baker by Cadet Maj. Norman Igo for First Battalion, Jerry Blundell by Cadet Maj. Ted Schikowitz for Second Battalion, and Jacquelyn Wilkinson by Cadet Captain Bowen Dulaney.

The Club seal of SAME was mounted on white background and was placed behind the orchestra and flanked on each side by the National colors and Regimental colors. Company Guides were placed at various points around the ball room.

"Army Blue" was the last song as it is the traditional ending of the Military ball.

Members and their dates were:

George Acton Margaret Ann Bell
Bill Akers Billie Powea

Specials guests were Major and Mrs. C. H. Swick, Major and Mrs. F. E. Hanks, Captain and Mrs. H. D. Weston. Other guests were the girls nominated and their dates.

Aircraft Firm To Train Women In Engineering

In an excerpt from a bulletin printed by the American Council on Education a program was announced by one of the three largest aeronautical concerns in the country for the training of women in engineering. This plan provides for the selection of approximately 1,000 women who are now in college and who have completed at least two years of college work including elementary college mathematics.

Those young women selected will be placed on the company payroll and will receive this training, room and board free of charge. While in training they will be paid a nominal amount. Such training will be of a year's duration and will qualify students for immediate assignment upon finishing the course.

This plan is being proposed as the establishment of an industrial corps for women in the engineering profession. It provides opportunity for young women who are now enrolled in colleges, but who feel that in order to be of greater service in the war effort, should receive more direct preparation in order to do the best job possible.

Tech Graduate Tells Of Pacific Battle

A Silver Star For Him—
By DOROTHY MONTGOMERY
Toreador Staff Writer

CAPTAIN Wilson Chapman of Quitaque, ex-Techian, has recently been awarded the Silver Star for distinguished service. He received this reward with thirteen other United States Army fliers at Gen. MacArthur's Headquarters in Australia, Oct. 27.

Chapman, 22 years old, small, neat and dark, is the leader of a group of fliers known as "Chip Chapman's Charging Chumps." Late in August "Chapman's Charging Chumps" made their name even more famous by diving into a large Japanese force of bombers and fighters over the Timor sea in the Darwin theatre of war.

"I saw my Melick heard 'em and Drake saw 'em," said Chapman.

The other two men referred to are Gene F. Drake of Winnetka, Ill., and Ray Milikan of Fresno, Calif. Milikan is large, reticent and young and Drake is sporty, good-looking plunger, who has "Obie" (for a Chicago girl, Shirley McCormick O'Brien) painted on the nose of his plane.

Drake led the attack with a long leisurely dive. A group of American fliers just before the "Charging Chumps" made their attack, dived out of the sun and picked off six enemy bombers, but the "Chumps" were not quite as fortunate.

"This time we did not have the sun for concealment," explained Drake. "With Don protecting my tail, I went in straight at 'em. I saw my tracers first hitting a nose, then going back. Perhaps I got the pilot and co-pilot. Whatever was the reason, that '98 began a slow, lazy fall. Its fall got steeper and steeper till the ship was dropping straight down."

Grimes Feted By Sans Souci With Kitchen Shower

Sans Souci social club honored the former Mary Elizabeth Grimes, a club member who married Lt. Robert R. Coble, with a kitchen shower Wednesday evening at 6:45 in the playroom of Women's Dormitory No. 2.

Club members and pledges attending were Louise Anderson, Virginia Bowman, Betty Rhea Caldwell, Fannie Dale Cheek, Sara Daviss, Ophelia May Beall, Frances Lou Dean, Barbara Forrest, Marjorie Hall, Jane Hiatt, Betty Herring, Mary Jane Kinard, Dorothy Marrs, Elizabeth McKennon, Jean McLaughlin, Mary Lou Metcalf, Marilynn Miller, Theda Rattan, Mary Ann Stephenson, Dorothy Nelle Swanson, Yvonne Westmoreland, Dorothy Wright, Maryjo Turner, Dolores Bizzell, Sue Grimes, Jane Cheatham, Hannah Preston, Joan Norton, Ava Ruth Stangel, Dorothy Underwood, Martha Kuykendall, June Zumbro, Fern Brannen, Nina Byron, Margaret Jane Dill, Phyllis McReynolds, Ruth Gray, Dana Faye Ware, and Evelyn McLaughlin.

Sock And Buskin Present "Question Of Morality"

"Question of Morality" was the play presented by members of Sock and Buskin in their regular meeting Tuesday night, December 1. The cast included Ruby Cowan, Raymond Pillar and Reverdie Ater with Bettye Rhea Caldwell, Brunette Harper, Ruby Cowan and Ava Smith acting as directors. Phyllis McReynolds presented a character study after which members of the club made plans for a Christmas party. Students chosen on the committee for planning the party were: Dudley Sue Dinwiddie, Billy Louise Berry, Norman Shaw and Lehmer Graham.

The corporation will get in touch with colleges and universities in the very near future to work out some mutually advantageous program, through which those girls who are interested and eligible may be immediately considered for employment.

Miss Poindexter To Direct Hotel Renovation Plan

The federal government this week called on Texas Tech for a new type of aid in war work—this time to help increase efficiency of women in a large automotive training school at Cisco.

The task is to brighten surroundings in Cisco hotels where more than 200 women are beginning training as automobile mechanics, will be housed. Miss Martye Poindexter, professor of applied arts in the division of Home Economics, has been assigned the task of aiding and already has visited Cisco to draft a program. Miss Ruth Huey, state director of Home Making, is cooperating.

On the theory the women trainees will be more happy if living in bright surroundings, plans have been laid for retaining interior walls of the two hotels lighter colors, placing light colored slip covers on furniture, lightening window hangings, and replacing ten-watt bulbs in corridors and rest rooms with larger lights.

Areas to be freshened and made brighter are those to be used during recreational hours. Bedrooms, Miss Poindexter said, are suitable for sleeping, even though dark. But lobbies, halls, writing and reading rooms should be cheerful and bright. Books, magazines, attractive lamps and even ash trays will be provided.

Newell To Speak At Meet Of Engineering Society

Robert Newell, professor in mechanical engineering, will speak at a meeting of the American Society of Mechanical Engineers, Monday night at 7 in E201. He is to tell of his experience while working this summer for Douglas Aircraft company in Santa Monica, California.

Students interested in becoming members of ASME are invited to attend the meeting.

Army Wives Are Entertained With Tea Wednesday

Decorations featured a Christmas motif. The serving table was laid with silver metallic cloth on which sprigs of holly were scattered.

A large reflector surrounded by miniature angels holding candles centered the table.

Guests were greeted by Mrs. R. E. Garlin, chairman of arrangements for the tea, Mrs. A. B. Cunningham, secretary-treasurer of the club, Mrs. R. A. Mills, president, Mrs. Clifford E. Jones, wife of the college president, Mrs. Norman B. Olsen, wife of the commanding officer of South Plains Army Flying school, and Mrs. Thomas L. Gilbert, wife of the commanding officer at Lubbock Army Flying school.

Mrs. Jones and Mrs. Mills poured tea.

Ermael Floyd, a Tech student, played two piano selections, "Clair de Lune" (Debussy) and "Juba Dance" (Dett), and accompanied a quintet of girls from the Tech music department who sang Christmas carols. Members of the quintet were Betty Cherry, Bonnie Campbell, Joyce Watson, Ruth Strain, and Lorraine Ross.

About 150 guests attended.

Maeker Visiting Tech This Week

Lt. Arnold Maeker, former Tech student, returned to Lubbock and Tech campus this week for a short visit while on a ten day furlough, at the close of school last year.

Maeker received his commission in the Fifth Armored division Wednesday night he addressed the Officers' Call regular meet-

Alpha Phi Omega Sport Dance To Be Held Tonight

A sport dance for Alpha Phi Omega members and pledges will be held tonight at 8 o'clock at the Yellowhouse Tea Room. The dance, to be held in honor of the pledges, precedes the formal initiation on Sunday afternoon, 2 p.m., at the home of Dr. J. O. Ellsworth, faculty advisor. Cooperating with three other campus organizations next Monday night, December 7, APO has part in sponsoring the War Film Program in the Gymnasium at 8 o'clock.

Pledging this National Service Fraternity are: Charles Reese, Howard Schmidt, Brac Biggers, Bill Thorpe, Jack McMillin, Harold Ballew, Guinn Williamson, Van Greene, Hugh Ledford, W. B. Blankenship, Larry Miller, Clay Woods, Maxey Pinson, James Conley, John Collier, Bill Rollwage, Harold Space, Billy Harvey, Julian Stewart, Bobby Harvey, Julian Simpson, James Campbell.

The dance, to be held in honor of the pledges, precedes the formal initiation on Sunday afternoon, 2 p.m., at the home of Dr. J. O. Ellsworth, faculty advisor. Cooperating with three other campus organizations next Monday night, December 7, APO has part in sponsoring the War Film Program in the Gymnasium at 8 o'clock.

Pledging this National Service Fraternity are: Charles Reese, Howard Schmidt, Brac Biggers, Bill Thorpe, Jack McMillin, Harold Ballew, Guinn Williamson, Van Greene, Hugh Ledford, W. B. Blankenship, Larry Miller, Clay Woods, Maxey Pinson, James Conley, John Collier, Bill Rollwage, Harold Space, Billy Harvey, Julian Stewart, Bobby Harvey, Julian Simpson, James Campbell.

Cleanness Necessary In Wrapping Of Gifts

WRAPPINGS for Christmas gifts this year will be devoid of many fancy trimmings of former times due to shortages of colorful cellophane and other materials. For this reason, coeds must depend more than ever upon their individual originality to make a gift appear attractive on the outside as well as on the inside.

Moreover, department stores will probably be swamped this season with a heavy Yuletide rush and in spite of their usual excellent service in gift wrappings, girls will not be able to make an extra trip to town on crowded buses to pick up the gift.

Wrappings for Christmas packages can be made both attractive and inexpensive with a little effort and cleverness. Perhaps however, the coed would like a few ideas on gift wrapping or would prefer a very special sort of wrapping for a very special gift.

In that event, she should attend the Fireside Forum at 2:30 o'clock Sunday afternoon in the playroom of the new dorm, when Miss Elizabeth Hawley of the Home Ec faculty will demonstrate new methods for wrapping gifts. The program should prove highly interesting as well as instructive.

Raido Quip of the Week (from Abbott and Costello) "Think of all the poor women at home darning their hubby's socks..."

"Well, what of the women at home socking their darn hubby's..." The Nazis say the American flag resembles a stick of peppermint... to which we can

ing telling of his experiences while on desert maneuvers. He told how a tank was recovered from the Colorado river, and the difficulties entailed in the reclamation. He also mentioned some nuisances encountered as snakes, scorpions, and the temperature soaring to 140 degrees.

prightly retort, "It hasn't been licked yet!"

East wing dorm residents rising for the breakfast bell catch a beautiful display as the sun rises behind the picturesque steeple of the Episcopal Church. The view is matched only in splendor by that seen by the west wing dormmates as the setting sun disappears behind the Ad building tower. It's small wonder that West Texas "sky scenes" are famous the country over.

Mary Elizabeth Grimes, popular Tech coed and a Sans Souci, became the bride Friday of Lieut. Robt. R. Cole of the Pecos Basic Army Flying school. And Elizabeth Young, prexy of the new dorm, is wearing a ring from Ben Oglesby, who is employed by the Tech Press.

"I'm said that girls certainly regret losing their youth—unless they can pick up another one immediately... "Lucky Strike Green Has Gone to War" is becoming as irritating as the "oh, darling" of radio commercials for macaroni.

Monday is December 7, a day that will "live in infamy." After a year at war, we have become accustomed to a more regimented way of life! We have developed a deeper consecration for the return of that way of life as we knew it before the fateful Pearl Harbor event. The coed at Texas Tech knows that this is her war too; fighting for victory and building for peace, she has not failed America.

Gift Hints

- Wrisley's Toilet Sets \$1.00 up
- Evening in Paris Sets \$15.00
- Colognes \$1.00 to 2.50
- Stationery 50c to \$1.19
- Brush Sets \$3.00 to \$4.50
- Fountain Pens \$2.75 to \$8.75
- H. H. Ayers Fitted Kits \$6.50

Gifts for the Home

- Boudoir Lamps
- Candelabra Sets
- Ash Tray Sets
- Pottery

Gifts for Sister

- Stationery
- Fountain Pens
