TEXAS TECHNOLOGICAL COLLEGE, LUBBOCK, FRIDAY, AUGUST 14, 1942

Number 9

FALL TERM BEGINS SEPTEMBER 15

Mark McGee To Address Graduates

Two Hundred To Be Graduated Friday

SPEAKING to some 167 graduates receiving Bachelor's degrees, and some 32 receiving their Master's, the Honorable Mark McGee, prominent Texas attorney and head of the Texas Rationing Board, will deliver the main address at the commencement exercises of Tech on Friday, August 21. Mr. McGee was an officer in the American Expeditionary Forces during World War I. He was chosen as the speaker due to his prominence in Texas activities, as well as being one of the most proficient public speakers in the South.

The graduation exercises will occur on the Administration Green, beginning at 8:30 on Friday night with the invocation given by the Reverend Gantz of the First Christian church of Lubbock. During the evening's program, Paul Redding, president of the graduating class, will present the college with the class gift. This gift, at the present time in the form of Victory Bonds, will be given with the understanding that when they are cashed the money received will be used for the purchase of concrete markers for the main buildings of the campus. The night's activities will be brought to a close with the benediction given by the Reverend McGee of St. John's Methodist church.

Of the 167 students receiving their Bachelor's degree, there are 32 due to receive a Bachelor of Arts; 13 to get a Bachelor of Business Administration; 5 to get a Bachelor of Science; 3 to get a BS in Chemical Engineering; 5 due to a BS in Civil Engineering; 2 to get a BS in Electrical Engineering; 1 to get a BS in Mechanical Engineering; 4 in Petroleum Engineering; and 1 in Textile Engineering. There are 15 students receiving their BS with an Agriculture major, and 24 in Home Economics.

Of those receiving a Master's degree, some 14 will receive a Master of Arts; 4 will get a Master of Science; 3 will receive a Master of Education; and 1 will get his Master of Business Administration.

On September 10 an informal graduation will find 13 more students finishing their scholastic activities in Texas Tech. There will be graduated on that date some 3 students with Bachelor of Arts; 2 with Bachelor of Science in Education; 2 with Bachelor of Business Administration; 4 Civil Engineers; 2 Mechanical Engineers; and 2 Textile Engineers. There will also be six Master of Arts degrees conferred upon that date.

The officers to the graduating class are Paul Redding, president; Dorothy Burton, secretary-treasurer; and G. L. Farrar, vice-president. The Invitation Committee was made up of Dorothy Burton, Martha Price, Paul Redding, Harold Yeager. The Gift Committee consisted of Hazel Dickinson, G. L. Farrar, Charles Gollibar, Mary Francis Reeves, Kenneth Taylor, and Mary Burke Yeager. T. C. Root and Haskell Taylor sponsored the class.

The total number of graduates is not definitely known, as the above is only a tentative list, but at the present time, with the 212 degrees to be conferred during both graduations, the class is 42 members short of last year's summer graduates, who totaled 254.

Assistant Cheer Leaders Named; Uniforms Chosen

With football games and pep-rallies just around the corner, the Texas Tech yell leaders have announced their assistants and ordered their uniforms.

James Gunter, junior agriculture student from Conway and head yell leader, has announced that Rex Harris, Dallas arts and science sophomore, and J. C. Doss, sophomore aggie from Stamford will be the two men assistants. Doss and Harris were chosen last spring following Gunter's election in May.

Head girl yell leader, Bill Williams, senior arts and science student from Farwell, at the same time announced that Glennis "Gee" Waltz, seniors arts and sciences student from Denison, will be her assistant.

Order were placed for the cheer leaders' uniforms this week, and according to Bill Williams they will be the most novel uniforms ever worn by Tech representatives. Boys and girls will both wear white sweaters with a red megaphone across the front.

Tech Enters In Contract With U. S. Government

Enlistees To Take Extension Courses At Reduced Rates

Texas Technological college recently entered into a contract with the United States government to give soldiers a discount on correspondence courses.

So far the college has just been making out bulletin to different centers for the army. Twenty camps, forts and other army posts have sent for the bulletin from Tech. The contract with the government was completed July 14 and no students have enrolled in the correspondence courses yet. However, Mr. McDonald, director of extension, is expecting a large enrollment as soon as the courses get underway.

Fifty colleges were chosen by the war department to submit applications and courses to the war department. Tech had 150 courses in 15 different departments accepted.

The war department will pay half of any course for an enlisted man including text books as long as the long as the War Department's half does not exceed \$20.

No enlisted man may take over one correspondence course at a time with the government's help. Fifty faculty members at Tech are cutting their rate of teaching and by cutting the overhead by the college the courses are now offered to the soldiers for half of the regular prices by Texas Tech.

Texas Tech started a policy before war was declared to let enlisted personnel take correspondence courses at 2-3 of the regular price. This was on the college's own "hook" and was made possible by the instructors cutting their price of teaching the correspondence work.

President Clifford B. Jones has announced that classes will start this fall at 9:00 a.m. war time, instead of the usual eight o'clock classes. This new schedule will be in effect with war time, and will not be in effect if the war time has been discarded by then.

Classes will begin at 9:00 a.m. and turn out for lunch at 1 p.m. Then classes will last one hour longer in the afternoon than before, or until 7 p.m.

According to President Jones this is being done in order to save utilities and to avoid beginning classes in the dark this winter.

Students In Apartments Have Best Grade Average

THE office of the Dean of Men has just completed a survey of the men students for the past year. This survey looked into the best environment for students to make the best grades. The primary purpose according to Dean James G. Allen was to find out where the students did the best work. Contrary to popular belief the dormitories were second in the grade point average per student.

The place that the men students seem to do the best work is in college approved apartments. However, as an explanation Dean Allen gave for this was the men students had to have their academic dean's approval before they could move into an apartment. And the academic deans would not approve any student to live in apartments unless their grade averages were good.

College approved houses were last on the list for some unknown reason. There was no way of checking the students average that live at home.

Comparative grade averages for college approved houses, apartments and college dormitories (fall and spring semesters 1941-42).

Number of Students	Average Grade		Average Grade	
	Fall	Spring	Fall	Spring
College Approved Houses	749	497	1.17	1.28
and Apartments combined	655	429	1.13	1.22
College Approved Houses	655	429	1.13	1.22
College Approved Apartments	94	68	1.34	1.52
College Dormitories	632	630	1.24	1.30

Comparative Grade Average per student, for college approved houses, apartments and college dormitories. (Fall and Spring semesters 1941-42)

Number of Students	Average Grade		Average Grade	
	Fall	Spring	Fall	Spring
College Approved Houses	794	497	1.09	1.21
College Approved Houses	655	429	1.07	1.11
College Approved Apartments	94	68	1.27	1.46
College Dormitories	632	630	1.24	1.30

HE Division Is Host To Plains Teachers Meet

138 Demonstration Agents and Home Ec Profs Registered

Teachers from as far east as Jacksboro and west to Odessa have been on the Texas Tech campus since Monday in their Annual Conference of Homemaking teachers.

One hundred thirty-eight teachers, county demonstration agents, and other home economics majors registered in the entrance hall of the Home Economics building Monday morning and have attended meetings and sectional meetings until Thursday.

This conference of the Home-making teachers is one of the six held in the state of Texas this year and it replaces the former two annual conferences held in San Antonio and Dallas. The reason for having six conferences instead of two is the national shortage of rubber, and the state department of public education was trying to save tires for the teachers as well as trying to keep transportation problems at a minimum.

Teachers led their own discussion groups, and tried to solve their own problems. The Tech Home Economics faculty were used as advisers. Ester Stevenson, superintendent of Homemaking Area 2, was in charge of the conference. Ella Mae Lyle, assistant professor of Home Economics education, was in charge of publicity.

The purpose of the conferences was to plan the next year for a large crowd of homemaking teachers and to help solve the problems that confronted the teachers of home economics in schools of different sorts.

Tuesday afternoon at 4:15 the Home Economics building was open to the teachers for inspection, and at the same time a tea was given in the Home Management house for the visiting teachers.

A canteen supper was given the conference Tuesday night in aggie grove and a canteen service followed the supper. The canteen supper was a supper for a large crowd of refugees that is easily prepared and served. The object of this supper was to show the visiting teachers how to feed a large crowd easily and yet give the people all of their vitamins.

New ROTC Unit Is Formed For Eighteenth Session

A new ROTC unit will be established at Texas Technological college this fall, according to a report received by President Clifford B. Jones, from the War Department.

This new unit will be a signal corps unit and will not interfere with the other ROTC units now on Texas Tech campus.

However, President Jones expects the unofficial ROTC unit to become official before the year is over.

The signal corps unit will be for all men in the college regardless of their divisions, if they can qualify.

Obstacle Course Being Built To Train Techsans

A 110-yard obstacle course is now under construction by ROTC students and CPT flyers. To be a permanent part of the college facilities upon completion, the course will be available to the physical education department.

Located west of Tech stadium and north of the gymnasium, the course will be made in five lanes, each four feet wide and containing the eight obstacles for the course runner to clear. According to ROTC officers in charge of construction, the runner will have to use every muscle in his body in crossing the obstacles.

First barrier to be crossed is a two and one-half foot fence to hurdle, next comes a four foot fence with water, this is a zig-zag balancing run and jacobs ladder, a ten foot wall with cross bars eight inches. The runner must climb up this wall and then down it, without jumping. The last obstacle in the course is a six foot ditch which the runner must jump.

To be completed by the end of this week, students will begin running the barriers early next week. While the ROTC department and CPT students will be trained to teach the course in groups. The physical education students will probably stress the individual speed.

Tech Department Prepares Briefs

Gov. Coke R. Stevenson has asked Texas Tech to file a brief opposing the complicated eastern concentration of garment manufacturing, both civilian and under garment contracts.

The department of Economics and Business Administration is preparing the brief which will be filed in protest of this movement.

This brief will be supported by statements from power companies, warehouses an labor officials evidencing the facilities in Texas to continue the present large garment manufacturing in this state.

Dormitory Reservation For Fall Semester To Be Made Before Registration

Reservations may now be made in the dormitories for the fall semester, according to Miss Mozelle Craddock. Both boys dorms will be open to male students, and the buildings have been cleaned or will be cleaned, thoroughly before the fall semester opens.

Girls Dorm No. 1 is being repainted from "top to bottom." The other girls dorm will be cleaned also, before the beginning of school this fall.

All students who wish rooms should make their reservations immediately. This can either be done directly or through the mail with a five dollar deposit.

Honoring Freshman and Transfer students, the Home Economics Club will begin the new year with a "Howdy Picnic." All girls interested in the Home Economics club will be invited to this picnic which will be held on the lawn of the Home Economics building on September 22.

The club is planning to include worthwhile defense activities in their program of work for the year. The officers for the next year, who were elected last spring are: President, Doris Nell Tippitt; Vice-President, Opa Thacker; Secretary, Miriam Meading; Treasurer, Ina Niell.

Eighty-five per cent of the 422 new full-time students who were examined upon entrance at Wayne university this semester have been "Class A" ratings in physical exams recently completed.

One of the most important applications of vitamin knowledge will be the study of cancer, a University of Texas biochemist believes.

Twenty-eight lecturers from other schools all over the nation will join the University of Wisconsin summer session staff.

Placement Bureau Finds More Jobs For Tech Grads

Seventy-Two Have Taken Jobs Through Service This Year

THE TEXAS Technological college teacher placement bureau has found jobs for twenty more teachers. This brings the total number of teachers to be employed through the placement bureau this summer to 72.

Dr. Doyle D. Jackson is in charge of the bureau and is assisted by only one helper, his secretary, Ann Duff. This year there has been a serious shortage of teachers and it is becoming more acute all the time. For a while there was a shortage of only a few different kinds of teachers but now the shortage of only a few different way through the entire teaching profession.

Teachers are leaving the profession to go into war work, and their schools are having a hard time replacing teachers lost to the draft and to the different war industries, according to Dr. Jackson.

Mrs. Lily S. Hubbert of Lubbock with no degree has been elected to teach primary grades and art at Eula, Elizabeth Musick of Lubbock, June, 1942 graduate, has been elected to teach music in the third to seventh grades at Andrews, Texas. Dorothy Baker of Lubbock, June 1942 graduate, has been elected to teach music through the eighth grade at Ropesville. O'Veal Warren of Tahoka, 1941 graduate, has been elected to teach in the grades at Idalou. Eula Lee Peters of Wellington, 1933 grad, has been elected to teach English and penmanship in the middle grades at Rube. O. M. Stewart of Lubbock, M. A. degree, 1935, is to be elementary principal at Hereford. Mrs. Artie Bene Carroll of Lubbock, 1941 graduate, has been elected to teach the first grade at Spur. Thelma Meyers, 1940 grad, has been elected to teach high school commercial work at Morse. Jayce Holden, 1937 graduate, has been elected to teach sixth and seventh grades and act as principal at Lehman.

Mary Clare Barnett of Lubbock, June 1942 graduate, is to teach junior and senior English at Paducah. Gladys Schantz of Lubbock, 1938 graduate, has been elected to teach Spanish in senior high school at San Angelo. Elwanda Allen of Snyder, August 1942 graduate, is to teach physical education for women and history in high school at Spade. Mrs. Rosemary Patterson of Lubbock, June 1942 graduate, has been elected to teach English in high school at Rosevelt consolidated rural school in Lubbock county. Pauline Travis of Lubbock, 1940 graduate, has been elected to teach high school Spanish and English at Memphis. Hardy Masters of Lubbock is to teach high school mathematics at Superior, Wyoming. She is an August 1942 graduate. Hazel Louise Bryant of Ralls, June, 1942 graduate, was elected to teach home economics in high school at Mentone.

Foster hall is to be the name of the new girls' dormitory at Texas Christian university, which is nearing completion.

Richard Crooks Feature Of Years Artist Course

RICHARD Crooks, the leading tenor of the Metropolitan Opera, will appear at Tech sometime in the February, in the highlight of the 1942-43 Artist Course. Crooks has for years been the most widely renowned singer in the world. Discovered by Leona Geyer, the famous German contralto, who predicted great things for him, Crooks studied long and hard in Europe and made his debut in the Hamburg Opera. He then sang in the same roles at the State Opera in Berlin. German critics have called him "a new star in the operatic firmament."

But Crooks' appearance at Tech is only one of the many great attractions that are in store for the student body during the coming year. This "Artist Course year" is due to be the greatest and best Lubbock and Texas Tech have ever seen. This string of programs has been arranged by the Artist Course committee, which is headed by Prof. R. A. Mills.

Albert Spalding, the world-famous violinist, will be presented in the year. Spalding learned to play the violin when he was seven years of age and was taught by Chittl, the famous Florentine master. Buitrago in New York; and LeFor in Paris. He was graduated from the Bologna Conservatory of Music at 14 years of age and received the highest honors ever accorded anyone since Mozart.

Spalding is today one of the most popular of the world-famous violinists and plays every season from 80 to 90 concerts in the United States, besides an average of about fifty concerts a season in South America, and, before the war, in Australia and Europe.

Paul Draper, brilliant tap dancer, and Larry Adler, harmonica virtuoso, are slated for a point concert. The two young American artists brought their fresh new gifts to New York for the first time this season. This is their first tour, and from their initial concert they have been hailed as one of the happiest ideas in the entertainment field. Draper, the tap dancer with the extraordinary ballet technique, and Adler, the harmoniconist who appeared with the nation's symphonic orchestras, will appear here in a program that ranges from the popular to the classic, to music of George Ger-shwin and Scarlatti, Irving Berlin, and Bach.

Dates for the appearances of the stars are: Louis Adler and Paul Draper, October 19; Mona Panlee, Soprano, November 12; Richard Crooks, March 5; Albert Spalding, April 4.

Crowded Year Will Await All Techsans

Student Special To Houston Seen For Tech-Rice Fracas

CLASSES being Friday, September 18, for the Eighteenth annual session of Texas Technological college, which promise to be one of the most crowded in years in the short history of Tech. With pre-registration beginning Saturday, September 12, between 2500 and 3000 will begin their payment of fees for Tech's first war-time school year.

According to the college calendar, the dormitories will not be opened until September 15, the first meal to be served at noon. Registration for the fall semester will be held Wednesday and Thursday, September 16 and 17.

With a full year already scheduled, Techsans may look forward to an interesting year despite war-time curtailments and priorities. The first football game September 26, when Dell Morgan's Red Raiders challenge the West Texas Buffaloes from Canyon at Tech stadium will mark the initial fracas in a ten-game schedule of six games to be played at Lubbock.

The Raiders journey to College Station the next week to play the defending champions of the Southwest conference, A & M's highly touted Aggies who are doped to repeat in the conference pennant race. Returning to Lubbock the next week for a two game stand, the Raiders will meet Oklahoma A & M October 10 and Baylor's Golden Bears October 17 in their own backyard. October 17 will be Parent's Day when Techsan parents will invade the campus for the annual reception.

The next two games find the Morgannmen vacating Lubbock for a crack at the Lobos of New Mexico U. October 24, and thence to Houston to tangle with the Owls in Rice Institute. Techsans formulated for a student special train to Houston to see this Hal-loween fracas, which should be the most closely contested game of the season.

The next week finds the traditional bon-fire burning as the Raiders prepare for a homecoming contest with the Frogged Frogs from TCU. To meet Coach Meyer's boys November 7, in what should be the climax of the season, Tech's Red Raiders will be aiming for this game the whole season. Having played the Frogs six times in previous years, the Raiders have emerged victorious only once. In 1936, the Techsans upset Sammy Baugh and pre-season dope to blast the Frogs 7-0, setting the victory bells to ringing all through the night.

The following Saturday will find the Raiders in Omaha, to battle last year's homecoming victims, Creighton university's Bluejays. They will return to Lubbock for the last home game of the season with the Baptists of Hardin-Simmons and will wind up the season with Arizona university of Tucson in what should be the deciding factor for the Border conference pennant.

But football is not all that has been scheduled for returning Techsans, freshmen for instance, the traditional "Howdy" dances will again be sponsored by the Women's Inter-Club council. Lubbock churches will sponsor a Sunday of special sermons for Tech students September 20, and will hold an open house for Techsans the following Monday, November 30. Tuesday, December 4, will find Tech students wending their ways home for Christmas vacation and they will not be back in class until January 4, 1943 to begin preparations to eth the school year tradition, that of offering final examinations at the termination of each semester.

The fall term's Nemesis begin January 22, when Techsans will regret the nights spent on dates and begin to wish that the notes take nin class had more of the context of the prof's lecture and less caricatures of the adored ones.

To end January 28, when those lethal exams retreat into obscurity for another four and one-half months, returning Techsans will have ended another semester with but one charring thought in their mind, that of Techsans who were unable to enjoy the privileges of attending school the past semester due to the tantrums of the little slant eyes across the pond.

Dr. K. C. Leebrock, president of Kent State university, has accepted an invitation extended by Gov. John W. Bricker to serve on the Ohio War Historical commission. Iowa State college spring quarter, 21 per cent from the 1941 spring quarter.

A nutrition course for house-mothers or proprietors of societies and boarding houses has been inaugurated at the University of California.

THE TOREADOR

THE TOREADOR, student newspaper of Texas Technological College, is published once a week during the summer months on Friday by the students of the Journalism department.

"Campus Scandal" Unveiled By Collier Editorialists

EIGHTY-TWO per cent of U. S. colleges do not require a course in U. S. History for graduation according to the "Campus Scandal" uncovered by the July 25th issue of Colliers in a recent survey by the New York Times. To quote further, Colliers says, "72 per cent of these institutions require no high school study of U. S. history for admission."

This national weekly magazine seems to think that the omission of U. S. history in college's required curricula is a crime that can be justified only by a complete reversal and require every college student to study U. S. history. Claiming that a complete knowledge of history is necessary to an education, they have failed to consider the fact that students ordinarily study American history about three times before entering college and that a further course in the same subject is beneficial only to those who specialize in that field.

From the time a child enters the second grade, the deeds of Lincoln and Washington are drilled into him every year in some course or the other and he gets a complete course in U. S. history in the fourth grade, again in the seventh, and again in his junior or senior year in high school. In Texas, the child gets a further history of Texas in the sixth grade, which necessarily includes highlights of U. S. history.

Summing this up, a Texas student has three or four different courses in American history prior to enrollment in a university, yet Colliers say that we need another course. While it is true that we can not review a course in as intellectual a manner while in the fourth grade as we can as college students, it is also true that we can remember what we learned more indefinitely. Feats performed by American patriots at Lexington and Bull Run have been indelibly transplanted in the minds of students.

The battle of Bunker Hill and the details of the Boston Tea party are a second nature to students by the time they reach college and any further study could only be a boring and tedious class to all who do not plan to go deeper into history than is necessary for a broad-minded view on national affairs. The "Campus Scandal" uncovered by the New York Times and publicized by Colliers is nothing more than idle gossip that would have been better had it been left unsaid.

Parker Predicts Red Raider Victories

By BILL PARKER
Special To The Toreador

WELL now, Doctor Quiz, what about the 1942 Texas Tech Red Raiders who start fall practice on September 5. Come, come—you have eight seconds to predict the future of the Red Raiders. What's that? Correct Dr. Quiz—absolutely correct—Texas Tech will be a winning team.

It doesn't matter that the ten-game schedule is the toughest in Texas Tech's 17-year football history. It doesn't matter that the 1942 Tech squad will be the smallest in number of years. There's no use to shiver with fright just because the Red Raiders are scheduled to play the Texas A. and M. Aggies, the Baylor Bears, the Texas Christian Horned Frogs, the Rice Institute Owls and several other strong teams because the Techs will be able to take care of themselves regardless of how stubborn the competition may be. Coach Del Morgan doesn't claim he is going to have a world beater this coming season, but Mr. Morgan will tell you that the Raiders are going to play a lot of powerful football. Some of the Red Raiders who hold first mortgages on starting

positions include J. R. Callahan, the blistering triple-threat left halfback; Don Austin, the speedy curve-running right halfback, and Kenneth "Cocky" Robbins the signal barking and blocking demon. With these three men in the backfield and paired with either Peter Blanda or Walter Schlinkman in the fullback slot, the Raiders will boast a versatile backfield that will give the Aggies, Horned Frogs, and Owls plenty of misery. To shield these gifted backs, Coach Morgan has a stalwart front wall that looks plenty potent on the dope sheet and probably will be just that on the field of battle. Pre-season planning puts Harold Crossen and Vernon Ray on the wings. Both are fast, reliable pass catchers and strong defensive men. The tackle berths probably will go to "Buck" Glienwater and a blond blizzard of See PARKER, Page 5

Let Us AGAIN Say
"Welcome Home, Techsans!"

It has been a distinct pleasure on our part to serve you in your every party need in the past and it will give us the same pleasure to help you plan all your socials this coming year! It is a pleasure we look forward to in welcoming you again, Back to Lubbock and to TEXAS TECH.

For All Your Social Highlights

HOME SICK?

Cheer up!—it's only a short time until school opens! it has been an old custom of ours to WELCOME you back to the campus again for another school year... it is a custom that has been in vogue for years and this year we are especially anxious to be the first to welcome you back....

"See You at the Bookstore"

Yes, "see you at the bookstore".... it's a phrase as collegiate as the campus itself.... students have been saying it for a long time and there really must be something to it when all the SENIORS say it, the JUNIORS say it—and even the FROSH are catching on.... it has been almost a by-word of the campus for years an—

There's A Real Reason

The real reason is that all the students like to meet the gang at the Bookstore to talk over nearly every event that has gone on or that they expect to take place in the near future... they like to meet at the bookstore because they know that they will be treated right, given the best service and the best attention....

Well--- O. K., Then...

As has been the custom in the past, as all the students have said before.... "WELL—O. K. THEN.... SEE YOU AT THE

TEXAS TECH COLLEGE BOOKSTORE

"On the Campus"

Raiders Prepare For Tough Schedule

WITH kick-off time only a few weeks in the offing, some thirty-two "rough-and-ready" Red Raiders, scattered throughout Texas and neighboring states are preparing to return to Texas Tech and the toughest schedule in the history of Tech football facing them. These mighty men of Texas Tech are holding down various jobs to condition themselves for the initial practice on September 5. Beginning on this day Coach Dell Morgan will begin preparing the Raiders for such opponents as Texas A & M, Baylor, Rice, and Texas Christian. These are only four names in the 10-game schedule that brings the Morgannen face to face with some of the finest football teams in the nation.

Leading the parade of returning lettermen coming back to school will Co-captain Kenneth "Cocky" Robbins, quarterback. Robbins served as reserve quarterback last season, but played in all the nine games. Barring injuries, he is slated to be the first-string signal caller this season. Driving the Red Raiders to several touchdowns the past year he is slated to have his best season during the 1942 campaign. Robbins is a Petroleum Engineering student, a senior, is now enrolled in Summer School. Cocky is enrolled also in the Naval Reserve.

Will Albright, the jack-of-all-positions, who played at guard, in the backfield, and at center last season; Robbins running-mate in that he is the other '42 co-captain. He is slated to be seen regularly at the right guard slot at kick-off time during the coming season. Exceptionally fast, and possessing a love for battle, Albright stands some six feet tall, tips the scales at 195, and is posted to become one of the top-flight guards in Southwestern football during 1942. "Joe" is a senior physical education major and will go into the armed forces as a pilot at the end of the coming season. Joe has been employed by the Cogburn Drilling Company this summer, and has been working at Loco Hills, New Mexico.

Doyle Caraway senior left guard, weighs 180 and is 5' 9" tall, possesses a "football heart", and promises to remove any worries that Coach Dell Morgan may have about filling the left guard post. After two good years with the Raiders Caraway is looking forward to the coming season that promises to be the best one he has had since beginning his athletic career in Tech. His home town is Sherman, where he was a star in high school, and he is enlisted in the Marine Reserve. He has been working at the Lubbock Air Base.

Tech's hopes for power in the air rest upon J. R. Callahan, who finished last season with 25 completions against 58 attempts. Callahan is a junior, 5 feet eleven inches tall and weighs 190. He is enlisted in the Marine Reserve. He has been employed by George P. Livermore, working in Sundown, this summer.

The "whirling dervish" as well as the speed merchant, of the Texas Tech squad is Don B. "Donald Duck" Austin. Relying on a twisting spin, and amazing speed that make him a difficult target for a would-be tackler to hit, Austin carries the Red Raider's threat of broken field running into the fray with him. Though small, weighing only 161 and being some 5 feet eleven inches tall, Austin relies chiefly upon his amazing speed to "whittle the big boys down to his size." Austin is a senior, will probably be the starting right half for Coach Morgan, and being in the Naval Reserve will not be called until graduation. He has been working in Sundown the past few months.

At the present time employed by the American Airway of Dallas, Harold Crossen is expected to be a trouble maker for Tech opponents, starting September 26 with West Texas State, and continuing through November 26 and Arizona U. Crossen saw little action last season, but during that time he proved himself to be fully capable of handling his opposition, both offensively and defensively. He is a candidate for the right end position, and is a junior.

Vernon Ray, a product of Hughes Spring High school down in the tall timber, almost outgrew the trees there. He is six feet and

two inches tall and weighs 195 pounds. At the present time he appears to be the most likely contestant for the left end slot. He is an aggressive player and excels in speed, blocking, tackling, and shows an uncanny ability to handle passes. He has been getting in condition for the '42 campaign with the Holland Construction Company at East Bernard.

With the loss of Newman Ledbetter and Jack Shanks at the tackle positions, some 210 pounds of power may fill the post of right tackle. Facing E. W. "Buck" Gilenwater is the job of filling Jack Shanks big shoes, which is quite a job. Buck didn't see much action last season but was the stand-out tackle during the spring training grind. Now employed by Pantex, and working in Amarillo, Gilenwater is preparing to pass out a few headaches to opponents during the coming season.

Due to be one of the first two centers on the Red Raider squad is Garland Head, the Clovis, New Mexico, 6 feet two inch, 190 pivot man. Head saw little action last season but is due to see action very frequently this season. He is also employed by George P. Livermore and is working in Sundown. Expected to blossom into one of

the greatest ball carriers in Red Raider history this season, Maxey McKnight brings his 192 pounds of muscle and brawn back to Tech on September 5, with a summers work on the highway behind him. McKnight, though playing little, gained a lot of experience last season, and promises to be one of Tech's big guns in the 1942 fall offensive.

Peter Paul Blanda, known better as Pete, returning for his last year at Tech, is looking forward to the best year in his Tech football career. Pete saw little action the past season, but being a stout runner, fast and a fine passer, will no doubt see plenty of action this season. Plus this he is also one of the best punters on the Tech squad. Hailing from Youngwood, Pennsylvania, Blanda has been in Lubbock this summer working at the Lubbock Air Base.

Looming as the regular left tackle for the coming season is Al-

bert Williams, big rough, fighting Raider. A star at Childress, Williams is ticketed to become an even greater one at Tech. Loving the game more, the harder and rougher it gets, Williams turns in his best performance against stiff competition.

Billy Hale played in most of the games last year and was the second string center. He turned in several fine performances and is posted to be the regular center for the coming year. In the Wake Forest game last year Hale scored his only touchdown by snatching a Wake Forest pass and racing thirty-five yards to cross the double stripe. Hale has spent the summer in El Paso, where he has been working at Fort Bliss.

Jimmy Jay is the probable alternating guard for the Raiders. Last season he played both right and left guard and will probably do so again this year.

Parker

Continued From Page 2

Seasoned timber, tried and true, will be at the guard slots in Captain Will Albright and Doyle Caraway, a couple of guys who should be among the best of Southwestern guards.

How will the Red Raiders come out in their ten games:

- To beat West Texas State.
- A toss-up against the Texas A. and M. Aggies.
- To beat the Oklahoma A. and M. Aggies.
- To beat the Baylor Golden Bears.
- To beat New Mexico University in a close game.
- To beat Rice in their greatest performance of the season.
- Toss-up on Texas Christian.
- To beat Creighton.
- To beat Hardin-Simmons.
- To nose out Arizona University.

WELCOME Back To Lubbock And Texas Tech

Homesick?

of course you are....you really do want to get back to your school, your home and all that the old school stands for....the carefree days that you enjoy so much, just going to school and being with your fellow students....it may be a lot different this year on account of the war, but we know that TEXAS TECH will never lose that old spirit that has built it into what it is today—you are a vital part of that spirit, so naturally you are wanting to get back "Home".....

Of Course!

We are going to be one of the first to welcome you back, for we have missed you this summer and really are looking forward to seeing you around again....you see, we too Love Texas Tech and what the school stands for. We have always tried to make our store a vital part of your campus life—so—

Welcome Back

We know that you will always remember the days you have spent with us, those hours you have been in our store, we know that you will never forget them and so we are welcoming you back in the grandest fashion that we know, hoping that you will spend a lot more of those hours with us this coming year....

We're "Kicking-off" again

and looking forward to another brilliant and outstanding college year at Texas Tech

Getting a little "homesick" for school? . . . so are we . . . we really miss all the gay excitement that goes with the long term's activities . . . we miss our many college friends who have a habit of dropping in for a bull session . . . we miss all the pretty co-eds . . . and we miss the traditional green caps and the freshman antics that go with them.

We are certainly glad that "it won't be long now" and wanted to take this opportunity, in this The Homesick Edition of the Toreador, to express our homesickness" and urge you to hurry "Home".
