

Twenty-One Tech Students Nominated For Who's Who Noted Speaker Appears Here Next Week

Selections Have Been Made Seven Straight Years

Absence Of Juniors
On List Is Unusual;
One Lone Holdover

NOMINATIONS for twenty students for the "Who's Who of American Colleges and Universities" were made by a point committee of faculty members and students this week.

Students were judged on the basis of character, outstanding work on the campus, and potentialities for success. Twenty students were selected with discriminations from a large number of names turned in to the committee by selected persons on the campus.

Each year since the establishment of "Who's Who in American Colleges and Universities" at the University of Alabama in 1924, Tech has been represented in the publication.

These outstanding students were selected from the junior and senior Techs who seem to be most worthy of the honor because of their service to Tech.

P. B. Shannon Jr., Levelland, is a senior Government major with a grade point average of 2.30. He is a member of the Saddle Tramps, Silver Key fraternity, Latin club in 1940-41, International Relations Club, Pi Sigma Alpha, Debate club, Pre-Law club, and Alpha Chi. Shannon is now president of the Student Council, president of the Pre-Law club and the Debate club. He holds the office of vice-president of Alpha Chi. From 1939 until 1942 he was a member of the International Intercollegiate Debate team.

Kenneth W. "Rocky" Robbins, Dallas, holds a 1.87 grade average in his senior year as a Petroleum Engineering major. Robbins is a member of the Double T association, Sigma Gamma Epsilon, Petroleum Engineering Society, and Engineering Society. The honor of being manager of the 1943 Engineers' Show was bestowed upon him by his classmates, and he was elected co-captain of the football team by Tech's Red Raiders. Robbins is now president of the Sec. for class and president of the Double T Association. Last year he was president of the Junior class.

Frances Gary, Ft. Worth, is a senior Spanish major and has a grade point average of 2.47. During the past year, Miss Gary has been Junior Council president, Ko Shari president, Forum president, and secretary of Alpha Chi. She is a member of Forum, Capa y Espada, Alpha Chi, Junior Council, Ko Shari, Women's Inter-Club Council, Foreign Language club, and the Artist Course committee. Miss Gary was honored in the Recognition ceremony. See WHO'S WHO, Page 4.

Block And Bridle Will Hold Annual Steak Fry Monday

The Block and Bridle, animal husbandry club, will have its annual steak fry Monday from 5:45 to 8:45 p. m. in Aggie Grove.

This annual affair was changed from the spring, as has been the custom, to the fall, so that the boys leaving school to join the armed forces might attend.

The steak fry is in honor of Block and Bridle pledges and their dates. All members, pledges, a few of the alumni and the animal husbandry faculty are invited.

Block and Bridle fall semester officers are: Delbert Devin, president; Edwin Dawson, secretary; Mac Brandon, vice-president; Otis Levens, treasurer; Herbert Flowers, reporter; Jar Wilson, parliamentarian; Richard Turnbough, rodeo manager and Prof. R. C. Mowery, sponsor.

World Federation Is Debate Topic

Permanent World Federation was the topic of discussion in open forum at the meeting of the Debate club Tuesday night. Betty O'Mara led the following members of the club in this round table discussion: Edith Poole, Helen Wells, Glenn Ivy, and Jane Pegues.

Looking ahead these students foresee difficulties that will arise after this war in maintaining a world peace. Representative of the youth of America were these students who discussed the advisability of adopting a permanent World Federation and a "just, equitable and permanent peace," as Henry A. Wallace, vice-president of the United States, advises.

A question brought before the debaters was, "Is our government perfect enough to be set up as an example before the Chinese and Japanese people who must be re-educated in the ways of the civilized world, after this war?"

Officers of the club are: P. B. Shannon, president; Betty O'Mara, vice-president; and Evelyn Cooper, secretary and treasurer.

Volume XVII TEXAS TECHNOLOGICAL COLLEGE, LUBBOCK, SATURDAY, OCTOBER 31, 1942 Number 13

Techs Continue To Search For Patriotic, Insured Steeple-Jack

No flag, Nope, no flag. Evidently somebody is passing the buck. Any way Navy day came and went without a flag at Tech as Tech. What's to be done?

Home-coming is near at hand and still no flag. No doubt the Tech Exes will shake their heads and mutter, "What's this younger generation coming to?" when they glance at the flag pole from habit and are shocked by not seeing a flag instead of being comforted and reassured by its unfurled colors and symbolism.

It is bad to have people Tsk Tsk over you, so if there is a student with more brawn than brains, see if an uncle that was once a professional pole climber or a cousin who helped build the Brooklyn bridge can be induced to come rescue a seemingly helpless student body from an embarrassing plight.

Two Films To Be Shown Monday In Patriotic Series

Former Professor
T. C. Root Will Be
Program Lecturer

"Safeguarding Military Information" and "Western Front" are the films that will be shown Monday night at 8 o'clock in the Chemistry auditorium.

This is the second of a series of war films which are educational as well as entertaining. Lt. T. C. Root will give the address. The public is invited.

"Western Front" is a picture of China's plight and heroic fight. It emphasizes with reality the role that China continues to play as one of the united Nations. The desperate brutality of Japan's destruction in China is shown. Against great obstacles China continues her fight and the people of the United States are not conscious of the importance of holding China as a fighting ally. The picture stresses the desperate needs of the Chinese people, although it makes no direct appeal for contributions. It was originally released by United China Relief, Inc., in connection with their 1942 campaign for funds for China.

"Safeguarding Military Information" stresses the importance of secrecy on the part of military personnel and workers engaged in defense activities, and shows the results of careless talk, dramatic scenes of ship explosion, sabotage, and disastrous events resulting from thoughtless revelation for information to the enemy. This show is not being given throughout the country.

Alpha Phi Omega Schedules Plans

Alpha Phi Omega has made tentative plans for the fall semester in continuing their work as campus guides when the occasion arises with need of them. They are planning to work on the project of the Red Cross Blood bank which is to be started on the Tech campus.

The club has made tentative plans to assist generally with the defense show programs which are being sponsored on Monday nights for the next twenty weeks by the college. APO is to fix the "No Smoking" signs for the gymnasium to be used during basket ball season next spring.

Coach Nichols is to show the pictures of the Texas Tech-Baylor game at the club meeting next Thursday, November 5, in Room 229 of the Administration building at 7:15 p. m. There is to be a short business meeting for members and a pledge service for the fall pledges.

Capt. Clark To Be Here Nov. 9

Capt. John L. Clark and a Marine Recruiting party will return to Lubbock Monday, Nov. 9, to consider applicants who wish to enlist in the Marine Corps Reserve.

Capt. Clark will be in Room 217 of the Lubbock Post Office to interview all applicants.

Young men who desire to apply for enlistment should see Sgt. Goode of the Marine Recruiting office in Room 217 of the Post Office at once so they may get instructions and have all the required papers before Nov. 9.

"Theatres Of War" To Be Discussed By Eve Curie

EVE CURIE

Opera Singer Is Slated For Stand

Three Stars Appear
On Artist Program

November 12 will mark the second and final artist course of the semester.

The program features three nationally known figures: Virginia Morley and Livingston Gearhart, duo-pianists and Mona Paulee, metropolitan star.

The American duo pianists first gained recognition abroad. They met and decided to combine their talents when both were attending the Fontainebleau Conservatory. When the outbreak of the war brought them back to their own country, they were forced to cancel an impressive list of European engagements. Both members of the duo have extensive musical backgrounds and have won the highest honors in piano and composition.

Mona Paulee, who will make her debut at the Metropolitan Opera next season, has gained recognition only through the aspects of her talent. Her first public appearance was made in an amateur contest in a small Portland theatre. Since that time Mona's voice has aroused the admiration of more than a few of the musically wise. She has won numerous contests and at the present she is preparing roles for her coveted debut.

Matador And ROTC Bands Combine To Welcome All Homecomers At Half-Time

Former Tech students and T. C. U. delegates are to be officially recognized by Tech band and Military band between halves at the Tech-T. C. U. game.

"Hello Exes" is to be spelled out with the Matador band spelling "Hello" and the Military taking the "Exes." They collaborate again and spell "T. C. U. Frogs" with the Military making the first, and the Tech band executing "Frogs." While in the latter formation, both bands will play the T. C. U. fight song.

War Blasts Annual Parade As Homecoming Plans Shape-up

THE 1943 HOMECOMING parade will proceed according to tradition but will lack many of the colorful floats which have graced it in previous years.

Due to the world crisis and the scarcity of many materials, various campus organizations voted to do away with the annual floats and to have their representatives march in the parade or represent the club in some other manner that will not involve the use of materials needed for the war effort.

All participants in the parade are to gather at 10:30 on Ave. Q at Broadway and the parade will proceed from there down Broadway to the Tech circle where there will be a general Convocation from 11 until 12. The ROTC unit will march in the parade and the Matador band has expressed its willingness to participate in the parade if the necessary arrangements can be completed.

Deadline Lifted For Enlistment In Navy Reserve

Enlistee's Status
Is Unchanged; Unit
Still Short Of Goal

FORMER DEADLINE of November 1, 1942 has been lifted with regards to enlistment of applicants in V-1 and V-7, United States Naval Reserve.

This statement was received by Dr. H. L. Kent, director of naval reserve at Tech, last week in answer to his inquiry of the time allowed for enlistment. Although this statement, issued by H. P. McBride, Lieut. officer in charge of a trip around the world in January, and in her lecture here will report on international developments as she observed them first hand. Her first stop was in Bathurst, Gambia, on the west coast of Africa. She also visited Egypt, Russia, Syria, China, Burma, and the Philippines.

At the outbreak of hostilities in 1939, Eve Curie voluntarily enlisted for war work and became a coordinator of the war activities of French women at the Ministry of Information in Paris. After the French capitulation, she chose to go to work in London at the side of the British and the Free French who went on fighting.

After living in London for six months, witnessing the blitzkrieg, she came in January of 1941 to America for her third American lecture tour. She came out as an ardent supporter of the "aid to Britain" policy, and as a faithful friend of the Free French Movement of General de Gaulle.

Eve Curie was born in Paris, December 6, 1904. She was graduated at the Sevigne College, and speaks French, Polish and English. Actively interested in music, Eve Curie devoted several years to the study of the piano. She became a virtuoso and gave her first concert in 1925 in Paris; since then she has given several concerts in Paris, in the French provinces and in Belgium.

Today Eve Curie ranks among the great war correspondents of World War II. Her recent dispatches from the Libyan front on the war in the desert, her stories of the heroic efforts of the Russians to drive out the Nazis, and her meeting with the Shah of Persia in his fabulous palace at Teheran, her trip over the fabled Burma Road, her visit to bomb-torn Chungking, her many other accounts of the fighting in the Far East have added her name to the list of the foremost writers of our time.

Reserved seats, which include the best of the middle section downstairs, are \$1.00. A reserved section, which consists of seats to either side of the reserved seats, and including the first four rows of the balcony, are \$.75. All other seats are \$.50. Reserved seats may be obtained by calling Miss Jonnie McCreery in the Home Economics building. The \$.75 and \$.50 tickets will be on sale in the following places from Saturday morning, October 31, until noon, November 7: Registrar's office, Dean Leight's office in the aggie building, Dean Adams' office in the engineering building, Mrs. Louise C. Allen's office in the Journalism building and in Dean Weeks' office in the Home Economics building. All seats will be on sale at the Hilton Hotel from 11:30 a. m. until 3 p. m. from Saturday, October 31 through Saturday, November 7.

Kappa Kappa Psi Installs Pledges In Monday Meet

Kappa Kappa Psi, honorary fraternity for men band members, at its regular meeting Monday at 8 p. m. in the band hall, held formal installation of pledges for the coming year.

Those qualifying to be pledges are Mert Starnes, Charles Wiley, Bob Wiley, Claude Burrows, Donald Kleinschmidt, Robert Lowery, Douglas Mays, John James Haynie, and Wayne Hughes.

This organization publishes a weekly paper for the benefit of the band members containing news pertinent only to the band, its activities, and personals about its members. A copy is mailed to the other chapters in this district. Tommy Thomas is the editor, and the name is CODA taken from a musical term meaning supplement or addition at the end of a number.

Activities of the society so far include a reception and mixer for all band members and a smoker for the men members. Plans are being made for a banquet to honor former members at home-coming.

The officers of Kappa Kappa Psi for this year are: Woodard McDowell, president; James W. Williams III, vice-president; Loyd Jenkins, secretary; Charles Senning, treasurer; George Mays, sergeant-at-arms; and Lowery Wallace, parliamentarian.

John L. Stoddard was an American traveler and author for twenty years. He devoted his entire time to lecturing in the United States on travel subjects. After retiring he published among others this group of travel lectures. They concern almost every country in the world. Tech students will be allowed to read these at their convenience as soon as cataloging is completed.

Intimate Problems Of Youth Discussed

"Men-Women Relationships" Will Be Subject Of Lecture In Gymnasium

MRS. GRACE Sloan Overton, New York author and lecturer on youth and family living, will speak in Lubbock, November 2, 3 and 4.

The Hogg Foundation of the University of Texas is paying the expenses from New York to Tech and other Texas colleges.

A. J. Balm, Tech professor of social sciences, is in charge of local arrangements.

Mrs. Overton has proved to be an interesting speaker throughout the United States. She is able to win the admiration of her audience by her philosophy of dealing with the problems of youth in a frank, and down-to-earth manner. She is an expert in marriage preparation, youth counselling, personality adjustment and preparation for family relations.

She is the author of "Love, Marriage, and Parenthood," "This Business of Living," "The Home in a Changing Culture," "Youth in Quest," and various other books of a similar nature.

She is the author of "Love, Marriage, and Parenthood," "This Business of Living," "The Home in a Changing Culture," "Youth in Quest," and various other books of a similar nature.

The public is invited to attend all lectures. Students are expected to be interested in all but the Monday afternoon program.

Several instructors have made arrangements for their entire classes to be present at some of the given schedule. Others are invited to do so.

Mrs. Overton has been a lecturer and teacher at Missouri Wesleyan college, Chicago Training school, Columbia university and New York university.

The above arrangements are tentative and Mrs. Overton may consent to speak at other times also.

Picture Contest Is Announced By La Ventana Heads

La Ventana is announcing a snapshot contest among students for the purpose of obtaining pictures for the annual's feature section: Cash awards of \$7.50, \$5, and \$2.50 will be given for the best photos of campus life submitted to La Ventana before December 15. The yearbook staff will judge the pictures.

Any student may turn in photos taken with any type of camera. After the most suitable pictures have been chosen, the negatives must be submitted before the photos can be used in the annual.

There is no limit as to the number of pictures a student may enter in the contest.

Due to an early deadline set for the annual this year, staff photographers will not have sufficient time to secure the large variety of pictures for the feature section without the aid of students. All clear pictures entered in the contest will be published in La Ventana provided they are of general interest and depict some phase of college life.

Bill Barnett Associate Editor

The Annual Parade Is Not Essential To Festivities

A POOR excuse is better than none at all... Working on this badge, students continue to prepare for a modified parade Homecoming day, only one week hence. With financial limitations being set at ten dollars per float, the color of parades of former years will be forgotten.

Texas Tech is a young school, and its traditions are young and are not yet well established. The school can ill afford to endanger any of these traditions by allowing them to be postponed because of a mere war.

Yet, doesn't it seem plausible that a poor showing is apt to leave far more distaste in the mouth of our exes than to merely explain that Tech was going all out for a war. There are exceptions to all rules, and we believe this to be just that. Should our parade amount to the mere waste of gas and shoe leather rather than an elaborate display of festivities, we believe that postponement would better serve to continue the Homecoming traditions than a feeble attempt to keep them alive through wartime continuity.

The abolition of the annual parade would be a very minor indication of patriotism, for the planned parade will use no materials essential to war production. However, it will use the rubber which is revered so highly at this time, and its effect could not enhance Homecoming festivities enough to sanction its existence.

For the first time in the history of the school, this year's homecoming activities will be designed in commemoration of those unable to attend rather than those who will be here. It is our opinion that the abolition of the annual parade would be an added salute to Techsians on foreign soil.

With teas, receptions, open houses, banquets, dances, football games and bonfires featuring the day, we doubt that the absence of a parade would cause any disappointment among the exes.

We say, forget the parade, and anything else that cannot be done to the credit of a school young in tradition but patriotic to the core. Let's win this war and then stage a parade that will make the Mardi Gras of New Orleans look like a Halloween party. Anything worth doing is worth doing well.

Students Are Entitled To Use Of Dormitory Lounges

FORUM MEMBERS are seriously handicapped in their efforts to sponsor their monthly fireside meetings due to lack of a satisfactory place to hold the programs. Until two years ago, the forums were conducted in the lounge of Women's Dorm No. 1, where a large, interested group of girls attended the meetings.

After the new dormitory was opened last year, Forum was prohibited by the dormitory manager from holding the fireside programs in the lounge of either building. Should the privilege of meeting in the dorm be given to Forum, it was stated, the lounge would have to be opened to other organizations. The dormitory officials also stated that too much confusion was caused by the moving of chairs into the lounge on Sunday afternoon. Later in the year, however, the basement play-room was made available for Forum gatherings.

Of the six service organizations for women students at Texas Tech, Forum is the only one which asks for the privilege of using the lounges. One of the unique characteristics of Forum is its sponsoring of the fireside programs, whereas the other service clubs, which also work for the common betterment of women students, have other projects that do not require the use of dormitory lounges.

When Forum sponsored its first program of the year last week, only a small group of girls attended the brilliant interpretation of the opera "Carmen," given by Dr. J. P. Blitz. Had the program been held in the dormitory lounge, a much more fitting setting for this discussion would have been obtained. Had the program been held in the lounge, possibly 200 or more girls would have been present.

Women students who pay for room and board in college dormitories are entitled to the building's facilities. Use of the lounge by Forum one hour per month is not too much to ask.

Programs sponsored by the organization have always been upon the highest plane culturally; they are educational, interesting, and informal. Why not let them remain Fireside Forums, as the name implies, rather than "basement get-togethers?"

Quotable Quotes

"An engineer who can develop an idea for making an airplane go 20 miles an hour faster is worth as much as a hundred thousand men in uniform." Ray Lyman Wilbur, president of Stanford university, expresses what schoolmen of the country consider their highest duty—to train technical talent for a highly mechanized war.

Museum Exhibit Outlines Eskimo Life In Arctics

The life of the eskimo is by no means complicated. When they are hungry, they go out and shoot a seal or spear a fish. If a woman wants a new dress, she sends her husband out to kill a fur-bearing animal. At least, this is the ideal life depicted in the Eskimo exhibit in the West Texas Museum on Tech campus.

Different phases of their life are shown in this scene. The Eskimos are very fond of children as can be seen by the hand made doll, painstakingly made from seal skin and furs. A hat made from driftwood, that was worn before they came in contact with the white man, and one, made of furs with beaded trim that they wear now, represent the change that has taken place among some of the tribes.

A seal skin rug that would be the envy of any housekeeper, is also in the scene. The Eskimos eat primarily what they kill. Seal, walrus, fish, and birds, in a "high" condition (crudely speaking, "spoiled") are their favorite food. In the summer, when fresh meat is rather scarce, they eat some canned food they get from trading posts.

Contrary to popular belief, they do not live in igloos. Igloos are only temporary homes built when they are on hunting trips. In the winter they live in partly sub-berged dugouts made of stone. In the summer, their homes are made of skin stretched on poles.

These Arctic dwellers did not know what war was, until they came in contact with the white man. Their leaders are strong men in the tribes and medicine men. Nothing belongs to any one person. What belongs to one man, belongs to every other man, including wives.

Summer weather for these people is temperature between 50 and 30 degrees below zero. In the winter it is as cold as 60 below.

Tech ROTC Students Take Civilian Defense Courses

ROTC classes will have the advantage of a course taught by Civilian Defense units and State Guard in the treatment of bombs, their effects, range, and care of them to prevent fire and explosion.

Major Hays and Captain Weston took the course at the American Legion hall and are passing the information on to the students.

The wettest week in Washington history is also a week of the greatest historical significance to American colleges. Strong currents also are running through Congress and administrative offices.

The bill to draft 18 and 19-year-olds is about to be passed; the senators are wrestling with it right now.

That bill may determine whether you continue your education and, if you do, what shape it may take during the remainder of your years or months, in school.

By the time you read this you may be able to prompt us on some of the points, but here's the way the picture looks now:

Most teen-aged college students won't be called into military service until the end of this school year. This is particularly true of competent students, especially those taking scientific and technical courses.

After this year, when inroads on college teen-agers are likely to be relatively heavy, the question of who shall remain in school will be a stickler. The draft bill itself isn't likely to lay down strict stipulations on this matter—it will be left to administrative decision.

Broadly, administrative officials will base their decision on two major considerations: the course a student is taking and his scholastic record.

England's policies are a key to what may happen to students here. Although there has been about a 25 per cent drop in overall enrollment in Britain, scientific and technical departments of the colleges are crammed full of students. Obviously, the drop has occurred in liberal arts courses.

And obviously, these same courses will suffer in America. Officials in the Office of Education here believe that American arts colleges haven't done all they should to cope with that inevitable situation.

These officials feel that some educators are slow to recognize the inevitability of the drop-off in enrollment and, consequently are slow to prepare for it.

First, say the officials, these educators should expand their curricula, and quickly, to include additional science courses, courses in physical education and the like. In short, courses that tie in more closely with prosecution of the

Campus Camera

Parade of Opinion

"OUR CHOICE lies between education at the full, and training limited to the level of utility." In the words Dr. John Milton Potter, sixteenth president of Hobart and William Smith colleges, has summarized the problem which faces colleges and universities in general and his own institutions in particular.

He spoke to students, faculties, and trustees of the two colleges and to several hundred distinguished guests, at his recent formal inauguration.

"If we leave the choice to chance," he continued, "and fail to exert ourselves for the higher end, we shall be responsible if learning and the life of the mind and spirit become the hidden possession of the very few, and those perhaps condemned, perhaps even hunted that they may be destroyed. If we make the choice of utility only, we have no assurance that the technological means of livelihood will long remain uncorrupted by the decay of learning and science."

Dr. Potter also charged colleges and universities with the responsibility of mitigating the confusion of tongues and the clouding of understanding which have been bred by the increasing separation of one field of learning from another.

"They must," he added, "strive to place the means of education and the instrumentalities of learning at the disposal of the largest possible number of those of all sorts and conditions of men, who are capable of making use of them."

Conversion, in many cases, hasn't been thorough and it hasn't been prompt.

Second, arts educators should devise a plan right away for keeping their best students—scholastically speaking—in school. The need in this war for trained, educated men and women is as great as the need for front line fighters. It is highly important that the "right" students remain to study. Recommendations of the arts colleges will probably determine which are the "right" students, even though final decision will, theoretically, be up to the government.

In the eyes of our United Nations friends, the poll tax is a strange sight indeed in a country fighting to preserve freedom throughout the world.

Which probably has considerable to do with the fact that the House, after these many years, has finally passed an anti-poll tax bill—over the shameful protests of the poll tax "bloc," many members of which have their seats only by virtue of the fact that poll tax laws in their states prevent many persons from voting.

It's a good bill. But it faces a rough course in the senate, where red tape and technicalities threaten to choke it off, as well as a similar bill sponsored by Senator Pepper of Florida.

Hunter college made a gesture that, multiplied many times elsewhere, might turn the trick. Two thousand students and members of the faculty signed and sent to Congress a petition in favor of the anti-poll tax bill.

That's one language every congressman understands. And when the voices are numerous and loud he does something about it.

EDUCATION ELSEWHERE Nazi Propaganda Minister Goebbels said recently that no Nazi should feel it beneath his dignity to write fiction.

Herr Goebbels ought to know.

The Nazi general staff has ordered Rumania to give military training to every student up to 20 years of age.

More than 100,000 Russian students have begun studies in 1,200 schools of the Leningrad area. Many of the schools, damaged in German air raids, have been rebuilt by peasants and young Leningrad workers.

In The Editor's Mail

Signal Corp Seniors To Be Given Tests This Week

Senior members of the Signal Corps have a chance to prove their ability this week when they set up a radio net. The type radio is that used between observation planes and artillery units.

Two radios will be placed at separate points on the campus and communication is to be carried on between them as though they were in the actual setting, for this type radio generally used between land and air.

Bowles To Speak At Home Economics Alumnae Meet

Miss Johnne Bowles of the Tech home economics department will speak at a meeting of the Tech Home Economics Alumnae association Saturday afternoon at 3 o'clock. The meeting will be at the home of Miss Margaret W. Weeks, 2602 Twentieth street.

All home economics graduates are invited to attend.

They must preserve, or if necessary create, an environment for education, of human scale—not so large nor so amorphous that the opening mind is alienated or overwhelmed by mere mass and multitudinousness and by the penury of anonymity.

The Hobart-William Smith president emphasized also, that this is a generation of doubt, but explained that doubt is a universal experience, and that its disappearance could only mean that freedom and intellectual honesty are dead.

"The purpose of education," he said, "is not escape from doubt. It is to learn how to meet doubt head on, and again and again to grapple with it; to move through it to further conflicts with further doubts. A decade and more ago, many young men and women in Germany sought to escape their doubts and their confusions of spirit by dedicating their right to think, and by accepting the commands of other minds.... If we fail to encourage the growth in students of intellectual and moral discipline, what assurance can we have that exhaustion and despair may not one day lead to a similar abdication of the right to think as that which in Germany is destroying an entire generation, and has left education and learning, together with much else of civilized society, in ruins."

This is not intended as an imperativeness, or as uncooperative agitation; I realize that public opinion is a powerful ally and a terrible foe, but, Administrative Council, if you do not allow us to represent and express ourselves freely, you will kill the heritage of "The Most Democratic School in the World."

Yours truly,
Ben McReynolds

Editor, Toreador, Campus, Dear Editor,

The contents of this letter have been in my mind for some time. A petition presented to me to sign precipitated what you read. This is merely my opinion. If you can find space, and think good of it, publish it in "our" paper where all can see.

This epistle is, in truth, an appeal to the Administrative Council to give the students that which belongs to them—the right to represent themselves as they prefer to be represented. The policies of the Administrative Council pertinent to representations of the Student Body appear, to this perhaps shortsighted student, to be policies of only the wisdom and prudence of age, in that they seem essentially attempts to protect, enhance, or otherwise convey to the world the idea of a cultured, mentally clean Texas Tech. BUT, the Student Body with which I am so proud to be affiliated prefers to remain unsalaciously Greek, (the most cultured and mentally clean nation the world has ever known, incidentally) in employing traditions and customs variously for the sake of themselves, not as tools of propaganda for creating impressions as to what Tech is or isn't. What the Student Body of Tech is at heart is Texas Tech; let our friends as our enemies see it! I, for one, am PROUD of the freedom of thought and action that has prevailed here, and would hold such a banner high for the whole world to see!

This is not intended as an imperativeness, or as uncooperative agitation; I realize that public opinion is a powerful ally and a terrible foe, but, Administrative Council, if you do not allow us to represent and express ourselves freely, you will kill the heritage of "The Most Democratic School in the World."

Yours truly,
Ben McReynolds

Coed's Corner—

Girls To Do Tagging At Hallowe'en Dance

—By Kara Hunsucker

RESIDENTS of the women's dorms will have a chance to meet the boy they've been admiring from a distance when they give tonight in the boys' first girls' tag. For once, girls need dance only with the boys of their choice.

The dorm dances are the only events scheduled on the calendar, besides the DFD party, so the Hallowe'en affair should prove quite popular.

With the arrival of Hallowe'en comes the realization that it's "Indian Summer" time. According to Indian lore, this is the time of year when the harvest moon is full and bright and the feed stocks stand high in the fields, like the Redman's tepees. As a gray, smoky haze hangs over the horizon, one sees the Indian chieftains dancing in the moonlight.

Then later in the autumn time comes Hallowe'en, the eve of All Saints' Day on November 1. The Druids believed that on this night, Saman, the lord of death, called together certain wicked souls. In years since, the night has been featured by mirth and merry-making, with witches and hobgoblins providing the eerie effects for this famous and popular holiday.

Campus gleamings: Blonde and pretty Bettie Jo Wolfe and Stanley Mudge, the dark and handsome type, make an attractive couple. We like the graceful walk of Leah Nicholson. And orchids to Winifred Woods, new Vivie president, for her personality, ever friendly, ever smiling. A likeable pair of coeds in the old dorm are Kay McCarthy and Jackie Belew, roommates from Abilene. Also Joyce Rives and Betty Sue Knickerbocker, who come from Odessa and who likewise reside in Dorm No. 1.

Perhaps more than any other poet, Edna St. Vincent Millay has captured the spirit of warm-hearted America; her poetic pen condemned isolationism long before Pearl Harbor... and now she urges her country on to a more consecrated effort for victory with a mas-

Sock And Buskin Stage Vaudeville

Members of Sock and Buskin will present a vaudeville show Tuesday night in their regular meeting with skits between acts and candy sales complete. Lehmer Graham, as master of ceremonies, will introduce Bettie Rhea Caldwell and Buddy Sprague who will feature a dance followed by readings by Marguerite Nobles and Mary Ann Schmidt. The program will end with a vocal number by Viralyn Patrick. Buddy Sprague will write the script for the skits that are Lehmer Graham will present between acts. Midway in the program girls will sell candy and prizes will be offered those finding numbers in the candy boxes.

Gargoyle Club Gives Dance

Gargoyle club is giving a barbecue tonight from 9 to 12. The dance is to be held in the art labs in the Engineering building. Music will be furnished by a nickelodeon.

Ko Sharis Hold Annual Costume Ball

Hallowe'en Dance Marked By Juke Box Musicians

IN A FESTIVE Hallowe'en setting amid confetti and serpentine, Ko Sharis entertained with an annual costume ball Friday night at the Old Hayloft. Music was furnished by a nickelodeon.

Home Ec. Girls Have Series Of Entertainments

Residents of the Home Management house entertained as dinner guests Monday night the Rev. and Mrs. H. I. Robinson of the First Methodist Church and Dr. Charles C. Washburn of Nashville, Tenn. who has been conducting the Religious Music week which ended Friday at the First Methodist church.

Wednesday afternoon, a chocolate hour was given for members of the home economics faculty by the Home Management house. Thirty guests called from 4:30 to 5:30. The menu consisted of French chocolate, cream puffs, checkerboard sandwiches, glazed grapes and nuts.

Las Vivarachas Buy War Bonds

The Las Vivarachas presentation dance decorations will be quite simple this year because the club has purchased a \$100 defense bond with money ordinarily spent to set up elaborate surroundings.

DDF's Join In Red Cross Work; Wrapping Bandages

D. F. D's are doing their bit for defense every second and fourth Thursday of the month. On this night from 7:30 until 10:00 the club goes in body to the Red Cross center and wraps bandages. Last year the D.F.D.'s set the example for the girls' social clubs by knitting for the Red Cross.

Who's Who—

Continued From Page 1

ny last spring for having 56 activity points and a 2.47 average.

Vester Lee Smith is president of the Men's Inter-Club Council and Silver Key fraternity. He is the seniors Arts and Sciences representative to the Student Council and is a member of the Publications committee. Smith is a senior government major with a grade point average of 2.95 who comes from McLean. Smith was a member of the Saddle Tramps, Silver Key fraternity, and the Men's Inter-Club Council. He was a member of the golf team which went on the Southwest Conference tour last year.

John O. Ely leads the list of students with the highest grade point average of 2.93. He is a senior in Electrical Engineering and is a member of the American Institute of Electrical Engineers, Kappa Mu Epsilon and Tau Beta Pi. During the school year of 1942-43 he is to serve as president of Kappa Mu Epsilon and corresponding secretary of Tau Beta Pi. Ely, who comes from Monahans, was cited for his outstanding work in Military Science when he was a freshman and that same year won the Tau Beta Pi award for the outstanding Freshman. He is student assistant in the office of the Dean of Engineering and has been very active in working with the Engineering Shows.

Kara Hunsucker, Matador, is editor of the 1943 La Ventana, secretary of Phi Upsilon Phi, honorary fraternity for women in Journalism, and the International Relations club. In 1942, she was president of the International Relations club. She is a member of Forum and Las Chaparritas. In 1942, she was a member of the French club, Press club, Capa y Espada, Las Chaparritas, Alpha Chi and Theta Sigma Phi. In the Recognition services last spring she was recognized for her outstanding work as Associate Editor of La Ventana and for maintaining an A- average.

And We Resolve...

They shall not fall tonight. With the gradual deterioration of Hallowe'en pranks enhanced by war activities a noble institution is lost, that of capsizing the old outhouse. Long a sign of rural aristocracy, a person could judge a family by the crescent or star that hung in the door. Immortalized by Chic Silas and James Whitcomb Riley, they shall always live in the fond memories of the American people. So it is with real sorrow and deep regret that we pay tribute to the Vanishing American, and resolve that we shall someday even the score with the Japs and Heinies for speeding the death of a one-time favorite pastime.

Theta Sigs Hold Pledge Service For Seven Girls

A reception honoring all girls in the Tech band is to be given by the members of Tau Beta Sigma, Tuesday night from 7 to 9 at the home of Virginia Hogan, 1912 Seventeenth street.

Engineers Hold Annual Ball On Homecoming Eve

Annual Engineering Ball will be held Friday, November 6, in Hotel Lubbock. Jack York's orchestra will furnish music for the event.

Laundry-Ometer Is New Addition To Laboratory In Textile Department

A laundry-ometer, in case anyone may wish to know, is a pretentious looking machine resembling an iron lung in appearance with an attachment at one end that looks like a Chinese board for bowling. All of this proves that seeing is not believing as it is only a machine for testing the durability of fibers and fabrics in washing.

Adler Sends Campus Made Record To Small Daughter

Larry Adler's daughter is playing a record this week made on Tech campus by her father.

Robert H. Hargrove, Rotan, is a senior agronomy major with a grade point average of 1.78.

Robert H. Hargrove, Rotan, is a senior agronomy major with a grade point average of 1.78. He is also a member of Alpha Chi, vice president of the Aggie club, vice president of the Student Council, president of the Plant Industry club, secretary of the College Club and Saddle Tramps, and a member of the publications committee.

Rice-Tech Game Feature Of DFD Afternoon Party
